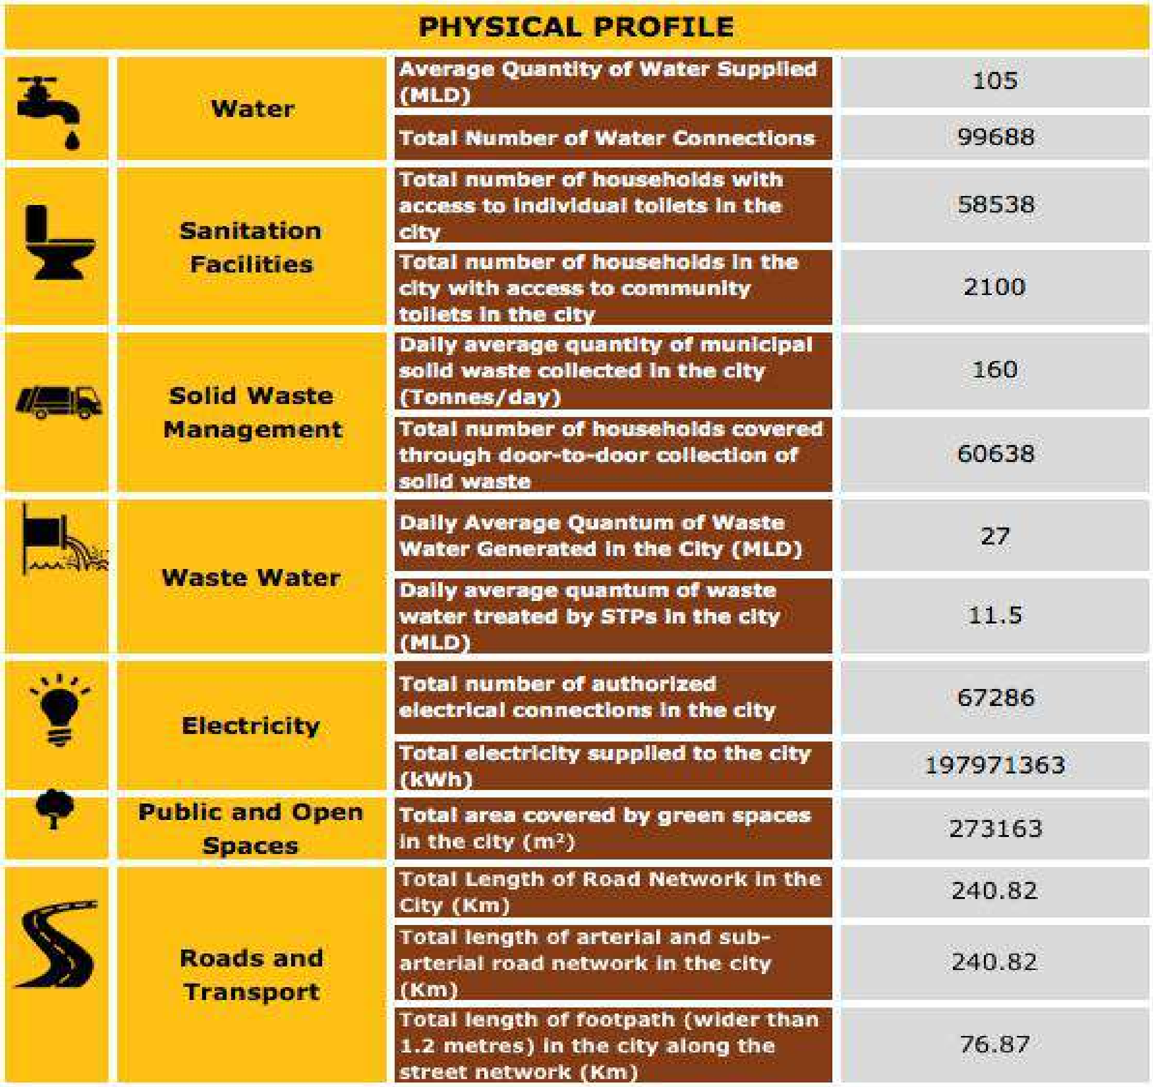
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

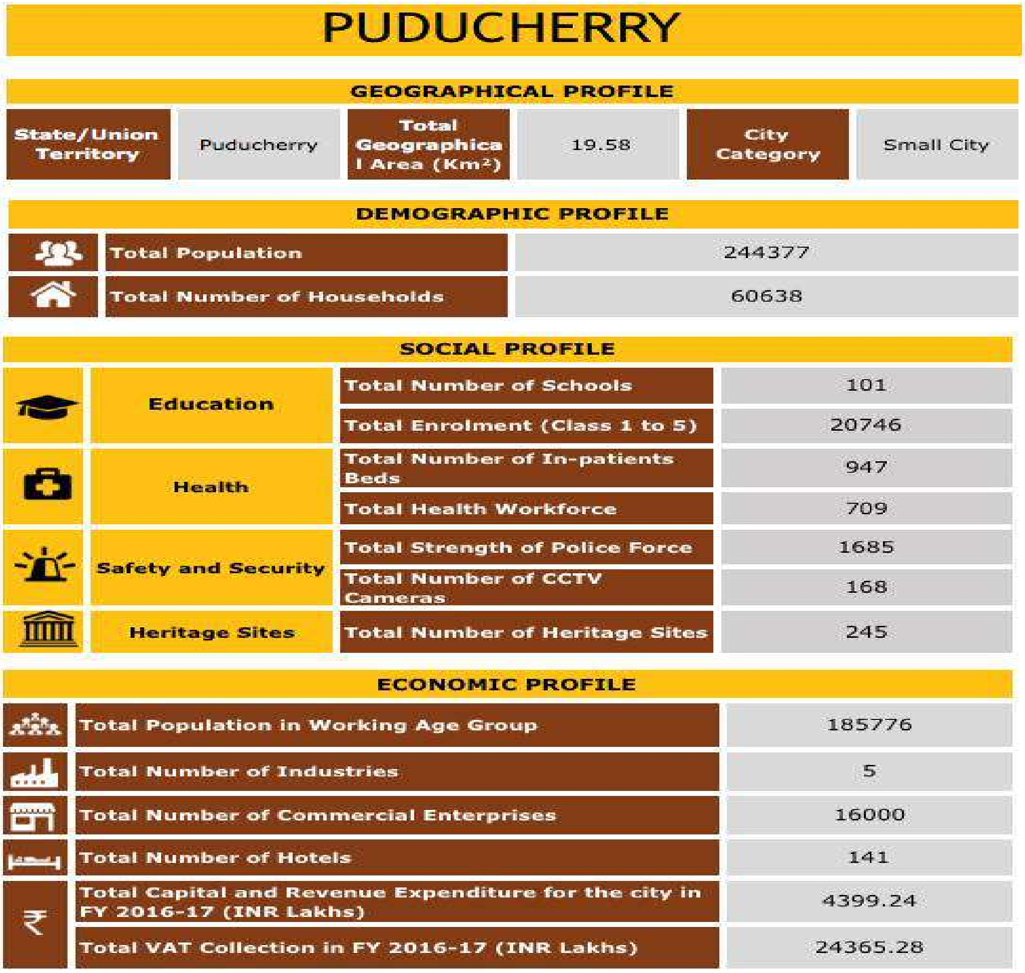
2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



PHYSICAL PROFILE

Water	**Average Quantity of Water Supplied (MLD)**	105
	Total Number of Water Connections	99688
Sanitation Facilities	**Total number of households with access to individual toilets in the city**	58538
	Total number of households in the city with access to community toilets in the city	2100
Solid Waste Management	**Daily average quantity of municipal solid waste collected in the city (Tonnes/day)**	160
	Total number of households covered through door-to-door collection of solid waste	60638
Waste Water	**Daily Average Quantum of Waste Water Generated in the City (MLD)**	27
	Daily average quantum of waste water treated by STPs in the city (MLD)	11.5
Electricity	**Total number of authorized electrical connections in the city**	67286
	Total electricity supplied to the city (kWh)	197971363
Public and Open Spaces	**Total area covered by green spaces in the city (m^2)**	273163
Roads and Transport	**Total Length of Road Network in the City (Km)**	240.82
	Total length of arterial and sub-arterial road network in the city (Km)	240.82
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	76.87



PUDUCHERRY

GEOGRAPHICAL PROFILE

State/Union Territory	Puducherry	Total Geographical Area (Km^2)	19.58	City Category	Small City

DEMOGRAPHIC PROFILE

Total Population	244377
Total Number of Households	60638

SOCIAL PROFILE

Education	Total Number of Schools	101
	Total Enrolment (Class 1 to 5)	20746
Health	Total Number of In-patients Beds	947
	Total Health Workforce	709
Safety and Security	Total Strength of Police Force	1685
	Total Number of CCTV Cameras	168
Heritage Sites	Total Number of Heritage Sites	245

ECONOMIC PROFILE

Total Population in Working Age Group	185776
Total Number of Industries	5
Total Number of Commercial Enterprises	16000
Total Number of Hotels	141
₹ Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	4399.24
Total VAT Collection in FY 2016-17 (INR Lakhs)	24365.28

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive

development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1. Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education

Pillars of Comprehensive Development	Category	Indicators
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places

Pillars of Comprehensive Development	Category	Indicators
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization

Pillars of Comprehensive Development	Category	Indicators
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through re-use
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution

Pillars of Comprehensive Development	Category	Indicators
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2. Scoring and Computing Category Indices of Liveability

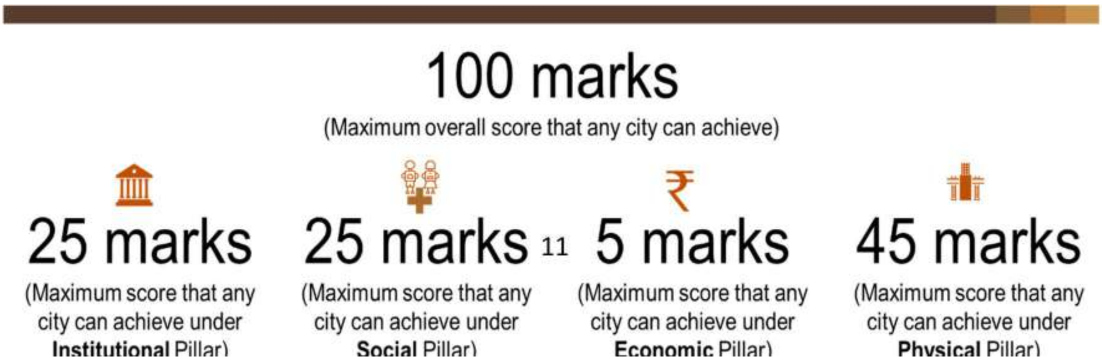
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3. Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks

(Maximum overall score that any city can achieve)

25 marks

(Maximum score that any city can achieve under Institutional Pillar)

25 marks

(Maximum score that any city can achieve under Social Pillar)

5 marks

(Maximum score that any city can achieve under Economic Pillar)

45 marks

(Maximum score that any city can achieve under Physical Pillar)

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4. Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicatorvalueforthecity - indicatorvaluefortheworstperformingcity}{benchmark - indicatorvaluefortheworstperformingcity}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1. Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2. Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Pondicherry Municipality
Urban Local Body	For Park and Recreation Related Questions	Pondicherry Municipality
Urban Local Body	For Water Supply and Drainage related questions	Public Works Department
Urban Local Body	For Heritage sites related data	Department of Art and Culture
Urban Local Body	For Ecological sites related data	Department of Forest and wildlife
Urban Local Body	For Housing related data	Puducherry Slum Clearance Board & Puducherry Planning Authority
Urban Local Body	For Building plan related data	Puducherry Planning Authority
Urban Local Body	For Roads related data	Pondicherry Municipality / Transport Department

Urban Local Body	For Solid waste management related data	Pondicherry Municipality/ Swatchitha Corporation
Urban Local Body	For IT services related data	Pondicherry Municipality IT wing
Urban Local Body	For Vendor committee related data	Pondicherry Municipality (Revenue Office)
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	Pondicherry Municipality
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Pollution Control Board, Department of Science and Technology and Public Works Department-Water supply
Development Authority	Building Infrastructure	Puducherry Planning Authority
	Construction planning	Puducherry Planning Authority
	Green Building	Puducherry Planning Authority
	Rain water harvesting	Puducherry Planning Authority
	Universal Design Principle	Puducherry Planning Authority
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Electricity Department
State Disaster management authority		Revenue Officer –Disaster Management, Puducherry Collectorate
State Education Department		Department of School Education
State Health Department	Health care professionals	Department of Health and Family Welfare
	Citizen Services	Department of Health and Family Welfare
	Disease Prevalence	Department of Health and Family Welfare
	Health Infrastructure	Department of Health and Family Welfare
State Renewable Energy Development Agency		Renewable Energy Agency, Puducherry

State Sales / Commercial Taxes Department		Department of Commercial Taxes
Town and Country Planning Department	Land Use	Puducherry Planning Authority
Traffic and Police Department		Police/Police Department
Transport Authorities	Buses	Transport Department
	Registered Vehicles	Transport Department
	Sub urban rail transport	NA
	Mono Rail Authority	NA
	Tramways	NA
	Marine Transport Authority	NA

4.3. List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 59 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	2
State Education Department	2
DISCOM/Electricity Department	1

Traffic and Police Department	7
Development Authority	0
Pollution Control Board	4
State Renewable Energy Department	1
Town and Country Planning	0
State Health Department	2
Transport Authority	1
Disaster Management	0
Urban Local Body	39
Total	59

* The count of documents is based on first round of submission.

4.4. Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1| Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5. Physical Audit

The following map presents the indicators audited at city level.

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**32.35**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	0.75
	1.1b death certificate	0.75
	1.1c trade license	0
	1.1d solid waste management	0
	1.1e water supply	0
	1.1f sewerage/drainage	0

	1.1g fogging	0
	1.1h property tax	0.666666666666667
	1.1i professional tax	0
	1.1j information	0.538461538461538
	1.1k Grievance redressal	1
	1.1l electricity	0.5
	1.1m Building plan	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**0**
Description	Services integrated through an integrated or a singular operations command centre	0
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**Non-Computable**
Description		
Sub Indicators	1.3a Building plan	NA
	1.3b Birth/Death Certificate	NA
	1.3c water supply	NA
	1.3d solid waste management	NA
	1.3e property tax	NA

	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	NA
	1.3i information	NA
	1.3j electricity	0

Indicator No. 1.4	**Average delay in grievance redressal**	**4**
Description		
Sub Indicators	1.4a water supply	0
	1.4b solid waste	0
	1.4c street lights	28
	1.4d sewerage	0
	1.4e professional tax	0
	1.4f parks and recreational spaces	0
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**82.8**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	663.09
Denominator	Total demand raised for the year	800.88

Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**107.11**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	407
Denominator	Total O&M cost for providing water supply services during the year	380
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**212.39**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	-20039.8
Denominator	Total expenditure (revenue and capital accounts) in the same year	-9435.45
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	NA
Denominator	Total number of wards	42
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**100**

Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites re-stored/preserved/brought under adaptive reuse	21
Denominator	Total number of historic buildings/sites identified	21
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	0
Denominator	Total number of ecologically important sites identified in the city	2
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**44.39**
Description	Average Occupancy rate of Hotels	44.392
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	0
Denominator	Total budget of the ULB (capital and revenue)	4399.24
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	

Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**Non-Computable**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	Data Unavailable
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**93.62**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	34772
Denominator	Total population in the age group of 6-14 years	37140
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**89.08**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	16205
Denominator	Total female population in the age group of 6-14 years	18191
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**24.58**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	20746

Denominator	Total number of teachers available for primary grades (public and private schools)	844
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**46.53**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	47
Denominator	Total number of schools	101
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**100.68**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	
Numerator	Percentage	100.68164535932
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**100.03**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	
Numerator	Percentage	22884447
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**38.75**

Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	947
Denominator	Total population of the city	244377
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**29.01**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	709
Denominator	Total population of the city	244377
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**15**
Description	Total response time for health-related distress calls received in the city	15
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**5.92**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	14474
Denominator	Total population of the city	244377
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.58**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases	1428

	in a year	
Denominator	Total population of the city	244377
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**69.76**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	168
Denominator	Total length of road network in the city	240.82
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**741.07**
Formula:	Numerator / Denominator	1811
Numerator	Total number of crimes recorded in a year	244377
Denominator	Total population of the city	
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**11.49**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	**208**
Denominator	Total crimes recorded in the same year	1811
Unit	Percentage	

Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**2.46**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	6
Denominator	Total population of the city	244377
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**13.87**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	2968.74
Denominator	Total VAT/GST collection during preceding year	213.9654
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**-28.13**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	**-45**
Denominator	Total Professional Tax collection during preceding year	160
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst	

	cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**13.75**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	51
Denominator	Number of construction permits during preceding year	3.71
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	55984
Denominator	Total labour force in the city	37140
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	0
Denominator	Total number of vendors in the city	2838
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**8.86**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	644
Denominator	Total number of slum and EWS households in the city	72.69
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	Data Unavailable
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**1.12**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	273163
Denominator	Total population of the city	244377
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**2.97**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	726193

Denominator	Total population of the city	244377
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**5.5**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	1076819.742
Denominator	Total area of the city (total area of all land uses)	19580000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.04**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	244377
Denominator	Area allocated for residential land use (in hectares)	5921045.289
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**22.21**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at house-hold level	13470
Denominator	Total number of households in the city	60638
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**50.93**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	34272
Denominator	Total number of electricity connections in the city	67286
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**1679**
Description	Total number of sustained electrical interruptions in a year	1679
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.61**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	114135
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will	

	be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	15046
Denominator	Total energy consumption from all sources	327971363
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	408.333333333333
Denominator	Total quantum of water and waste water handled during the period	3495
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	130000000
Denominator	Total number of street light installations	7900
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**0**
Formula:	*Numerator / Denominator*	

Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	13856.85
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.77**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	327971363
Denominator	Total population of the city	244377
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.64**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	48.63
Denominator	Total area of the city (sq.km)	19.58
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.21**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	52
Denominator	Total population of the city	244377
Unit	Number per 1000 persons	
Benchmark	>=0.6	

Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	20
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	240.82
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**50**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	1
Denominator	Total number of major transport interchanges in the city	2
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**	**To be computed**
Description	Mode share of non-motorised transport	15
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**Non-Computable**

Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	NA
Denominator	Total number of major interchanges in the city	2
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	11
Denominator	Total number of signalised intersections in the city	11
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**33.33**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	1
Denominator	Total available on-street parking spaces in the city	3
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**15.96**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	76.87
Denominator	Total length of road network in the city	481.64
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**111.11**

Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	10
Denominator	Total number of junctions/ intersections on major roads in the city	9
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**0.33**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	1
Denominator	Total number of public right-of-way areas in the city	304
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**0.17**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	106
Denominator	Total number of households in the city	60638
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	60638
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution	105

	system	
Denominator	Total population of the city	244377
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	73
Denominator	Total number of samples tested for water quality	73
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	0
Denominator	Quantum of water put into the distribution system (mld)	105
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**99.89**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	99575
Denominator	Total number of water connections in the city	99688
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**89.66**
Formula:	*Numerator / Denominator*	

Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	347
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	347
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**171.78**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	73419
Denominator	Total number of properties in the city	42739
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**152.72**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	65272
Denominator	Total number of properties in the city	42739
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**42.59**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	11.5

Denominator	Total waste water generated in the city per day	27
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**404.35**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	46.5
Denominator	Total waste water received at treatment plants per day	11.5
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**13.45**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	32.398
Denominator	Total length of road network in the city	240.82
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**98.5**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	75488
Denominator	Total number of households and establishments in the city	76638

Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	160
Denominator	Total quantum of MSW generated in the city	160
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through re-use**	**94.16**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	4519.69
Denominator	Average MSW generated in the city (tons per month)	4800
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**4.6**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	4.6
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**12.6**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	12.6
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean con-	

	centration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**41**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	41
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	0
Denominator	Total number of noise samples	2
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	0
Denominator	Total number of samples tested	2
Unit	Percentage	
Benchmark	100%

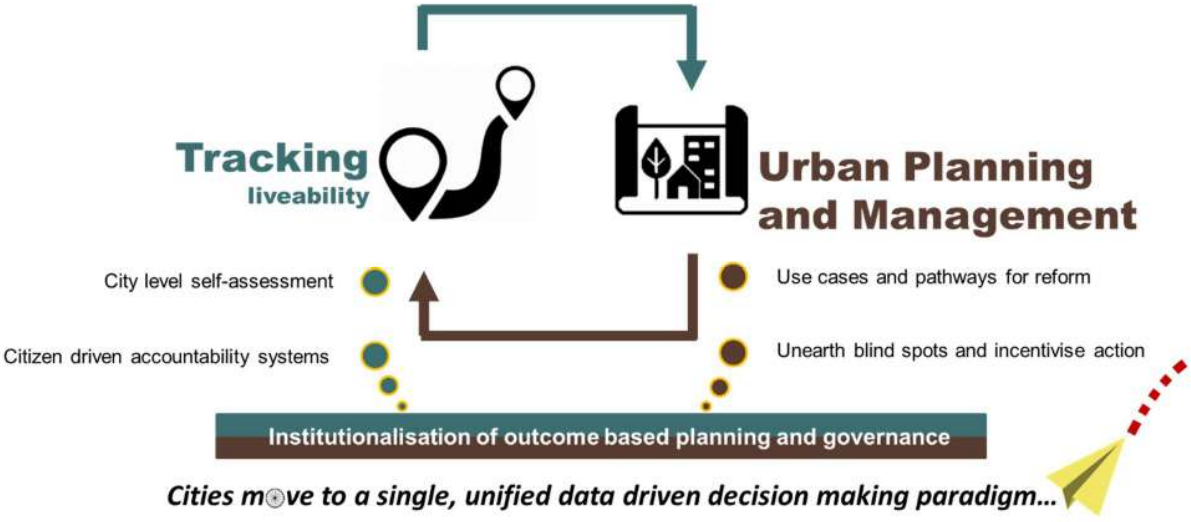
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

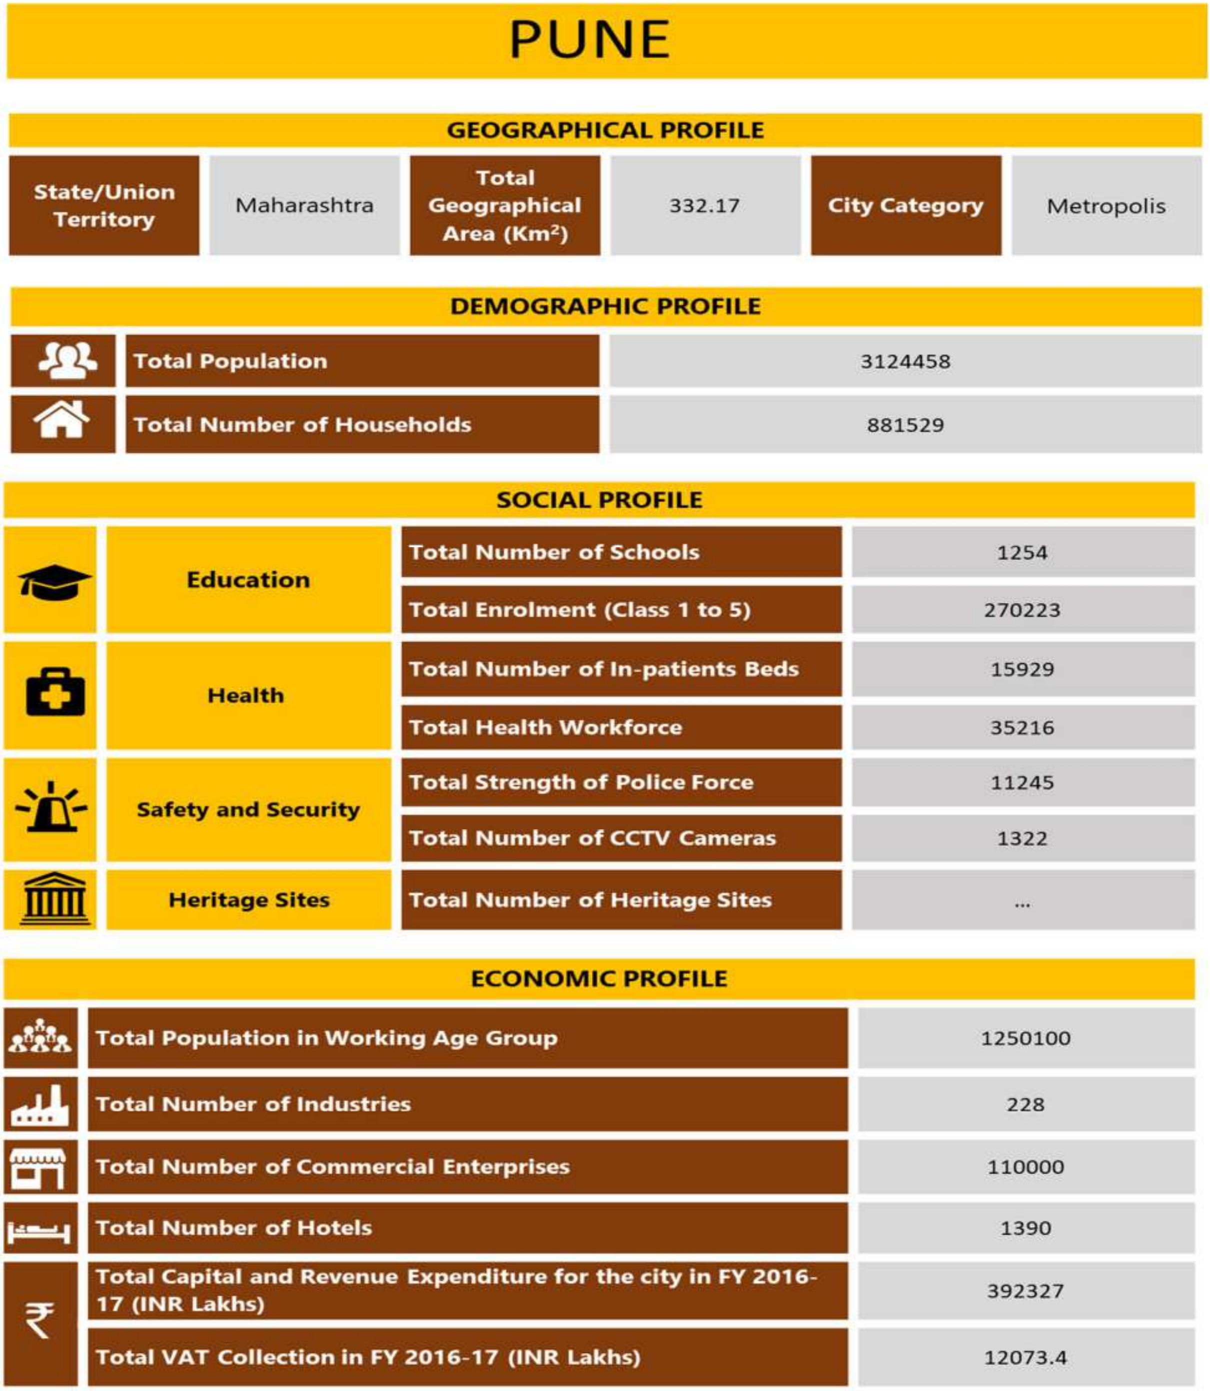


Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



PUNE

GEOGRAPHICAL PROFILE

State/Union Territory	Maharashtra	**Total Geographical Area (Km²)**	332.17	**City Category**	Metropolis

DEMOGRAPHIC PROFILE

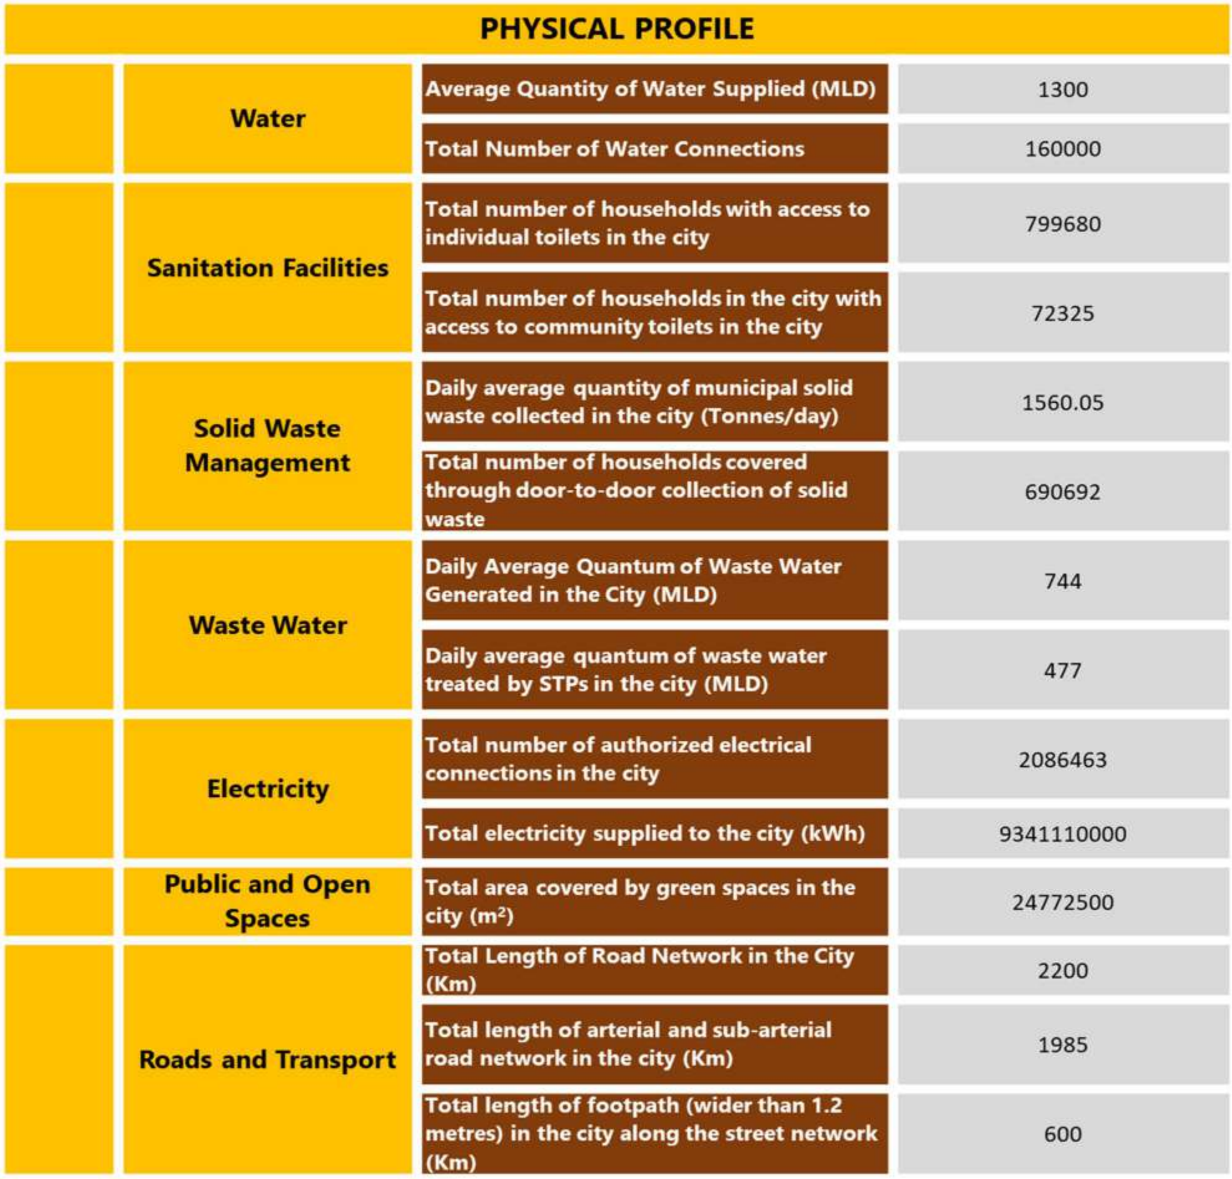
Total Population	3124458
Total Number of Households	881529

SOCIAL PROFILE

Education	**Total Number of Schools**	1254
	Total Enrolment (Class 1 to 5)	270223
Health	**Total Number of In-patients Beds**	15929
	Total Health Workforce	35216
Safety and Security	**Total Strength of Police Force**	11245
	Total Number of CCTV Cameras	1322
Heritage Sites	**Total Number of Heritage Sites**	...

ECONOMIC PROFILE

Total Population in Working Age Group	1250100
Total Number of Industries	228
Total Number of Commercial Enterprises	110000
Total Number of Hotels	1390
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	392327
Total VAT Collection in FY 2016-17 (INR Lakhs)	12073.4



PHYSICAL PROFILE			
	Water	Average Quantity of Water Supplied (MLD)	1300
		Total Number of Water Connections	160000
	Sanitation Facilities	Total number of households with access to individual toilets in the city	799680
		Total number of households in the city with access to community toilets in the city	72325
	Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	1560.05
		Total number of households covered through door-to-door collection of solid waste	690692
	Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	744
		Daily average quantum of waste water treated by STPs in the city (MLD)	477
	Electricity	Total number of authorized electrical connections in the city	2086463
		Total electricity supplied to the city (kWh)	9341110000
	Public and Open Spaces	Total area covered by green spaces in the city (m^2)	24772500
	Roads and Transport	Total Length of Road Network in the City (Km)	2200
		Total length of arterial and sub-arterial road network in the city (Km)	1985
		Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	600

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies

Pillars of Comprehensive Development	Category	Indicators
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita

Pillars of Comprehensive Development	Category	Indicators
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced	15.1 Concentration of SO2- air pollution

Pillars of Comprehensive Development	Category	Indicators
	Pollution	15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

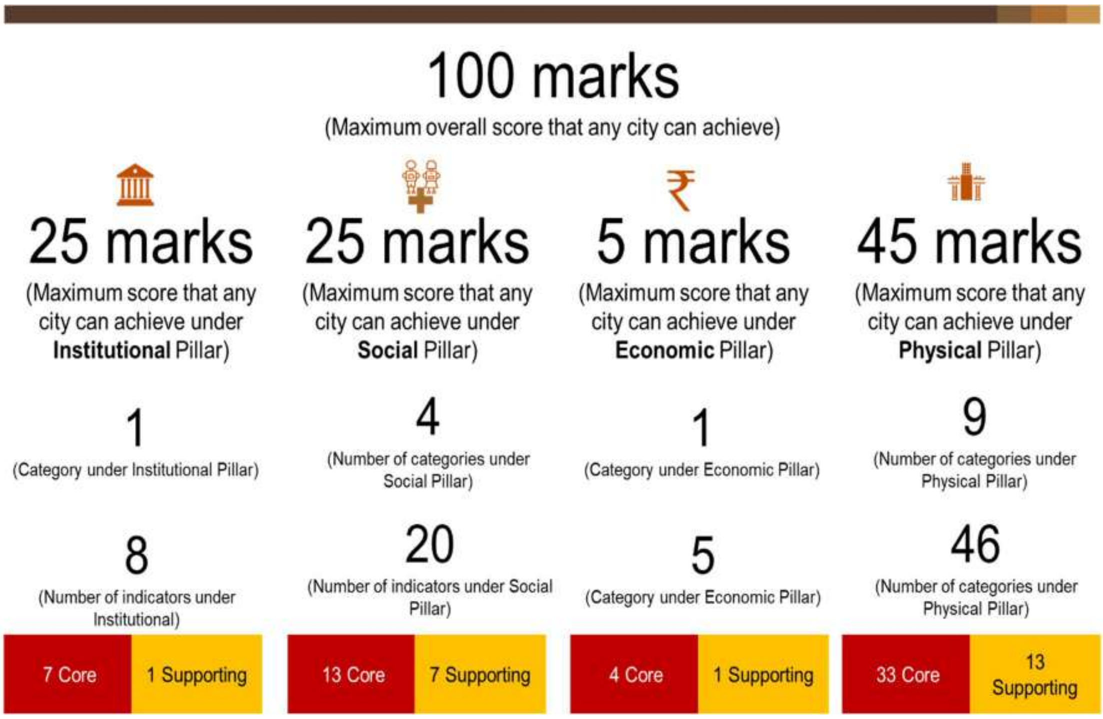
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks

(Maximum overall score that any city can achieve)

25 marks	25 marks	5 marks	45 marks
(Maximum score that any city can achieve under **Institutional** Pillar)	(Maximum score that any city can achieve under **Social** Pillar)	(Maximum score that any city can achieve under **Economic** Pillar)	(Maximum score that any city can achieve under **Physical** Pillar)
1	4	1	9
(Category under Institutional Pillar)	(Number of categories under Social Pillar)	(Category under Economic Pillar)	(Number of categories under Physical Pillar)
8	20	5	46
(Number of indicators under Institutional)	(Number of indicators under Social Pillar)	(Category under Economic Pillar)	(Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and

development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Mrs. Ulka Kalaskar CAFO PMC
Urban Local Body	For Park and Recreation Related Questions	Mr. Ashok Ghorpade Superintendent garden dept.
Urban Local Body	For Water Supply and Drainage related questions	V. G. Kulkarni Chief Engg. (Water supply and sewerage), PMC and Mr. Mule A.E.(sewerage) PMC
Urban Local Body	For Heritage sites related data	Mrs. Harshada shinde EE, PMC
Urban Local Body	For Ecological sites related data	Mr. Mangesh Dighe (Environment Officer) PMC
Urban Local Body	For Housing related data	Mr. Dinesh Rokade Dept. director, PMAY, PMC
Urban Local Body	For Building plan related data	Mr.Nillesh Saitwal Building and plan permission
Urban Local Body	For Roads related data	Mr. Anoop Gajjalwar J.E. (project) Road Department.PMC.
Urban Local Body	For Solid waste management related data	Mr. Suresh Jagatap JMC (Solid Waste Management), PMC
Urban Local Body	For IT services related data	Mr. Rahul Jagtap HOD, IT, PMC
Urban Local Body	For Vendor committee related data	Mr. Madhav Jagtap DMC (encroachment), PMC
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	Sarv Siksha Abhiyan department, Sport Department,Health Department, STP Department,electricity department ,ward office ,D.P cell, property tax department, bhavan department
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Mr.Mangesh Dighe HOD Enviornment Dept
Development	Building Infrastructure	Mr.Nillesh Saitwal

Designated data owners	Subcategories	Data owners at city level
Authority		Building and plan permission Department
	Construction planning	Building and plan permission Department
	Green Building	
	Rain water harvesting	Building and plan permission Department
	Universal Design Principle	Building and plan permission Department
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Maharashtra State Electricity Distribution Company, Rasta peth, pune.
State Disaster management authority		Disaster Management Cell Pune Municipal Corpporation.
State Education Department		Sarv Shiksha Abhiyan Department
State Health Department	Health care professionals	Health Department,Pune Municipal Corporaton.
	Citizen Services	Health Department,Pune Municipal Corporaton.
	Disease Prevalence	Health Department,Pune Municipal Corporaton.
	Health Infrastructure	Health Department,Pune Municipal Corporaton.
State Renewable Energy Development Agency		Maharashtra State Electricity Distribution Company, Rasta peth, pune and Maharashtra Energy Development Agency,Pune.
State Sales / Commercial Taxes Department		Sales Tax Office,Pune.
Town and Country Planning Department	Land Use	Development Plan cell,Pune Municipal Corporation.
Traffic and Police Department		Traffic head Office and Commissioner of Police Office,pune.
Transport Authorities	Buses	Pune Mhanagar ParivahanMahamandal Limited,, Pune.
	Registered Vehicles	RTO, Pune
	Sub urban rail transport	NA
	Mono Rail Authority	NA
	Tramways	NA
	Marine Transport Authority	NA

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 168 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	**2**
State Education Department	**7**
DISCOM/Electricity Department	**4**
Traffic and Police Department	**11**
Development Authority	**12**
Pollution Control Board	**5**
State Renewable Energy Department	**2**
Town and Country Planning	**10**
State Health Department	**9**
Transport Authority	**10**
Disaster Management	**2**
Urban Local Body	**94**
Total	**168***

* The count of documents is based on first round of submission.

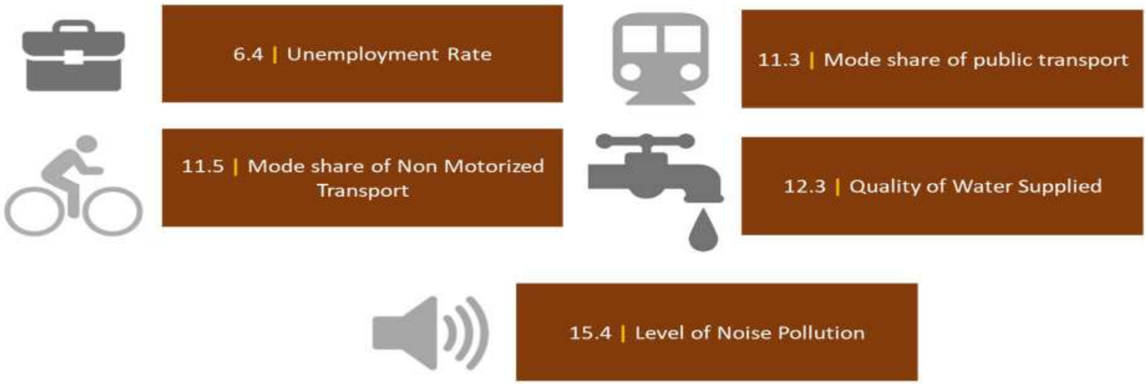
4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

- 1.2 | Percentage of services integrated through Command Centre
- 2.3 | Hotel occupancy
- 3.4 | Percentage of schools with access to digital education
- 5.1 | Number of streets, public places, junctions covered through surveillance systems
- 6.5 | Percentage of vendors registered and provided formal spaces
- 11.7 | Availability of Passenger Information System
- 11.11 | Percentage of traffic intersections with pedestrian crossing facilities
- 11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.



- 6.4 | Unemployment Rate
- 11.3 | Mode share of public transport
- 11.5 | Mode share of Non Motorized Transport
- 12.3 | Quality of Water Supplied
- 15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend

etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**80.77**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	0.75
	1.1b death certificate	0.75
	1.1c trade license	0
	1.1d solid waste management	1
	1.1e water supply	1
	1.1f sewerage/drainage	1
	1.1g fogging	1
	1.1h property tax	1
	1.1i professional tax	0
	1.1j information	1
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	1
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**40.48**
Description	Services integrated through an integrated or a singular operations command centre	8.5
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**1.35**
Description		

Sub Indicators	1.3a Building plan	0.006139439
	1.3b Birth/Death Certificate	0.000742555
	1.3c water supply	0.000301731
	1.3d solid waste management	4.25674E-05
	1.3e property tax	0.000247966
	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	0.000887194
	1.3i information	0.099874922
	1.3j electricity	2.80379E-05
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**NC**
Description		
Sub Indicators	1.4a water supply	0
	1.4b solid waste	0
	1.4c street lights	0
	1.4d sewerage	0
	1.4e professional tax	NA
	1.4f parks and recreational spaces	0
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**80.28**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	76508
Denominator	Total demand raised for the year	95298
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water**	**32.39**

	supply services	
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	7161
Denominator	Total O&M cost for providing water supply services during the year	22107
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**36.16**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	355132
Denominator	Total expenditure (revenue and capital accounts) in the same year	981983
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	15
Denominator	Total number of wards	15
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**1.63**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	4
Denominator	Total number of historic buildings/sites identified	245
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	0

Denominator	Total number of ecologically important sites identified in the city	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**72.14**
Description	Average Occupancy rate of Hotels	72.14285714
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0.87**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	3396.52
Denominator	Total budget of the ULB (capital and revenue)	392327
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**650**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	650
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**89.06**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	425595
Denominator	Total population in the age group of 6-14 years	477870
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**88.83**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	201564

Denominator	Total female population in the age group of 6-14 years	226915
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**13.55**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	270223
Denominator	Total number of teachers available for primary grades (public and private schools)	19948
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**39**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	489
Denominator	Total number of schools	1254
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**103.58**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	103.5799782
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**98.8**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	2641745645
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**50.98**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	15929
Denominator	Total population of the city	3124458
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**112.71**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	35216
Denominator	Total population of the city	3124458
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**20**
Description	Total response time for health-related distress calls received in the city	20
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.03**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	896
Denominator	Total population of the city	3124458
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.08**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	2642
Denominator	Total population of the city	3124458
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**60.09**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	1322
Denominator	Total length of road network in the city	2200
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**614.86**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	19211
Denominator	Total population of the city	3124458
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**11.04**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	2121
Denominator	Total crimes recorded in the same year	19211
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**48.23**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	1507
Denominator	Total population of the city	3124458
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**9.61**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	1058.19
Denominator	Total VAT/GST collection during preceding year	110.1521
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	NA
Denominator	Total Professional Tax collection during preceding year	NA
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**-29.41**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	-1226
Denominator	Number of construction permits during preceding year	41.69
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	49441
Denominator	Total labour force in the city	477870
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	

Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**79.14**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	22341
Denominator	Total number of vendors in the city	28229
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**12.68**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	28148
Denominator	Total number of slum and EWS households in the city	2220.6
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**22.64**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	1013054828500000
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**7.93**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	24772500
Denominator	Total population of the city	3124458
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**1.51**
Formula:	*Numerator / Denominator*	

Numerator	Total area of public and recreational places (sq.m.)	4709832.53
Denominator	Total population of the city	3124458
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	NA
Denominator	Total area of the city (total area of all land uses)	332170000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.03**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	3124458
Denominator	Area allocated for residential land use (in hectares)	90005300
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**204.17**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	1799792
Denominator	Total number of households in the city	881529
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0.11**

Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	2225
Denominator	Total number of electricity connections in the city	2086463
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**10710**
Description	Total number of sustained electrical interruptions in a year	10710
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.66**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	782609
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	8217915
Denominator	Total energy consumption from all sources	9341110000
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.27**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	14362573.42
Denominator	Total quantum of water and waste water handled during the period	53310
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.32**

Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	48134517
Denominator	Total number of street light installations	125000
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**0.1**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	3252776
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	14752246
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	9341110000
Denominator	Total population of the city	3124458
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.04**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	22.7
Denominator	Total area of the city (sq.km)	332.17
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.62**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	1945
Denominator	Total population of the city	3124458
Unit	Number per 1000 persons	
Benchmark	>=0.6	

Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	12.2
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**4.14**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	91
Denominator	Total length of road network in the city	2200
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**50**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	5
Denominator	Total number of major transport interchanges in the city	10
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	42.9
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**5.9**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	59
Denominator	Total number of major interchanges in the city	10
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are	0

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

	synchronised	
Denominator	Total number of signalised intersections in the city	218
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**1.64**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	568
Denominator	Total available on-street parking spaces in the city	34678
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**13.64**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	600
Denominator	Total length of road network in the city	4400
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**51.93**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	242
Denominator	Total number of junctions/ intersections on major roads in the city	466
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**8.55**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	160
Denominator	Total number of public right-of-way areas in the city	1872
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**89.16**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	785968
Denominator	Total number of households in the city	881529
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**416.07**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	1300
Denominator	Total population of the city	3124458
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	200
Denominator	Total number of samples tested for water quality	200
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**30.77**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	400
Denominator	Quantum of water put into the distribution system (mld)	1300
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**24.67**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	39466
Denominator	Total number of water connections in the city	160000
Unit	Percentage	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**27.85**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	1584
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	5687
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**98.81**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	970977
Denominator	Total number of properties in the city	982663
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**80.56**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	791672
Denominator	Total number of properties in the city	982663
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**79**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	587.76
Denominator	Total waste water generated in the city per day	744
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**124.34**
Formula:	*Numerator / Denominator*	

Numerator	Quantum of waste water recycled or reused per day	705
Denominator	Total waste water received at treatment plants per day	567
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**9.73**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	214
Denominator	Total length of road network in the city	2200
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**79.56**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	788853
Denominator	Total number of households and establishments in the city	991529
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**94.29**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	1560.05
Denominator	Total quantum of MSW generated in the city	1654.54
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**70.71**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	33092
Denominator	Average MSW generated in the city (tons per month)	46801.5
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**36.73**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	36.73
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**22.02**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	22.02
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**101.52**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	101.52
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	48
Denominator	Total number of noise samples	3888
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**61.14**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	1273
Denominator	Total number of samples tested	2082
Unit	Percentage	
Benchmark	100%

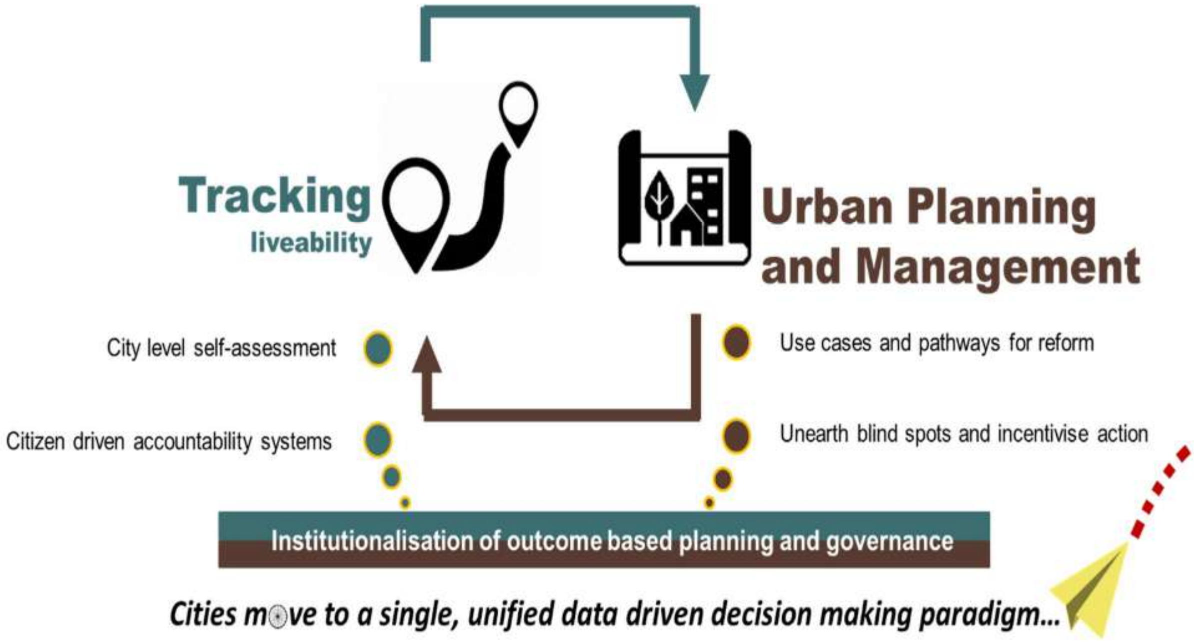
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

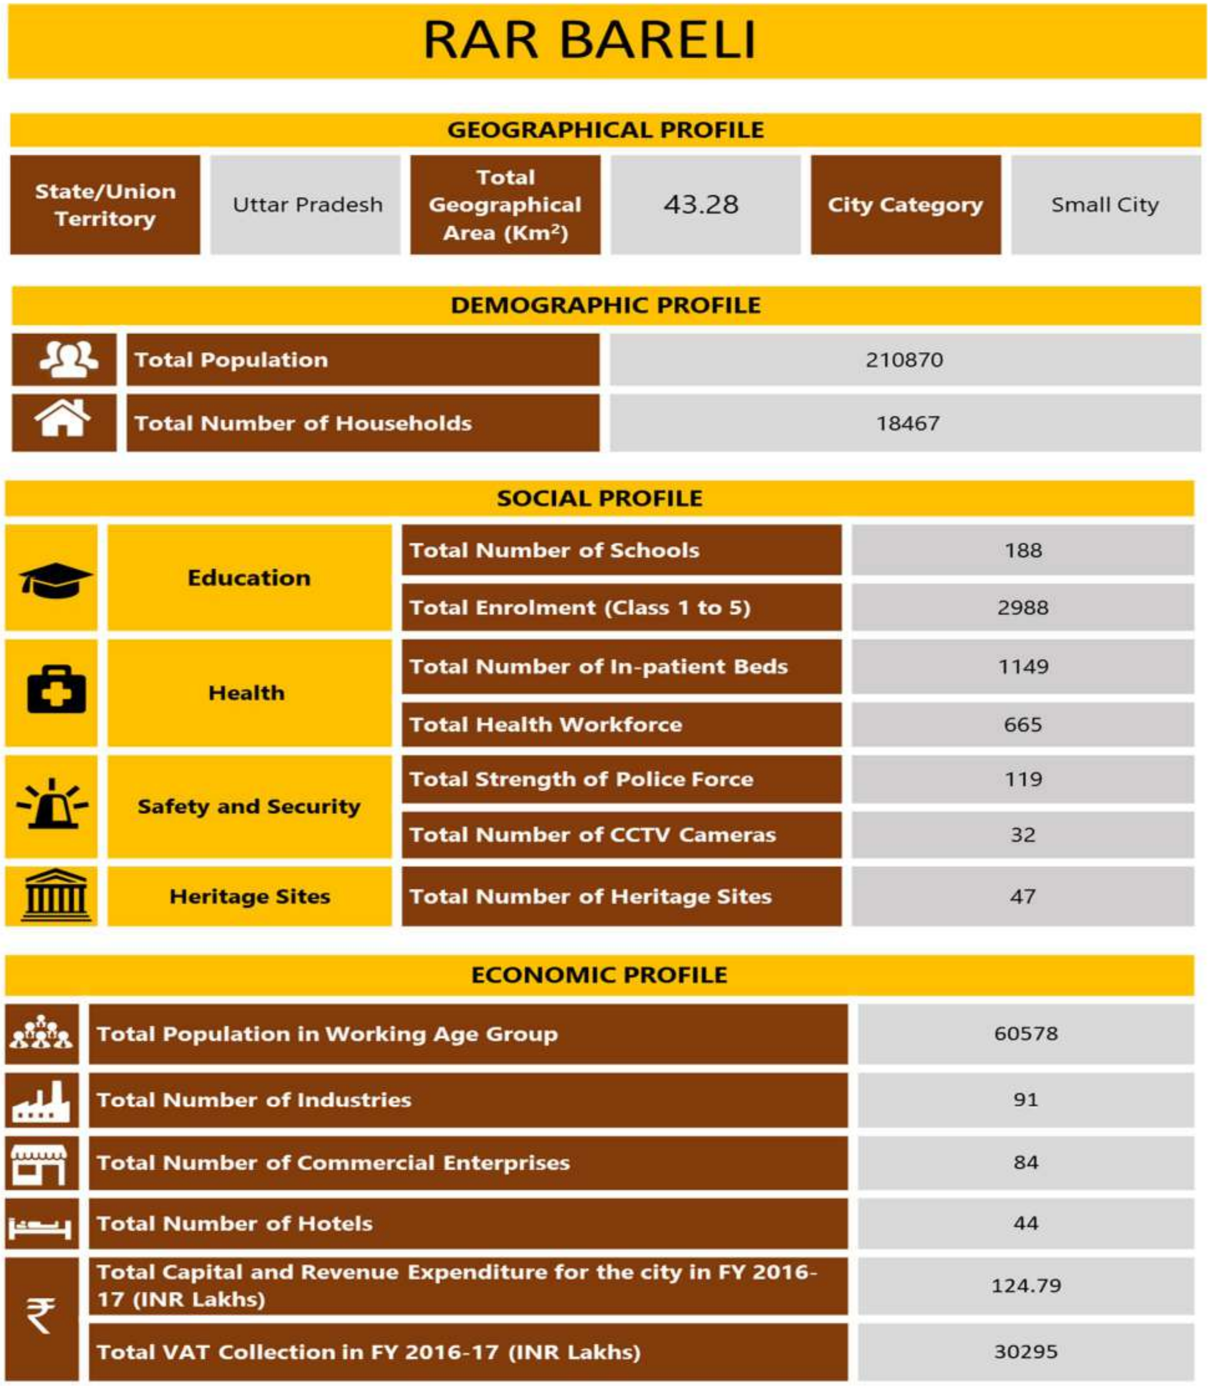


Tracking liveability
Urban Planning and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



RAR BARELI

GEOGRAPHICAL PROFILE

State/Union Territory	Uttar Pradesh	**Total Geographical Area (Km²)**	43.28	**City Category**	Small City

DEMOGRAPHIC PROFILE

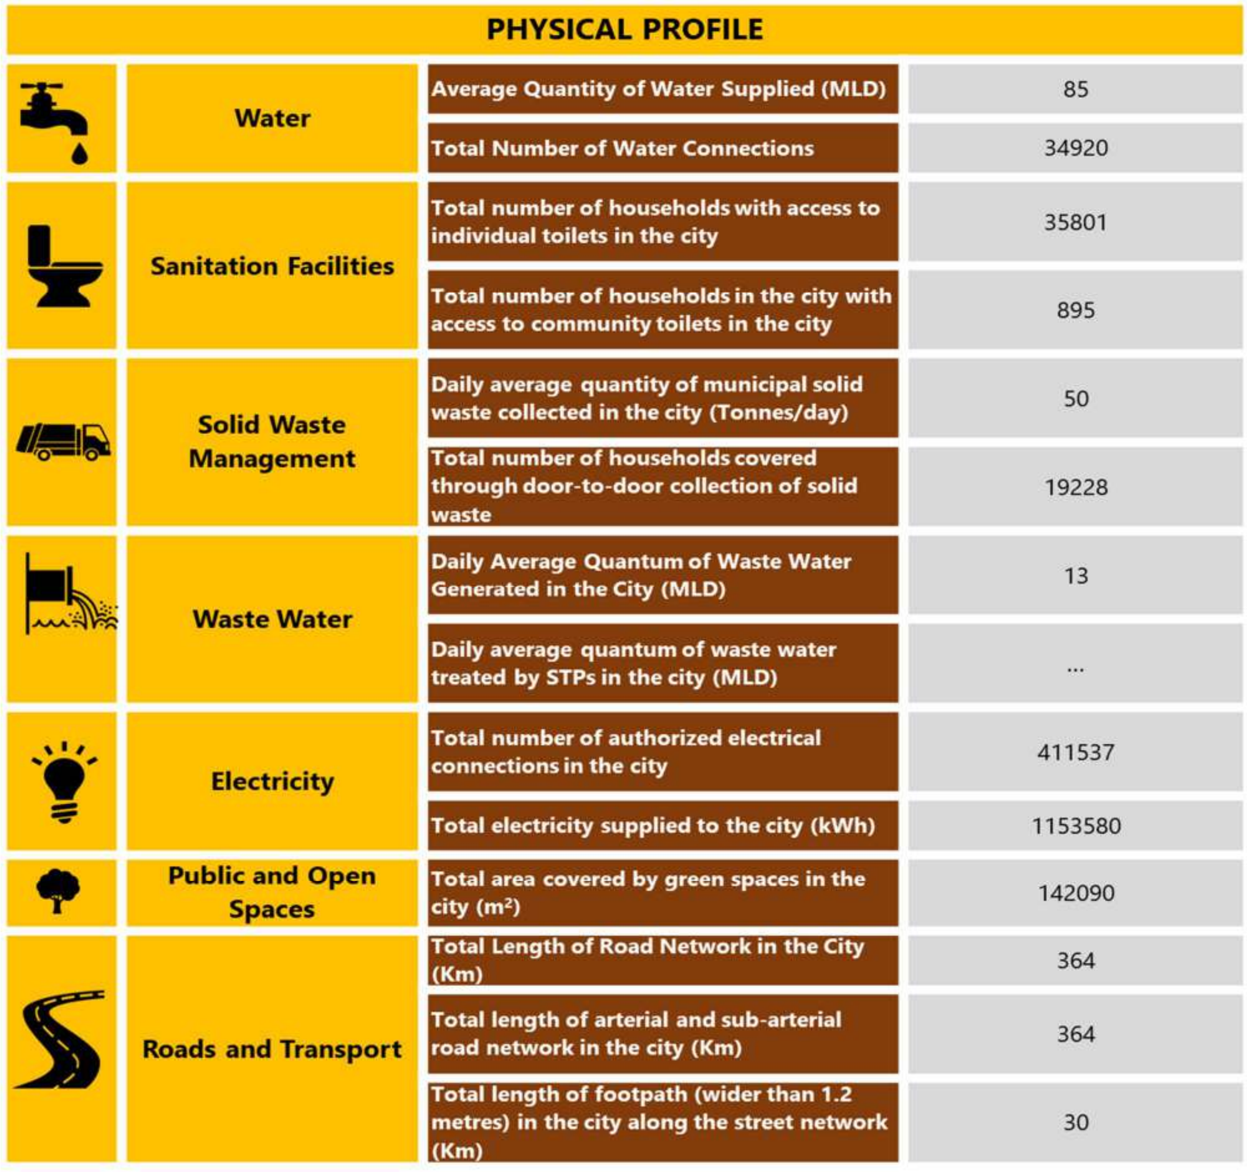
Total Population	210870
Total Number of Households	18467

SOCIAL PROFILE

Education	**Total Number of Schools**	188
	Total Enrolment (Class 1 to 5)	2988
Health	**Total Number of In-patient Beds**	1149
	Total Health Workforce	665
Safety and Security	**Total Strength of Police Force**	119
	Total Number of CCTV Cameras	32
Heritage Sites	**Total Number of Heritage Sites**	47

ECONOMIC PROFILE

Total Population in Working Age Group	60578
Total Number of Industries	91
Total Number of Commercial Enterprises	84
Total Number of Hotels	44
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	124.79
Total VAT Collection in FY 2016-17 (INR Lakhs)	30295



PHYSICAL PROFILE

Water	Average Quantity of Water Supplied (MLD)	85
	Total Number of Water Connections	34920
Sanitation Facilities	Total number of households with access to individual toilets in the city	35801
	Total number of households in the city with access to community toilets in the city	895
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	50
	Total number of households covered through door-to-door collection of solid waste	19228
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	13
	Daily average quantum of waste water treated by STPs in the city (MLD)	...
Electricity	Total number of authorized electrical connections in the city	411537
	Total electricity supplied to the city (kWh)	1153580
Public and Open Spaces	Total area covered by green spaces in the city (m²)	142090
Roads and Transport	Total Length of Road Network in the City (Km)	364
	Total length of arterial and sub-arterial road network in the city (Km)	364
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	30

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies

Pillars of Comprehensive Development	Category	Indicators
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita

Pillars of Comprehensive Development	Category	Indicators
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced	15.1 Concentration of SO2- air pollution

Pillars of Comprehensive Development	Category	Indicators
	Pollution	15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

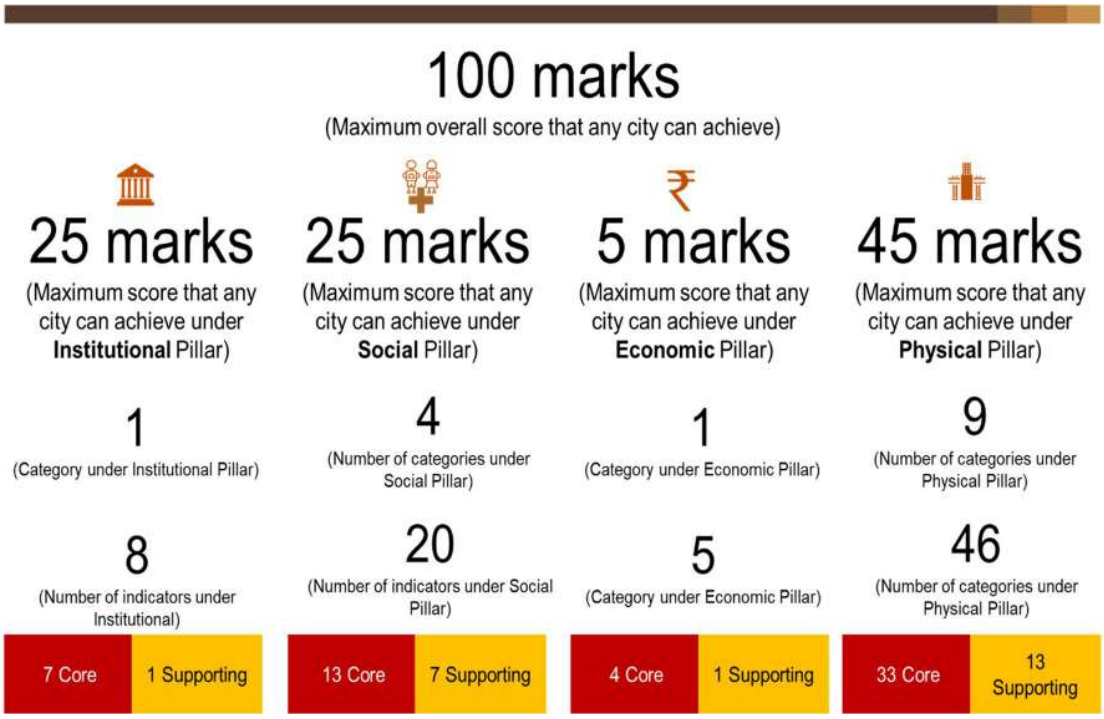
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks
(Maximum overall score that any city can achieve)
25 marks
(Maximum score that any city can achieve under Institutional Pillar)
25 marks
(Maximum score that any city can achieve under Social Pillar)
5 marks
(Maximum score that any city can achieve under Economic Pillar)
45 marks
(Maximum score that any city can achieve under Physical Pillar)
1
(Category under Institutional Pillar)
4
(Number of categories under Social Pillar)
1
(Category under Economic Pillar)
9
(Number of categories under Physical Pillar)
8
(Number of indicators under Institutional)
20
(Number of indicators under Social Pillar)
5
(Category under Economic Pillar)
46
(Number of categories under Physical Pillar)
7 Core
1 Supporting
13 Core
7 Supporting
4 Core
1 Supporting
33 Core
13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning

department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Account department, Raebareli Nagar Nigam
Urban Local Body	For Park and Recreation Related Questions	Nirman vibhag, Raebareli Nagar Nigam
Urban Local Body	For Water Supply and Drainage related questions	Jal kal vibhag, Raebareli Nagar Nigam
Urban Local Body	For Heritage sites related data	----
Urban Local Body	For Ecological sites related data	-----
Urban Local Body	For Housing related data	Jan gadana
Urban Local Body	For Building plan related data	Raebareli Development Authority
Urban Local Body	For Roads related data	Nirman vibhag, Raebareli Nagar Nigam
Urban Local Body	For Solid waste management related data	Health department, Raebareli Nagar Nigam
Urban Local Body	For IT services related data	Health department, tax Department
Urban Local Body	For Vendor committee related data	Revenue Department
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	Account, light, jal kal public work construction
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Regional office of state Pollution control Board
Development Authority	Building Infrastructure	Raebareli Development authority
	Construction planning	Raebareli Development authority

Designated data owners	Subcategories	Data owners at city level
	Green Building	Raebareli Development authority
	Rain water harvesting	Raebareli Development authority
	Universal Design Principle	Raebareli Development authority
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Office of the Executive Engineer vidut vitreren khend - first
State Disaster management authority		Office of additional district mejistret finance and Revenue
State Education Department		Office of basic shiksha adhikari
State Health Department	Health care professionals	Office of chief medical officer
	Citizen Services	Office of chief medical officer
	Disease Prevalence	Office of chief medical officer
	Health Infrastructure	Office of chief medical officer
State Renewable Energy Development Agency	Renewable Energy	District Renewable Energy Development Agency
State Sales / Commercial Taxes Department		District sales/ Commercial Taxes Department
Town and Country Planning Department	Land Use	Development Authority
Traffic and Police Department		
Transport Authorities	Buses	Office of Road ways
	Registered Vehicles	Office of Road Transport officer
	Sub urban rail transport	--
	Mono Rail Authority	--
	Tramways	--
	Marine Transport Authority	--

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 12 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

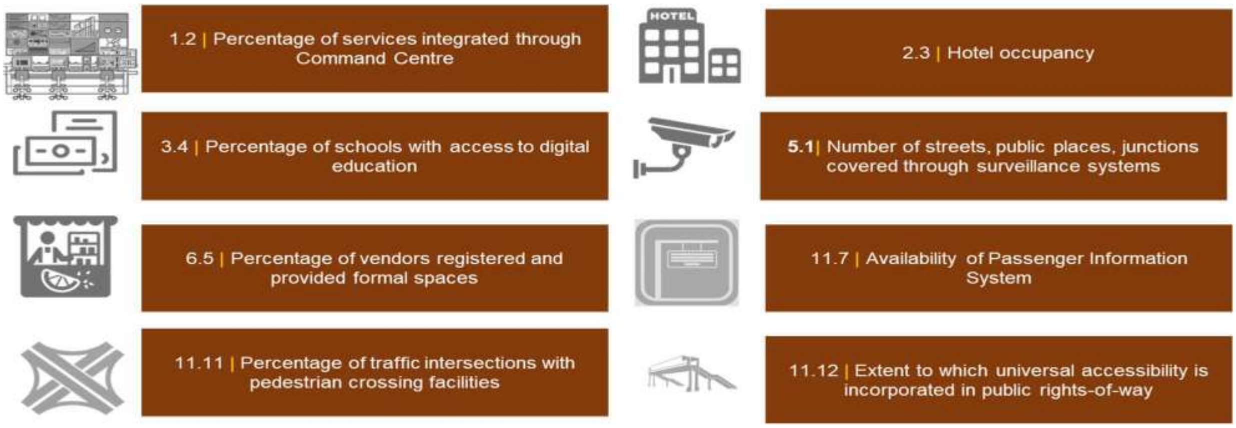
Data Owners	Number of Documents
Sales and Commercial Taxes	**0**
State Education Department	**0**
DISCOM/Electricity Department	**0**
Traffic and Police Department	**1**
Development Authority	**1**
Pollution Control Board	**0**
State Renewable Energy Department	**0**
Town and Country Planning	**1**
State Health Department	**0**
Transport Authority	**0**
Disaster Management	**0**
Urban Local Body	**9**
Total	**12***

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:



1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

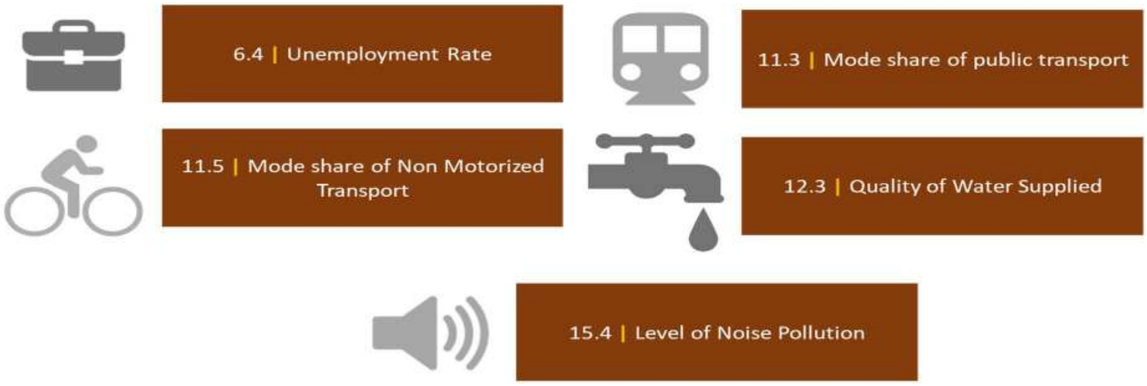
6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.



6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

7. LA - Street Vendors
8. LA - Universal Design Principles

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend

etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**82.74**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	1
	1.1c trade license	1
	1.1d solid waste management	1
	1.1e water supply	1
	1.1f sewerage/drainage	1
	1.1g fogging	1
	1.1h property tax	1
	1.1i professional tax	0
	1.1j information	0.923076923
	1.1k Grievance redressal	1
	1.1l electricity	0.5
	1.1m Building plan	0.333333333
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**0**
Description	Services integrated through an integrated or a singular operations command centre	0
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**0.49**
Description		

Sub Indicators	1.3a Building plan	0
	1.3b Birth/Death Certificate	NA
	1.3c water supply	NA
	1.3d solid waste management	NA
	1.3e property tax	NA
	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	NA
	1.3i information	NA
	1.3j electricity	0.009719661
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**602.67**
Description		
Sub Indicators	1.4a water supply	3603
	1.4b solid waste	0
	1.4c street lights	0
	1.4d sewerage	0
	1.4e professional tax	NA
	1.4f parks and recreational spaces	0
	1.4g building plan	13
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**77.03**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	215.15763
Denominator	Total demand raised for the year	279.31818
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water**	**Non-Computable**

	supply services	
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	NA
Denominator	Total O&M cost for providing water supply services during the year	194.953
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**98.8**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	11782.05481
Denominator	Total expenditure (revenue and capital accounts) in the same year	11925.55481
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	34
Denominator	Total number of wards	34
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	NA
Denominator	Total number of historic buildings/sites identified	NA
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects	NA

	for restoration	
Denominator	Total number of ecologically important sites identified in the city	NA
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**70**
Description	Average Occupancy rate of Hotels	70
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	0
Denominator	Total budget of the ULB (capital and revenue)	124.7977824
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**2**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	2
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**11.84**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	4333
Denominator	Total population in the age group of 6-14 years	36589
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**12.92**
Formula:	*Numerator / Denominator*	

Numerator	Total female enrolment in primary and secondary schools (public and private	2202
Denominator	Total female population in the age group of 6-14 years	17048
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**3.51**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	2988
Denominator	Total number of teachers available for primary grades (public and private schools)	852
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	0
Denominator	Total number of schools	188
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**0.23**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	0.232220844
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**2.89**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	142560
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**60.06**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	1149
Denominator	Total population of the city	191316
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**34.76**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	665
Denominator	Total population of the city	191316
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**20**
Description	Total response time for health-related distress calls received in the city	20
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**7.46**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	14264
Denominator	Total population of the city	191316
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	18
Denominator	Total population of the city	191316
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**8.79**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	32
Denominator	Total length of road network in the city	364
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**714.52**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	1367
Denominator	Total population of the city	191316
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**10.9**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	149
Denominator	Total crimes recorded in the same year	1367
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**26.66**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	51
Denominator	Total population of the city	191316
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**4.76**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	1377
Denominator	Total VAT/GST collection during preceding year	289.18
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	NA
Denominator	Total Professional Tax collection during preceding year	NA
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**-3.74**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	-4
Denominator	Number of construction permits during preceding year	1.07
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	4361
Denominator	Total labour force in the city	36589
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	

Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	0
Denominator	Total number of vendors in the city	914.725
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	NA
Denominator	Total number of slum and EWS households in the city	199.14
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**0.01**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	77343756
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**0.74**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	142090
Denominator	Total population of the city	191316
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**3.93**
Formula:	*Numerator / Denominator*	

Numerator	Total area of public and recreational places (sq.m.)	751455
Denominator	Total population of the city	191316
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**54.54**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	23603800
Denominator	Total area of the city (total area of all land uses)	43280000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	191316
Denominator	Area allocated for residential land use (in hectares)	18092500
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**103.29**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	39732
Denominator	Total number of households in the city	38467
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered**	**0**

	through smart meters	
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	411537
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**535**
Description	Total number of sustained electrical interruptions in a year	535
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.78**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	20580
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	12.5
Denominator	Total energy consumption from all sources	1153580
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	950
Denominator	Total quantum of water and waste water handled during the period	NA
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	15660
Denominator	Total number of street light installations	7316
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	0
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	1153580
Denominator	Total population of the city	191316
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	NA
Denominator	Total area of the city (sq.km)	43.28
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	NA
Denominator	Total population of the city	191316

Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	NA
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**1.37**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	5
Denominator	Total length of road network in the city	364
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	NA
Denominator	Total number of major transport interchanges in the city	1
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	NA
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**1**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	1
Denominator	Total number of major interchanges in the city	1
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**Non-**

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Formula:	*Numerator / Denominator*	**Computable**
Numerator	Total number of signalised intersections that are synchronised	0
Denominator	Total number of signalised intersections in the city	0
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	2
Denominator	Total available on-street parking spaces in the city	0
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**4.12**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	30
Denominator	Total length of road network in the city	728
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**80**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	4
Denominator	Total number of junctions/ intersections on major roads in the city	5
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	0
Denominator	Total number of public right-of-way areas in the city	111
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**90.78**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	34920
Denominator	Total number of households in the city	38467
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**444.29**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	85
Denominator	Total population of the city	191316
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	120
Denominator	Total number of samples tested for water quality	1800
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**9.65**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	8.2
Denominator	Quantum of water put into the distribution system (mld)	85
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	0
Denominator	Total number of water connections in the city	34920
Unit	Percentage	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	4
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	0
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**96.47**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	37286
Denominator	Total number of properties in the city	38651
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**184.8**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	71428
Denominator	Total number of properties in the city	38651
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	NA
Denominator	Total waste water generated in the city per day	13
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	13

Denominator	Total waste water received at treatment plants per day	0
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**15.38**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	56
Denominator	Total length of road network in the city	364
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**50.09**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	19312
Denominator	Total number of households and establishments in the city	38551
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	50
Denominator	Total quantum of MSW generated in the city	50
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	1500
Denominator	Average MSW generated in the city (tons per month)	1500
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**11.5**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	11.5
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**16.8**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	16.8
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**141**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	141
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	NA
Denominator	Total number of noise samples	50
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	NA
Denominator	Total number of samples tested	NA
Unit	Percentage	
Benchmark	100%

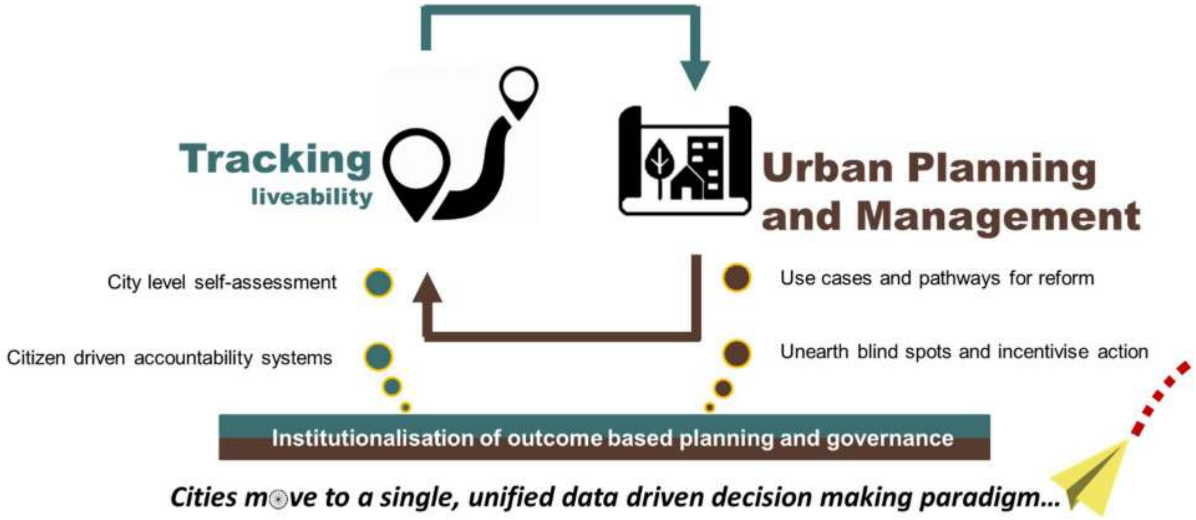
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

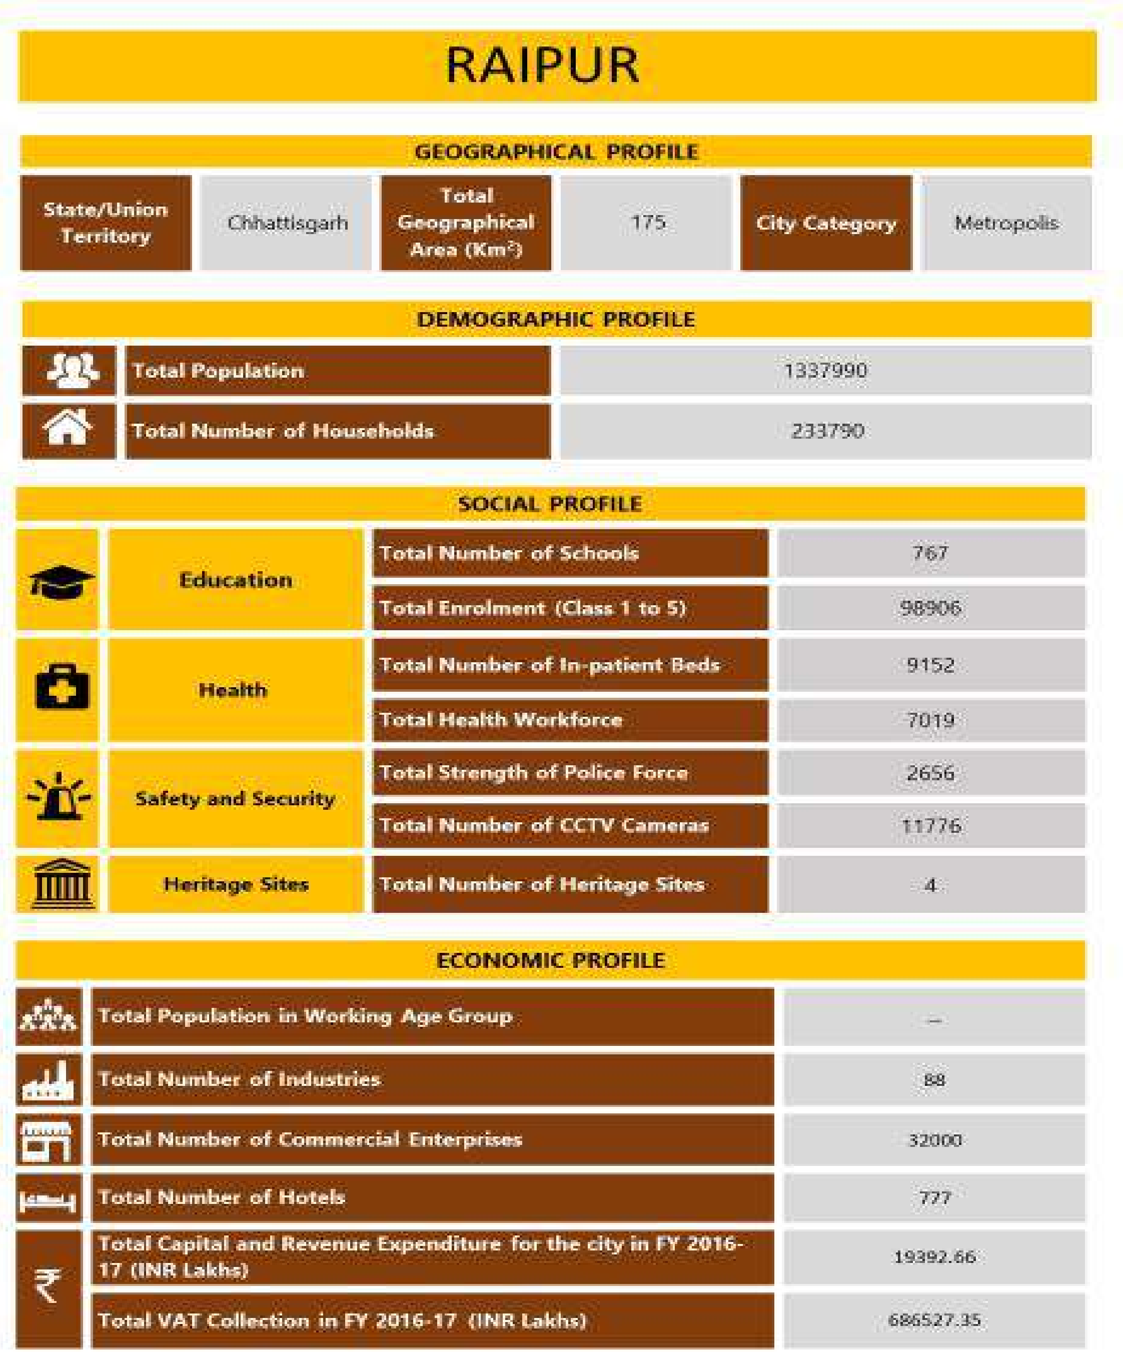


Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



RAIPUR

GEOGRAPHICAL PROFILE

State/Union Territory	Chhattisgarh	Total Geographical Area (Km²)	175	City Category	Metropolis

DEMOGRAPHIC PROFILE

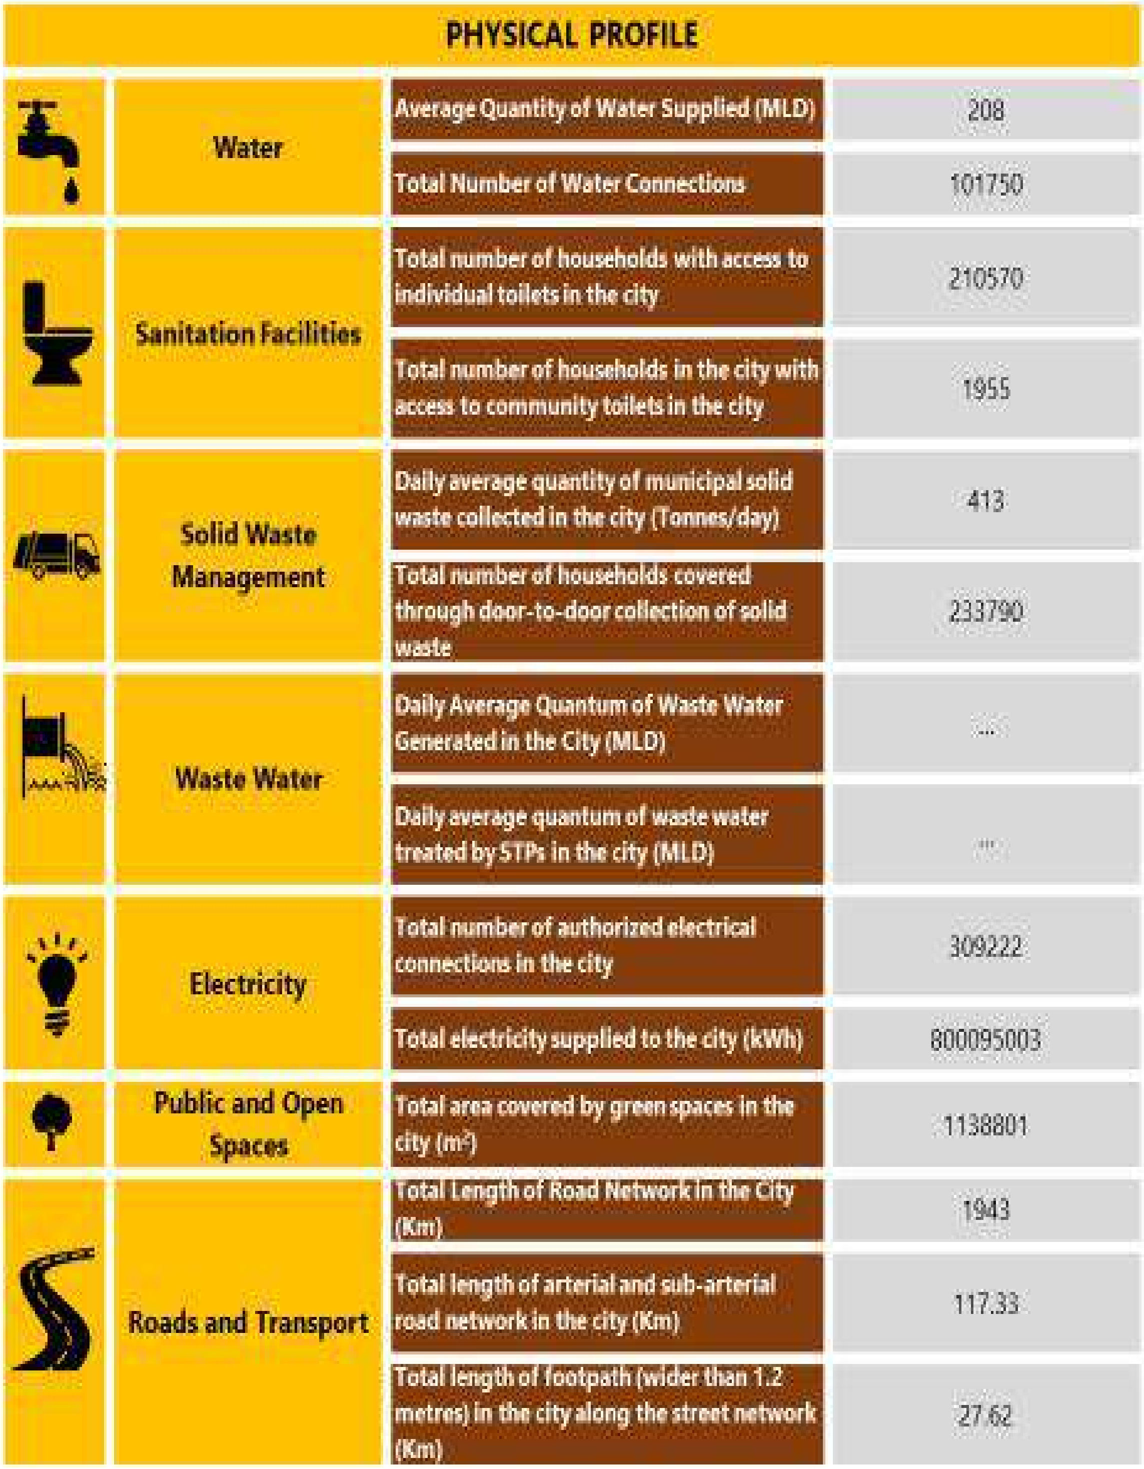
Total Population	1337990
Total Number of Households	233790

SOCIAL PROFILE

Education	Total Number of Schools	767
	Total Enrolment (Class 1 to 5)	98906
Health	Total Number of In-patient Beds	9152
	Total Health Workforce	7019
Safety and Security	Total Strength of Police Force	2656
	Total Number of CCTV Cameras	11776
Heritage Sites	Total Number of Heritage Sites	4

ECONOMIC PROFILE

Total Population in Working Age Group	–
Total Number of Industries	88
Total Number of Commercial Enterprises	32000
Total Number of Hotels	777
₹ Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	19392.66
Total VAT Collection in FY 2016-17 (INR Lakhs)	686527.35



PHYSICAL PROFILE

Water	Average Quantity of Water Supplied (MLD)	208
	Total Number of Water Connections	101750
Sanitation Facilities	Total number of households with access to individual toilets in the city	210570
	Total number of households in the city with access to community toilets in the city	1955
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	413
	Total number of households covered through door-to-door collection of solid waste	233790
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	....
	Daily average quantum of waste water treated by STPs in the city (MLD)	...
Electricity	Total number of authorized electrical connections in the city	309222
	Total electricity supplied to the city (kWh)	800095003
Public and Open Spaces	Total area covered by green spaces in the city (m²)	1138801
Roads and Transport	Total Length of Road Network in the City (Km)	1943
	Total length of arterial and sub-arterial road network in the city (Km)	117.33
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	27.62

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in

Pillars of Comprehensive Development	Category	Indicators
		schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density

Pillars of Comprehensive Development	Category	Indicators
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through

Pillars of Comprehensive Development	Category	Indicators
		meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

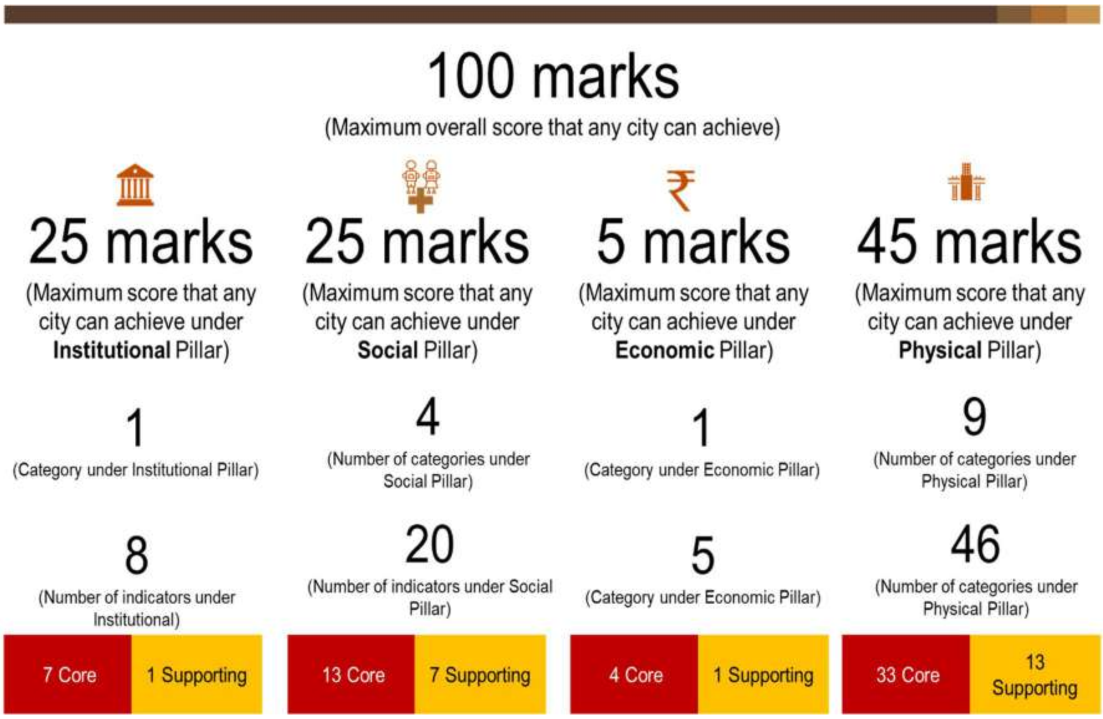
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks

(Maximum overall score that any city can achieve)

25 marks	25 marks	5 marks	45 marks
(Maximum score that any city can achieve under **Institutional** Pillar)	(Maximum score that any city can achieve under **Social** Pillar)	(Maximum score that any city can achieve under **Economic** Pillar)	(Maximum score that any city can achieve under **Physical** Pillar)
1	4	1	9
(Category under Institutional Pillar)	(Number of categories under Social Pillar)	(Category under Economic Pillar)	(Number of categories under Physical Pillar)
8	20	5	46
(Number of indicators under Institutional)	(Number of indicators under Social Pillar)	(Category under Economic Pillar)	(Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Accounts Department, RMC
Urban Local Body	For Park and Recreation Related Questions	AMRUT, RMC
Urban Local Body	For Water Supply and Drainage related questions	Water Supply Department, RMC
Urban Local Body	For Heritage sites related data	Indian National Trust for Art and Culture Heritage
Urban Local Body	For Ecological sites related data	NA
Urban Local Body	For Housing related data	Raipur Municipal Corporation
Urban Local Body	For Building plan related data	Raipur Development Authority
Urban Local Body	For Roads related data	Raipur Municipal Corporation
Urban Local Body	For Solid waste management related data	Solid waste management Department, Raipur Municipal Corporation
Urban Local Body	For IT services related data	IT Section, RMC
Urban Local Body	For Vendor committee related data	Bazar Bibhag, RMC
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	Employment Exchange, Census Department
For questions under Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Chhattisgarh Pollution Control Board
Development Authority	Building Infrastructure	Raipur Development Authority Raipur Municipal Corporation

Designated data owners	Subcategories	Data owners at city level
	Construction planning	Raipur Development Authority Raipur Municipal Corporation
	Green Building	Raipur Development Authority Raipur Municipal Corporation
	Rain water harvesting	Raipur Development Authority Raipur Municipal Corporation
	Universal Design Principle	Raipur Development Authority Raipur Municipal Corporation
DISCOM /Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Chhattisgarh State Power Distribution Corporation Limited
State Disaster management authority		Raipur Smart City Limited
State Education Department		District Education Department
State Health Department	Health care professionals	Chhattisgarh Medical and Health organization
State Health Department	Citizen Services	Chhattisgarh Medical and Health organization
State Health Department	Disease Prevalence	Chhattisgarh Medical and Health organization
State Health Department	Health Infrastructure	Chhattisgarh Medical and Health organization
State Renewable Energy Development Agency		Chhattisgarh Renewable Energy Development Authority
State Sales / Commercial Taxes Department		State Sale Tax department
Town and Country Planning Department	Land Use	Town and country planning department, Raipur
Traffic and Police Department		Police department, Raipur
Transport Authorities	Buses	City Bus In charge, RMC
Transport Authorities	Registered Vehicles	Road and Transport organization
Transport Authorities	Sub urban rail transport	

Designated data owners	Subcategories	Data owners at city level
Transport Authorities	Mono Rail Authority	
Transport Authorities	Tramways	
Transport Authorities	Marine Transport Authority	

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 189 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	2
State Education Department	4
DISCOM/Electricity Department	16
Traffic and Police Department	25
Development Authority	3
Pollution Control Board	10
State Renewable Energy Department	2
Town and Country Planning	4
State Health Department	24
Transport Authority	9
Disaster Management	1
Urban Local Body	89
Total	189

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre
2.3 | Hotel occupancy
3.4 | Percentage of schools with access to digital education
5.1| Number of streets, public places, junctions covered through surveillance systems
6.5 | Percentage of vendors registered and provided formal spaces
11.7 | Availability of Passenger Information System
11.11 | Percentage of traffic intersections with pedestrian crossing facilities
11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate
11.3 | Mode share of public transport
11.5 | Mode share of Non Motorized Transport
12.3 | Quality of Water Supplied
15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5. LA - Surveillance Camera
6. LA - Passenger Information Systems
7. LA - Street Vendors
8. LA - Universal Design Principles

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**86.54**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	1
	1.1c trade license	1
	1.1d solid waste management	0.25
	1.1e water supply	1
	1.1f sewerage/drainage	1
	1.1g fogging	1
	1.1h property tax	1
	1.1i professional tax	0
	1.1j information	1
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	1
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**16.67**
Description	Services integrated through an integrated or a singular operations command centre	3.5
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**9.91**
Description		
Sub Indicators	1.3a Building plan	0
	1.3b Birth/Death Certificate	0
	1.3c water supply	0
	1.3d solid waste management	0
	1.3e property tax	0
	1.3f professional tax (RC)	NA

	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	0
	1.3i information	0
	1.3j electricity	0.793024106
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**5.08**
Description		
Sub Indicators	1.4a water supply	6
	1.4b solid waste	6
	1.4c street lights	5.5
	1.4d sewerage	11
	1.4e professional tax	0
	1.4f parks and recreational spaces	NA
	1.4g building plan	2
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**110.81**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	4986.34
Denominator	Total demand raised for the year	4500
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**54.33**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	1955.8
Denominator	Total O&M cost for providing water supply services during the year	3599.6
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**110.49**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	-19871.71
Denominator	Total expenditure (revenue and capital accounts) in the same year	-17985.46
Unit	Percentage	

Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	0
Denominator	Total number of wards	70
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**40.43**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	19
Denominator	Total number of historic buildings/sites identified	47
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	0
Denominator	Total number of ecologically important sites identified in the city	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**61.43**
Description	Average Occupancy rate of Hotels	61.42857143
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0.01**
Formula:	*Numerator / Denominator*	

Numerator	Budget allocated for cultural/sports activities	2.35
Denominator	Total budget of the ULB (capital and revenue)	19392.66
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**30**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	30
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**81.24**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	155379
Denominator	Total population in the age group of 6-14 years	191252
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**80.62**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	74117
Denominator	Total female population in the age group of 6-14 years	91932
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**24.63**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	98906
Denominator	Total number of teachers available for primary grades (public and private schools)	4016
Unit	Ratio	
Benchmark	1 teacher for every 30 students	

Indicator No: 3.4	**Percentage of schools with access to digital education**	**13.95**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	107
Denominator	Total number of schools	767
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**89.19**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	89.19400697
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**95.48**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	348333335
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**89.09**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	9152
Denominator	Total population of the city	1027264
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**68.33**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	7019
Denominator	Total population of the city	1027264
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	

Indicator No: 4.3	**Average response time in case of health emergencies**	**14.5**
Description	Total response time for health-related distress calls received in the city	14.5
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.56**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	5771
Denominator	Total population of the city	1027264
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.03**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	258
Denominator	Total population of the city	1027264
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**606.07**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	11776
Denominator	Total length of road network in the city	1943
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**837.27**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	8601
Denominator	Total population of the city	1027264
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**25.49**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	2192
Denominator	Total crimes recorded in the same year	8601
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**25.7**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	264
Denominator	Total population of the city	1027264
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**13.72**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	82848.74
Denominator	Total VAT/GST collection during preceding year	6036.7861
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	0
Denominator	Total Professional Tax collection during preceding year	0
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be	

	treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**-16.91**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	-453
Denominator	Number of construction permits during preceding year	26.79
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	40654
Denominator	Total labour force in the city	191252
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**1.05**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	50
Denominator	Total number of vendors in the city	4781.3
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**6.14**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	6684
Denominator	Total number of slum and EWS households in the city	1089.44

Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**60**
Formula:	*Numerator / Denominator*	213123471830172
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	**Per capita availability of green spaces**	**1.11**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	1138801
Denominator	Total population of the city	1027264
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	**Per capita availability of public and recreational places**	**2.74**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	2815783.184
Denominator	Total population of the city	1027264
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**38.13**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	66734000
Denominator	Total area of the city (total area of all land uses)	175000000

Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	1027264
Denominator	Area allocated for residential land use (in hectares)	80880000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**107.22**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	250666
Denominator	Total number of households in the city	233790
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	309222
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**6329**

Description	Total number of sustained electrical interruptions in a year	6329
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.76**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	283318
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	3735.8
Denominator	Total energy consumption from all sources	800100203
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.31**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	881471.3333
Denominator	Total quantum of water and waste water handled during the period	6240
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	41040
Denominator	Total number of street light installations	44894
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	335209
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.6**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	800100203
Denominator	Total population of the city	1027264
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.4**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	120
Denominator	Total area of the city (sq.km)	175
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.16**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles	165

	available per day	
Denominator	Total population of the city	1027264
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	25
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0.21**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	4
Denominator	Total length of road network in the city	1943
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**50**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	1
Denominator	Total number of major transport interchanges in the city	2
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**18.5**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	37
Denominator	Total number of major interchanges in the city	2
Unit	Percentage	
Benchmark	>=75	

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Indicator No: 11.8	**Extent of signal synchronisation**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	0
Denominator	Total number of signalised intersections in the city	41
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	27.5
Denominator	Total available on-street parking spaces in the city	27.5
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**0.71**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	27.62
Denominator	Total length of road network in the city	3886
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**78.07**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	89
Denominator	Total number of junctions/ intersections on major roads in the city	114
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**94.46**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	392
Denominator	Total number of public right-of-way areas in the city	415

Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**42.62**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	99641
Denominator	Total number of households in the city	233790
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**202.48**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	208
Denominator	Total population of the city	1027264
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	55463
Denominator	Total number of samples tested for water quality	56882
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**53.05**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	110.34
Denominator	Quantum of water put into the distribution system (mld)	208
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**10.83**
Formula:	*Numerator / Denominator*	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Numerator	Number of metered water connections	11019
Denominator	Total number of water connections in the city	101750
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**104.58**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	2328
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	2226
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**108.22**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	245392.8
Denominator	Total number of properties in the city	226744
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**91.43**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	207314
Denominator	Total number of properties in the city	226744
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	0
Denominator	Total waste water generated in the city per day	0

Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	0
Denominator	Total waste water received at treatment plants per day	0
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**28.82**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	560
Denominator	Total length of road network in the city	1943
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	265790
Denominator	Total number of households and establishments in the city	265790
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	413
Denominator	Total quantum of MSW generated in the city	413
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**54.26**

Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	6722.26
Denominator	Average MSW generated in the city (tons per month)	12390
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**10.38**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	10.38
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**27.32**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	27.32
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**92.25**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	92.25
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	180
Denominator	Total number of noise samples	180
Unit	Percentage	

Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	64
Denominator	Total number of samples tested	64
Unit	Percentage	
Benchmark	100%

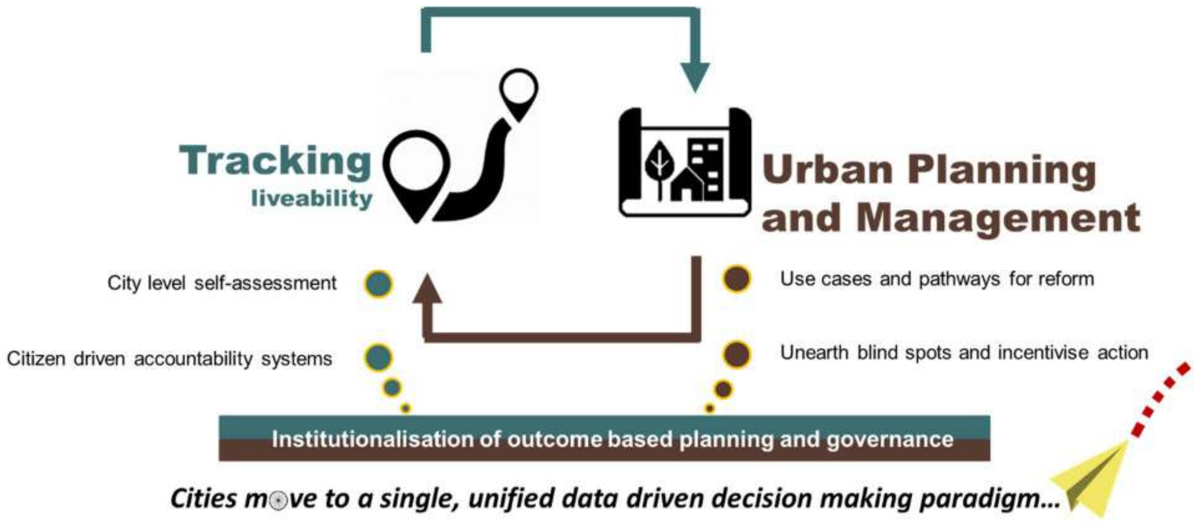
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

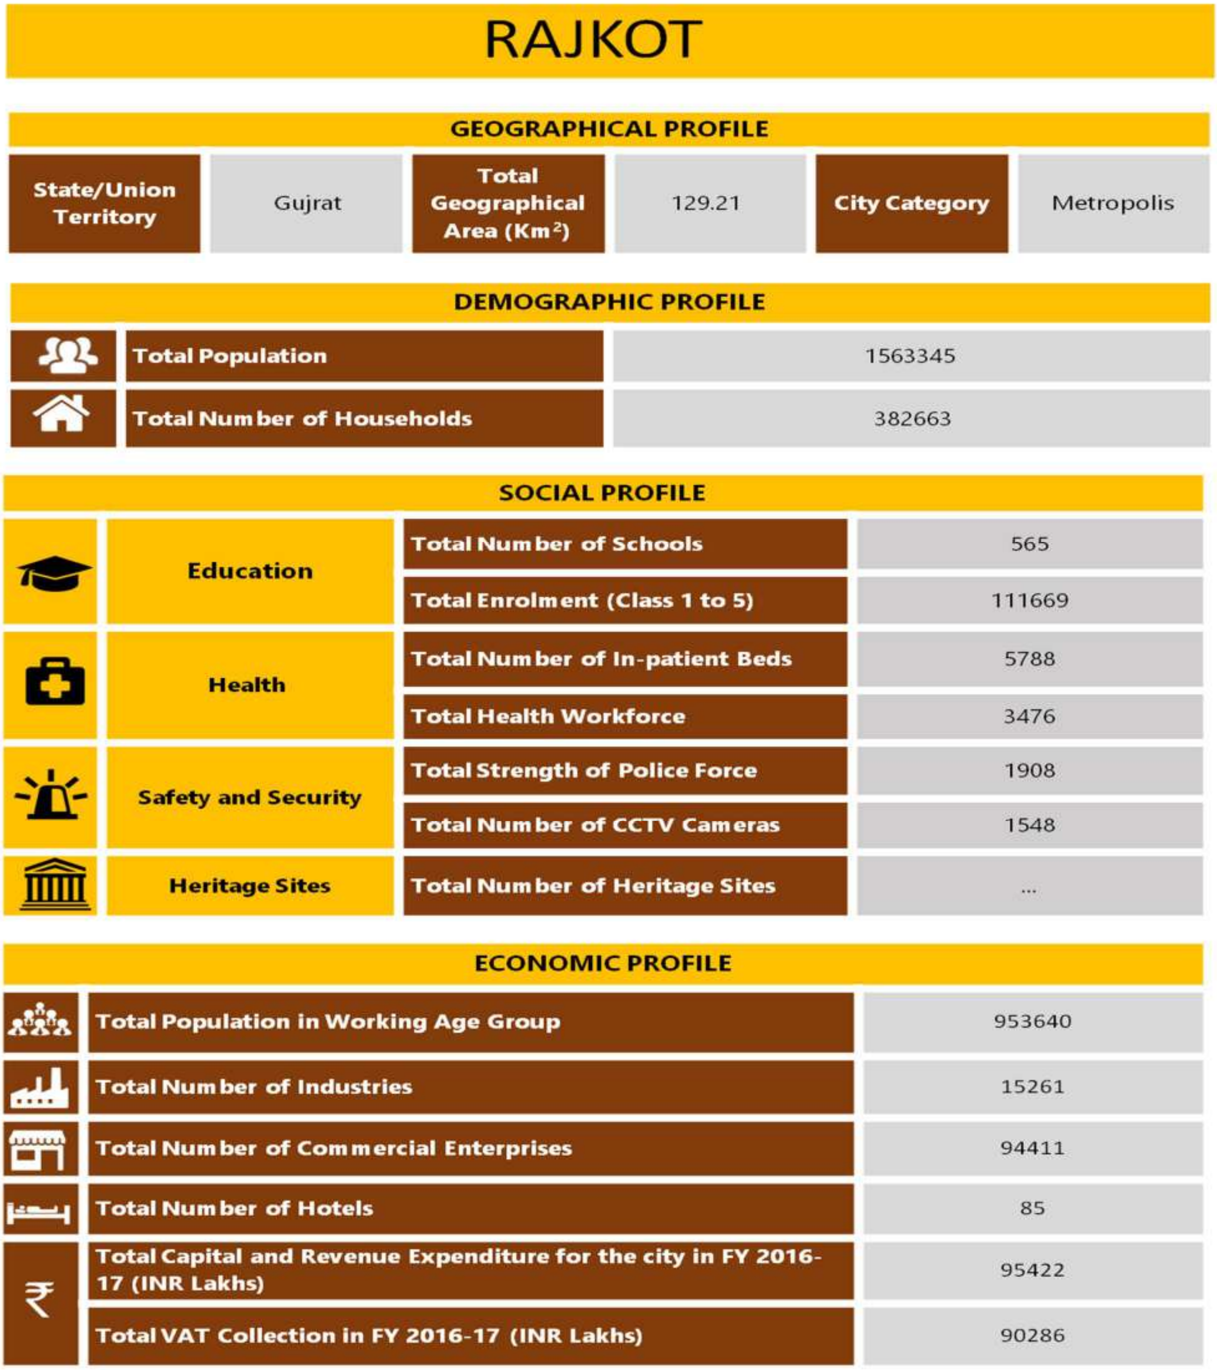


Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



RAJKOT

GEOGRAPHICAL PROFILE

State/Union Territory	Gujrat	**Total Geographical Area (Km^2)**	129.21	**City Category**	Metropolis

DEMOGRAPHIC PROFILE

Total Population	1563345
Total Number of Households	382663

SOCIAL PROFILE

Education	**Total Number of Schools**	565
	Total Enrolment (Class 1 to 5)	111669
Health	**Total Number of In-patient Beds**	5788
	Total Health Workforce	3476
Safety and Security	**Total Strength of Police Force**	1908
	Total Number of CCTV Cameras	1548
Heritage Sites	**Total Number of Heritage Sites**	...

ECONOMIC PROFILE

Total Population in Working Age Group	953640
Total Number of Industries	15261
Total Number of Commercial Enterprises	94411
Total Number of Hotels	85
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	95422
Total VAT Collection in FY 2016-17 (INR Lakhs)	90286

PHYSICAL PROFILE

Water	Average Quantity of Water Supplied (MLD)	241
	Total Number of Water Connections	328112
Sanitation Facilities	Total number of households with access to individual toilets in the city	317425
	Total number of households in the city with access to community toilets in the city	1275
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	577
	Total number of households covered through door-to-door collection of solid waste	330751
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	170
	Daily average quantum of waste water treated by STPs in the city (MLD)	82
Electricity	Total number of authorized electrical connections in the city	524087
	Total electricity supplied to the city (kWh)	1792140096
Public and Open Spaces	Total area covered by green spaces in the city (m^2)	213030
Roads and Transport	Total Length of Road Network in the City (Km)	1798
	Total length of arterial and sub-arterial road network in the city (Km)	15.2
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	141

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in

Pillars of Comprehensive Development	Category	Indicators
		schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density

Pillars of Comprehensive Development	Category	Indicators
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through

Pillars of Comprehensive Development	Category	Indicators
		meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

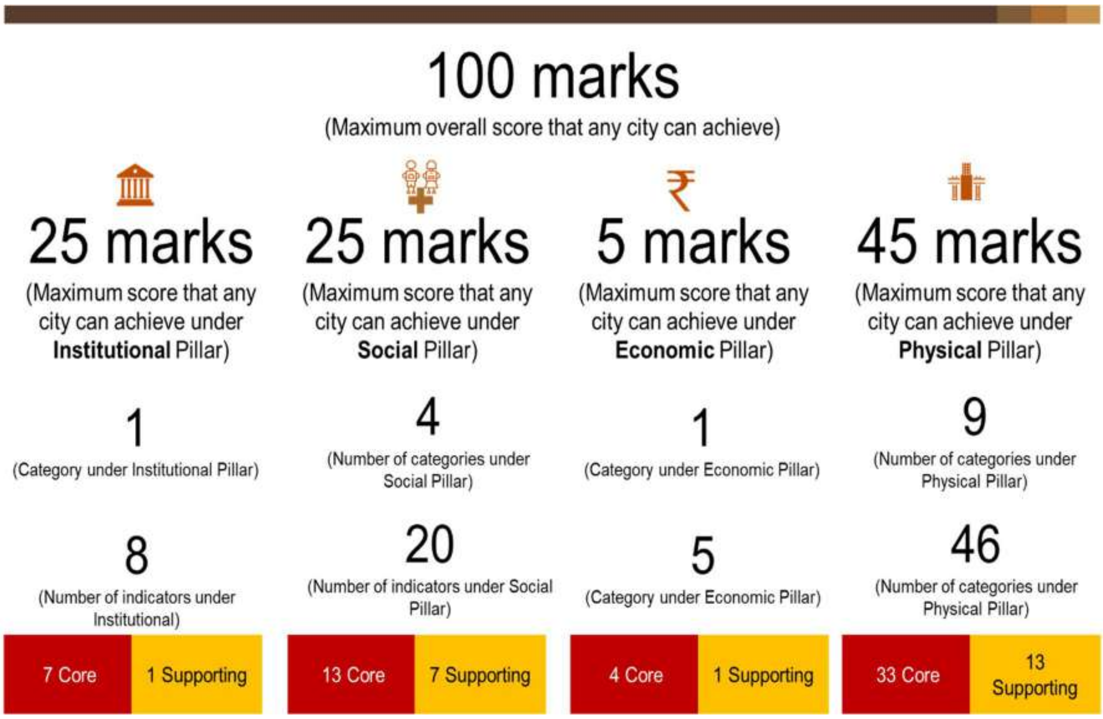
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks

(Maximum overall score that any city can achieve)

25 marks (Maximum score that any city can achieve under **Institutional** Pillar)		25 marks (Maximum score that any city can achieve under **Social** Pillar)		5 marks (Maximum score that any city can achieve under **Economic** Pillar)		45 marks (Maximum score that any city can achieve under **Physical** Pillar)	
1 (Category under Institutional Pillar)		4 (Number of categories under Social Pillar)		1 (Category under Economic Pillar)		9 (Number of categories under Physical Pillar)	
8 (Number of indicators under Institutional)		20 (Number of indicators under Social Pillar)		5 (Category under Economic Pillar)		46 (Number of categories under Physical Pillar)	
7 Core	1 Supporting	13 Core	7 Supporting	4 Core	1 Supporting	33 Core	13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Account
Urban Local Body	For Park and Recreation Related Questions	Park and recreation
Urban Local Body	For Water Supply and Drainage related questions	Drainage department
Urban Local Body	For Heritage sites related data	-
Urban Local Body	For Ecological sites related data	-
Urban Local Body	For Housing related data	-
Urban Local Body	For Building plan related data	Town development
Urban Local Body	For Roads related data	
Urban Local Body	For Solid waste management related data	Solid waste management
Urban Local Body	For IT services related data	
Urban Local Body	For Vendor committee related data	
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Water department
Development Authority	Building Infrastructure	
	Construction planning	
	Green Building	

Designated data owners	Subcategories	Data owners at city level
	Rain water harvesting	
	Universal Design Principle	
DISCOM /Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Pgvcl
State Disaster management authority		
State Education Department		
State Health Department	Health care professionals	Health department
	Citizen Services	
	Disease Prevalence	
	Health Infrastructure	
State Renewable Energy Development Agency		
State Sales / Commercial Taxes Department		
Town and Country Planning Department	Land Use	
Traffic and Police Department		
Transport Authorities	Buses	
	Registered Vehicles	R.T.O
	Sub urban rail transport	Railway department
	Mono Rail Authority	
	Tramways	
	Marine Transport Authority	

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 25 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments.

Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	1
State Education Department	3
DISCOM/Electricity Department	1
Traffic and Police Department	1
Development Authority	1
Pollution Control Board	0
State Renewable Energy Department	1
Town and Country Planning	1
State Health Department	1
Transport Authority	1
Disaster Management	0
Urban Local Body	14
Total	25*

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**95.07**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	1

Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**79.33**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	177789
Denominator	Total population in the age group of 6-14 years	224121
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**70.54**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	70435
Denominator	Total female population in the age group of 6-14 years	99853
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**33.01**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	111669
Denominator	Total number of teachers available for primary grades (public and private schools)	3383
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**81.42**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	460
Denominator	Total number of schools	565

Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**87.41**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	87.41431482
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**96.48**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	483318030
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**43.74**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	5788
Denominator	Total population of the city	1323363
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**26.27**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	3476
Denominator	Total population of the city	1323363
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	

Indicator No: 4.3	**Average response time in case of health emergencies**	**10**
Description	Total response time for health-related distress calls received in the city	10
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.57**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	7484
Denominator	Total population of the city	1323363
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.06**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	796
Denominator	Total population of the city	1323363
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**86.1**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	1548
Denominator	Total length of road network in the city	1798
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**389.46**

Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	5154
Denominator	Total population of the city	1323363
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**9.31**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	480
Denominator	Total crimes recorded in the same year	5154
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**14.66**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	194
Denominator	Total population of the city	1323363
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**19.93**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	15005
Denominator	Total VAT/GST collection during preceding year	752.81
Unit	Percentage	

Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**22.08**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	320
Denominator	Total Professional Tax collection during preceding year	1449
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**3.99**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	122
Denominator	Number of construction permits during preceding year	30.55
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	9156
Denominator	Total labour force in the city	224121
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**97.07**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	19572
Denominator	Total number of vendors in the city	20163

Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**4.41**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	8391
Denominator	Total number of slum and EWS households in the city	1902.91
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**0** 94502870
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	**Per capita availability of green spaces**	**0.16**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	213030
Denominator	Total population of the city	1323363
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	**Per capita availability of public and recreational places**	**1.75**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	2310779

Denominator	Total population of the city	1323363
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**74.56**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	96340000
Denominator	Total area of the city (total area of all land uses)	129210000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.02**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	1323363
Denominator	Area allocated for residential land use (in hectares)	73580000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**136.26**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	521435
Denominator	Total number of households in the city	382663
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	524087
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**3084**
Description	Total number of sustained electrical interruptions in a year	3084
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.79**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	110760
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	4960
Denominator	Total energy consumption from all sources	1792142926
Unit	Percentage	
Benchmark	10%	

Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.34**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	403199.4167
Denominator	Total quantum of water and waste water handled during the period	9690
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.33**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	15745871
Denominator	Total number of street light installations	54532
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	1117941.467
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.45**

Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	1792142926
Denominator	Total population of the city	1323363
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.64**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	233
Denominator	Total area of the city (sq.km)	129.21
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.08**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	100
Denominator	Total population of the city	1323363
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	13
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**1.11**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	19.9

Denominator	Total length of road network in the city	1798
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**66.67**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	2
Denominator	Total number of major transport interchanges in the city	3
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	0.37
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**Non-Computable**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	NA
Denominator	Total number of major interchanges in the city	3
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**18.18**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	2

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Denominator	Total number of signalised intersections in the city	11
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	4
Denominator	Total available on-street parking spaces in the city	4
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**3.92**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	141
Denominator	Total length of road network in the city	3596
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**738.89**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	133
Denominator	Total number of junctions/ intersections on major roads in the city	18
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**63.09**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as	665

	per universal design principles	
Denominator	Total number of public right-of-way areas in the city	1054
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**83.83**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	320787
Denominator	Total number of households in the city	382663
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**182.11**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	241
Denominator	Total population of the city	1323363
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	27015
Denominator	Total number of samples tested for water quality	27182
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**12.45**
Formula:	*Numerator / Denominator*	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	30
Denominator	Quantum of water put into the distribution system (mld)	241
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**0.16**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	526
Denominator	Total number of water connections in the city	328112
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**7.69**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	233
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	3030
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**94.21**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	427369
Denominator	Total number of properties in the city	453631
Unit	Percentage	

Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**70.26**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	318700
Denominator	Total number of properties in the city	453631
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**79.41**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	135
Denominator	Total waste water generated in the city per day	170
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**140.24**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	115
Denominator	Total waste water received at treatment plants per day	82
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**8.48**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	152.53
Denominator	Total length of road network in the city	1798
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**89.12**
Formula:	*Numerator / Denominator*	

Numerator	Total number of households and establishments covered through doorstep collection	425162
Denominator	Total number of households and establishments in the city	477074
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**98.3**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	577
Denominator	Total quantum of MSW generated in the city	587
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**3.29**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	570
Denominator	Average MSW generated in the city (tons per month)	17310
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**16.9**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	16.9
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**22.93**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	22.93
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean	

	concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**115.27**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	115.266
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	18
Denominator	Total number of noise samples	18
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	33
Denominator	Total number of samples tested	33
Unit	Percentage	
Benchmark	100%	

LIVEABILITY ASSESSMENT DRAFT REPORT

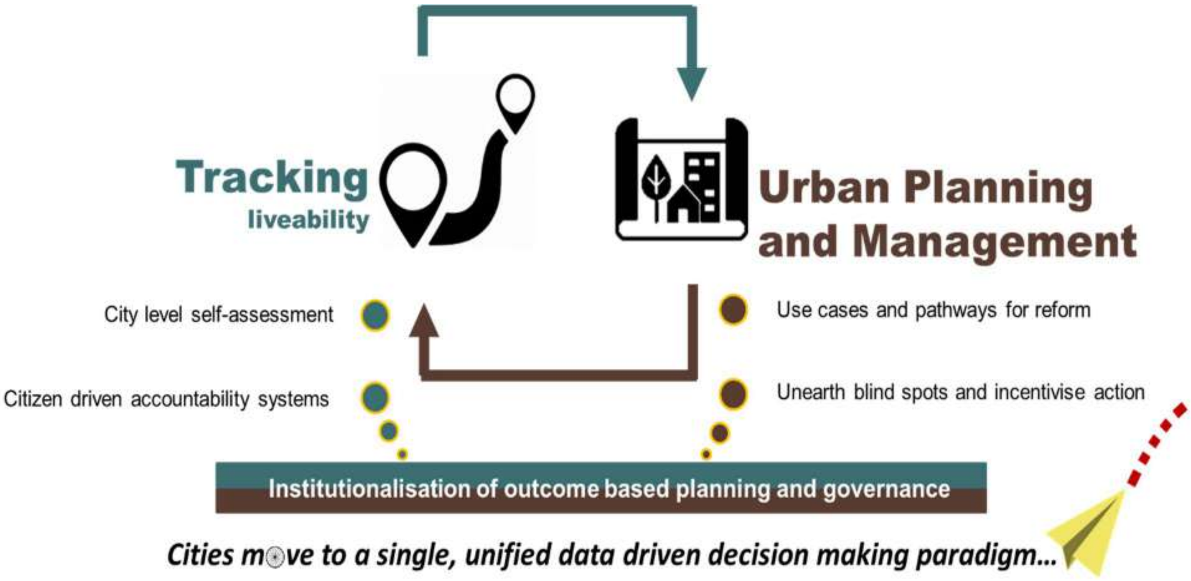
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

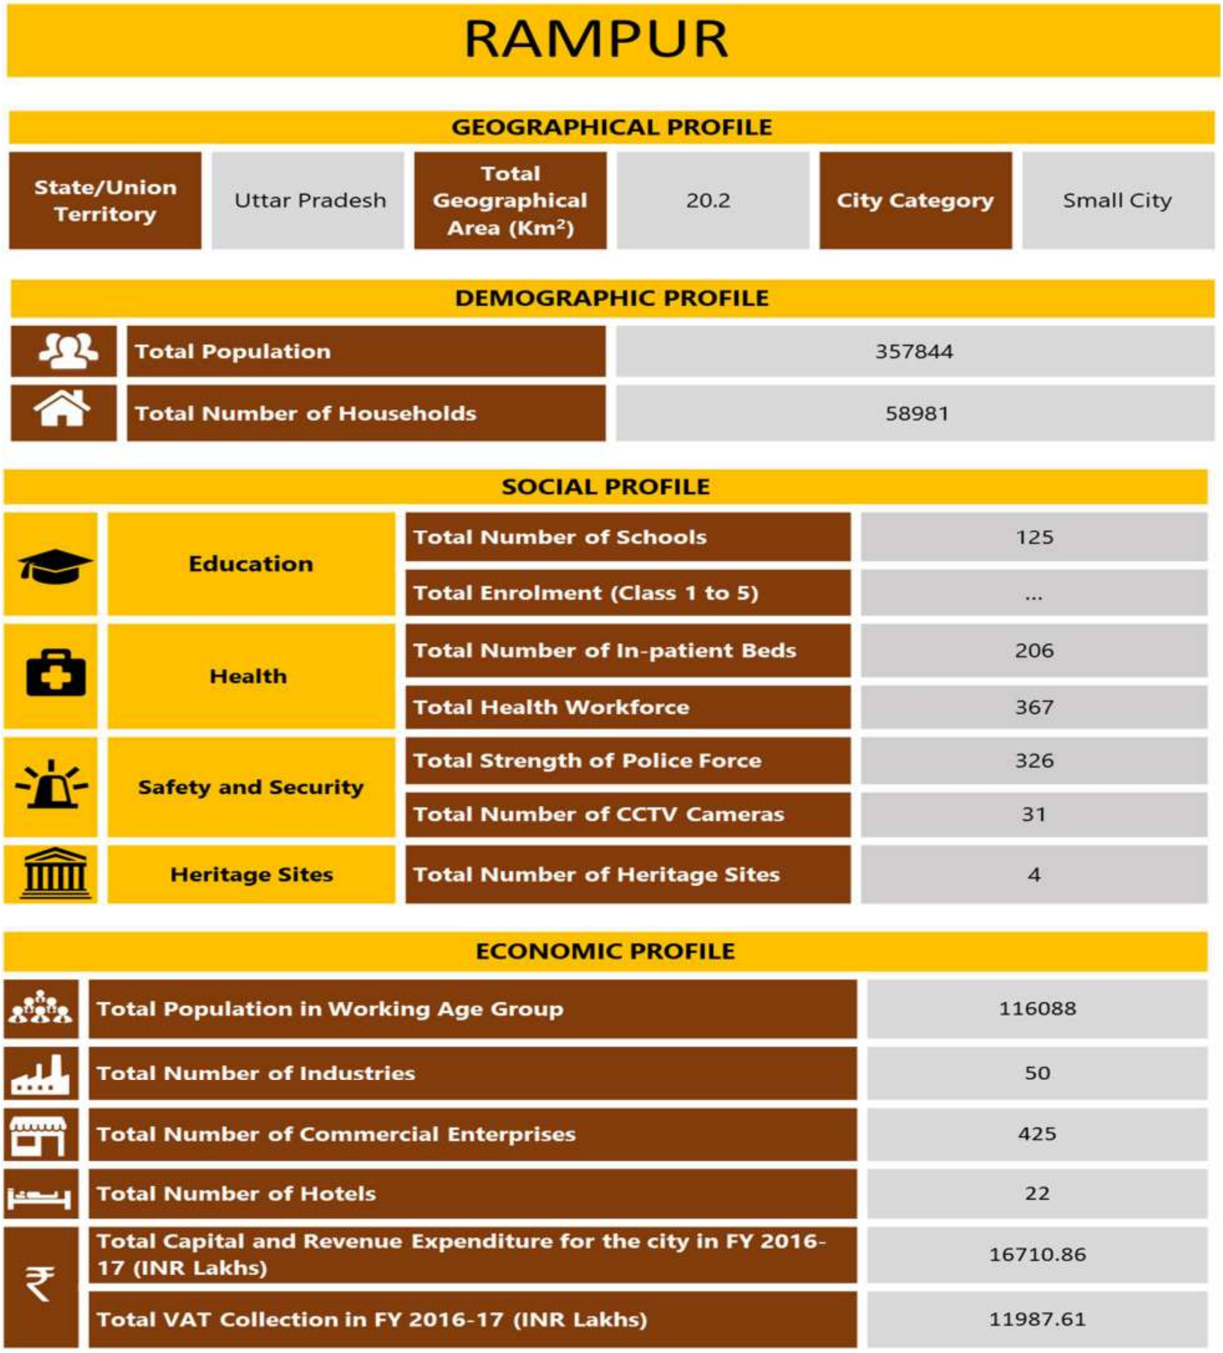


Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



RAMPUR

GEOGRAPHICAL PROFILE

State/Union Territory	Uttar Pradesh	**Total Geographical Area (Km²)**	20.2	**City Category**	Small City

DEMOGRAPHIC PROFILE

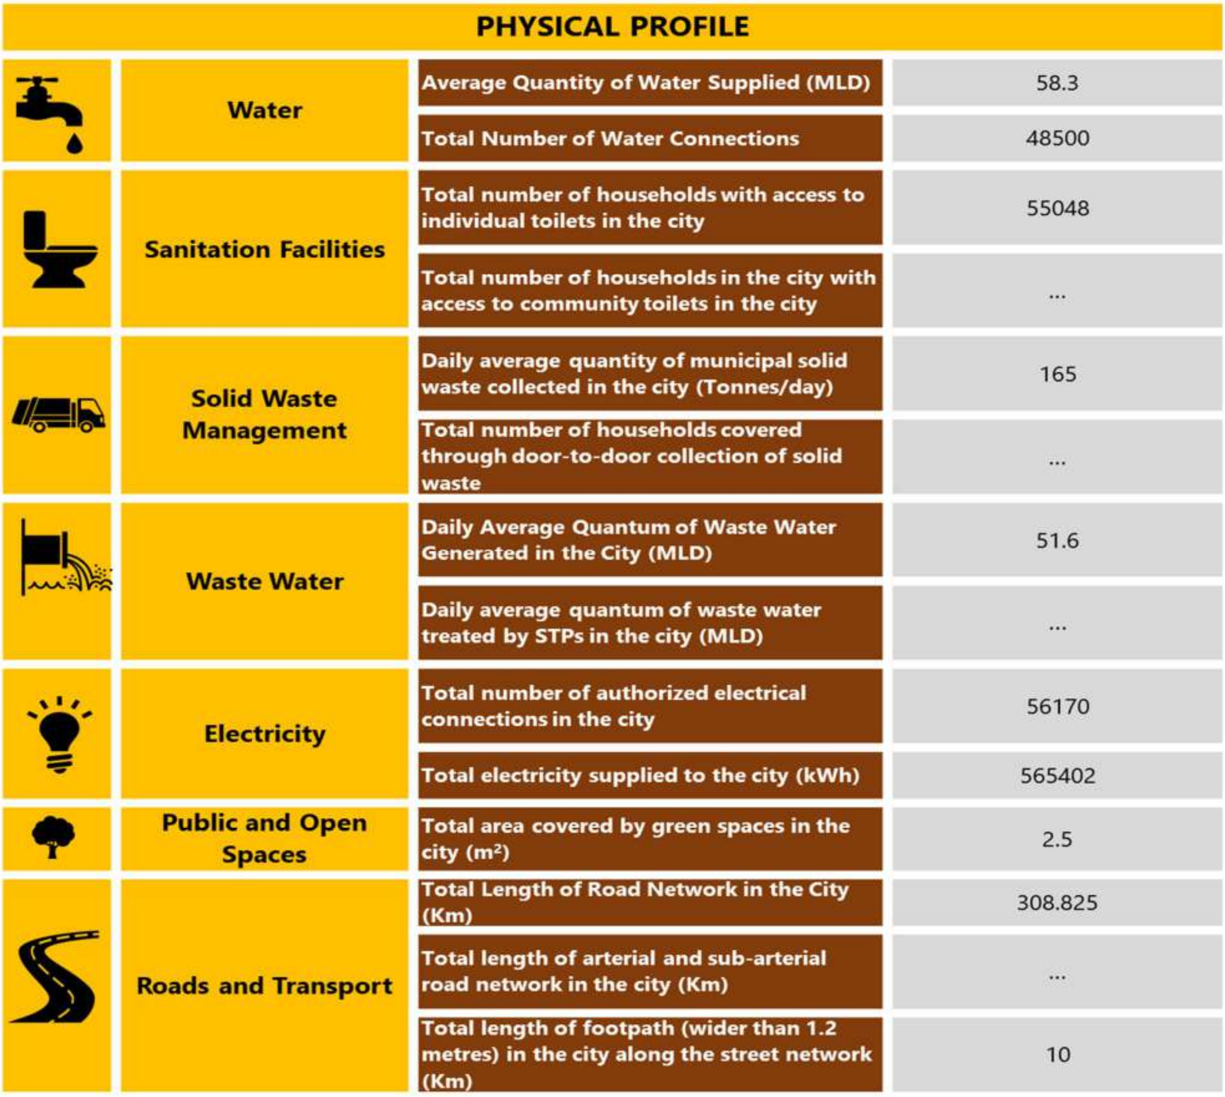
Total Population	357844
Total Number of Households	58981

SOCIAL PROFILE

Education	**Total Number of Schools**	125
	Total Enrolment (Class 1 to 5)	...
Health	**Total Number of In-patient Beds**	206
	Total Health Workforce	367
Safety and Security	**Total Strength of Police Force**	326
	Total Number of CCTV Cameras	31
Heritage Sites	**Total Number of Heritage Sites**	4

ECONOMIC PROFILE

Total Population in Working Age Group	116088
Total Number of Industries	50
Total Number of Commercial Enterprises	425
Total Number of Hotels	22
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	16710.86
Total VAT Collection in FY 2016-17 (INR Lakhs)	11987.61



PHYSICAL PROFILE		
Water	Average Quantity of Water Supplied (MLD)	58.3
	Total Number of Water Connections	48500
Sanitation Facilities	Total number of households with access to individual toilets in the city	55048
	Total number of households in the city with access to community toilets in the city	...
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	165
	Total number of households covered through door-to-door collection of solid waste	...
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	51.6
	Daily average quantum of waste water treated by STPs in the city (MLD)	...
Electricity	Total number of authorized electrical connections in the city	56170
	Total electricity supplied to the city (kWh)	565402
Public and Open Spaces	Total area covered by green spaces in the city (m^2)	2.5
Roads and Transport	Total Length of Road Network in the City (Km)	308.825
	Total length of arterial and sub-arterial road network in the city (Km)	...
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	10

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various ‘Category Sub-Indexes’ and a composite ‘City Liveability Index’ will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies

Pillars of Comprehensive Development	Category	Indicators
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita

Pillars of Comprehensive Development	Category	Indicators
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced	15.1 Concentration of SO_2- air pollution

Pillars of Comprehensive Development	Category	Indicators
	Pollution	15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

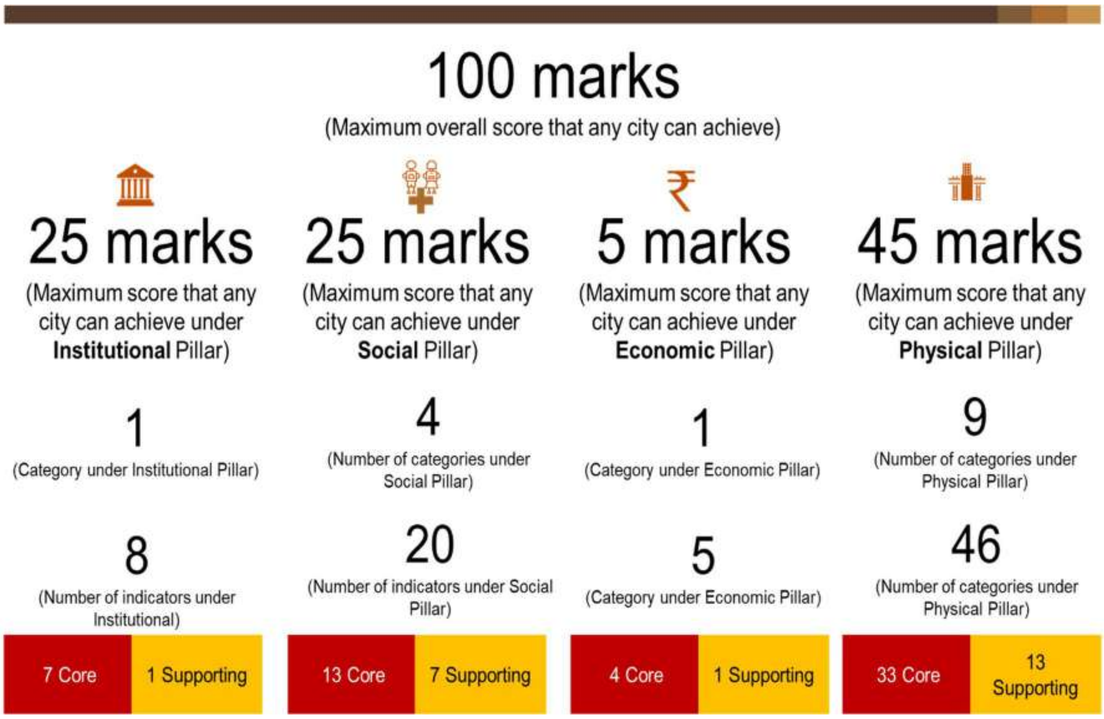
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks

(Maximum overall score that any city can achieve)

25 marks	25 marks	5 marks	45 marks
(Maximum score that any city can achieve under **Institutional** Pillar)	(Maximum score that any city can achieve under **Social** Pillar)	(Maximum score that any city can achieve under **Economic** Pillar)	(Maximum score that any city can achieve under **Physical** Pillar)
1 (Category under Institutional Pillar)	4 (Number of categories under Social Pillar)	1 (Category under Economic Pillar)	9 (Number of categories under Physical Pillar)
8 (Number of indicators under Institutional)	20 (Number of indicators under Social Pillar)	5 (Category under Economic Pillar)	46 (Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and

development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Accounts department Nagar Palika Parishad Rampur
Urban Local Body	For Park and Recreation Related Questions	Civil department Nagar Palika Parishad Rampur
Urban Local Body	For Water Supply and Drainage related questions	Jalkal vibhag Nagar Palika Parishad Rampur
Urban Local Body	For Heritage sites related data	Archeological survey of India /in charge in ULB
Urban Local Body	For Ecological sites related data	Civil Department Rampur
Urban Local Body	For Housing related data	Moradabad Development Authority / properties tax department Nagar Palika Parishad Rampur
Urban Local Body	For Building plan related data	Rampur Development Authority Rampur
Urban Local Body	For Roads related data	Public Works Department / civil department rampur
Urban Local Body	For Solid waste management related data	Health Department Nagar Palika Parishad Rampur
Urban Local Body	For IT services related data	IT department (main office) Nagar palika parishad Rampur
Urban Local Body	For Vendor committee related data	Tex department ULB Rampur
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	Public Works Department ,Employment Exchange, District urban development Agency Rampur
Central / state	Water Quality, Air	Uttar Pradesh pollution Control Board

Designated data owners	Subcategories	Data owners at city level
Pollution control Board	Quality, Noise Quality	Moradabad
Development Authority	Building Infrastructure	Rampur development Authority Rampur
	Construction planning	Rampur development Authority Rampur
	Green Building	Rampur development Authority Rampur
	Rain water harvesting	Rampur development Authority Rampur
	Universal Design Principle	Rampur development Authority Rampur
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Uttar Pradesh Power Corporation Ltd Rampur
State Disaster management authority		State Disaster Management Rampur [in UP ADM (FR]
State Education Department		Basic Siksha Adhikari/district inspector of school Rampur (DIOS)
State Health Department	Health care professionals	UP State Health Department Rampur (CMO)
	Citizen Services	UP State Health Department Rampur (CMO)
	Disease Prevalence	UP State Health Department Rampur (CMO)
	Health Infrastructure	UP State Health Department Rampur (CMO)
State Renewable Energy Development Agency	Renewable Energy	State Renewable Energy Develop. Agency(NEDA)
State Sales / Commercial Taxes Department		Commercial Taxes Department Rampur
Town and Country Planning Department	Land Use	Town and Country Planning Department Moradabad
Traffic and Police Department		Traffic police, Civil police & Grand Railway police Rampur
Transport Authorities	Buses	Uttar Pradesh State transport Corporation & Regional Transport Office Rampur
	Registered Vehicles	Regional Transport Office Rampur
	Sub urban rail transport	N A
	Mono Rail Authority	N A
	Tramways	N A
	Marine Transport Authority	N A

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 45 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	**1**
State Education Department	**1**
DISCOM/Electricity Department	**3**
Traffic and Police Department	**1**
Development Authority	**1**
Pollution Control Board	**1**
State Renewable Energy Department	**3**
Town and Country Planning	**1**
State Health Department	**3**
Transport Authority	**1**
Disaster Management	**1**
Urban Local Body	**28**
Total	**45***

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1| Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

7. LA - Street Vendors
8. LA - Universal Design Principles

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**57.63**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	0.75
	1.1c trade license	0.75
	1.1d solid waste management	0
	1.1e water supply	0.666666667
	1.1f sewerage/drainage	0.666666667
	1.1g fogging	0
	1.1h property tax	0.666666667
	1.1i professional tax	0
	1.1j information	0.769230769
	1.1k Grievance redressal	1
	1.1l electricity	1

Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**0.38**
Description		
Sub Indicators	1.4a water supply	NA
	1.4b solid waste	1.5
	1.4c street lights	0
	1.4d sewerage	NA
	1.4e professional tax	NA
	1.4f parks and recreational spaces	0
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**11.71**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	36.82
Denominator	Total demand raised for the year	314.51
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**1.15**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	7.12
Denominator	Total O&M cost for providing water supply services during the year	617.7
Unit	Percentage	
Benchmark	100%	

Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**46.93**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	17440.35
Denominator	Total expenditure (revenue and capital accounts) in the same year	37160.29
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	Data Unavailable
Denominator	Total number of wards	43
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	Data Unavailable
Denominator	Total number of historic buildings/sites identified	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	0
Denominator	Total number of ecologically important sites identified in the city	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**Non-Computable**

Description	Average Occupancy rate of Hotels	Data Unavailable
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**100.01**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	16711.86
Denominator	Total budget of the ULB (capital and revenue)	16710.86
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**0**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	0
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	0
Denominator	Total population in the age group of 6-14 years	70205
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	0
Denominator	Total female population in the age group of 6-14 years	33697
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**Non-**

Formula:	*Numerator / Denominator*	**Computable**
Numerator	Total number of students in primary grades (public and private)	0
Denominator	Total number of teachers available for primary grades (public and private schools)	Data Unavailable
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	0
Denominator	Total number of schools	125
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**0**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	0
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**0**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	0
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**6.33**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	206

Denominator	Total population of the city	325313
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**11.28**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	367
Denominator	Total population of the city	325313
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**43118**
Description	Total response time for health-related distress calls received in the city	43118
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**9.27**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	30156
Denominator	Total population of the city	325313
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.19**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	626
Denominator	Total population of the city	325313
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**10.04**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	31

Denominator	Total length of road network in the city	308.825
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**945.24**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	3075
Denominator	Total population of the city	325313
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**13.01**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	400
Denominator	Total crimes recorded in the same year	3075
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**18.44**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	60
Denominator	Total population of the city	325313
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**15.66**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	1622.86
Denominator	Total VAT/GST collection during preceding year	103.6475
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst	

	cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**486.67**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	1.46
Denominator	Total Professional Tax collection during preceding year	0.3
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**34.39**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	54
Denominator	Number of construction permits during preceding year	1.57
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	14074
Denominator	Total labour force in the city	70205
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	0
Denominator	Total number of vendors in the city	1850
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	375
Denominator	Total number of slum and EWS households in the city	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**Non-Compuatble**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	Data Unavailable
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	2.5
Denominator	Total population of the city	325313
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**1.26**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	411055
Denominator	Total population of the city	325313
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	Data Unavailable
Denominator	Total area of the city (total area of all land uses)	20200000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	325313
Denominator	Area allocated for residential land use (in hectares)	25558600
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**79.35**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	46803
Denominator	Total number of households in the city	58981
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	56170
Denominator	Total number of electricity connections in the city	56170
Unit	Percentage	
Benchmark	100%	

Indicator No: 10.3	**Average number of electrical interruptions per year**	**24**
Description	Total number of sustained electrical interruptions in a year	24
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.81**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	1766
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0.1**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	6965
Denominator	Total energy consumption from all sources	565402
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	0
Denominator	Total quantum of water and waste water handled during the period	1749
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	Blank
Denominator	Total number of street light installations	9700
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst	

	cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	0
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	565402
Denominator	Total population of the city	325313
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.61**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	395
Denominator	Total area of the city (sq.km)	20.2
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.4**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	131
Denominator	Total population of the city	325313
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	0
Unit	Percentage	
Benchmark		

Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	Data Unavailable
Denominator	Total length of road network in the city	308.825
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	NA
Denominator	Total number of major transport interchanges in the city	2
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**Non-Computable**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	NA
Denominator	Total number of major interchanges in the city	2
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	0
Denominator	Total number of signalised intersections in the city	0
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**Non-Computable**
Formula:	*Numerator / Denominator*	

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Numerator	Total available on-street paid parking spaces in the city	0
Denominator	Total available on-street parking spaces in the city	Data Unavailable
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**1.62**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	10
Denominator	Total length of road network in the city	617.65
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	0
Denominator	Total number of junctions/ intersections on major roads in the city	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	0
Denominator	Total number of public right-of-way areas in the city	12
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**82.23**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	48500
Denominator	Total number of households in the city	58981
Unit	Percentage	
Benchmark	100%	

Indicator No: 12.2	**Per capita supply of water**	**179.21**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	58.3
Denominator	Total population of the city	325313
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	45
Denominator	Total number of samples tested for water quality	1120
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	Blank
Denominator	Quantum of water put into the distribution system (mld)	58.3
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**25.46**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	12350
Denominator	Total number of water connections in the city	48500
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	0
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	0

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**153.98**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	55048
Denominator	Total number of properties in the city	35750
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	Data Unavailable
Denominator	Total number of properties in the city	35750
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	Data Unavailable
Denominator	Total waste water generated in the city per day	51.6
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	0
Denominator	Total waste water received at treatment plants per day	Data Unavailable
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	Data Unavailable
Denominator	Total length of road network in the city	308.825

Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	Data Unavailable
Denominator	Total number of households and establishments in the city	59406
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	165
Denominator	Total quantum of MSW generated in the city	165
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	0
Denominator	Average MSW generated in the city (tons per month)	4950
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**Non=Computable**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	Data Unavailable
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**Non=Computable**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	Data Unavailable
Unit	µg/m3	

Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**Non=Computable**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	Data Unavailable
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	12
Denominator	Total number of noise samples	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	Data Unavailable
Denominator	Total number of samples tested	Data Unavailable
Unit	Percentage	
Benchmark	100%	

LIVEABILITY ASSESSMENT

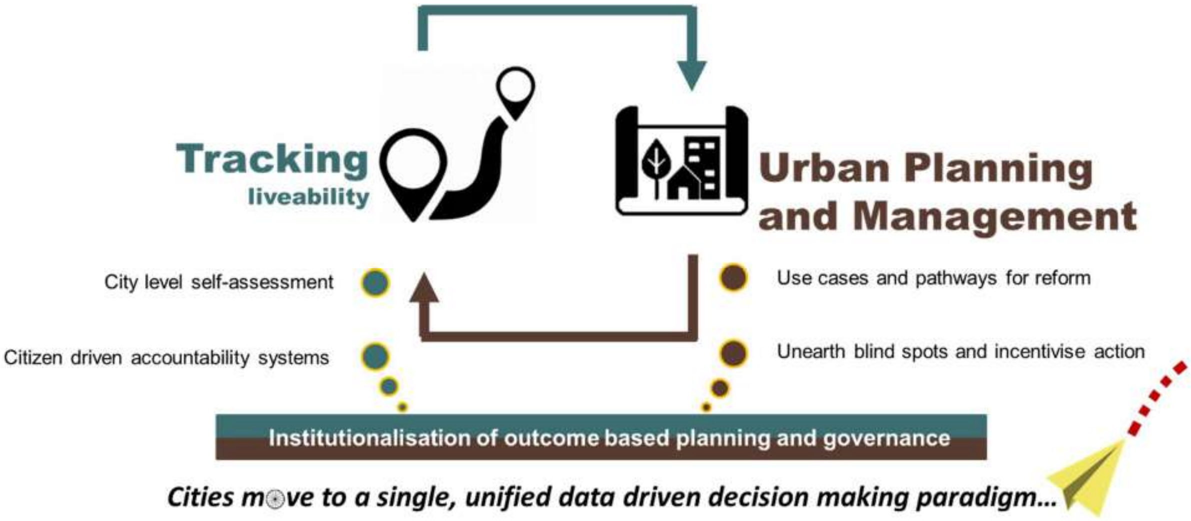
Table 5: Details of Indicator Values 18

1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).

RANCHI

GEOGRAPHICAL PROFILE

State/Union Territory	Jharkhand	Total Geographical Area (Km^2)	175	City Category	Metropolis

DEMOGRAPHIC PROFILE

Total Population	1073427
Total Number of Households	239239

SOCIAL PROFILE

Education	Total Number of Schools	319
	Total Enrolment (Class 1 to 5)	80333
Health	Total Number of In-patient Beds	43
	Total Health Workforce	4422
Safety and Security	Total Strength of Police Force	4254
	Total Number of CCTV Cameras	180
Heritage Sites	Total Number of Heritage Sites	1

ECONOMIC PROFILE

Total Population in Working Age Group	558688
Total Number of Industries	7
Total Number of Commercial Enterprises	26000
Total Number of Hotels	340
Total Capital and Revenue Expenditure for the city in FY 2016-14 (INR Lakhs)	18593
Total VAT Collection in FY 2016-17 (INR Lakhs)	513159

PHYSICAL PROFILE		
Water	Average Quantity of Water Supplied (MLD)	217
	Total Number of Water Connection	43098
Sanitation Facilities	Total number of households with access to individual toilets in the city	163229
	Total number of households in the city with access to community toilets in the city	1875
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	160
	Total number of households covered through door-to-door collection of solid waste	123863
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	5
	Daily average quantum of waste water treated by STPs in the city (MLD)	0
Electricity	Total number of authorized electrical connections in the city	297409
	Total electricity supplied to the city (kWh)	1084552698
Public and Open Spaces	Total area covered by green spaces in the city (m^2)	1011980000
Roads and Transport	Total Length of Road Network in the City (Km)	143
	Total length of arterial and sub-arterial road network in the city (Km)	55
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	171

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities

Pillars of Comprehensive Development	Category	Indicators
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal

Pillars of Comprehensive Development	Category	Indicators
		spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle

Pillars of Comprehensive Development	Category	Indicators
		tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste	14.1 Household level coverage of municipal solid waste

Pillars of Comprehensive Development	Category	Indicators
	Management	collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

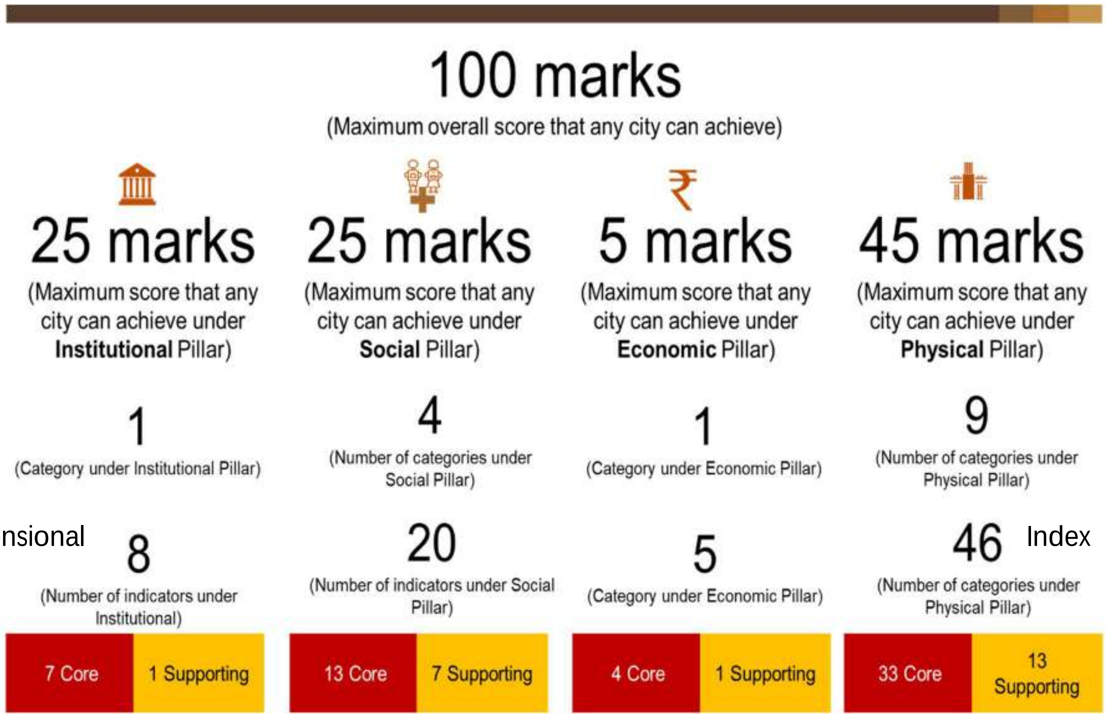
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks

(Maximum overall score that any city can achieve)

25 marks	25 marks	5 marks	45 marks
(Maximum score that any city can achieve under **Institutional** Pillar)	(Maximum score that any city can achieve under **Social** Pillar)	(Maximum score that any city can achieve under **Economic** Pillar)	(Maximum score that any city can achieve under **Physical** Pillar)
1	4	1	9
(Category under Institutional Pillar)	(Number of categories under Social Pillar)	(Category under Economic Pillar)	(Number of categories under Physical Pillar)
8	20	5	46
(Number of indicators under Institutional)	(Number of indicators under Social Pillar)	(Category under Economic Pillar)	(Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the

questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Ranchi Municipal Corporation
Urban Local Body	For Park and Recreation Related Questions	Ranchi Municipal Corporation
Urban Local Body	For Water Supply and Drainage related questions	Ranchi Municipal Corporation
Urban Local Body	For Heritage sites related data	Ranchi Municipal Corporation
Urban Local Body	For Ecological sites related data	Ranchi Municipal Corporation
Urban Local Body	For Housing related data	Ranchi Municipal Corporation
Urban Local Body	For Building plan related data	Ranchi Municipal Corporation
Urban Local Body	For Roads related data	Ranchi Municipal Corporation
Urban Local Body	For Solid waste management related data	Ranchi Municipal Corporation
Urban Local Body	For IT services related data	Ranchi Municipal Corporation
Urban Local Body	For Vendor committee related data	Ranchi Municipal Corporation
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	Tourism department, Excise and taxes department, architecture department
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	JharkhandState Pollution Control Board
Development Authority	Building Infrastructure	Greater Ranchi Development Authority
	Construction planning	Greater Ranchi Development Authority
	Green Building	Greater Ranchi Development Authority
	Rain water harvesting	Greater Ranchi Development Authority
	Universal Design Principle	Greater Ranchi Development Authority
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Tripura State Electricity Corporation Limited
State Disaster management authority		District Disaster management Office, Ranchi
State Education Department		District Education Department, Ranchi

Designated data owners	Subcategories	Data owners at city level
State Health Department	Health care professionals	Civil Surgeon, Ranchi
	Citizen Services	Civil Surgeon, Ranchi
	Disease Prevalence	Civil Surgeon, Ranchi
	Health Infrastructure	Civil Surgeon, Ranchi
State Renewable Energy Development Agency		Jharkhand Renewable Energy Development Agency, Ranchi
State Sales / Commercial Taxes Department		Commercial Taxes department, Ranchi
Town and Country Planning Department	Land Use	Town Planning Department, Ranchi
Traffic and Police Department		Office of Commissioner of Police, Ranchi
Transport Authorities	Buses	District Transport Office, Ranchi
	Registered Vehicles	District Transport Office, Ranchi
	Sub urban rail transport	NA
	Mono Rail Authority	NA
	Tramways	NA
	Marine Transport Authority	NA

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 09 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	1
State Education Department	0
DISCOM/Electricity Department	0
Traffic and Police Department	0

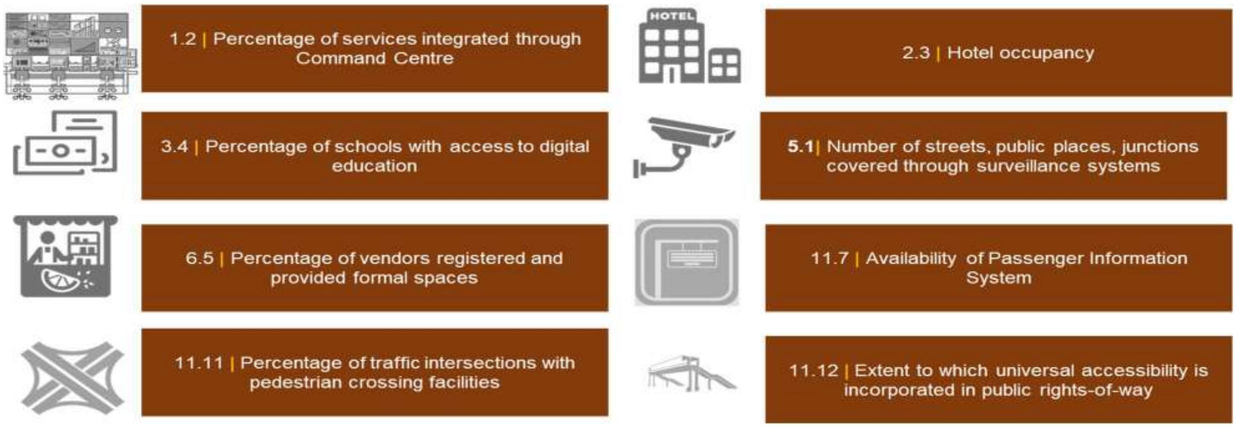
Development Authority	0
Pollution Control Board	0
State Renewable Energy Department	1
Town and Country Planning	0
State Health Department	1
Transport Authority	0
Disaster Management	0
Urban Local Body	6
Total	09*

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:



1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**91.12**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	1
	1.1c trade license	1
	1.1d solid waste management	1
	1.1e water supply	1
	1.1f sewerage/drainage	0
	1.1g fogging	1
	1.1h property tax	1
	1.1i professional tax	1
	1.1j information	0.846153846

	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	1
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**14.29**
Description	Services integrated through an integrated or a singular operations command centre	3
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**139.57**
Description		
Sub Indicators	1.3a Building plan	0.005288043
	1.3b Birth/Death Certificate	0.002157576
	1.3c water supply	0.001155529
	1.3d solid waste management	0.004090637
	1.3e property tax	0.085594747
	1.3f professional tax (RC)	0.083333333
	1.3g professional tax (EC)	0.083333333
	1.3h complaints/ grievance redressal	0.004192181

	1.3j electricity	3.456901103
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**0.14**

Description		
Sub Indicators	1.4a water supply	1
	1.4b solid waste	0
	1.4c street lights	0
	1.4d sewerage	0
	1.4e professional tax	0
	1.4f parks and recreational spaces	0
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**80.43**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	12225
Denominator	Total demand raised for the year	15200
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**552.85**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	5921
Denominator	Total O&M cost for providing water supply services during the year	1071
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**140.16**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	-15545
Denominator	Total expenditure (revenue and capital accounts) in the same year	-11091

Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	0
Denominator	Total number of wards	53
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	4
Denominator	Total number of historic buildings/sites identified	4
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	0
Denominator	Total number of ecologically important sites identified in the city	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**77.14**
Description	Average Occupancy rate of Hotels	77.14285714
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0**
Formula:	*Numerator / Denominator*	

Numerator	Budget allocated for cultural/sports activities	0
Denominator	Total budget of the ULB (capital and revenue)	18593
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**48**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	48
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**61.86**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	126605
Denominator	Total population in the age group of 6-14 years	204664
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**60.74**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	59695
Denominator	Total female population in the age group of 6-14 years	98277
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**128.53**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	80333
Denominator	Total number of teachers available for primary grades (public and private schools)	625
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**21**
Formula:	*Numerator / Denominator*	

Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	67
Denominator	Total number of schools	319
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**5000.9**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	
Numerator	Percentage	**5000.9**
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**66.23**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	
Numerator	Percentage	**66.23**
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**0.4**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	43
Denominator	Total population of the city	1073427
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**41.2**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	4422
Denominator	Total population of the city	1073427
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**30**
Description	Total response time for health-related distress calls received in the city	30

Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.32**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	3425
Denominator	Total population of the city	1073427
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.03**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	347
Denominator	Total population of the city	1073427
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**125.87**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	180
Denominator	Total length of road network in the city	143
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**30.74**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	330
Denominator	Total population of the city	1073427
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**80.3**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	265
Denominator	Total crimes recorded in the same year	330
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**10.43**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	112
Denominator	Total population of the city	1073427
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**20.37**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	86850
Denominator	Total VAT/GST collection during preceding year	4263.09
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**36.88**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	2742
Denominator	Total Professional Tax collection during preceding year	7434
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**533.85**

Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	347
Denominator	Number of construction permits during preceding year	0.65
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	9224
Denominator	Total labour force in the city	204664
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	0
Denominator	Total number of vendors in the city	5901
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**50.98**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	31072
Denominator	Total number of slum and EWS households in the city	609.53

Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**185.49**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	**185.49**
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**942.76**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	1011980000
Denominator	Total population of the city	1073427
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**11.15**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	11964000
Denominator	Total population of the city	1073427
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**19.94**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	34890000
Denominator	Total area of the city (total area of all land uses)	175000000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	1073427
Denominator	Area allocated for residential land use (in hectares)	158300000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**106.04**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	253678
Denominator	Total number of households in the city	239239
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	297409

Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**839**
Description	Total number of sustained electrical interruptions in a year	839
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.81**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	45
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	8000
Denominator	Total energy consumption from all sources	1084552698
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	53459.08333
Denominator	Total quantum of water and waste water handled during the period	6510
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.33**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	14688036
Denominator	Total number of street light installations	43320
Unit	kWh per light installation	

Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	118681
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	118681
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.54**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	1084552698
Denominator	Total population of the city	1073427
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.41**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	113
Denominator	Total area of the city (sq.km)	175
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.08**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	91
Denominator	Total population of the city	1073427
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**

Description	Mode share of public transport	5
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	143
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	Data Unavailable
Denominator	Total number of major transport interchanges in the city	4
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	37
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**Non-Computable**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	Data Unavailable
Denominator	Total number of major interchanges in the city	4
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**0**
Formula:	*Numerator / Denominator*	

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Numerator	Total number of signalised intersections that are synchronised	0
Denominator	Total number of signalised intersections in the city	20
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**0.2**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	39
Denominator	Total available on-street parking spaces in the city	19491
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**59.79**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	171
Denominator	Total length of road network in the city	286
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**166.67**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	25
Denominator	Total number of junctions/ intersections on major roads in the city	15
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**4.98**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	10
Denominator	Total number of public right-of-way areas in the city	201
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**44.17**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	105668
Denominator	Total number of households in the city	239239
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**202.16**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	217
Denominator	Total population of the city	1073427
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied[2]**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	300
Denominator	Total number of samples tested for water quality	300
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	Blank
Denominator	Quantum of water put into the distribution system (mld)	217
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**36.42**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	15695
Denominator	Total number of water connections in the city	43098
Unit	Percentage	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**12382.84**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	25261
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	204
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**98.36**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	191517
Denominator	Total number of properties in the city	194716
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**119.15**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	232000
Denominator	Total number of properties in the city	194716
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	0
Denominator	Total waste water generated in the city per day	5
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**Non-**
Formula:	*Numerator / Denominator*	

		Computable
Numerator	Quantum of waste water recycled or reused per day	0
Denominator	Total waste water received at treatment plants per day	0
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**338.46**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	484
Denominator	Total length of road network in the city	143
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**50.67**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	134390
Denominator	Total number of households and establishments in the city	265239
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**31.07**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	160
Denominator	Total quantum of MSW generated in the city	515
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	Data Unavailable
Denominator	Average MSW generated in the city (tons per month)	4800

Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**19.14**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	19.14
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**36.97**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	36.97
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**142**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	142
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	34
Denominator	Total number of noise samples	38
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	180
Denominator	Total number of samples tested	180

Unit	Percentage	
Benchmark	100%

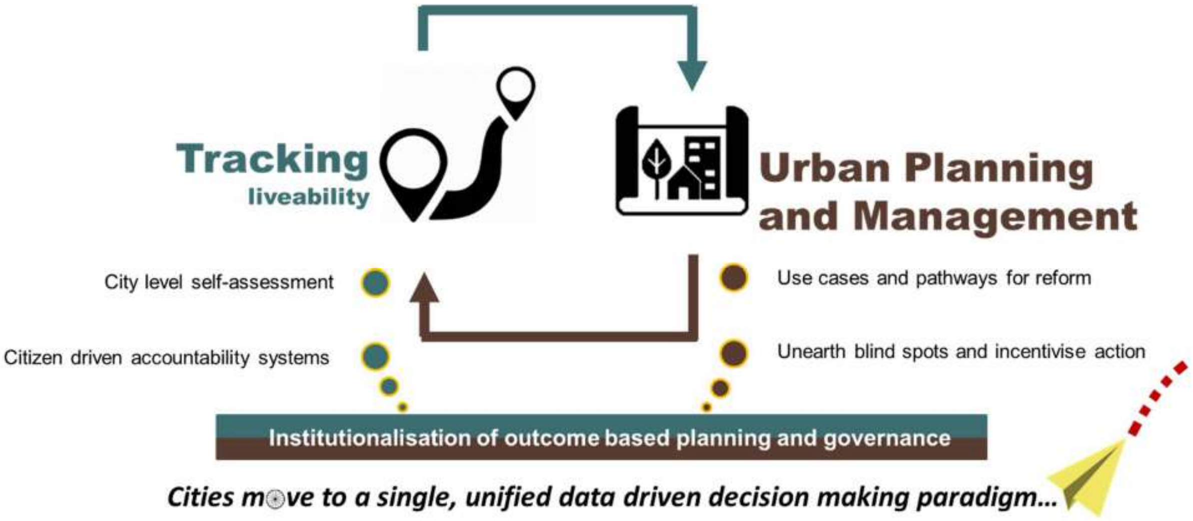
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart

cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).

ROURKELA

GEOGRAPHICAL PROFILE

State/Union Territory	Odisha	Total Geographical Area (Km²)	53.29	City Category	Small City

DEMOGRAPHIC PROFILE

Total Population	320040
Total Number of Households	70810

SOCIAL PROFILE

Education	Total Number of Schools	249
	Total Enrolment (Class 1 to 5)	37707
Health	Total Number of In-patient Beds	1781
	Total Health Workforce	1059
Safety and Security	Total Strength of Police Force	1687
	Total Number of CCTV Cameras	38
Heritage Sites	Total Number of Heritage Sites	1

ECONOMIC PROFILE

Total Population in Working Age Group	238733
Total Number of Industries	1183
Total Number of Commercial Enterprises	1687
Total Number of Hotels	70
Total Capital and Revenue Expenditure for the city in FY 2016-14 (INR Lakhs)	1570619000
Total VAT Collection in FY 2016-17 (INR Lakhs)	5425559000

PHYSICAL PROFILE			
	Water	Average Quantity of Water Supplied (MLD)	52.6
		Total Number of Water Connection	23895
	Sanitation Facilities	Total number of households with access to individual toilets in the city	57534
		Total number of households in the city with access to community toilets in the city	2800
	Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/ day)	10200
		Total number of households covered through door-to-door collection of solid waste	61413
	Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	48
		Daily average quantum of waste water treated by STPs in the city (MLD)	0
	Electricity	Total number of authorized electrical connections in the city	79629
		Total electricity supplied to the city (kWh)	288780000
	Public and Open Spaces	Total area covered by green spaces in the city (m^2)	787540.7
	Roads and Transport	Total Length of Road Network in the City (Km)	524.47
		Total length of arterial and sub-arterial road network in the city (Km)	78.268
		Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	30

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population

Pillars of Comprehensive Development	Category	Indicators
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart

Pillars of Comprehensive Development	Category	Indicators
		meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections

Pillars of Comprehensive Development	Category	Indicators
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

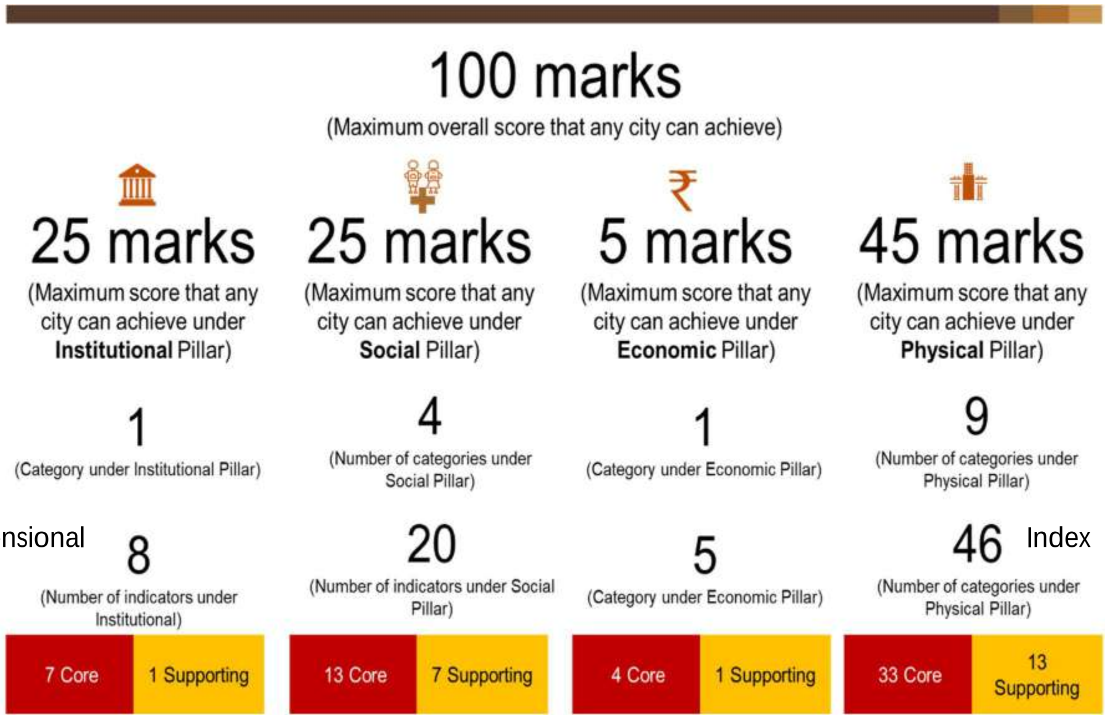
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks
(Maximum overall score that any city can achieve)
25 marks
(Maximum score that any city can achieve under Institutional Pillar)
25 marks
(Maximum score that any city can achieve under Social Pillar)
5 marks
(Maximum score that any city can achieve under Economic Pillar)
45 marks
(Maximum score that any city can achieve under Physical Pillar)
1
(Category under Institutional Pillar)
4
(Number of categories under Social Pillar)
1
(Category under Economic Pillar)
9
(Number of categories under Physical Pillar)
8
(Number of indicators under Institutional)
20
(Number of indicators under Social Pillar)
5
(Category under Economic Pillar)
46
(Number of categories under Physical Pillar)
7 Core
1 Supporting
13 Core
7 Supporting
4 Core
1 Supporting
33 Core
13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Rourkela Municipal Corporation Revenue Deptt., Sub-Collector Office
Urban Local Body	For Park and Recreation Related Questions	Rourkela Municipal Corporation
Urban Local Body	For Water Supply and Drainage related questions	Rourkela Municipal Corporation
Urban Local Body	For Heritage sites related data	District Tourist Office, Dept. of Tourism Rourkela Municipal Corporation
Urban Local Body	For Ecological sites related data	Rourkela Municipal Corporation
Urban Local Body	For Housing related data	Rourkela Municipal Corporation Rourkela Development Authority
Urban Local Body	For Building plan related data	Rourkela Municipal Corporation Rourkela Development Authority
Urban Local Body	For Roads related data	Rourkela Municipal Corporation Road & Building Superintendent Engineer
Urban Local Body	For Solid waste management related data	Rourkela Municipal Corporation
Urban Local Body	For IT services related data	Rourkela Municipal Corporation
Urban Local Body	For Vendor committee related data	Rourkela Municipal Corporation
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Public Health Officer, Odisha State Pollution Control Board
Development Authority	Building Infrastructure	Rourkela Municipal Corporation RDA/Smart City

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 06 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping

of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

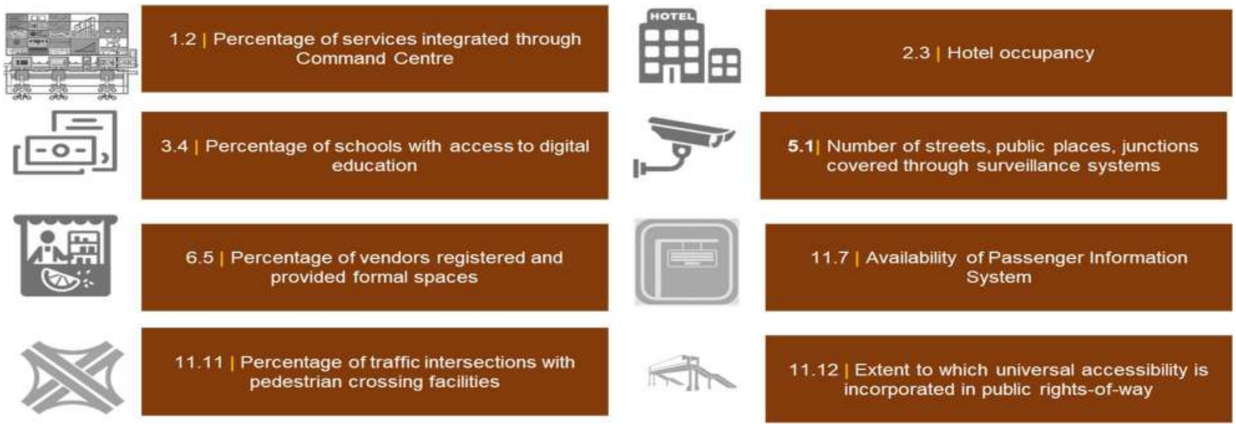
Data Owners	Number of Documents
Sales and Commercial Taxes	0
State Education Department	2
DISCOM/Electricity Department	0
Traffic and Police Department	0
Development Authority	0
Pollution Control Board	2
State Renewable Energy Department	0
Town and Country Planning	0
State Health Department	0
Transport Authority	1
Disaster Management	0
Urban Local Body	1
Total	6*

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:



1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1| Number of streets, public places, junctions covered through surveillance systems

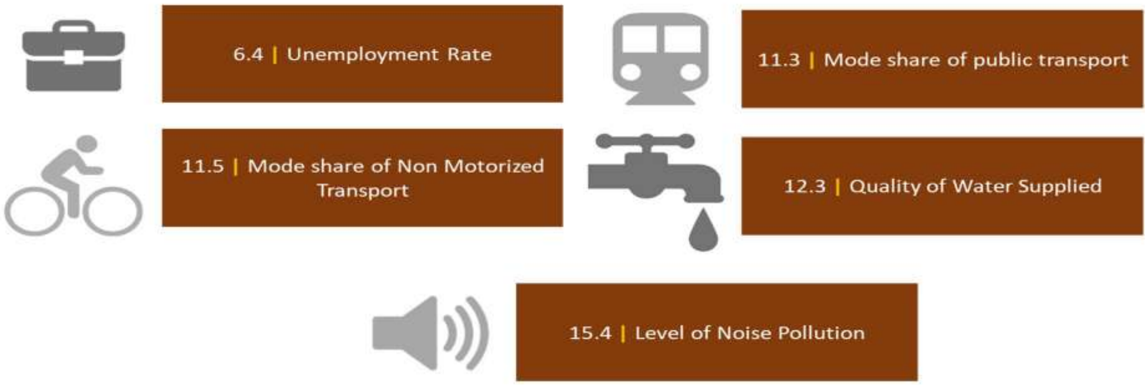
6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.



6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**60.78**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	1
	1.1c trade license	1
	1.1d solid waste management	0
	1.1e water supply	1
	1.1f sewerage/drainage	0
	1.1g fogging	0
	1.1h property tax	0.333333333
	1.1i professional tax	1
	1.1j information	0.846153846
	1.1k Grievance redressal	1
	1.1l electricity	0.5
	1.1m Building plan	0.222222222
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**0**
Description	Services integrated through an integrated or a singular operations command centre	0
Unit	Percentage	
Benchmark	100%	

Indicator No. 1.3	**Percentage of citizens using online services**	**10.8**
Description		
Sub Indicators	1.3a Building plan	NA
	1.3b Birth/Death Certificate	0
	1.3c water supply	NA
	1.3d solid waste management	0.00064367
	1.3e property tax	NA
	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	NA
	1.3i information	NA
	1.3j electricity	0.32337465
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**NC**
Description		
Sub Indicators	1.4a water supply	0
	1.4b solid waste	0
	1.4c street lights	0
	1.4d sewerage	0
	1.4e professional tax	NA
	1.4f parks and recreational spaces	0
	1.4g building plan	0

Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**139.7**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	85932438
Denominator	Total demand raised for the year	61511781
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**29.27**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	33384000
Denominator	Total O&M cost for providing water supply services during the year	114056000
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**42.75**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	1053152869
Denominator	Total expenditure (revenue and capital accounts) in the same year	2463589217
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	NA
Denominator	Total number of wards	40
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	0
Denominator	Total number of historic buildings/sites identified	1
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	0
Denominator	Total number of ecologically important sites identified in the city	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**23.57**
Description	Average Occupancy rate of Hotels	23.57142857
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0.08**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	1326309
Denominator	Total budget of the ULB (capital and revenue)	1570619000
Unit	Percentage	

Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**575**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	575
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**105.68**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	59749
Denominator	Total population in the age group of 6-14 years	56535
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**105.84**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	28281
Denominator	Total female population in the age group of 6-14 years	26720
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**65.12**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	37707
Denominator	Total number of teachers available for primary grades (public and private schools)	579
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**18.07**

Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	45
Denominator	Total number of schools	249
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**99.17**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	
Numerator	Percentage	**99.17**
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**104.49**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	
Numerator	Percentage	**104.49**
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**55.65**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	1781
Denominator	Total population of the city	320040
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**33.09**
Formula:	*Numerator / Denominator*	

Numerator	Total number of qualified healthcare professionals	1059
Denominator	Total population of the city	320040
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**33.59**
Description	Total response time for health-related distress calls received in the city	33.59
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**1.45**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	4648
Denominator	Total population of the city	320040
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.1**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	317
Denominator	Total population of the city	320040
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**7.25**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	38

Denominator	Total length of road network in the city	524.47
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**1058.31**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	3387
Denominator	Total population of the city	320040
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**17.01**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	576
Denominator	Total crimes recorded in the same year	3387
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**74.05**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	237
Denominator	Total population of the city	320040
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**0.38**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	20617000
Denominator	Total VAT/GST collection during preceding year	54049420
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**-20.94**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	-17603100
Denominator	Total Professional Tax collection during preceding year	84055325
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**-17.91**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	-53
Denominator	Number of construction permits during preceding year	2.96
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**

Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	2189
Denominator	Total labour force in the city	56535
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	0
Denominator	Total number of vendors in the city	2673
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**0.84**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	587
Denominator	Total number of slum and EWS households in the city	698.37
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**15.24**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	**11161221120000**
Unit	Percentage	

Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**2.46**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	787540.7
Denominator	Total population of the city	320040
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**6.42**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	2054780.11
Denominator	Total population of the city	320040
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**0.03**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	14140
Denominator	Total area of the city (total area of all land uses)	53290000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**8.18**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	320040
Denominator	Area allocated for residential land use (in hectares)	39110
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**95.07**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	67320
Denominator	Total number of households in the city	70810
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	NA
Denominator	Total number of electricity connections in the city	79629
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**2340**
Description	Total number of sustained electrical interruptions in a year	2340
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.81**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	2422
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	10
Denominator	Total energy consumption from all sources	288780000
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.3**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	1225242.583
Denominator	Total quantum of water and waste water handled during the period	1578
Unit	kWh per million litres	

Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.34**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	3575880
Denominator	Total number of street light installations	9081
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	Data Unavailable
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.78**
Formula:	*Numerator / Denominator*	

Numerator	Total energy consumption (for all uses) in the city	288780000
Denominator	Total population of the city	320040
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.69**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	59
Denominator	Total area of the city (sq.km)	53.29
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.13**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	43
Denominator	Total population of the city	320040
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	NA
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**5.72**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	30
Denominator	Total length of road network in the city	524.47
Unit	Percentage	
Benchmark	>=50	

Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**50**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	1
Denominator	Total number of major transport interchanges in the city	2
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	NA
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**Non-Computable**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	NA
Denominator	Total number of major interchanges in the city	2
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	NA
Denominator	Total number of signalised intersections in the city	1
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**25**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	1

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Denominator	Total available on-street parking spaces in the city	4
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**2.86**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	30
Denominator	Total length of road network in the city	1048.94
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	14
Denominator	Total number of junctions/ intersections on major roads in the city	14
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**31.01**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	49
Denominator	Total number of public right-of-way areas in the city	158
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**31.05**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	21983
Denominator	Total number of households in the city	70810
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**164.35**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	52.6
Denominator	Total population of the city	320040
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	0
Denominator	Total number of samples tested for water quality	1876
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**62.98**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	33.13
Denominator	Quantum of water put into the distribution system (mld)	52.6

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	0
Denominator	Total number of water connections in the city	23895
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	0
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	252
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**377.81**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	63276
Denominator	Total number of properties in the city	16748

Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**693.92**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	116218
Denominator	Total number of properties in the city	16748
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	0
Denominator	Total waste water generated in the city per day	48
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	0
Denominator	Total waste water received at treatment plants per day	0
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**7.58**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	39.73
Denominator	Total length of road network in the city	524.47
Unit	Percentage	

Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**87.04**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	63100
Denominator	Total number of households and establishments in the city	72497
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**85**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	10200
Denominator	Total quantum of MSW generated in the city	12000
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**0.39**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	1200
Denominator	Average MSW generated in the city (tons per month)	306000
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**6.3**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	6.3
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**13.5**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	13.5
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**97.3**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	97.3
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	50
Denominator	Total number of noise samples	96
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	Data Unavailable
Denominator	Total number of samples tested	60
Unit	Percentage	
Benchmark	100%

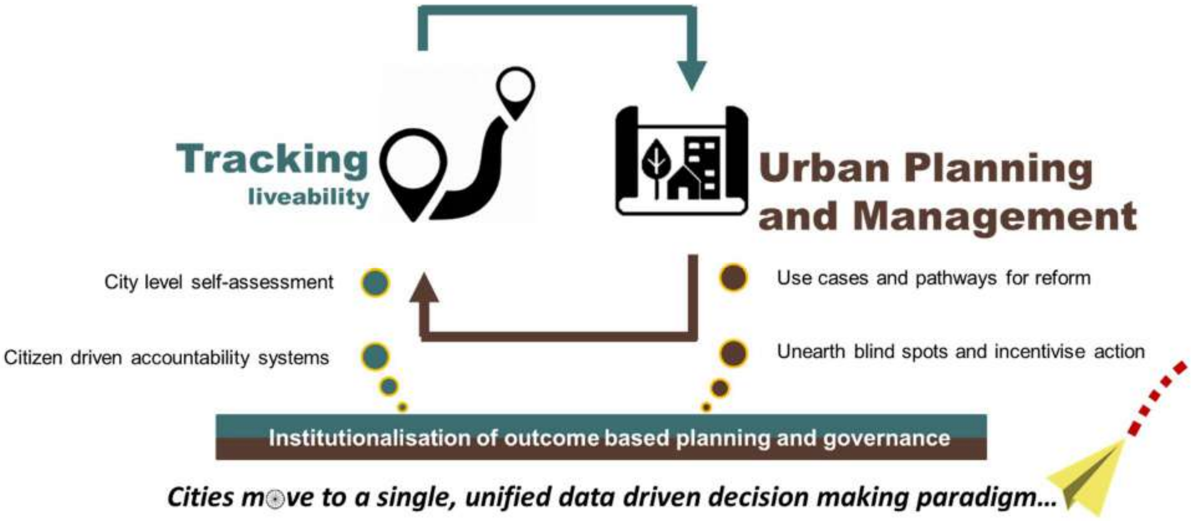
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance

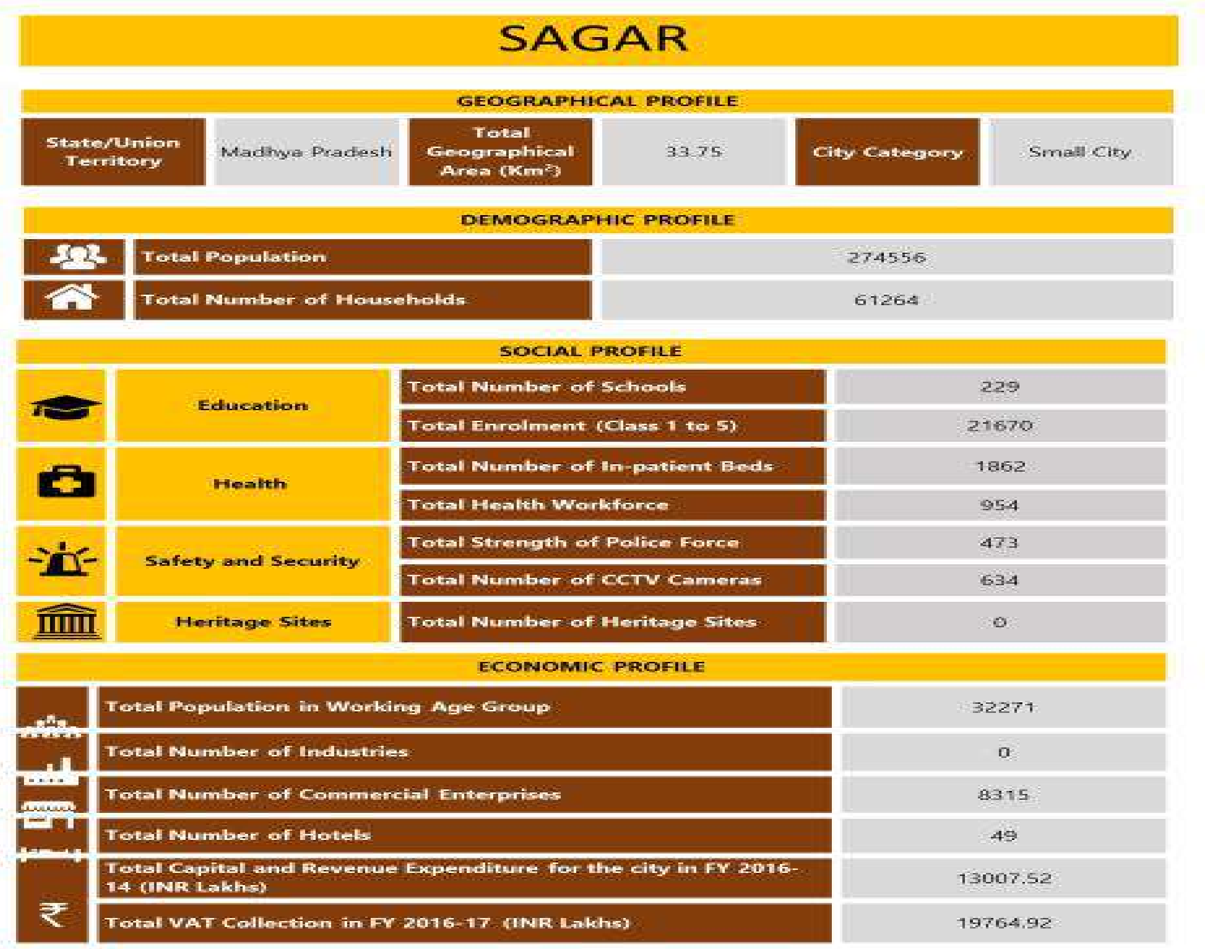
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart

cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



SAGAR

GEOGRAPHICAL PROFILE

State/Union Territory	Madhya Pradesh	Total Geographical Area (Km²)	33.75	City Category	Small City

DEMOGRAPHIC PROFILE

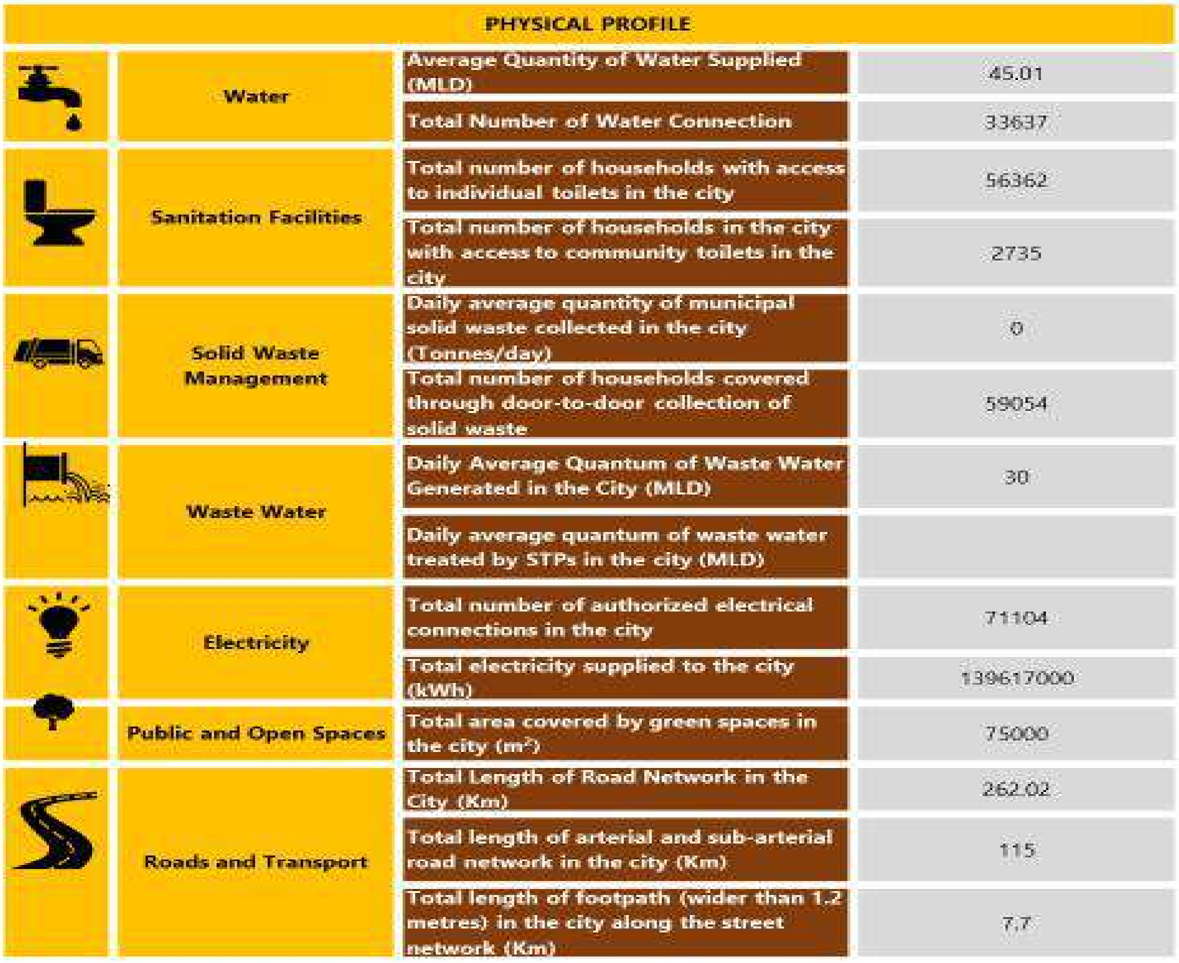
Total Population	274556
Total Number of Households	61264

SOCIAL PROFILE

Education	Total Number of Schools	229
	Total Enrolment (Class 1 to 5)	21670
Health	Total Number of In-patient Beds	1862
	Total Health Workforce	954
Safety and Security	Total Strength of Police Force	473
	Total Number of CCTV Cameras	634
Heritage Sites	Total Number of Heritage Sites	0

ECONOMIC PROFILE

Total Population in Working Age Group	32271
Total Number of Industries	0
Total Number of Commercial Enterprises	8315
Total Number of Hotels	49
Total Capital and Revenue Expenditure for the city in FY 2016-14 (INR Lakhs)	13007.52
Total VAT Collection in FY 2016-17 (INR Lakhs)	19764.92



PHYSICAL PROFILE			
	Water	Average Quantity of Water Supplied (MLD)	45.01
		Total Number of Water Connection	33637
	Sanitation Facilities	Total number of households with access to individual toilets in the city	56362
		Total number of households in the city with access to community toilets in the city	2735
	Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	0
		Total number of households covered through door-to-door collection of solid waste	59054
	Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	30
		Daily average quantum of waste water treated by STPs in the city (MLD)	
	Electricity	Total number of authorized electrical connections in the city	71104
		Total electricity supplied to the city (kWh)	139617000
	Public and Open Spaces	Total area covered by green spaces in the city (m^2)	75000
	Roads and Transport	Total Length of Road Network in the City (Km)	262.02
		Total length of arterial and sub-arterial road network in the city (Km)	115
		Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	7.7

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various ‘Category Sub-Indexes’ and a composite ‘City Liveability Index’ will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary

Pillars of Comprehensive Development	Category	Indicators
		education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density

Pillars of Comprehensive Development	Category	Indicators
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian

Pillars of Comprehensive Development	Category	Indicators
		crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

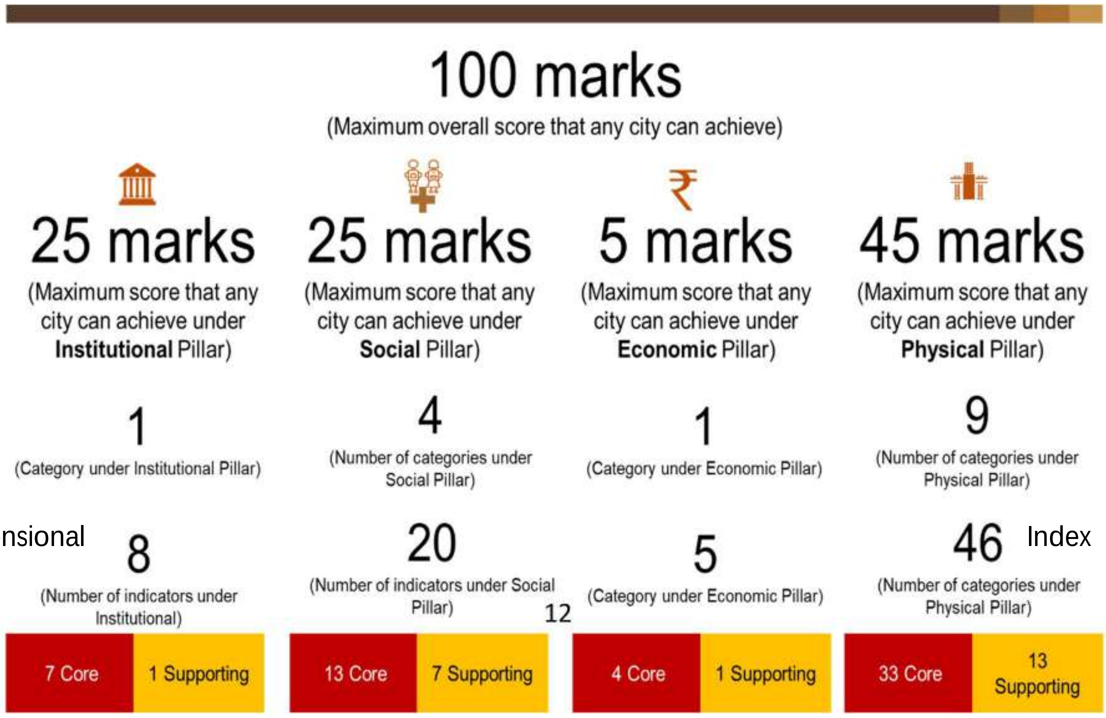
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	**Population range**
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks
(Maximum overall score that any city can achieve)
25 marks
(Maximum score that any city can achieve under Institutional Pillar)
25 marks
(Maximum score that any city can achieve under Social Pillar)
5 marks
(Maximum score that any city can achieve under Economic Pillar)
45 marks
(Maximum score that any city can achieve under Physical Pillar)
1
(Category under Institutional Pillar)
4
(Number of categories under Social Pillar)
1
(Category under Economic Pillar)
9
(Number of categories under Physical Pillar)
8
(Number of indicators under Institutional)
20
(Number of indicators under Social Pillar)
5
(Category under Economic Pillar)
46
(Number of categories under Physical Pillar)
7 Core
1 Supporting
13 Core
7 Supporting
4 Core
1 Supporting

13 Supporting

Dimensional Index

Methodology (DIM) has been used to compute scores for each indicator with reference to "maximum within the comparison group" or "absolute benchmarks". For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled

in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Sub categories	Data owners at city level
Urban Local Body	Accounts	Accounts Department, Sagar Municipal Corporation
	Park and Recreation	Sagar Municipal Corporation
	Water Supply and Drainage	Water Supply department, Sagar Municipal Corporation
	Heritage sites	Sagar Municipal Corporation
	Ecological sites	Sagar Municipal Corporation
	Housing	Housing section, Sagar Municipal Corporation
	Building plan	Sagar Municipal Corporation
	Roads	Lokakram Sakha, Sagar Municipal Corporation
	Solid waste management	Sagar Municipal Corporation
	IT services	IT Section, Sagar Municipal Corporation
	Vendor committee	Bazar Sakha, Sagar Municipal Corporation
	Any other departments involved in providing data for questions mentioned under Urban Local Body	
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Madhya Pradesh Pollution Control Board

Designated data owners	Sub categories	Data owners at city level
Development Authority	Building Infrastructure	MP Housing and Infrastructure development board
	Construction planning	MP Housing and Infrastructure development board
	Green Building	MP Housing and Infrastructure development board
	Rain water harvesting	MP Housing and Infrastructure development board
	Universal Design Principle	MP Housing and Infrastructure development board
DISCOM /Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Madhya Pradesh Poorv Kshetra Vidyut Vitaran Company limited
State Disaster management authority		District Disaster management Office
State Education Department		District Education Department
State Health Department	Health care professionals	Health Department
	Citizen Services	Health Department
	Disease Prevalence	Health Department
	Health Infrastructure	Health Department
State Renewable Energy Development Agency		Madhya Pradesh New and Renewable energy Department
State Sales / Commercial Taxes Department		Department of Commercial Taxes
Town and Country Planning Department	Land Use	Town and country planning
Traffic and Police Department		Traffic and Police Department, Sagar
Transport Authorities	Buses	Regional Transport Office
	Registered Vehicles	Madhya Pradesh Transport Department
	Sub urban rail transport	NA
	Mono Rail Authority	NA
	Tramways	NA
	Marine Transport Authority	NA

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 92 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	2
State Education Department	1
DISCOM/Electricity Department	3
Traffic and Police Department	5
Development Authority	1
Pollution Control Board	3
State Renewable Energy Department	1
Town and Country Planning	1
State Health Department	2
Transport Authority	1
Disaster Management	0
Urban Local Body	72
Total	92

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Benchmark	100%	

Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**0**
Description	Services integrated through an integrated or a singular operations command centre	0
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**0.23**
Description		
Sub Indicators	1.3a Building plan	0.001060747
	1.3b Birth/Death Certificate	0.005952338
	1.3c water supply	0.000201727
	1.3d solid waste management	NA
	1.3e property tax	0.004841443
	1.3f professional tax (RC)	0.002696078
	1.3g professional tax (EC)	0.001141171
	1.3h complaints/ grievance redressal	0.001571628
	1.3i information	7.28449E-05
	1.3j electricity	0.003157347
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**NC**
Description		
Sub Indicators	1.4a water supply	0
	1.4b solid waste	0
	1.4c street lights	0
	1.4d sewerage	NA
	1.4e professional tax	0
	1.4f parks and recreational spaces	0
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**164.61**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	662.55
Denominator	Total demand raised for the year	402.5
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**89.83**
Formula:	*Numerator / Denominator*	

Numerator	Total collection of user charges in water supply in a year	443.25
Denominator	Total O&M cost for providing water supply services during the year	493.41
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**149.39**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	-49160.145
Denominator	Total expenditure (revenue and capital accounts) in the same year	-32907.125
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	NA
Denominator	Total number of wards	48
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	1
Denominator	Total number of historic buildings/sites identified	1
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**0**
Formula:	*Numerator / Denominator*	

Numerator	Ecologically important sites covered through projects for restoration	0
Denominator	Total number of ecologically important sites identified in the city	1
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**Non-Computable**
Description	Average Occupancy rate of Hotels	Data Unavailable
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0.02**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	2.10062
Denominator	Total budget of the ULB (capital and revenue)	13007.52
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**109**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	109
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**64.99**
Formula:	*Numerator / Denominator*	

Numerator	Total enrolment in primary and secondary schools (public and private)	34039
Denominator	Total population in the age group of 6-14 years	52376
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**65.28**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	16230
Denominator	Total female population in the age group of 6-14 years	24863
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**15.29**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	21670
Denominator	Total number of teachers available for primary grades (public and private schools)	1417
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**5.24**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	12
Denominator	Total number of schools	229
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**68.1**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	68.09954206

Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**74.05**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	16731134
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**67.82**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	1862
Denominator	Total population of the city	274556
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**34.75**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	954
Denominator	Total population of the city	274556
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**2**
Description	Total response time for health-related distress calls received in the city	2
Unit	Minutes and seconds	
Benchmark	8 minutes	

Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.62**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	1711
Denominator	Total population of the city	274556
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.05**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	143
Denominator	Total population of the city	274556
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**241.97**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	634
Denominator	Total length of road network in the city	262.02
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**761.59**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	2091
Denominator	Total population of the city	274556
Unit	Crimes per lakh	

Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**21.95**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	459
Denominator	Total crimes recorded in the same year	2091
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**305.95**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	840
Denominator	Total population of the city	274556
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**1.11**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	217.79
Denominator	Total VAT/GST collection during preceding year	195.4713
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**-7.97**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year –	-37.5

	Total collection during preceding year)	
Denominator	Total Professional Tax collection during preceding year	470.76
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**-5.02**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	-32
Denominator	Number of construction permits during preceding year	6.38
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	33735
Denominator	Total labour force in the city	52376
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**200**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	4592
Denominator	Total number of vendors in the city	2296
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**26.14**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	7924
Denominator	Total number of slum and EWS households in the city	303.12
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**12.39** 62675172480
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	**Per capita availability of green spaces**	**0.27**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	75000
Denominator	Total population of the city	274556
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	**Per capita availability of public and recreational places**	**0.89**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	244458.26
Denominator	Total population of the city	274556

Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	NA
Denominator	Total area of the city (total area of all land uses)	33750000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.07**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	274556
Denominator	Area allocated for residential land use (in hectares)	4090000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**96.36**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	59037
Denominator	Total number of households in the city	61264
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	4
Denominator	Total number of electricity connections in the city	71104
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**135**
Description	Total number of sustained electrical interruptions in a year	135
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.81**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	0
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	145
Denominator	Total energy consumption from all sources	139617000
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**NC**
Formula:	*Numerator / Denominator*	

Numerator	Energy consumption on water supply and sewerage services	1238854.833
Denominator	Total quantum of water and waste water handled during the period	NA
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.34**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	2223370
Denominator	Total number of street light installations	7523
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	NA
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	0
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.8**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	139617000
Denominator	Total population of the city	274556
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	NA
Denominator	Total area of the city (sq.km)	33.75
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	NA
Denominator	Total population of the city	274556
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	40
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	NA
Denominator	Total length of road network in the city	262.02
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	NA
Denominator	Total number of major transport interchanges in the city	NA
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport[1]**	**To be computed**

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Description	Mode share of non-motorised transport	0.5
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**Non-Computable**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	NA
Denominator	Total number of major interchanges in the city	NA
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	0
Denominator	Total number of signalised intersections in the city	1
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	NA
Denominator	Total available on-street parking spaces in the city	1
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**1.47**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	7.7
Denominator	Total length of road network in the city	524.04
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	8
Denominator	Total number of junctions/ intersections on major roads in the city	0
Unit	Percentage	

Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	0
Denominator	Total number of public right-of-way areas in the city	135
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**54.01**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	33088
Denominator	Total number of households in the city	61264
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**163.94**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	45.01
Denominator	Total population of the city	274556
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	627
Denominator	Total number of samples tested for water quality	627
Unit	Percentage	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**20.02**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	9.01
Denominator	Quantum of water put into the distribution system (mld)	45.01
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	NA
Denominator	Total number of water connections in the city	33637
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**22.95**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	84
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	366
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**137.63**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	68227
Denominator	Total number of properties in the city	49572
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**113.7**
Formula:	*Numerator / Denominator*	

Numerator	Total number of properties with connection to waste water management systems	56362
Denominator	Total number of properties in the city	49572
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	NA
Denominator	Total waste water generated in the city per day	30
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	NA
Denominator	Total waste water received at treatment plants per day	NA
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**30.53**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	80
Denominator	Total length of road network in the city	262.02
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**96.82**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	67369
Denominator	Total number of households and establishments in the city	69579
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private	0

	operator	
Denominator	Total quantum of MSW generated in the city	84.99
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	NA
Denominator	Average MSW generated in the city (tons per month)	0
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**3.58**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	3.582
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**15.68**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	15.684
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**82.59**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	82.588
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	1869
Denominator	Total number of noise samples	1869

Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	63
Denominator	Total number of samples tested	63
Unit	Percentage

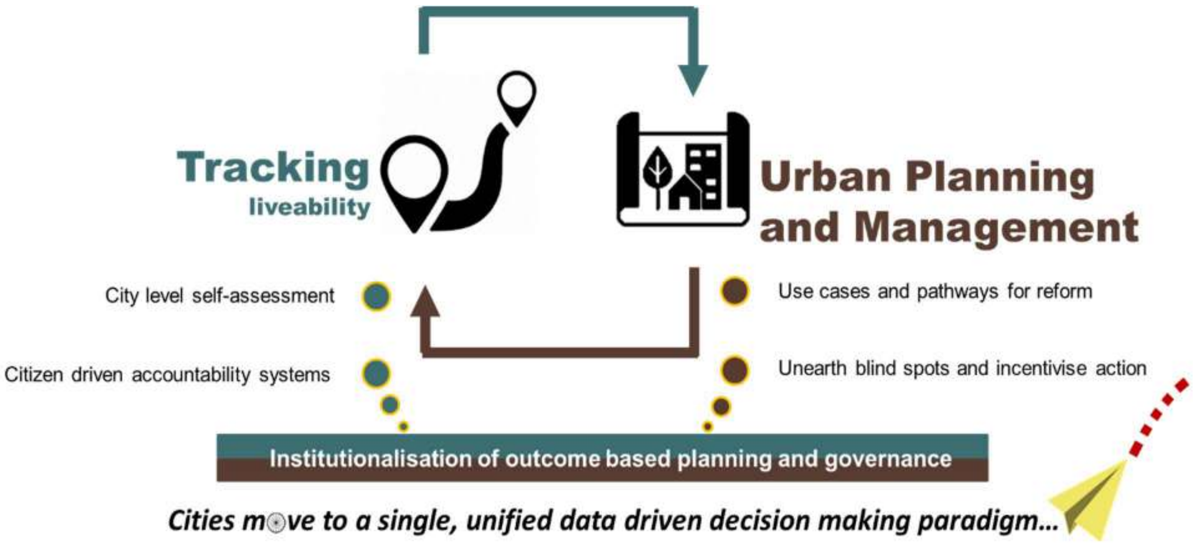
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

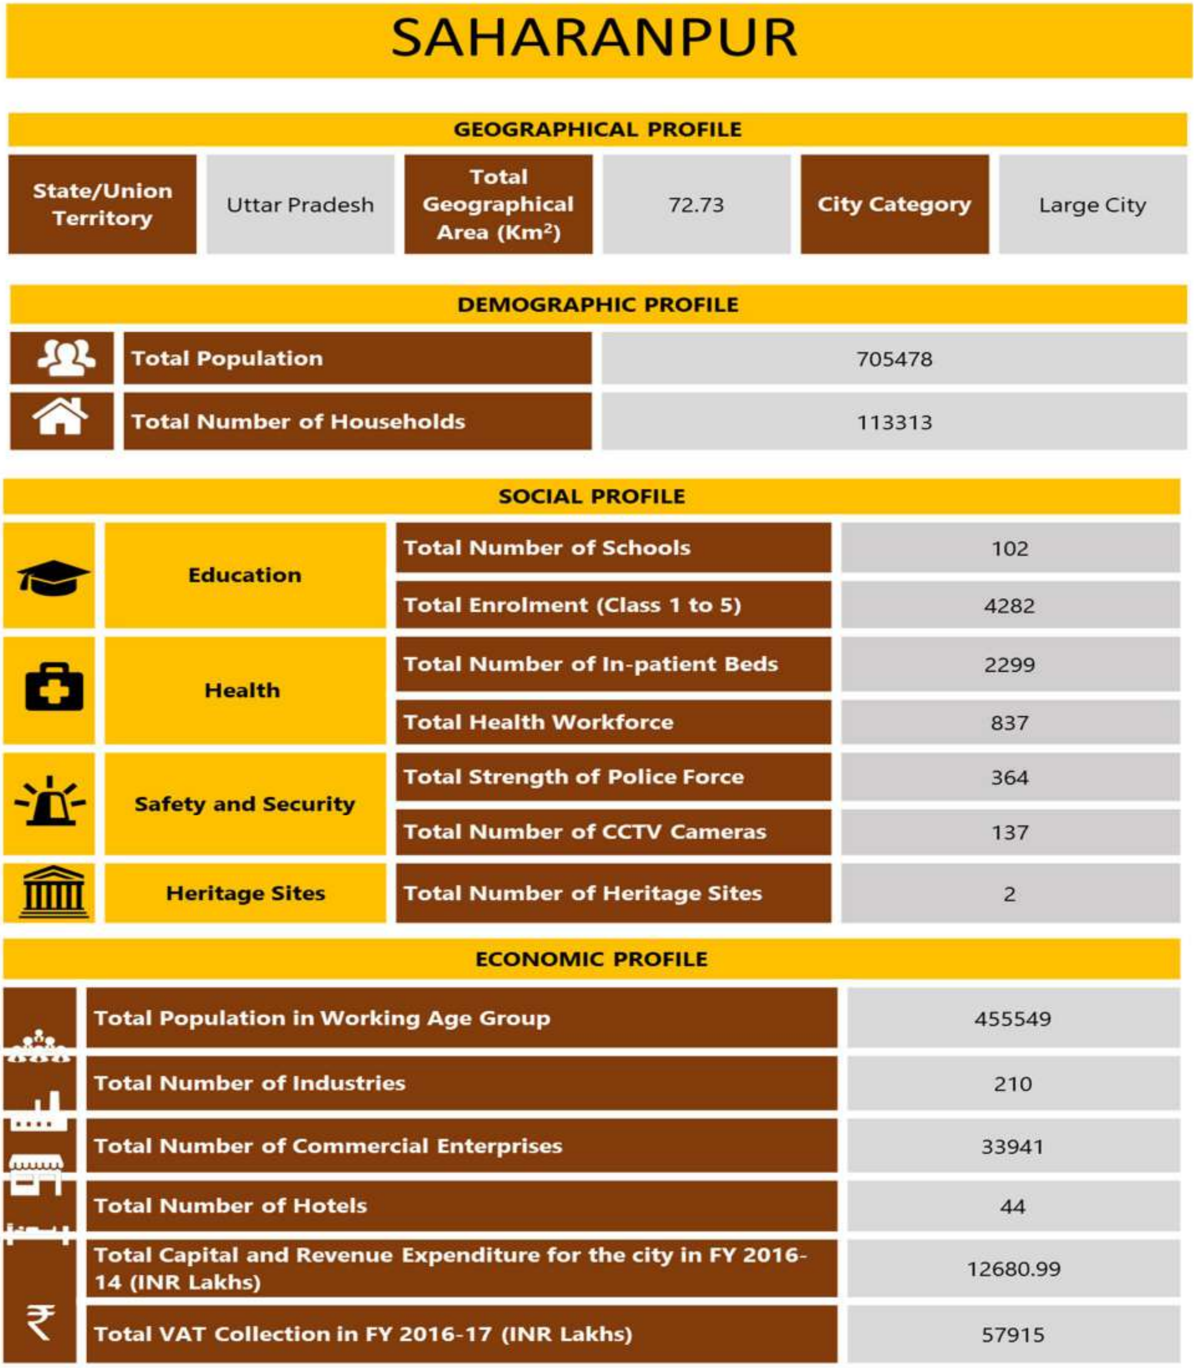


Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



SAHARANPUR

GEOGRAPHICAL PROFILE

State/Union Territory	Uttar Pradesh	**Total Geographical Area (Km^2)**	72.73	**City Category**	Large City

DEMOGRAPHIC PROFILE

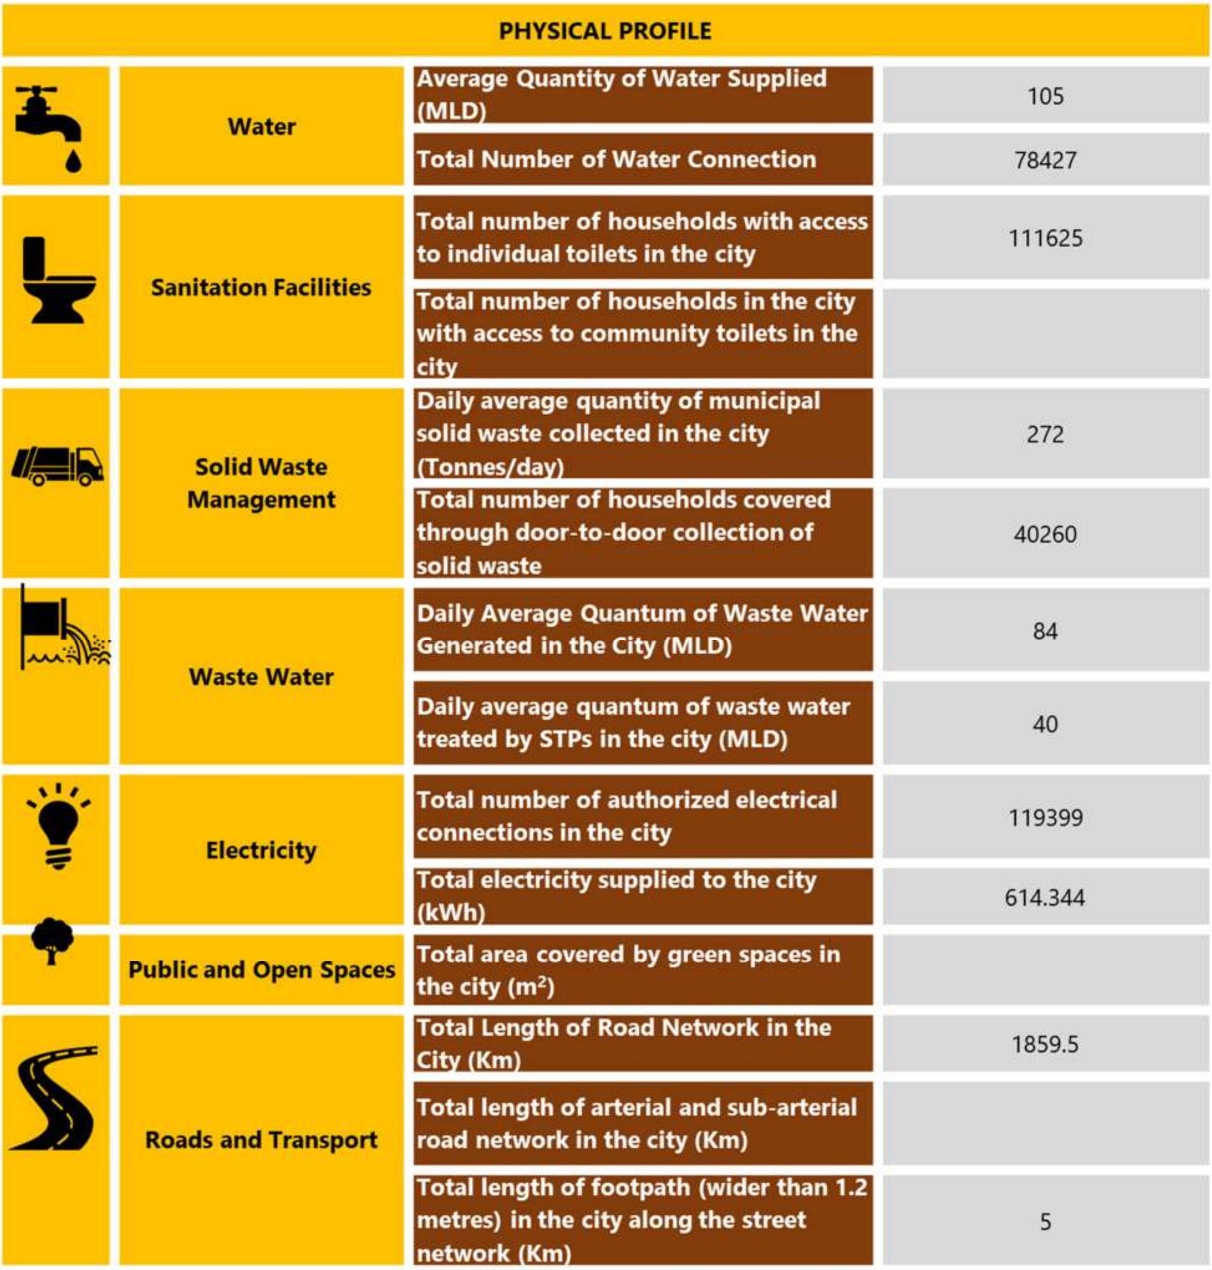
Total Population	705478
Total Number of Households	113313

SOCIAL PROFILE

Education	**Total Number of Schools**	102
	Total Enrolment (Class 1 to 5)	4282
Health	**Total Number of In-patient Beds**	2299
	Total Health Workforce	837
Safety and Security	**Total Strength of Police Force**	364
	Total Number of CCTV Cameras	137
Heritage Sites	**Total Number of Heritage Sites**	2

ECONOMIC PROFILE

Total Population in Working Age Group	455549
Total Number of Industries	210
Total Number of Commercial Enterprises	33941
Total Number of Hotels	44
Total Capital and Revenue Expenditure for the city in FY 2016-14 (INR Lakhs)	12680.99
Total VAT Collection in FY 2016-17 (INR Lakhs)	57915



PHYSICAL PROFILE		
Water	Average Quantity of Water Supplied (MLD)	105
	Total Number of Water Connection	78427
Sanitation Facilities	Total number of households with access to individual toilets in the city	111625
	Total number of households in the city with access to community toilets in the city	
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	272
	Total number of households covered through door-to-door collection of solid waste	40260
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	84
	Daily average quantum of waste water treated by STPs in the city (MLD)	40
Electricity	Total number of authorized electrical connections in the city	119399
	Total electricity supplied to the city (kWh)	614.344
Public and Open Spaces	Total area covered by green spaces in the city (m^2)	
Roads and Transport	Total Length of Road Network in the City (Km)	1859.5
	Total length of arterial and sub-arterial road network in the city (Km)	
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	5

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various ‘Category Sub-Indexes’ and a composite ‘City Liveability Index’ will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education

Pillars of Comprehensive Development	Category	Indicators
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage

Pillars of Comprehensive Development	Category	Indicators
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection

Pillars of Comprehensive Development	Category	Indicators
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

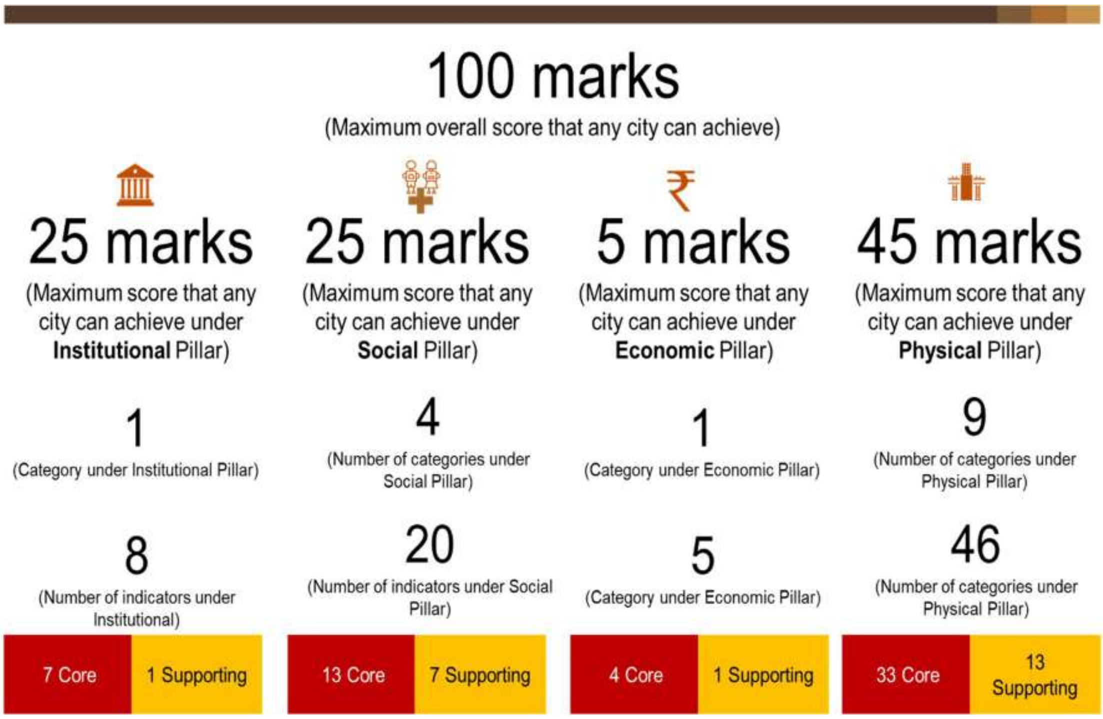
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks
(Maximum overall score that any city can achieve)

25 marks	25 marks	5 marks	45 marks
(Maximum score that any city can achieve under **Institutional** Pillar)	(Maximum score that any city can achieve under **Social** Pillar)	(Maximum score that any city can achieve under **Economic** Pillar)	(Maximum score that any city can achieve under **Physical** Pillar)
1 (Category under Institutional Pillar)	4 (Number of categories under Social Pillar)	1 (Category under Economic Pillar)	9 (Number of categories under Physical Pillar)
8 (Number of indicators under Institutional)	20 (Number of indicators under Social Pillar)	5 (Category under Economic Pillar)	46 (Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{\text{indicator value for the city} - \text{indicator value for the worst performing city}}{\text{benchmark} - \text{indicator value for the worst performing city}}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning

department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Accounts department Nagar nigam Shaharanpur
Urban Local Body	For Park and Recreation Related Questions	Udyan vibhag Nagar nigam Shaharanpur
Urban Local Body	For Water Supply and Drainage related questions	Jal Nigam/Jalkal vibhag Nagar nigam Shaharanpur
Urban Local Body	For Heritage sites related data	Archeological survey of India /in charge in ULB
Urban Local Body	For Ecological sites related data	Forest Department Shaharanpur
Urban Local Body	For Housing related data	Development Authority / Nirmaan Vibhag Nagar Nigam Shaharanpur
Urban Local Body	For Building plan related data	Development Authority Shaharanpur
Urban Local Body	For Roads related data	Public Works Department / Nirmaan Vibhag Nagar Nigam Shaharanpur
Urban Local Body	For Solid waste management related data	Health Department Nagar Nigam Shaharanpur
Urban Local Body	For IT services related data	Computer Department. Nagar Nigam Shaharanpur
Urban Local Body	For Vendor committee related data	District Urban Development Agency(DUDA) Shaharanpur
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	Public Works Department ,Employment Exchange, District urban development Agency Shaharanpur
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Uttar Pradesh pollution Control Board Shaharanpur
Development Authority	Building Infrastructure	Moradabad development Authority Shaharanpur
	Construction planning	Moradabad development Authority Shaharanpur

Designated data owners	Subcategories	Data owners at city level
	Green Building	Moradabad development Authority Shaharanpur
	Rain water harvesting	Moradabad development Authority Shaharanpur
	Universal Design Principle	Moradabad development Authority Shaharanpur
DISCOM /Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Uttar Pradesh Power Corporation Ltd Shaharanpur
State Disaster management authority		Shaharanpur Disaster Management in UP ADM (FR]
State Education Department		Basic Siksha Adhikari/district inspector of school Shaharanpur (DIOS)
State Health Department	Health care professionals	UP State Health Department Shaharanpur (CMO)
	Citizen Services	UP State Health Department Shaharanpur (CMO)
	Disease Prevalence	UP State Health Department Shaharanpur (CMO)
	Health Infrastructure	UP State Health Department Shaharanpur (CMO)
State Renewable Energy Development Agency	Renewable Energy	State Renewable Energy Develop. Agency(NEDA)
State Sales / Commercial Taxes Department		Commercial Taxes Department Shaharanpur Zone
Town and Country Planning Department	Land Use	Town and Country Planning Department Shaharanpur
Traffic and Police Department		Traffic police, Civil police & Grand Railway police Shaharanpur
Transport Authorities	Buses	Uttar Pradesh State transport Corporation & Regional Transport Office Shaharanpur
	Registered Vehicles	Regional Transport Office Shaharanpur
	Sub urban rail transport	N A
	Mono Rail Authority	N A
	Tramways	N A
	Marine Transport Authority	N A

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 12 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

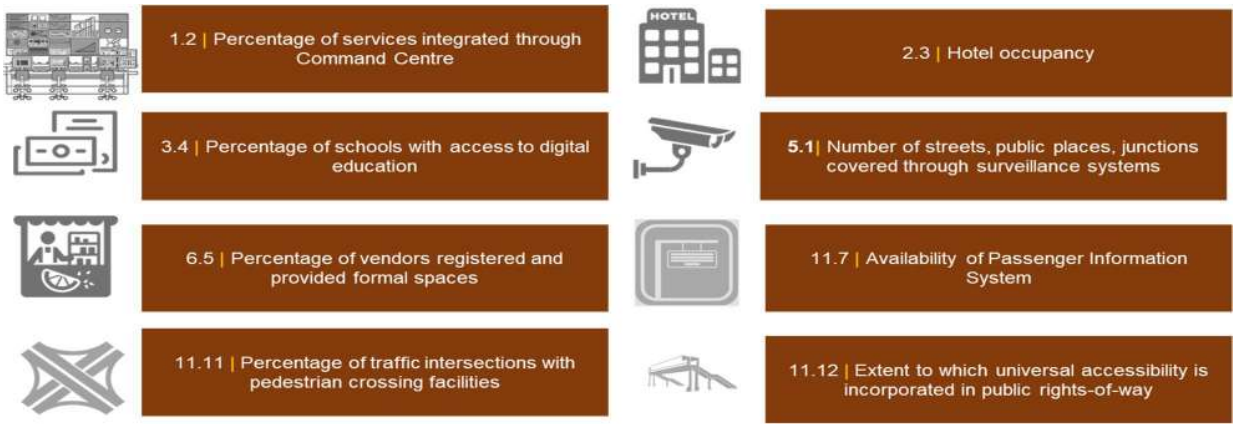
Data Owners	Number of Documents
Sales and Commercial Taxes	**1**
State Education Department	**1**
DISCOM/Electricity Department	**1**
Traffic and Police Department	**1**
Development Authority	**1**
Pollution Control Board	**1**
State Renewable Energy Department	**1**
Town and Country Planning	**1**
State Health Department	**1**
Transport Authority	**1**
Disaster Management	**1**
Urban Local Body	**1**
Total	**12***

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:



1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

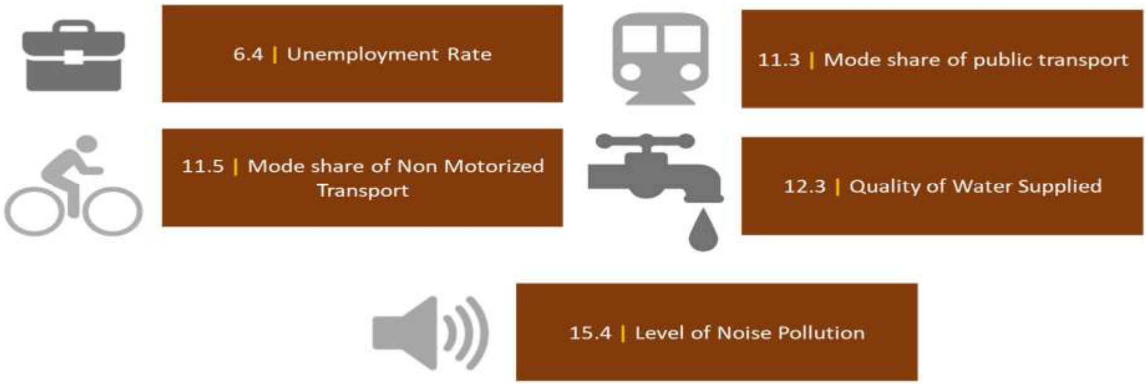
6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.



6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**57.79**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	1
	1.1c trade license	1
	1.1d solid waste management	0
	1.1e water supply	0.666666667
	1.1f sewerage/drainage	0
	1.1g fogging	0
	1.1h property tax	0.666666667

Sub Indicators	1.4a water supply	0
	1.4b solid waste	3
	1.4c street lights	8
	1.4d sewerage	7.5
	1.4e professional tax	0
	1.4f parks and recreational spaces	0
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**98**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	1114.88
Denominator	Total demand raised for the year	1137.63
Unit	Percentage	

Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	0
Denominator	Total O&M cost for providing water supply services during the year	442.6
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**27.39**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	8047.79
Denominator	Total expenditure (revenue and capital accounts) in the same year	29386.27
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	0
Denominator	Total number of wards	70
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	0
Denominator	Total number of historic buildings/sites identified	0

Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	0
Denominator	Total number of ecologically important sites identified in the city	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**Non-Computable**
Description	Average Occupancy rate of Hotels	Data Unavailable
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0.24**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	30.48
Denominator	Total budget of the ULB (capital and revenue)	12680.99
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**1**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	1
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**3.06**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	4603

Denominator	Total population in the age group of 6-14 years	150469
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**3.41**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	2378
Denominator	Total female population in the age group of 6-14 years	69682
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	4282
Denominator	Total number of teachers available for primary grades (public and private schools)	0
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	0
Denominator	Total number of schools	102
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**92.91**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	92.90805809
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**61.73**

Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	8352
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**32.59**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	2299
Denominator	Total population of the city	705478
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**11.86**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	837
Denominator	Total population of the city	705478
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**30**
Description	Total response time for health-related distress calls received in the city	30
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**1.57**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	11095
Denominator	Total population of the city	705478
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.02**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	162
Denominator	Total population of the city	705478

Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**7.37**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	137
Denominator	Total length of road network in the city	1859.5
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**192.49**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	1358
Denominator	Total population of the city	705478
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**14.29**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	194
Denominator	Total crimes recorded in the same year	1358
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**5.39**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	38
Denominator	Total population of the city	705478
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**-10.92**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	-7101
Denominator	Total VAT/GST collection during preceding year	650.16
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	0
Denominator	Total Professional Tax collection during preceding year	0
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	0
Denominator	Number of construction permits during preceding year	0
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	44645
Denominator	Total labour force in the city	150469
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in	

	this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**24.62**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	2000
Denominator	Total number of vendors in the city	8124
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**8.51**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	2082
Denominator	Total number of slum and EWS households in the city	244.63
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**Non-Compuatble**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	Data Unavailable
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	Data Unavailable
Denominator	Total population of the city	705478
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**Non-**

Formula:	*Numerator / Denominator*	**Computable**
Numerator	Total area of public and recreational places (sq.m.)	Data Unavailable
Denominator	Total population of the city	705478
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**28.16**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	20480000
Denominator	Total area of the city (total area of all land uses)	72730000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.02**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	705478
Denominator	Area allocated for residential land use (in hectares)	34349100
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**82.42**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	93395
Denominator	Total number of households in the city	113313
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0.02**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	23
Denominator	Total number of electricity connections in the city	119399
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**368**
Description	Total number of sustained electrical interruptions in a year	368
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.81**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	4104
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	135.8
Denominator	Total energy consumption from all sources	614.344
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	3823.478333
Denominator	Total quantum of water and waste water handled during the period	4350
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be	

	treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	1620
Denominator	Total number of street light installations	23514
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	0
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	614.344
Denominator	Total population of the city	705478
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.58**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	795
Denominator	Total area of the city (sq.km)	72.73
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.95**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	673
Denominator	Total population of the city	705478

Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	1859.5
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**33.33**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	1
Denominator	Total number of major transport interchanges in the city	3
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport[1]**	**To be computed**
Description	Mode share of non-motorised transport	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**0.67**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	2
Denominator	Total number of major interchanges in the city	3
Unit	Percentage	

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	0
Denominator	Total number of signalised intersections in the city	4
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	0
Denominator	Total available on-street parking spaces in the city	7
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**0.13**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	5
Denominator	Total length of road network in the city	3719
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	Data Unavailable
Denominator	Total number of junctions/ intersections on major roads in the city	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	0
Denominator	Total number of public right-of-way areas in the city	89
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**37.78**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	42807
Denominator	Total number of households in the city	113313
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**148.84**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	105
Denominator	Total population of the city	705478
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	0
Denominator	Total number of samples tested for water quality	2681
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**38.1**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	40
Denominator	Quantum of water put into the distribution system (mld)	105
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	0

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Denominator	Total number of water connections in the city	78427
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**22.92**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	22
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	96
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**98.51**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	111625
Denominator	Total number of properties in the city	113314
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**17.97**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	20365
Denominator	Total number of properties in the city	113314
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	84
Denominator	Total waste water generated in the city per day	84
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**0**

Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	0
Denominator	Total waste water received at treatment plants per day	84
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	0
Denominator	Total length of road network in the city	1859.5
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**30.07**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	44286
Denominator	Total number of households and establishments in the city	147254
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	272
Denominator	Total quantum of MSW generated in the city	272
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**0.72**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	59.15
Denominator	Average MSW generated in the city (tons per month)	8160
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**15.04**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	15.04
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**28.63**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	28.63
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**173.22**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	173.22
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	5
Denominator	Total number of noise samples	40
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	0
Denominator	Total number of samples tested	144
Unit	Percentage	
Benchmark	100%

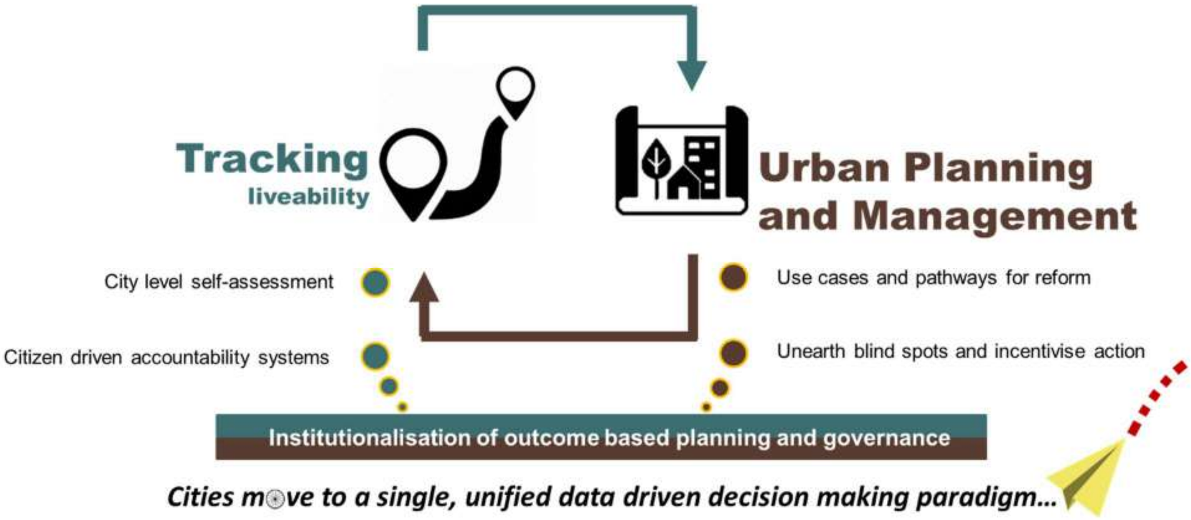
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

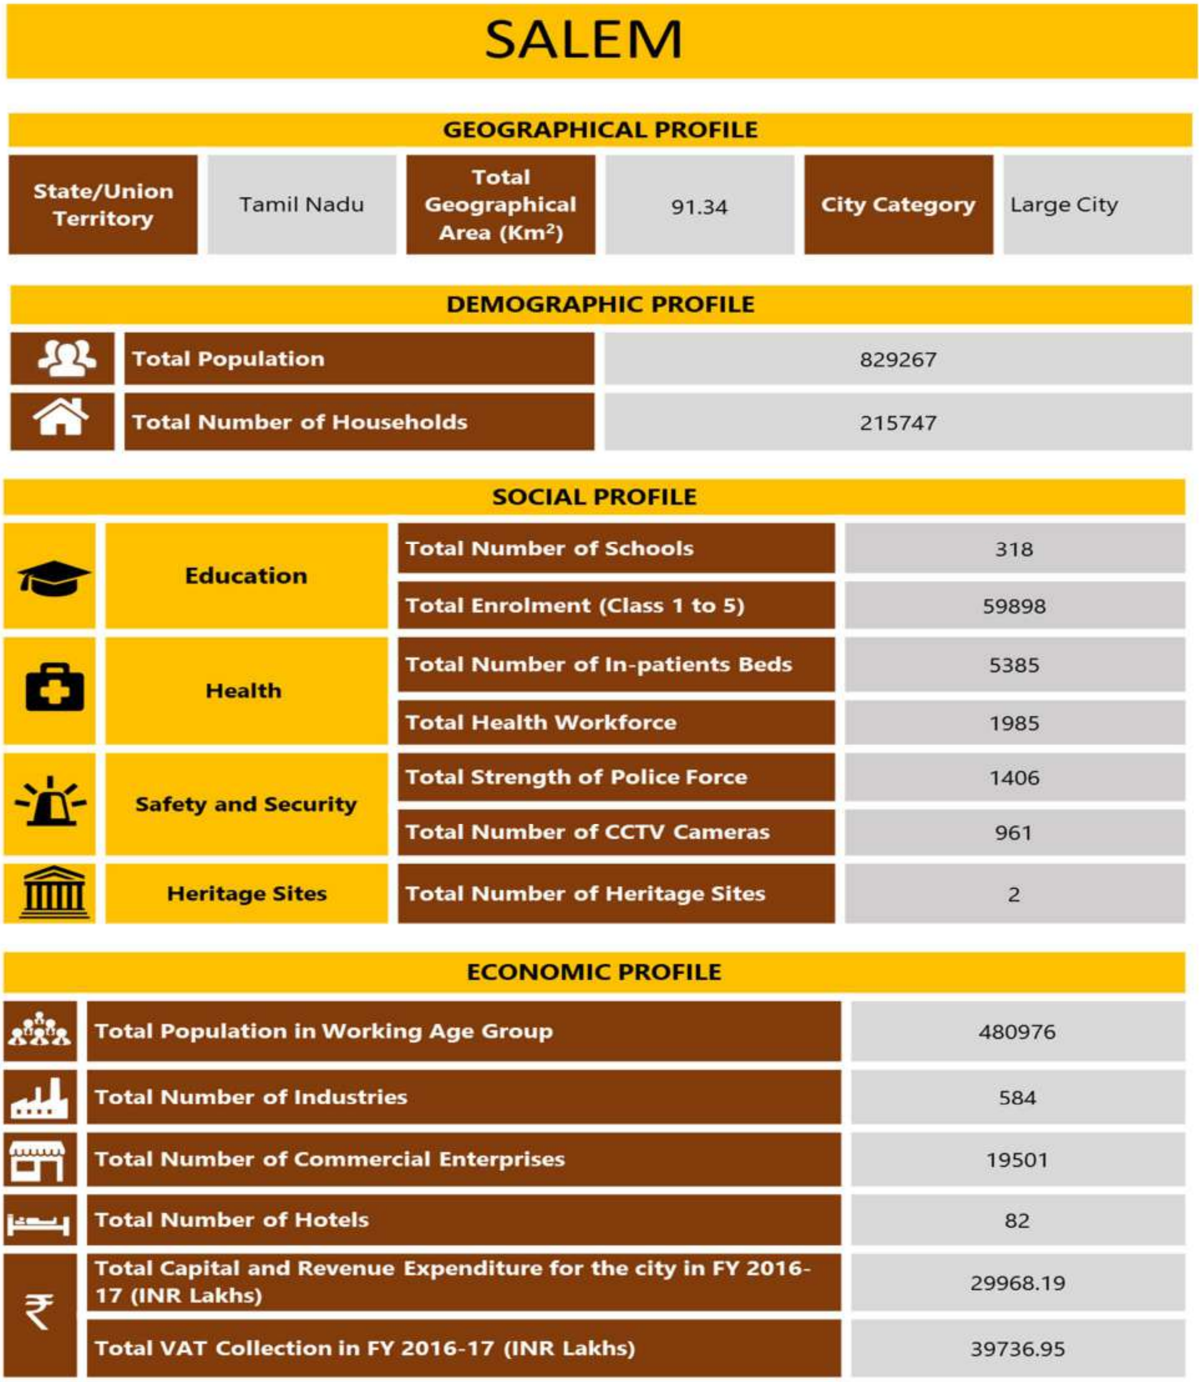


Tracking
liveability
Urban Planning and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



SALEM

GEOGRAPHICAL PROFILE

State/Union Territory	Tamil Nadu	**Total Geographical Area (Km^2)**	91.34	**City Category**	Large City

DEMOGRAPHIC PROFILE

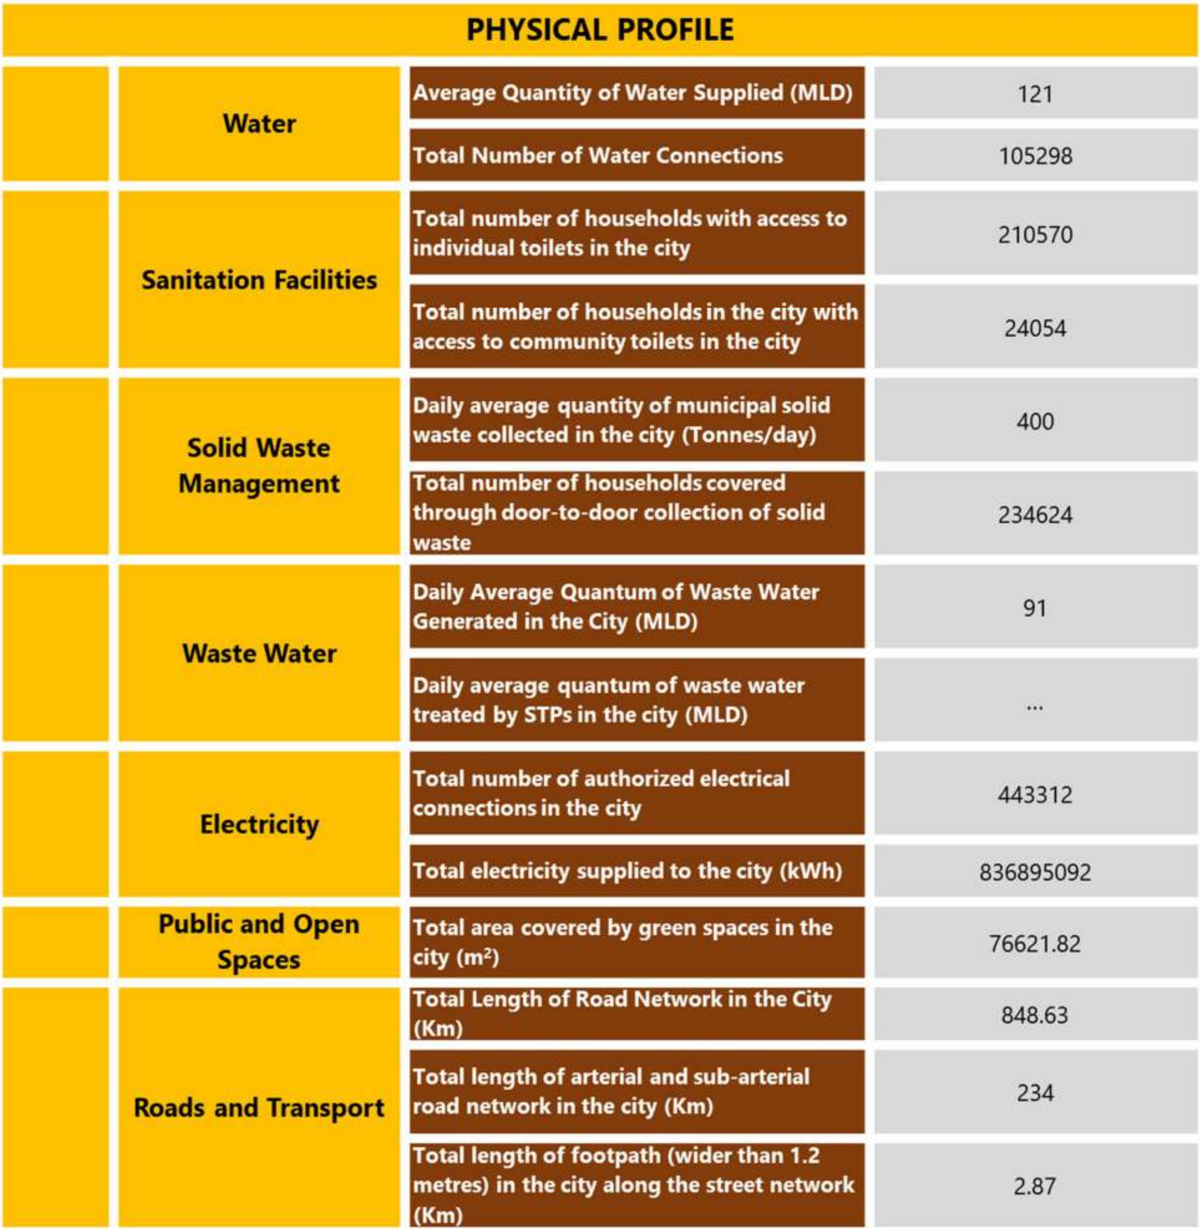
Total Population	829267
Total Number of Households	215747

SOCIAL PROFILE

Education	**Total Number of Schools**	318
	Total Enrolment (Class 1 to 5)	59898
Health	**Total Number of In-patients Beds**	5385
	Total Health Workforce	1985
Safety and Security	**Total Strength of Police Force**	1406
	Total Number of CCTV Cameras	961
Heritage Sites	**Total Number of Heritage Sites**	2

ECONOMIC PROFILE

Total Population in Working Age Group	480976
Total Number of Industries	584
Total Number of Commercial Enterprises	19501
Total Number of Hotels	82
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	29968.19
Total VAT Collection in FY 2016-17 (INR Lakhs)	39736.95



PHYSICAL PROFILE

	Water	Average Quantity of Water Supplied (MLD)	121
		Total Number of Water Connections	105298
	Sanitation Facilities	Total number of households with access to individual toilets in the city	210570
		Total number of households in the city with access to community toilets in the city	24054
	Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	400
		Total number of households covered through door-to-door collection of solid waste	234624
	Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	91
		Daily average quantum of waste water treated by STPs in the city (MLD)	...
	Electricity	Total number of authorized electrical connections in the city	443312
		Total electricity supplied to the city (kWh)	836895092
	Public and Open Spaces	Total area covered by green spaces in the city (m^2)	76621.82
	Roads and Transport	Total Length of Road Network in the City (Km)	848.63
		Total length of arterial and sub-arterial road network in the city (Km)	234
		Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	2.87

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population

Pillars of Comprehensive Development	Category	Indicators
		enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services

Pillars of Comprehensive Development	Category	Indicators
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting

Pillars of Comprehensive Development	Category	Indicators
		facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

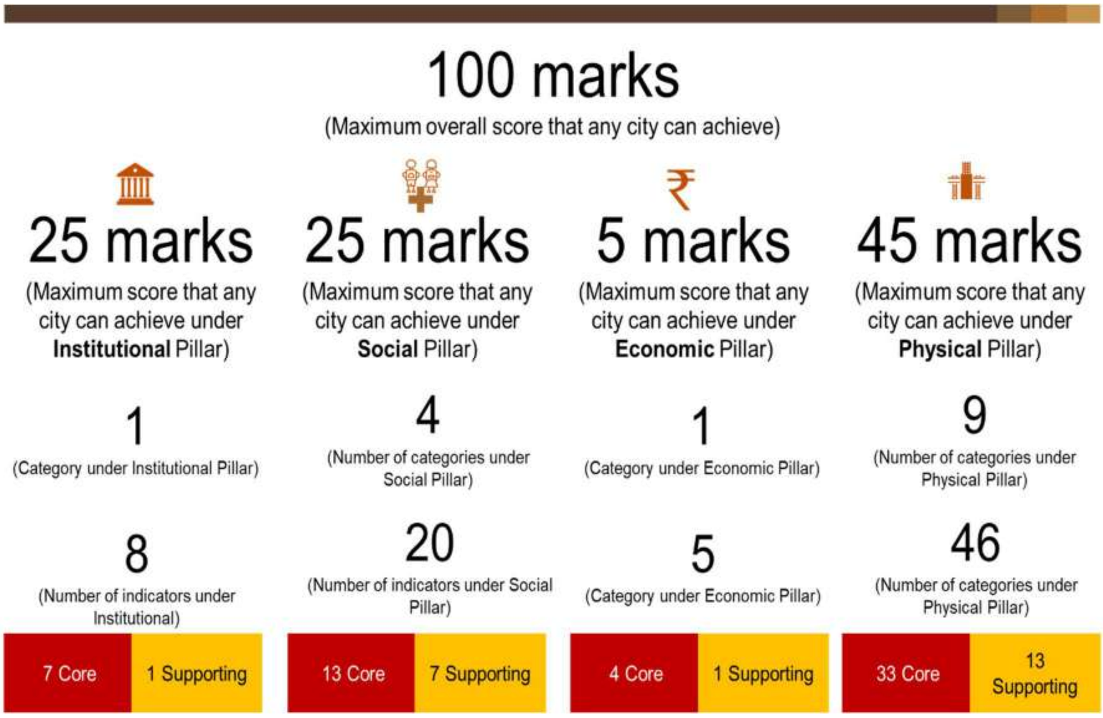
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks
(Maximum overall score that any city can achieve)

25 marks
(Maximum score that any city can achieve under **Institutional** Pillar)
1
(Category under Institutional Pillar)
8
(Number of indicators under Institutional)
7 Core | 1 Supporting

25 marks
(Maximum score that any city can achieve under **Social** Pillar)
4
(Number of categories under Social Pillar)
20
(Number of indicators under Social Pillar)
13 Core | 7 Supporting

5 marks
(Maximum score that any city can achieve under **Economic** Pillar)
1
(Category under Economic Pillar)
5
(Category under Economic Pillar)
4 Core | 1 Supporting

45 marks
(Maximum score that any city can achieve under **Physical** Pillar)
9
(Number of categories under Physical Pillar)
46
(Number of categories under Physical Pillar)
33 Core | 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Urban Local Body accounts department
Urban Local Body	For Park and Recreation Related Questions	Urban Local Body Town planning
Urban Local Body	For Water Supply and Drainage related questions	Urban Local Body Engineering section
Urban Local Body	For Heritage sites related data	Urban Local Body
Urban Local Body	For Ecological sites related data	Urban Local Body
Urban Local Body	For Housing related data	Slum Control Board and Health section
Urban Local Body	For Building plan related data	Town planning
Urban Local Body	For Roads related data	Urban Local Body Engineering section
Urban Local Body	For Solid waste management related data	Public Health section
Urban Local Body	For IT services related data	IT Section
Urban Local Body	For Vendor committee related data	Public Health section
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	No
Central / state Pollution control	Water Quality, Air Quality, Noise Quality	Pollution control Board

Designated data owners	Subcategories	Data owners at city level
Board		
Development Authority	Building Infrastructure	Development Authority
	Construction planning	Development Authority
	Green Building	Development Authority
	Rain water harvesting	Development Authority
	Universal Design Principle	Development Authority
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	DISCOM/Electricity Board
State Disaster management authority		State Disaster management authority
State Education Department		State Education Department
State Health Department	Health care professionals	Health Department
	Citizen Services	Health Department
	Disease Prevalence	Health Department
	Health Infrastructure	Health Department
State Renewable Energy Development Agency		DISCOM/Electricity Board
State Sales / Commercial Taxes Department		State Sales / Commercial Taxes Department
Town and Country Planning Department	Land Use	Town and Country Planning Department
Traffic and Police Department		Traffic and Police Department
Transport Authorities	Buses	Transport Authorities
	Registered Vehicles	Transport Authorities
	Sub urban rail transport	Nil
	Mono Rail Authority	Nil
	Tramways	Nil
	Marine Transport Authority	Nil

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 117 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	2
State Education Department	5
DISCOM/Electricity Department	12
Traffic and Police Department	8
Development Authority	1
Pollution Control Board	7
State Renewable Energy Department	1
Town and Country Planning	1
State Health Department	12
Transport Authority	3
Disaster Management	1
Urban Local Body	64
Total	117*

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1| Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**77.66**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	1
	1.1c trade license	1
	1.1d solid waste management	0.25
	1.1e water supply	1
	1.1f sewerage/drainage	1
	1.1g fogging	0
	1.1h property tax	1
	1.1i professional tax	1
	1.1j information	0.846153846
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**0**
Description	Services integrated through an integrated or a singular operations command centre	0
Unit	Percentage	

Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**0.29**
Description		
Sub Indicators	1.3a Building plan	0.000371185
	1.3b Birth/Death Certificate	0.000226706
	1.3c water supply	0.015869101
	1.3d solid waste management	0.000255647
	1.3e property tax	0.004711323
	1.3f professional tax (RC)	0.005914792
	1.3g professional tax (EC)	0.000188092

	1.3j electricity	1.57902E-05
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**3.67**
Description		
Sub Indicators	1.4a water supply	17
	1.4b solid waste	0
	1.4c street lights	0
	1.4d sewerage	NA
	1.4e professional tax	0
	1.4f parks and recreational spaces	5
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**87.94**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	2877.49

Denominator	Total demand raised for the year	3272.12
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**835.58**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	2408.06
Denominator	Total O&M cost for providing water supply services during the year	288.19
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**31.49**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	21898.07
Denominator	Total expenditure (revenue and capital accounts) in the same year	69548.76
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**6.67**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	4
Denominator	Total number of wards	60
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	2
Denominator	Total number of historic buildings/sites identified	2
Unit	Percentage	

Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	1
Denominator	Total number of ecologically important sites identified in the city	1
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**51.75**
Description	Average Occupancy rate of Hotels	51.75
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	Data Unavailable
Denominator	Total budget of the ULB (capital and revenue)	29968.19
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**102**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	102
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**75.2**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	96393

Denominator	Total population in the age group of 6-14 years	128185
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**76.71**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	47653
Denominator	Total female population in the age group of 6-14 years	62118
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**23.18**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	59898
Denominator	Total number of teachers available for primary grades (public and private schools)	2584
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**47.17**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	150
Denominator	Total number of schools	318
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**99.78**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	99.77589584
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**102.88**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	148984035

Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**64.94**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	5385
Denominator	Total population of the city	829267
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**23.94**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	1985
Denominator	Total population of the city	829267
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**15**
Description	Total response time for health-related distress calls received in the city	15
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.15**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	1281
Denominator	Total population of the city	829267
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.04**
Formula:	*Numerator / Denominator*	

Numerator	Number of cases of persons affected by vector borne diseases in a year	338
Denominator	Total population of the city	829267
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**113.24**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	961
Denominator	Total length of road network in the city	848.63
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**1227.95**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	10183
Denominator	Total population of the city	829267
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**0.61**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	62
Denominator	Total crimes recorded in the same year	10183
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**29.3**
Formula:	*Numerator / Denominator*	

Numerator	Total number of fatalities recorded in road accidents in a year	243
Denominator	Total population of the city	829267
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**14.14**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	4922.58
Denominator	Total VAT/GST collection during preceding year	348.1437
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**-8.8**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	-56.42
Denominator	Total Professional Tax collection during preceding year	641.16
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**0.96**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	9
Denominator	Number of construction permits during preceding year	9.36
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	

Numerator	Number of unemployed persons (seeking or available for work)	347385
Denominator	Total labour force in the city	128185
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**38.94**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	1248
Denominator	Total number of vendors in the city	3204.625
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**71.8**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	31383
Denominator	Total number of slum and EWS households in the city	437.09
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**0.11**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	37609641300
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**0.09**

Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	76621.82
Denominator	Total population of the city	829267
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**0.2**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	163419
Denominator	Total population of the city	829267
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	Data Unavailable
Denominator	Total area of the city (total area of all land uses)	91340000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**180.47**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	829267
Denominator	Area allocated for residential land use (in hectares)	4595
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**154.74**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	333851
Denominator	Total number of households in the city	215747
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	Data Unavailable
Denominator	Total number of electricity connections in the city	443312
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**10621**
Description	Total number of sustained electrical interruptions in a year	10621
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.79**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	77700
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**

Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	305.21
Denominator	Total energy consumption from all sources	837046848
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	8440.5
Denominator	Total quantum of water and waste water handled during the period	Data Unavailable
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	9962
Denominator	Total number of street light installations	28064
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	189706
Unit	Percentage	
Benchmark	80%	

Indicator No: 10.9	**Total energy consumption per capita**	**0.64**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	837046848
Denominator	Total population of the city	829267
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.1**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	15
Denominator	Total area of the city (sq.km)	91.34
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.38**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	317
Denominator	Total population of the city	829267
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	52
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0.31**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	2.6
Denominator	Total length of road network in the city	848.63
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**100**

Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	6
Denominator	Total number of major transport interchanges in the city	6
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	30
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**16**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	96
Denominator	Total number of major interchanges in the city	6
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	Data Unavailable
Denominator	Total number of signalised intersections in the city	48
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	1
Denominator	Total available on-street parking spaces in the city	Data Unavailable
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than**	**0.17**

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

	1.2m	
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	2.87
Denominator	Total length of road network in the city	1697.26
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**5.91**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	22
Denominator	Total number of junctions/ intersections on major roads in the city	372
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**3.36**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	33
Denominator	Total number of public right-of-way areas in the city	982
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**46.95**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	101286
Denominator	Total number of households in the city	215747
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**145.91**
Formula:	*Numerator / Denominator*	

Numerator	Total quantity of water supplied into the distribution system	121
Denominator	Total population of the city	829267
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	11
Denominator	Total number of samples tested for water quality	25
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**34.88**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	42.2
Denominator	Quantum of water put into the distribution system (mld)	121
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**0.31**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	330
Denominator	Total number of water connections in the city	105298
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**6.96**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	67

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	962
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**118.54**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	235529
Denominator	Total number of properties in the city	198688
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**106.27**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	211154
Denominator	Total number of properties in the city	198688
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	Data Unavailable
Denominator	Total waste water generated in the city per day	91
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	Data Unavailable
Denominator	Total waste water received at treatment plants per day	Data Unavailable

Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**64.25**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	545.25
Denominator	Total length of road network in the city	848.63
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**110.57**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	260125
Denominator	Total number of households and establishments in the city	235248
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	400
Denominator	Total quantum of MSW generated in the city	400
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**5.13**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	615
Denominator	Average MSW generated in the city (tons per month)	12000
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**7**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	7
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**26**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	26
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**52**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	52
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	1
Denominator	Total number of noise samples	3
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**83.33**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	10
Denominator	Total number of samples tested	12
Unit	Percentage	
Benchmark	100%

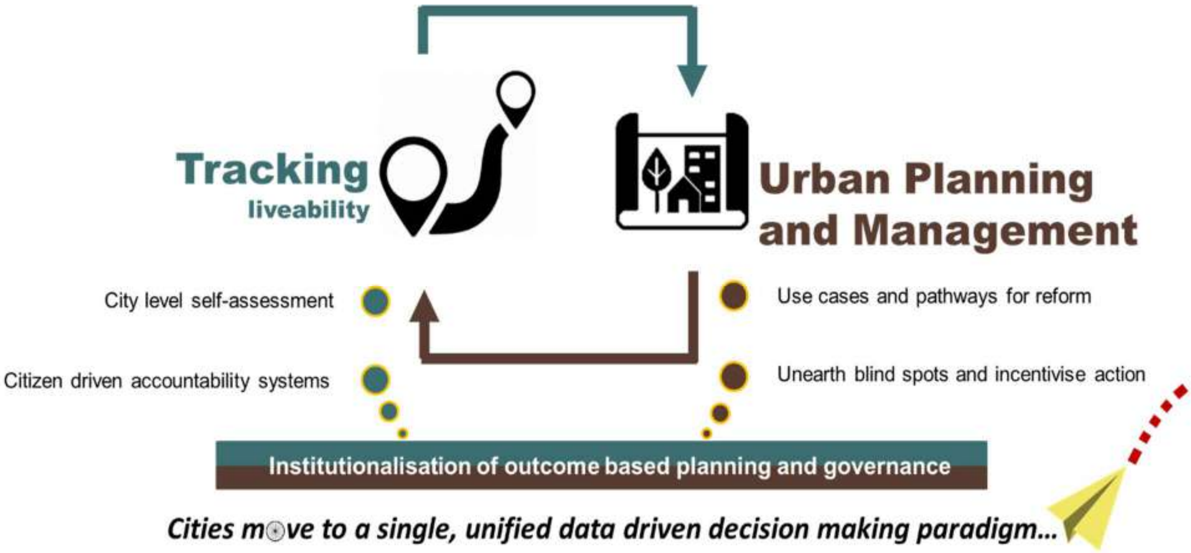
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

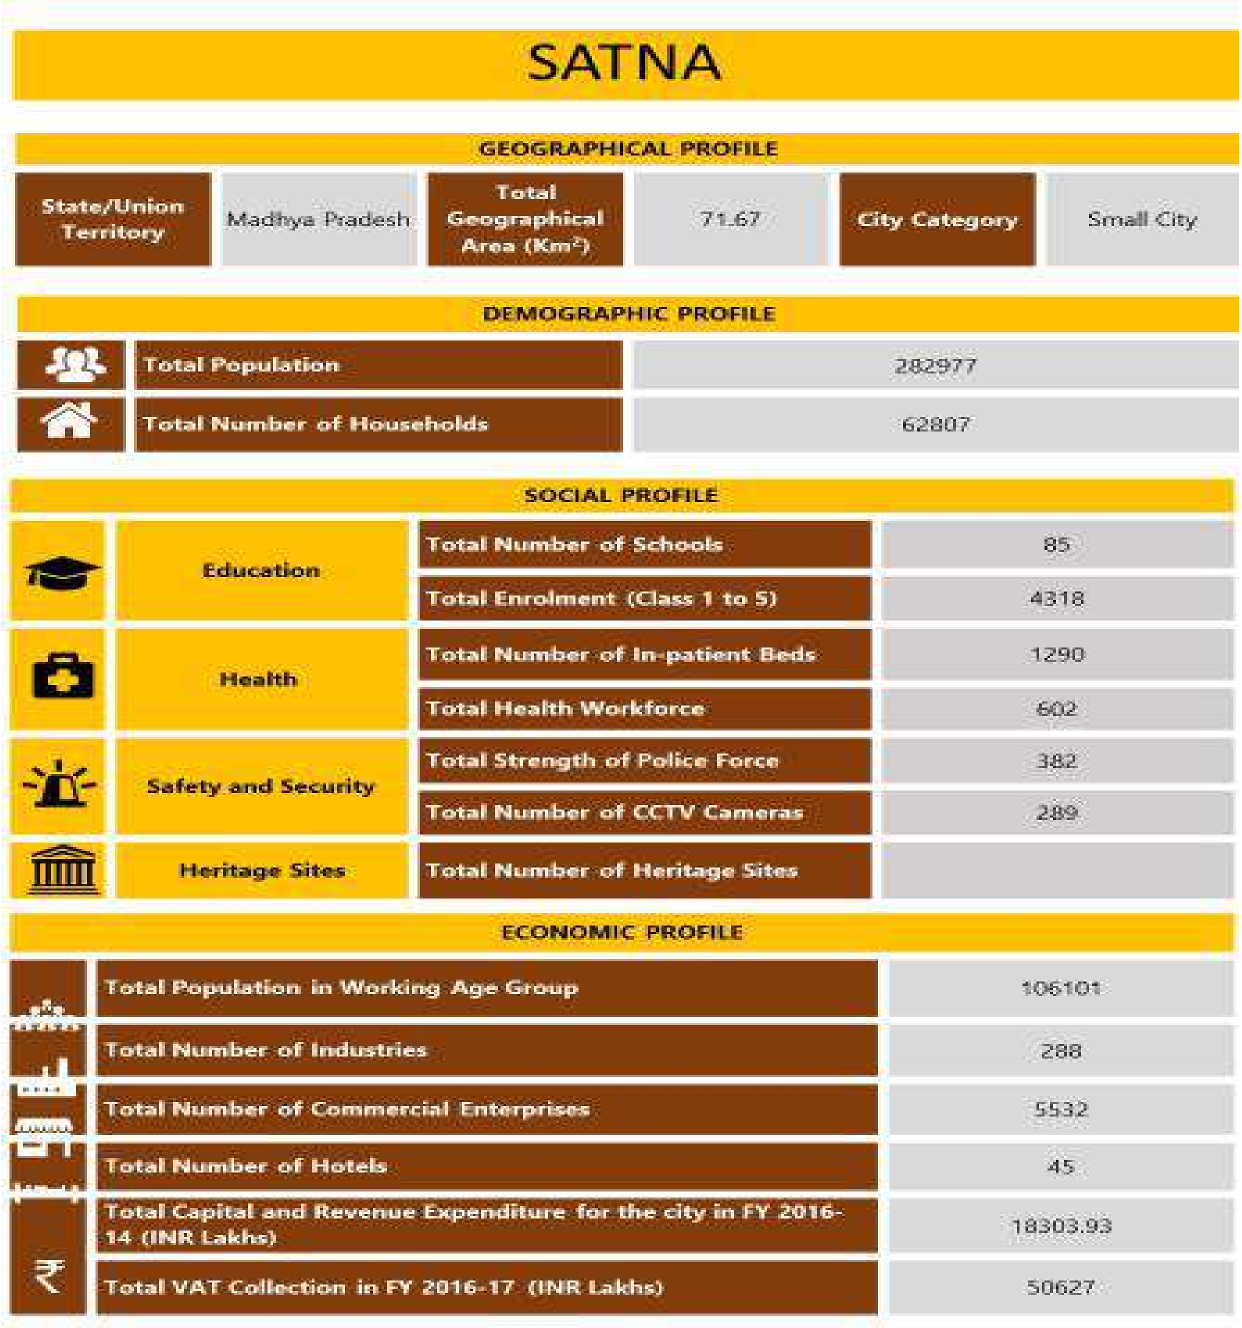


Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



SATNA

GEOGRAPHICAL PROFILE

State/Union Territory	Madhya Pradesh	Total Geographical Area (Km²)	71.67	City Category	Small City

DEMOGRAPHIC PROFILE

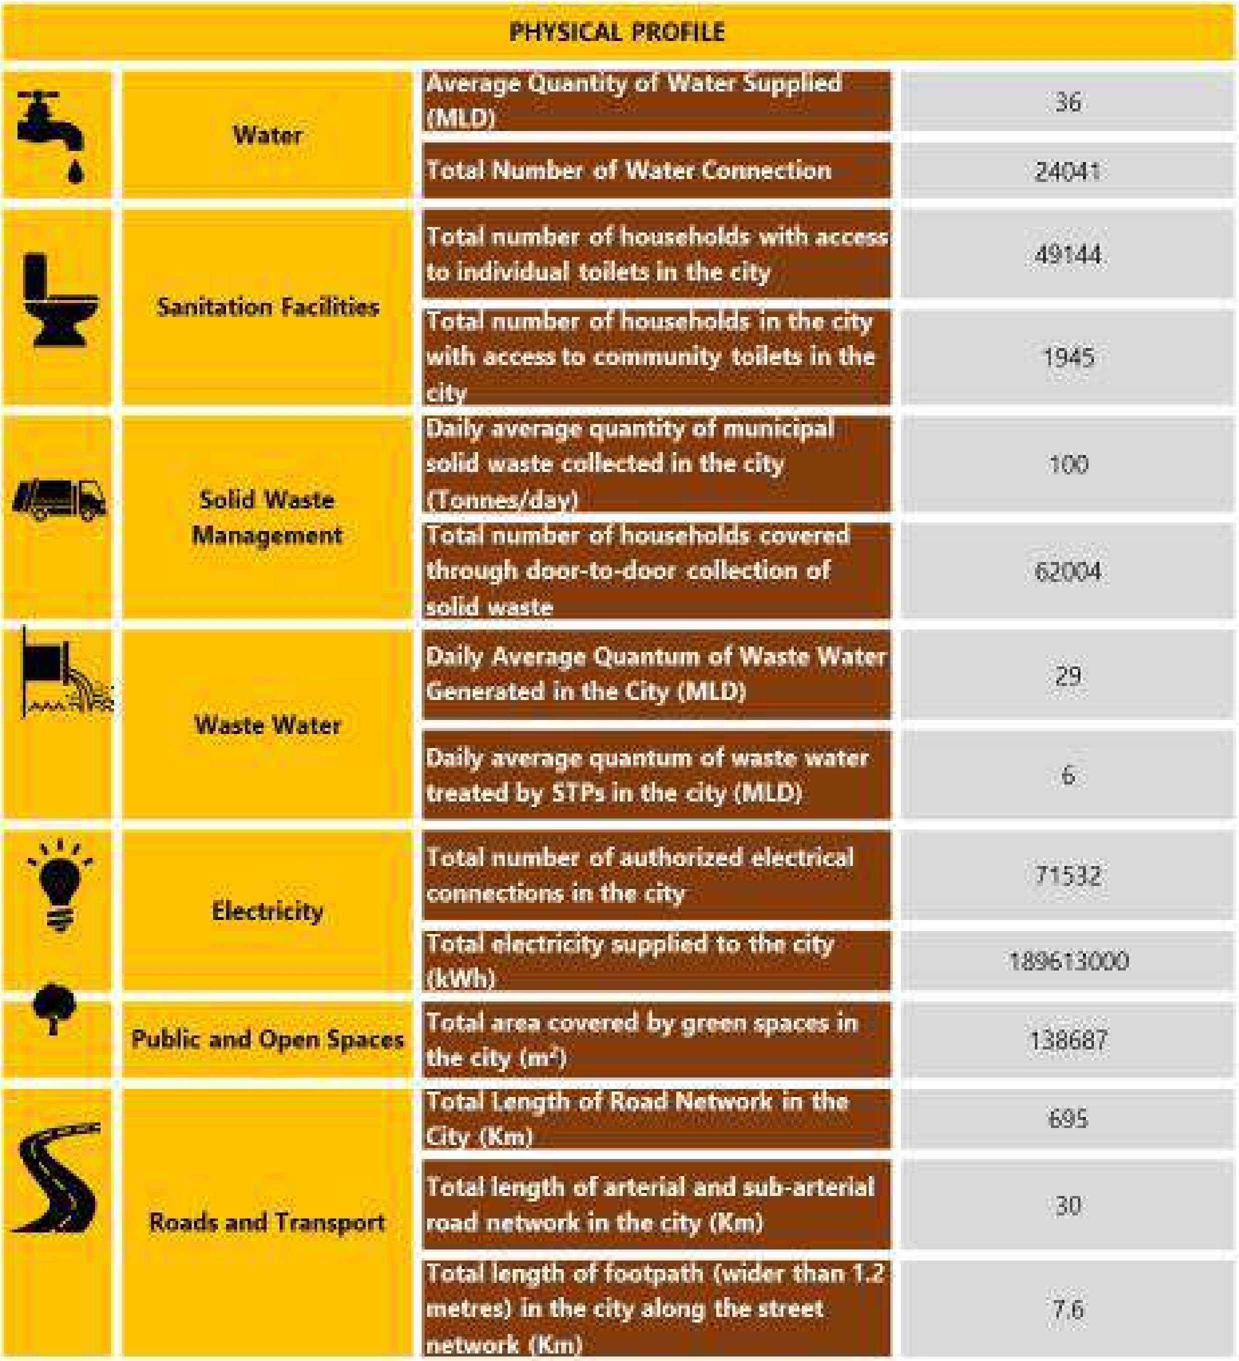
Total Population	282977
Total Number of Households	62807

SOCIAL PROFILE

Education	Total Number of Schools	85
	Total Enrolment (Class 1 to 5)	4318
Health	Total Number of In-patient Beds	1290
	Total Health Workforce	602
Safety and Security	Total Strength of Police Force	382
	Total Number of CCTV Cameras	289
Heritage Sites	Total Number of Heritage Sites	

ECONOMIC PROFILE

Total Population in Working Age Group	106101
Total Number of Industries	288
Total Number of Commercial Enterprises	5532
Total Number of Hotels	45
Total Capital and Revenue Expenditure for the city in FY 2016-14 (INR Lakhs)	18303.93
Total VAT Collection in FY 2016-17 (INR Lakhs)	50627



PHYSICAL PROFILE

Water	Average Quantity of Water Supplied (MLD)	36
	Total Number of Water Connection	24041
Sanitation Facilities	Total number of households with access to individual toilets in the city	49144
	Total number of households in the city with access to community toilets in the city	1945
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	100
	Total number of households covered through door-to-door collection of solid waste	62004
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	29
	Daily average quantum of waste water treated by STPs in the city (MLD)	6
Electricity	Total number of authorized electrical connections in the city	71532
	Total electricity supplied to the city (kWh)	189613000
Public and Open Spaces	Total area covered by green spaces in the city (m^2)	138687
Roads and Transport	Total Length of Road Network in the City (Km)	695
	Total length of arterial and sub-arterial road network in the city (Km)	30
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	7.6

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online 1.2 Percentage of services integrated through Command Centre 1.3 Percentage of citizens using online services 1.4 Average delay in grievance redressal 1.5 Tax collected as percentage of tax billed 1.6 Extent of cost recovery (O&M) in water supply services 1.7 Capital spending as percentage of total expenditure 1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings 2.2 Percentage of ecologically important areas covered through projects for restoration 2.3 Hotel occupancy 2.4 Percentage of budget allocated towards cultural/sports activities 2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools 3.2 Percentage of female school-aged population enrolled in schools 3.3 Primary education student-teacher ratio

Pillars of Comprehensive Development	Category	Indicators
		3.4 Percentage of schools with access to digital education 3.5 Percentage of students completing primary education 3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population 4.2 Healthcare professionals per 10,000 population 4.3 Average response time in case of health emergencies 4.4 Period prevalence of water borne diseases 4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras 5.2 Number of recorded crimes per lakh population 5.3 Extent of crimes recorded against women, children and elderly per year 5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection 6.2 Increase in collection of Professional Tax 6.3 Increase in issuance of Construction permits 6.4 Unemployment rate 6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing 7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces 8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use 9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services 10.2 Percentage of electrical connections covered through smart meters

Pillars of Comprehensive Development	Category	Indicators
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
		13.1 Coverage of toilets

Pillars of Comprehensive Development	Category	Indicators
	13. Waste Water Management	13.2 Coverage of sewerage network and/or septage 13.3 Collection efficiency of sewerage network 13.4 Extent of reuse and recycling of waste water 13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection 14.2 Efficiency of collection of municipal solid waste 14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO_2- air pollution 15.2 Concentration of NO_2- air pollution 15.3 Concentration of PM_{10} - air pollution 15.4 Level of noise pollution 15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

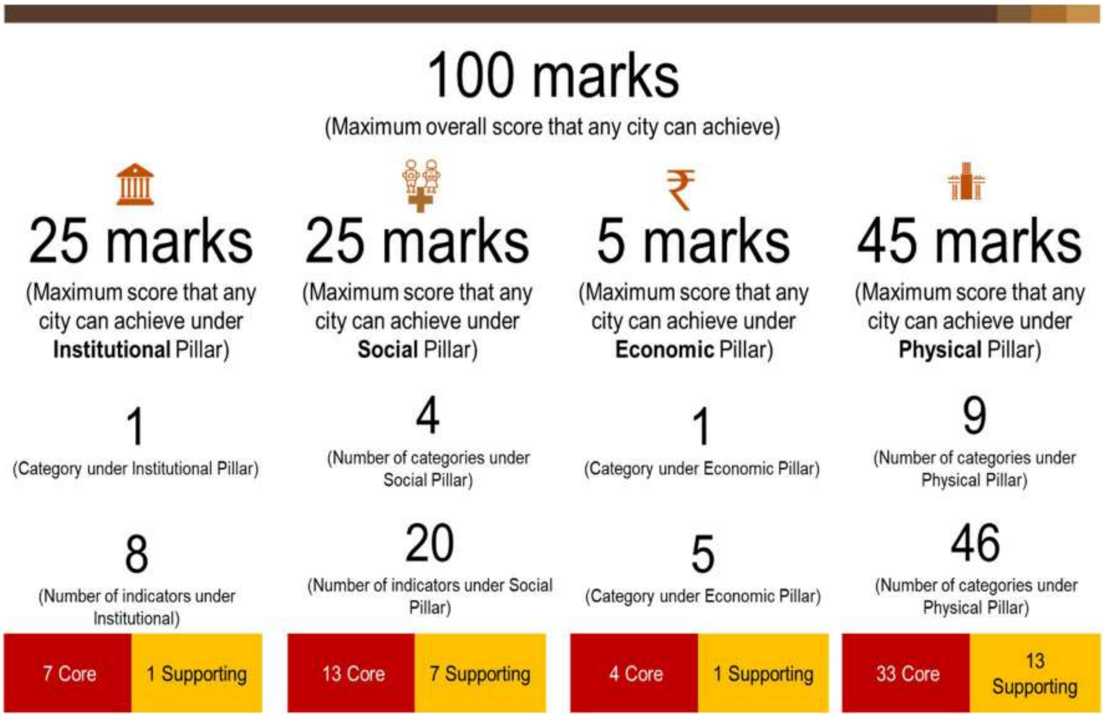
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks

(Maximum overall score that any city can achieve)

25 marks	25 marks	5 marks	45 marks

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to "maximum within the comparison group" or "absolute benchmarks". For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different

categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Sub categories	Data owners at city level
Urban Local Body	Accounts	Accounting Department, Satna Municipal Corporation
	Park and Recreation	Satna Municipal Corporation
	Water Supply and Drainage	Engineering Department, Satna Municipal Corporation
	Heritage sites	Satna Municipal Corporation
	Ecological sites	Satna Municipal Corporation
	Housing	Housing section, Satna Municipal Corporation
	Building plan	Satna Municipal Corporation
	Roads	Roads section, Satna Municipal Corporation
	Solid waste management	Satna Municipal Corporation
	IT services	IT Section, Satna Municipal Corporation
	Vendor committee	Satna Municipal Corporation
	Any other departments involved in providing data for questions mentioned under Urban Local Body	
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Madhya Pradesh Pollution Control Board
Development Authority	Building Infrastructure	MP Housing and Infrastructure development board
	Construction planning	MP Housing and Infrastructure development board
	Green Building	MP Housing and Infrastructure development board
	Rain water harvesting	MP Housing and Infrastructure development board
	Universal Design Principle	MP Housing and Infrastructure development board
DISCOM /Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Madhya Pradesh Poorv Kshetra Vidyut Vitaran Company limited

Designated data owners	Sub categories	Data owners at city level
State Disaster management authority		District Disaster management Office
State Education Department		District Education Department
State Health Department	Health care professionals	Health Department
	Citizen Services	Health Department
	Disease Prevalence	Health Department
	Health Infrastructure	Health Department
State Renewable Energy Development Agency		Madhya Pradesh New and Renewable energy Department
State Sales / Commercial Taxes Department		Department of Commercial Taxes
Town and Country Planning Department	Land Use	Town and country planning
Traffic and Police Department		Traffic and Police Department, Satna
Transport Authorities	Buses	Regional Transport Office
	Registered Vehicles	Madhya Pradesh Transport Department
	Sub urban rail transport	NA
	Mono Rail Authority	NA
	Tramways	NA
	Marine Transport Authority	NA

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 118 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	0
State Education Department	1
DISCOM/Electricity Department	2
Traffic and Police Department	1
Development Authority	6
Pollution Control Board	5
State Renewable Energy Department	1
Town and Country Planning	2
State Health Department	3
Transport Authority	7
Disaster Management	2
Urban Local Body	88
Total	118

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

8. LA - Universal Design Principles

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**89.94**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	1
	1.1c trade license	1
	1.1d solid waste management	1
	1.1e water supply	1
	1.1f sewerage/drainage	0
	1.1g fogging	1
	1.1h property tax	1
	1.1i professional tax	1
	1.1j information	0.692307692
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	1
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**4.76**
Description	Services integrated through an integrated or a singular operations command centre	1
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**4.32**
Description		
Sub Indicators	1.3a Building plan	0.000936768
	1.3b Birth/Death Certificate	0.000389608
	1.3c water supply	0.0000887039545835753
	1.3d solid waste management	0.000102482
	1.3e property tax	0.0000134399931187235
	1.3f professional tax (RC)	0.083333333
	1.3g professional tax (EC)	0.083333333
	1.3h complaints/ grievance redressal	0.0000020614160632607
	1.3i information	0.0000954141149280684
	1.3j electricity	0.263588324
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**NC**

Description		
Sub Indicators	1.4a water supply	0
	1.4b solid waste	0
	1.4c street lights	0
	1.4d sewerage	0
	1.4e professional tax	NA
	1.4f parks and recreational spaces	0
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**55.61**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	1547.06
Denominator	Total demand raised for the year	2782.14
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**11.85**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	98.47
Denominator	Total O&M cost for providing water supply services during the year	831.04
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**13.48**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	2726.75
Denominator	Total expenditure (revenue and capital accounts) in the same year	20226.75
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**37.78**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	17
Denominator	Total number of wards	45
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	2
Denominator	Total number of historic buildings/sites identified	2
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	1
Denominator	Total number of ecologically important sites identified in the city	1
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**32**
Description	Average Occupancy rate of Hotels	32
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0.05**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	10
Denominator	Total budget of the ULB (capital and revenue)	18303.93
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**47**

Description	Number of cultural/sports events hosted by the city authority in the preceding year	47
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**12.86**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	7639
Denominator	Total population in the age group of 6-14 years	59409
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**13.36**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	3671
Denominator	Total female population in the age group of 6-14 years	27476
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**18.22**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	4318
Denominator	Total number of teachers available for primary grades (public and private schools)	237
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**1.18**
Formula:	*Numerator / Denominator*	

Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	1
Denominator	Total number of schools	85
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**91.61** 91.60918135
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**103.58** 1408645
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**45.59**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	1290
Denominator	Total population of the city	282977
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**21.27**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	602

Denominator	Total population of the city	282977
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**17**
Description	Total response time for health-related distress calls received in the city	17
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**2.74**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	7760
Denominator	Total population of the city	282977
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.05**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	148
Denominator	Total population of the city	282977
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**41.58**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	289
Denominator	Total length of road network in the city	695
Unit	Percentage	

Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**3491.1**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	9879
Denominator	Total population of the city	282977
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**27.34**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	2701
Denominator	Total crimes recorded in the same year	9879
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**628.32**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	1778
Denominator	Total population of the city	282977
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**16.2**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	7057
Denominator	Total VAT/GST collection during preceding year	435.7
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**7.83**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	49.58
Denominator	Total Professional Tax collection during preceding year	632.84
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**51.85**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	238
Denominator	Number of construction permits during preceding year	4.59
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	5457
Denominator	Total labour force in the city	59409
Unit	Per 1000 persons	

Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**194.85**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	2894
Denominator	Total number of vendors in the city	1485.225
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**17.1**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	6066
Denominator	Total number of slum and EWS households in the city	354.67
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**7.11** 200535650784
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	**Per capita availability of green spaces**	**0.49**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	138687
Denominator	Total population of the city	282977
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	**Per capita availability of public and recreational places**	**1**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	282943
Denominator	Total population of the city	282977
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	0
Denominator	Total area of the city (total area of all land uses)	71670000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	282977
Denominator	Area allocated for residential land use (in hectares)	23613800
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**86.01**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	54021
Denominator	Total number of households in the city	62807
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**75.52**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	54021
Denominator	Total number of electricity connections in the city	71532
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**1325**
Description	Total number of sustained electrical interruptions in a year	1325
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.57**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	134007
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	

Numerator	Total installed capacity for generation of renewable energy in the city	1527.2
Denominator	Total energy consumption from all sources	189675906
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.31**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	670947.6667
Denominator	Total quantum of water and waste water handled during the period	1260
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.34**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	3702604
Denominator	Total number of street light installations	10462
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	NA
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	39077.45
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.79**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	189675906

Denominator	Total population of the city	282977
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.53**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	60
Denominator	Total area of the city (sq.km)	71.67
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.58**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	165
Denominator	Total population of the city	282977
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	25
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	695
Unit	Percentage	
Benchmark	>=50	

Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	1
Denominator	Total number of major transport interchanges in the city	1
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	1.42
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**7**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	7
Denominator	Total number of major interchanges in the city	1
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**25**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	1
Denominator	Total number of signalised intersections in the city	4
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	7

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Denominator	Total available on-street parking spaces in the city	7
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**0.55**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	7.6
Denominator	Total length of road network in the city	1390
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**120**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	6
Denominator	Total number of junctions/ intersections on major roads in the city	5
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**17.77**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	35
Denominator	Total number of public right-of-way areas in the city	197
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**38.28**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	24041
Denominator	Total number of households in the city	62807
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**127.22**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	36
Denominator	Total population of the city	282977
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	278
Denominator	Total number of samples tested for water quality	310
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**25.56**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	9.2
Denominator	Quantum of water put into the distribution system (mld)	36
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**2.71**
Formula:	*Numerator / Denominator*	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Numerator	Number of metered water connections	651
Denominator	Total number of water connections in the city	24041
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**92.11**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	362
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	393
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**93.11**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	57729
Denominator	Total number of properties in the city	62004
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**89.02**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	55199
Denominator	Total number of properties in the city	62004
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**Non-Computable**
Formula:	*Numerator / Denominator*	

Numerator	Total waste water collected per day	NA
Denominator	Total waste water generated in the city per day	29
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**92.31**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	6
Denominator	Total waste water received at treatment plants per day	6.5
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**2.16**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	15
Denominator	Total length of road network in the city	695
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**98.82**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	67536
Denominator	Total number of households and establishments in the city	68339
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	100

Denominator	Total quantum of MSW generated in the city	100
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**77.5**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	2325
Denominator	Average MSW generated in the city (tons per month)	3000
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**3.35**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	3.345
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**8.68**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	8.678
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**81.02**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	81.015
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	

Numerator	Number of noise samples meeting acceptable noise levels	1318
Denominator	Total number of noise samples	1728
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**61.82**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	34
Denominator	Total number of samples tested	55
Unit	Percentage	
Benchmark	100%

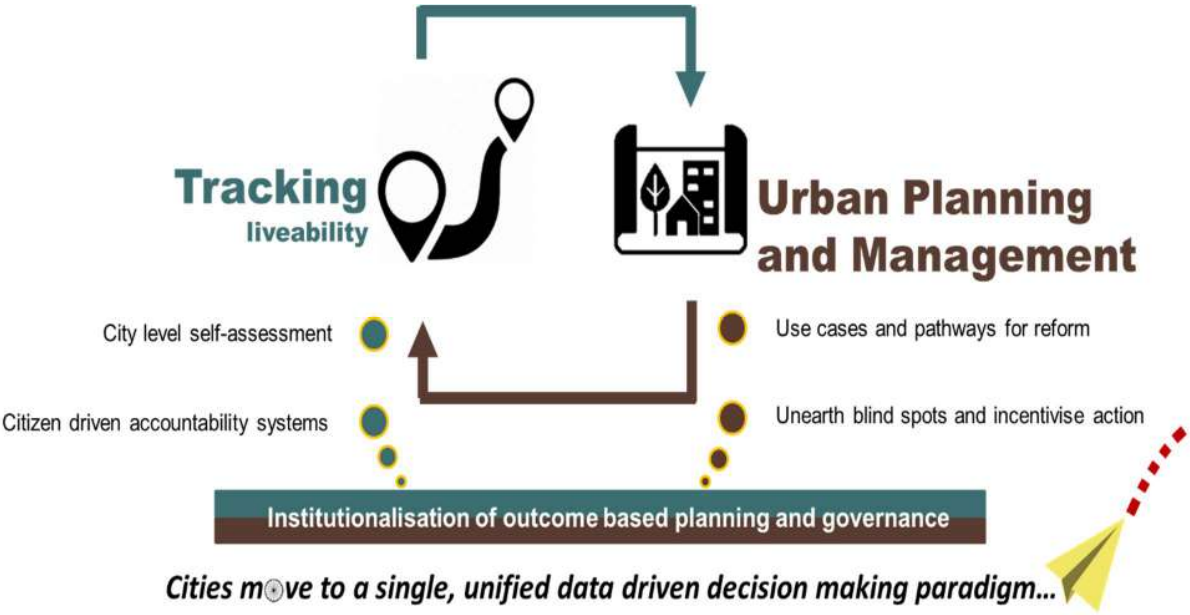
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

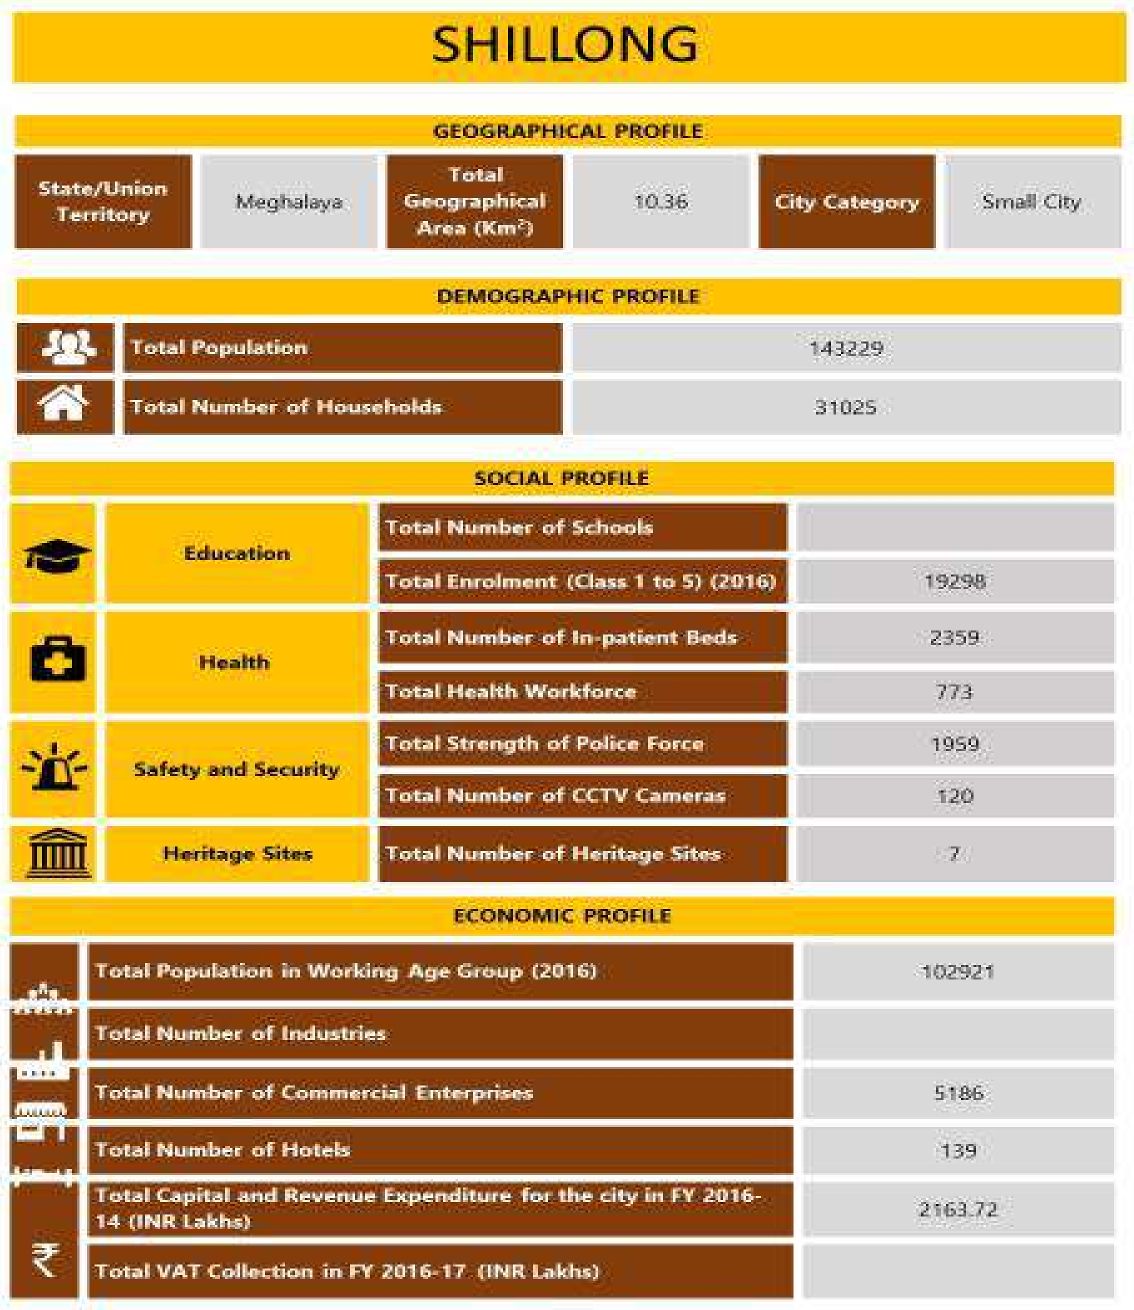


Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



SHILLONG

GEOGRAPHICAL PROFILE

State/Union Territory	Meghalaya	Total Geographical Area (Km²)	10.36	City Category	Small City

DEMOGRAPHIC PROFILE

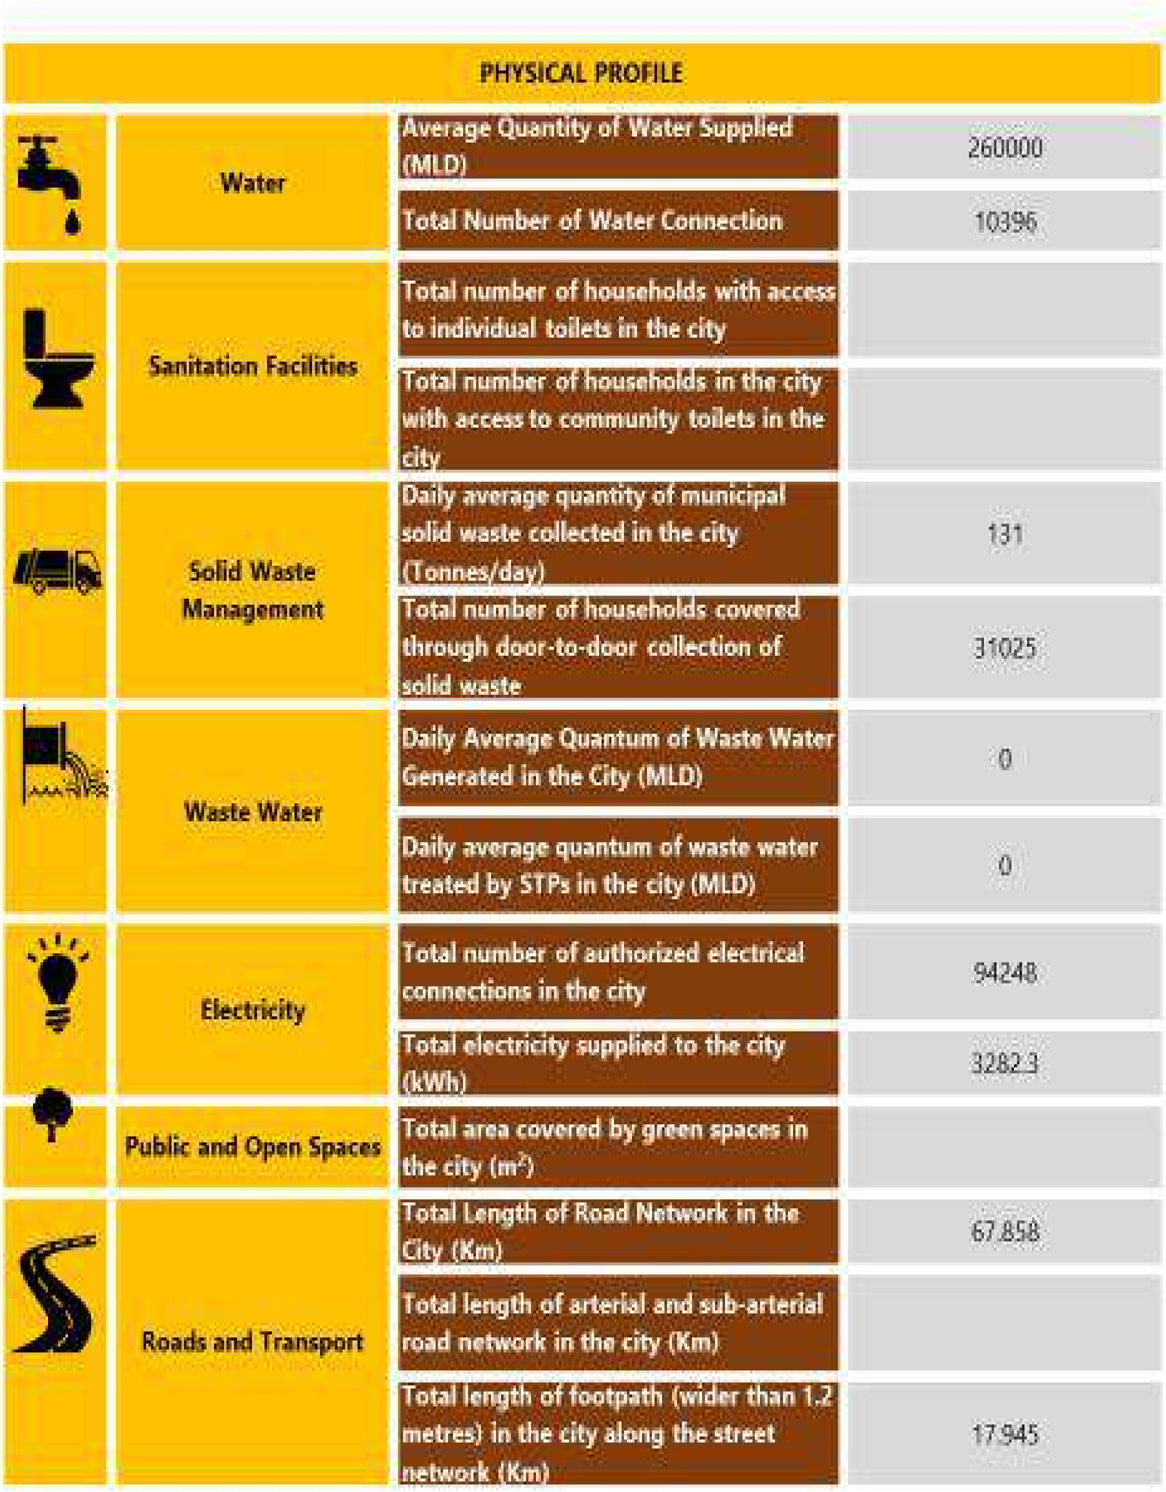
Total Population	143229
Total Number of Households	31025

SOCIAL PROFILE

Education	Total Number of Schools	
	Total Enrolment (Class 1 to 5) (2016)	19298
Health	Total Number of In-patient Beds	2359
	Total Health Workforce	773
Safety and Security	Total Strength of Police Force	1959
	Total Number of CCTV Cameras	120
Heritage Sites	Total Number of Heritage Sites	7

ECONOMIC PROFILE

Total Population in Working Age Group (2016)	102921
Total Number of Industries	
Total Number of Commercial Enterprises	5186
Total Number of Hotels	139
Total Capital and Revenue Expenditure for the city in FY 2016-14 (INR Lakhs)	2163.72
Total VAT Collection in FY 2016-17 (INR Lakhs)	



PHYSICAL PROFILE			
	Water	Average Quantity of Water Supplied (MLD)	260000
		Total Number of Water Connection	10396
	Sanitation Facilities	Total number of households with access to individual toilets in the city	
		Total number of households in the city with access to community toilets in the city	
	Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	131
		Total number of households covered through door-to-door collection of solid waste	31025
	Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	0
		Daily average quantum of waste water treated by STPs in the city (MLD)	0
	Electricity	Total number of authorized electrical connections in the city	94248
		Total electricity supplied to the city (kWh)	3282.3
	Public and Open Spaces	Total area covered by green spaces in the city (m^2)	
	Roads and Transport	Total Length of Road Network in the City (Km)	67.858
		Total length of arterial and sub-arterial road network in the city (Km)	
		Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	17.945

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy

Pillars of Comprehensive Development	Category	Indicators
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax

Pillars of Comprehensive Development	Category	Indicators
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11.	11.1 Geographical coverage of public transport

Pillars of Comprehensive Development	Category	Indicators
	Transportation and Mobility	11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage

Pillars of Comprehensive Development	Category	Indicators
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

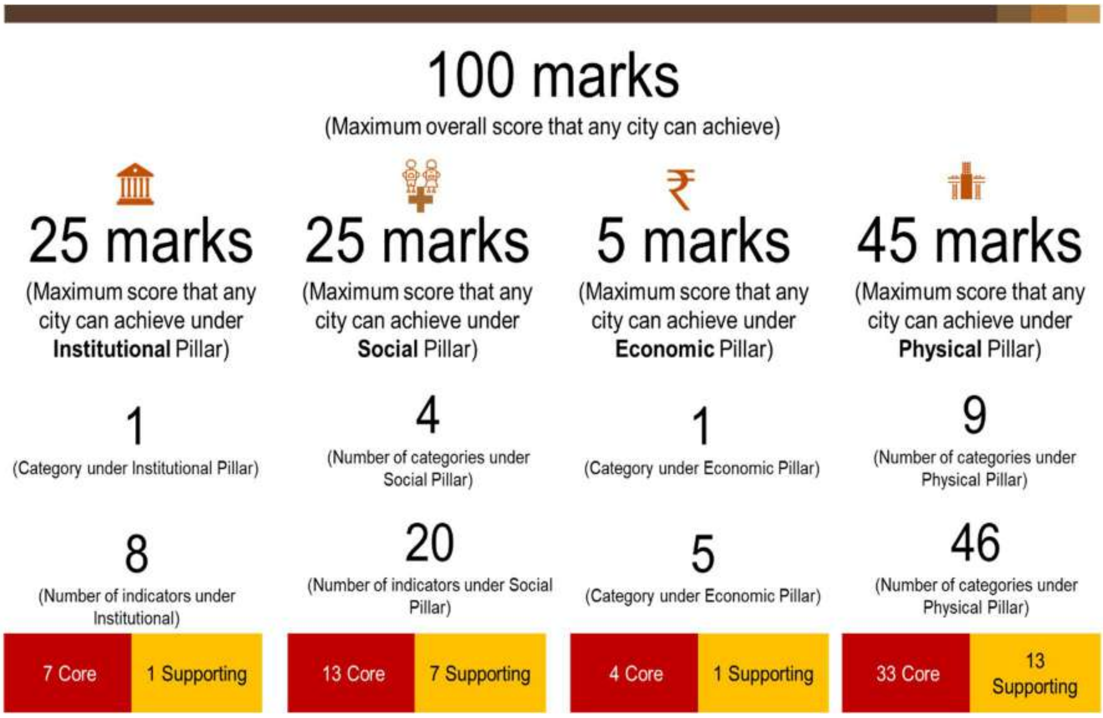
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks

(Maximum overall score that any city can achieve)

25 marks

(Maximum score that any city can achieve under **Institutional** Pillar)

1

(Category under Institutional Pillar)

8

(Number of indicators under Institutional)

7 Core | 1 Supporting

25 marks

(Maximum score that any city can achieve under **Social** Pillar)

4

(Number of categories under Social Pillar)

20

(Number of indicators under Social Pillar)

13 Core | 7 Supporting

5 marks

(Maximum score that any city can achieve under **Economic** Pillar)

1

(Category under Economic Pillar)

5

(Category under Economic Pillar)

4 Core | 1 Supporting

45 marks

(Maximum score that any city can achieve under **Physical** Pillar)

9

(Number of categories under Physical Pillar)

46

(Number of categories under Physical Pillar)

33 Core | 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	ULB
Urban Local Body	For Park and Recreation Related Questions	ULB
Urban Local Body	For Water Supply and Drainage related questions	ULB & PHE
Urban Local Body	For Heritage sites related data	NIL
Urban Local Body	For Ecological sites related data	NIL
Urban Local Body	For Housing related data	ULB & Meghalaya Urban Development Authority
Urban Local Body	For Building plan related data	ULB & Directorate of Urban Affair, Meghalaya Urban Development Authority
Urban Local Body	For Roads related data	ULB &PWD
Urban Local Body	For Solid waste management related data	ULB
Urban Local Body	For IT services related data	ULB
Urban Local Body	For Vendor committee related data	ULB and Directorate of Urban Affair
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	PWD, PHE, Directorate of Urban Affair, Meghalaya Urban Development Authority
For questions under Central / state Pollution control	Water Quality, Air Quality, Noise Quality	MEGHALAYA STATE POLLUTION CONTROL BOARD

Designated data owners	Subcategories	Data owners at city level
Board		
Development Authority	Building Infrastructure	MUDA
	Construction planning	MUDA
	Green Building	MUDA
	Rain water harvesting	MUDA
	Universal Design Principle	MUDA
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Meghalaya Power Distribution Corporation LTD.
State Disaster management authority		State disaster management authority
State Education Department		Directorate of school education and literacy
State Health Department	Health care professionals	Directorate of health complex and services, Shillong
State Health Department	Citizen Services	DO
State Health Department	Disease Prevalence	DO
State Health Department	Health Infrastructure	DO
State Renewable Energy Development Agency		
State Sales / Commercial Taxes Department		
Town and Country Planning Department	Land Use	Urban Affairs Department
Traffic and Police Department		Shillong Police (traffic)
Transport Authorities	Buses	District Transport Office
Transport Authorities	Registered Vehicles	District Transport Office
Transport Authorities	Sub urban rail transport	NIL
Transport Authorities	Mono Rail Authority	NIL
Transport Authorities	Tramways	NIL
Transport Authorities	Marine Transport Authority	NIL

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 24 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	0
State Education Department	2
DISCOM/Electricity Department	3
Traffic and Police Department	1
Development Authority	1
Pollution Control Board	5
State Renewable Energy Department	1
Town and Country Planning	1
State Health Department	1
Transport Authority	1
Disaster Management	1
Urban Local Body	7
Total	24

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the

field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

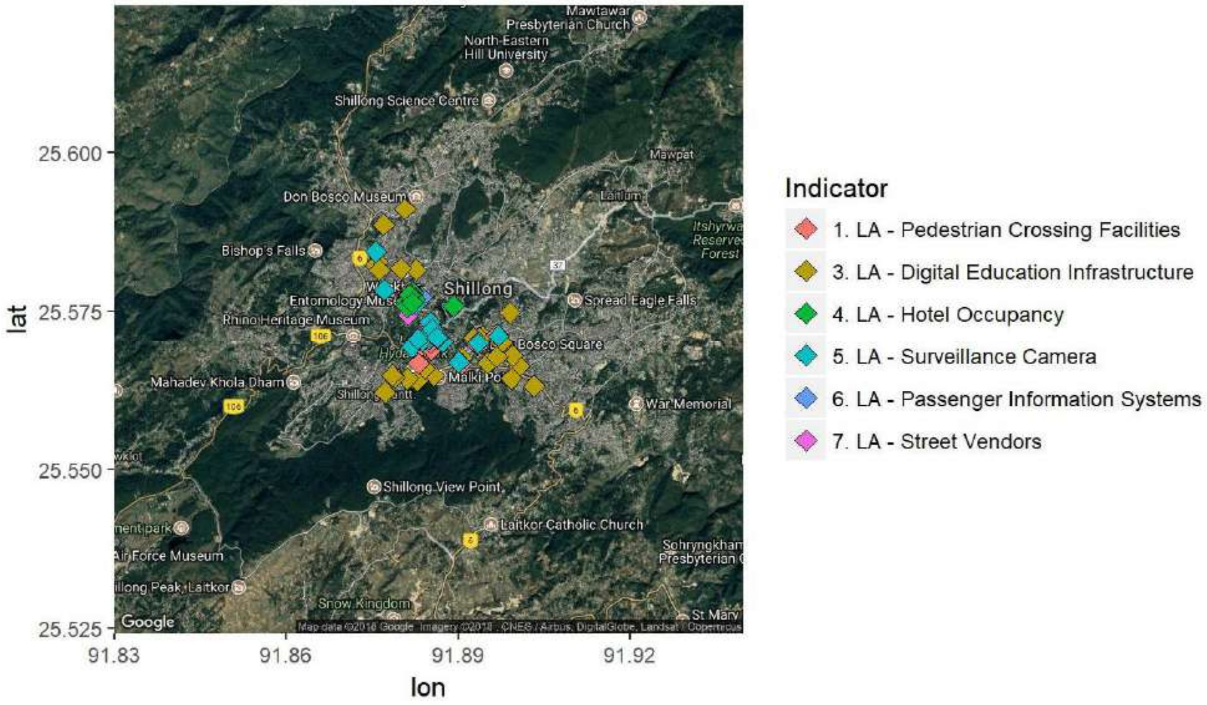
11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.



Indicator
1. LA - Pedestrian Crossing Facilities
3. LA - Digital Education Infrastructure
4. LA - Hotel Occupancy
5. LA - Surveillance Camera
6. LA - Passenger Information Systems
7. LA - Street Vendors

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**7.69**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	0
	1.1b death certificate	0
	1.1c trade license	0
	1.1d solid waste management	0
	1.1e water supply	0
	1.1f sewerage/drainage	0
	1.1g fogging	0
	1.1h property tax	0
	1.1i professional tax	0
	1.1j information	0
	1.1k Grievance redressal	0.5
	1.1l electricity	0.5
	1.1m Building plan	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**0**
Description	Services integrated through an integrated or a singular operations command centre	0
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**0**
Description		
Sub Indicators	1.3a Building plan	NA
	1.3b Birth/Death Certificate	NA
	1.3c water supply	NA
	1.3d solid waste management	NA
	1.3e property tax	NA
	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA

	1.3h complaints/ grievance redressal	4.65455E-06
	1.3i information	NA
	1.3j electricity	0
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**NC**
Description		
Sub Indicators	1.4a water supply	0
	1.4b solid waste	0
	1.4c street lights	NA
	1.4d sewerage	NA
	1.4e professional tax	NA
	1.4f parks and recreational spaces	NA
	1.4g building plan	NA
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	Data Unavailable
Denominator	Total demand raised for the year	Data Unavailable
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**18.55**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	17.81
Denominator	Total O&M cost for providing water supply services during the year	96.02
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**33.55**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	1861.02
Denominator	Total expenditure (revenue and capital accounts) in the same year	5546.98

Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	Data Unavailable
Denominator	Total number of wards	27
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	NA
Denominator	Total number of historic buildings/sites identified	NA
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	Data Unavailable
Denominator	Total number of ecologically important sites identified in the city	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**Non-Computable**
Description	Average Occupancy rate of Hotels	Data Unavailable

Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	Data Unavailable
Denominator	Total budget of the ULB (capital and revenue)	2163.72
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**Non-Computable**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	Data Unavailable
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	Data Unavailable
Denominator	Total population in the age group of 6-14 years	24389
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	Data Unavailable

Denominator	Total female population in the age group of 6-14 years	12215
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	Data Unavailable
Denominator	Total number of teachers available for primary grades (public and private schools)	Data Unavailable
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	Data Unavailable
Denominator	Total number of schools	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**#VALUE!** #VALUE!
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**Non-Computable** Data Unavailable
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	
Numerator	Percentage	
Unit	Percentage	

Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**164.7**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	2359
Denominator	Total population of the city	143229
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**53.97**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	773
Denominator	Total population of the city	143229
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**1732**
Description	Total response time for health-related distress calls received in the city	1732
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**1.13**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	1619
Denominator	Total population of the city	143229
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0**

Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	0
Denominator	Total population of the city	143229
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**176.84**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	120
Denominator	Total length of road network in the city	67.858
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**1048.67**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	1502
Denominator	Total population of the city	143229
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**14.85**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	223
Denominator	Total crimes recorded in the same year	1502
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-	

	size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**34.91**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	50
Denominator	Total population of the city	143229
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	NC
Denominator	Total VAT/GST collection during preceding year	NC
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	Data Unavailable
Denominator	Total Professional Tax collection during preceding year	Data Unavailable
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**21.78**
Formula:	*Numerator / Denominator*	

Numerator	(Number of permits issued during the year – Number of permits during preceding year)	211
Denominator	Number of construction permits during preceding year	9.69
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	Data Unavailable
Denominator	Total labour force in the city	24389
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**6.29**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	254
Denominator	Total number of vendors in the city	4041
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	46
Denominator	Total number of slum and EWS households in the city	130.25

Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**Non-Computable** Data Unavailable
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	**Per capita availability of green spaces**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	Data Unavailable
Denominator	Total population of the city	143229
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	**Per capita availability of public and recreational places**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	Data Unavailable
Denominator	Total population of the city	143229
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**Non-Computable**
Formula:	*Numerator / Denominator*	

Numerator	Total area under mixed land use	Data Unavailable
Denominator	Total area of the city (total area of all land uses)	10360000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**2.81**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	143229
Denominator	Area allocated for residential land use (in hectares)	50952.7
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**255.97**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	79414
Denominator	Total number of households in the city	31025
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	Data Unavailable
Denominator	Total number of electricity connections in the city	94248
Unit	Percentage	

Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**1200**
Description	Total number of sustained electrical interruptions in a year	1200
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.8**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	7324
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	516
Denominator	Total energy consumption from all sources	3282.3
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	576171.25
Denominator	Total quantum of water and waste water handled during the period	7800000
Unit	kWh per million litres	

Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	Data Unavailable
Denominator	Total number of street light installations	2640
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	Data Unavailable
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	51054
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	3282.3
Denominator	Total population of the city	143229
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	Data Unavailable
Denominator	Total area of the city (sq.km)	10.36
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**1.3**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	186
Denominator	Total population of the city	143229
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	NA
Denominator	Total length of road network in the city	67.858
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	NA

Denominator	Total number of major transport interchanges in the city	Data Unavailable
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorized transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	0
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**Non-Computable**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	NA
Denominator	Total number of major interchanges in the city	Data Unavailable
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronization**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronized	NA
Denominator	Total number of signalised intersections in the city	NA
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**50**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	3
Denominator	Total available on-street parking spaces in the city	6

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**13.22**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	17.945
Denominator	Total length of road network in the city	135.716
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	Data Unavailable
Denominator	Total number of junctions/ intersections on major roads in the city	NA
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	Data Unavailable
Denominator	Total number of public right-of-way areas in the city	31
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**34.64**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	10746
Denominator	Total number of households in the city	31025
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**1815274.84**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	260000
Denominator	Total population of the city	143229
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	104
Denominator	Total number of samples tested for water quality	134
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	Blank
Denominator	Quantum of water put into the distribution system (mld)	260000
Unit	Percentage	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	0
Denominator	Total number of water connections in the city	10396
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**12.73**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	141
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	1108
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	54
Denominator	Total number of properties in the city	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**Non-Computable**
Formula:	*Numerator / Denominator*	

Numerator	Total number of properties with connection to waste water management systems	31025
Denominator	Total number of properties in the city	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	0
Denominator	Total waste water generated in the city per day	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	Data Unavailable
Denominator	Total waste water received at treatment plants per day	Data Unavailable
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	Data Unavailable
Denominator	Total length of road network in the city	67.858
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**100**

Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	36211
Denominator	Total number of households and establishments in the city	36211
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**87.92**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	131
Denominator	Total quantum of MSW generated in the city	149
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**0.76**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	30
Denominator	Average MSW generated in the city (tons per month)	3930
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**2**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	2
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**11.1**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	11.1

Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**40.82**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	40.82
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	16
Denominator	Total number of noise samples	19
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**14.29**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	12
Denominator	Total number of samples tested	84
Unit	Percentage	
Benchmark	100%

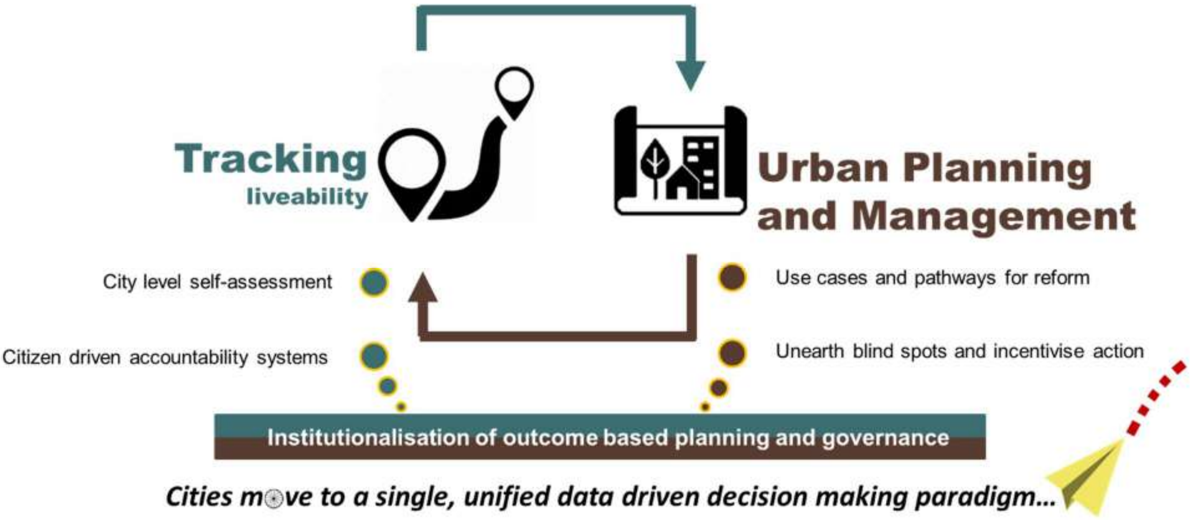
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).

SHIMLA

GEOGRAPHICAL PROFILE

State/Union Territory	Himachal Pradesh	**Total Geographical Area (Km^2)**	35.34	**City Category**	Small City

DEMOGRAPHIC PROFILE

Total Population	169578
Total Number of Households	25952

SOCIAL PROFILE

Education	**Total Number of Schools**	146
	Total Enrolment (Class 1 to 5)	13917
Health	**Total Number of In-patient Beds**	259
	Total Health Workforce	328
Safety and Security	**Total Strength of Police Force**	203
	Total Number of CCTV Cameras	111
Heritage Sites	**Total Number of Heritage Sites**	0

ECONOMIC PROFILE

Total Population in Working Age Group (2016)	128294
Total Number of Industries	0
Total Number of Commercial Enterprises	
Total Number of Hotels	253
Total Capital and Revenue Expenditure for the city in FY 2016-14 (INR Lakhs)	13388.5
Total VAT Collection in FY 2016-17 (INR Lakhs)	2028836539

PHYSICAL PROFILE		
Water	Average Quantity of Water Supplied (MLD)	33
	Total Number of Water Connection	30995
Sanitation Facilities	Total number of households with access to individual toilets in the city	30995
	Total number of households in the city with access to community toilets in the city	1499
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	70
	Total number of households covered through door-to-door collection of solid waste	34992
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	24
	Daily average quantum of waste water treated by STPs in the city (MLD)	7.358
Electricity	Total number of authorized electrical connections in the city	39360
	Total electricity supplied to the city (kWh)	1333867563
Public and Open Spaces	Total area covered by green spaces in the city (m^2)	
Roads and Transport	Total Length of Road Network in the City (Km)	142.636
	Total length of arterial and sub-arterial road network in the city (Km)	0
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	73.7

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in

Pillars of Comprehensive Development	Category	Indicators
		schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density

Pillars of Comprehensive Development	Category	Indicators
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through

Pillars of Comprehensive Development	Category	Indicators
		meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

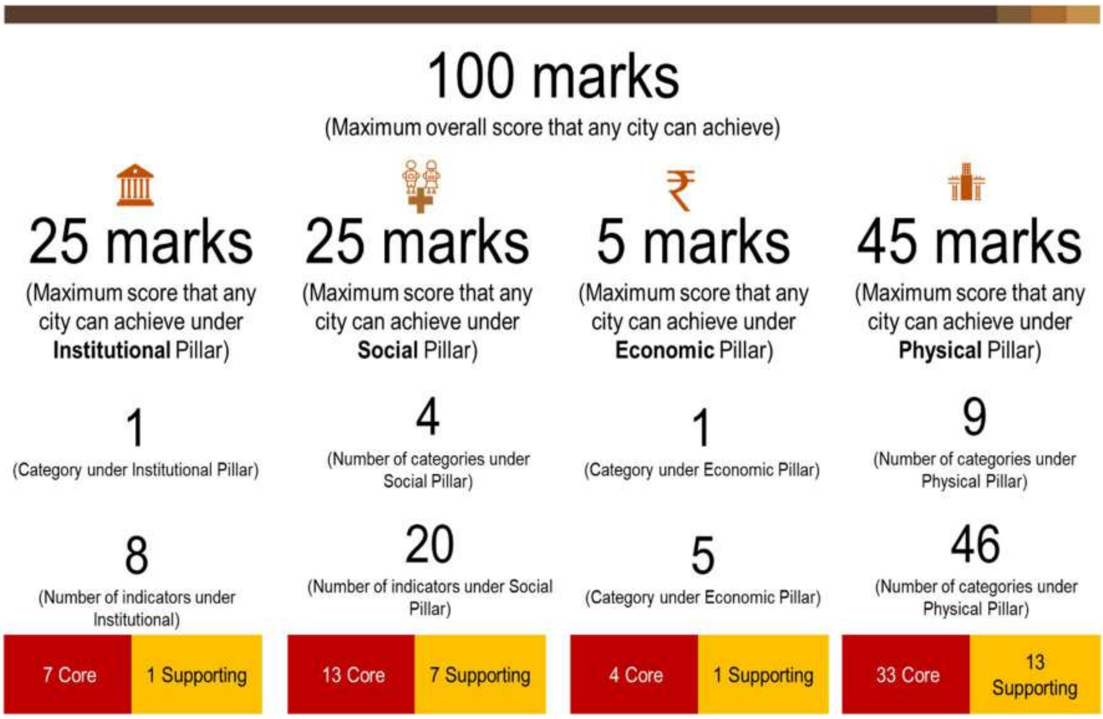
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks

(Maximum overall score that any city can achieve)

25 marks (Maximum score that any city can achieve under **Institutional** Pillar)	25 marks (Maximum score that any city can achieve under **Social** Pillar)	5 marks (Maximum score that any city can achieve under **Economic** Pillar)	45 marks (Maximum score that any city can achieve under **Physical** Pillar)
1 (Category under Institutional Pillar)	4 (Number of categories under Social Pillar)	1 (Category under Economic Pillar)	9 (Number of categories under Physical Pillar)
8 (Number of indicators under Institutional)	20 (Number of indicators under Social Pillar)	5 (Category under Economic Pillar)	46 (Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	MC Shimla
Urban Local Body	For Park and Recreation Related Questions	MC Shimla
Urban Local Body	For Water Supply and Drainage related questions	MC Shimla
Urban Local Body	For Heritage sites related data	Tourism Department
Urban Local Body	For Ecological sites related data	MC Shimla
Urban Local Body	For Housing related data	MC Shimla
Urban Local Body	For Building plan related data	MC Shimla
Urban Local Body	For Roads related data	Public Work Department
Urban Local Body	For Solid waste management related data	MC Shimla
Urban Local Body	For IT services related data	IT Shimla
Urban Local Body	For Vendor committee related data	MC Shimla
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	Tourism, PWD, Education, RTO and electricity board.
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Pollution Control Board Department
Development Authority	Building Infrastructure	MC Shimla
	Construction planning	MC Shimla
	Green Building	MC Shimla

Designated data owners	Subcategories	Data owners at city level
	Rain water harvesting	MC Shimla
	Universal Design Principle	MC Shimla
DISCOM /Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Electricity Board Department
State Disaster management authority		State disaster management department
State Education Department		Directory of state elementary
State Health Department	Health care professionals	Chief Medical Officer
	Citizen Services	CMO
	Disease Prevalence	CMO
	Health Infrastructure	CMO
State Renewable Energy Development Agency		Renewable Energy Development department
State Sales / Commercial Taxes Department		Taxation Department
Town and Country Planning Department	Land Use	Town and country Planning Department
Traffic and Police Department		Police Department
Transport Authorities	Buses	Regional transportation Office
	Registered Vehicles	RTO
	Sub urban rail transport	RTO
	Mono Rail Authority	RTO
	Tramways	RTO
	Marine Transport Authority	RTO

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 31 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments.

Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	1
State Education Department	1
DISCOM/Electricity Department	1
Traffic and Police Department	1
Development Authority	0
Pollution Control Board	3
State Renewable Energy Department	1
Town and Country Planning	1
State Health Department	3
Transport Authority	1
Disaster Management	0
Urban Local Body	18
Total	31*

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

7. LA - Street Vendors
8. LA - Universal Design Principles

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**60.55**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	1
	1.1c trade license	1
	1.1d solid waste management	0
	1.1e water supply	1
	1.1f sewerage/drainage	1
	1.1g fogging	0
	1.1h property tax	0.333333333

Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**73.53**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	25
Denominator	Total number of wards	34
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	0
Denominator	Total number of historic buildings/sites identified	7
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	0
Denominator	Total number of ecologically important sites identified in the city	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**21.71**
Description	Average Occupancy rate of Hotels	21.71428571
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	0
Denominator	Total budget of the ULB (capital and revenue)	13388.5
Unit	Percentage	

Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**0**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	0
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**89.29**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	23078
Denominator	Total population in the age group of 6-14 years	25847
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**93.28**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	10784
Denominator	Total female population in the age group of 6-14 years	11561
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**21.92**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	13917
Denominator	Total number of teachers available for primary grades (public and private schools)	635
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**0**

Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	0
Denominator	Total number of schools	146
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**91.33**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	
Numerator	Percentage	**91.33**
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**103.8**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	
Numerator	Percentage	**103.8**
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**15.27**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	259
Denominator	Total population of the city	169578
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**19.34**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	328
Denominator	Total population of the city	169578

Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**0**
Description	Total response time for health-related distress calls received in the city	0
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**20.82**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	35311
Denominator	Total population of the city	169578
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	2
Denominator	Total population of the city	169578
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**77.82**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	111
Denominator	Total length of road network in the city	142.636
Unit	Percentage	
Benchmark	100%	

Indicator No: 5.2	**Number of recorded crimes per lakh population**	**587.93**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	997
Denominator	Total population of the city	169578
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**10.13**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	101
Denominator	Total crimes recorded in the same year	997
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**15.33**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	26
Denominator	Total population of the city	169578
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**14.95**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	263808207
Denominator	Total VAT/GST collection during preceding year	17650283.32

Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	0
Denominator	Total Professional Tax collection during preceding year	0
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**-48.58**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	-103
Denominator	Number of construction permits during preceding year	2.12
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	78157
Denominator	Total labour force in the city	25847
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	

Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	0
Denominator	Total number of vendors in the city	1035
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**5.96**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	350
Denominator	Total number of slum and EWS households in the city	58.75
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**Non-Compuatble**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	**Data Unavailable**
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	Data Unavailable

Denominator	Total population of the city	169578
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**0.12**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	19995.661
Denominator	Total population of the city	169578
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	Data Unavailable
Denominator	Total area of the city (total area of all land uses)	35340000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 9.2	**Net Density**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	169578
Denominator	Area allocated for residential land use (in hectares)	Data Unavailable
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**125.99**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	32696
Denominator	Total number of households in the city	25952
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	39360
Unit	Percentage	

Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**73**
Description	Total number of sustained electrical interruptions in a year	73
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.81**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	1273
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	413.5
Denominator	Total energy consumption from all sources	1333867563
Unit	Percentage	
Benchmark	10%	

Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	0
Denominator	Total quantum of water and waste water handled during the period	1210.74
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.34**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	2418953
Denominator	Total number of street light installations	10120
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0

Denominator	Total built up area of all new/redeveloped buildings completed during the same year	109
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.53**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	1333867563
Denominator	Total population of the city	169578
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	Data Unavailable
Denominator	Total area of the city (sq.km)	35.34
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**1.47**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	250
Denominator	Total population of the city	169578
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	33
Unit	Percentage	

Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	142.636
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	0
Denominator	Total number of major transport interchanges in the city	3
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	0
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**0**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	0
Denominator	Total number of major interchanges in the city	3
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**50**
Formula:	*Numerator / Denominator*	

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Numerator	Total number of signalised intersections that are synchronised	2
Denominator	Total number of signalised intersections in the city	4
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	0
Denominator	Total available on-street parking spaces in the city	0
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**25.83**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	73.7
Denominator	Total length of road network in the city	285.272
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	0
Denominator	Total number of junctions/ intersections on major roads in the city	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	0
Denominator	Total number of public right-of-way areas in the city	117

Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**90.07**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	23374
Denominator	Total number of households in the city	25952
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**194.6**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	33
Denominator	Total population of the city	169578
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	64
Denominator	Total number of samples tested for water quality	2314
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**Non-Computable**
Formula:	*Numerator / Denominator*	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	Blank
Denominator	Quantum of water put into the distribution system (mld)	33
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	30995
Denominator	Total number of water connections in the city	30995
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**80**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	4
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	5
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**125.21**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual	32494

	and/or community toilets	
Denominator	Total number of properties in the city	25952
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**61.18**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	15878
Denominator	Total number of properties in the city	25952
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**41.13**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	9.87
Denominator	Total waste water generated in the city per day	24
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	0
Denominator	Total waste water received at treatment plants per day	9.87
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**0.46**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	0.65

Denominator	Total length of road network in the city	142.636
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**153.25**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	39771
Denominator	Total number of households and establishments in the city	25952
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**80**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	70
Denominator	Total quantum of MSW generated in the city	87.5
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**71.43**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	1500
Denominator	Average MSW generated in the city (tons per month)	2100
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**4**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	4
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**37.7**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	37.7
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**100.2**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	100.2
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	151
Denominator	Total number of noise samples	216
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	4
Denominator	Total number of samples tested	4
Unit	Percentage	
Benchmark	100%	

LIVEABILITY ASSESSMENT

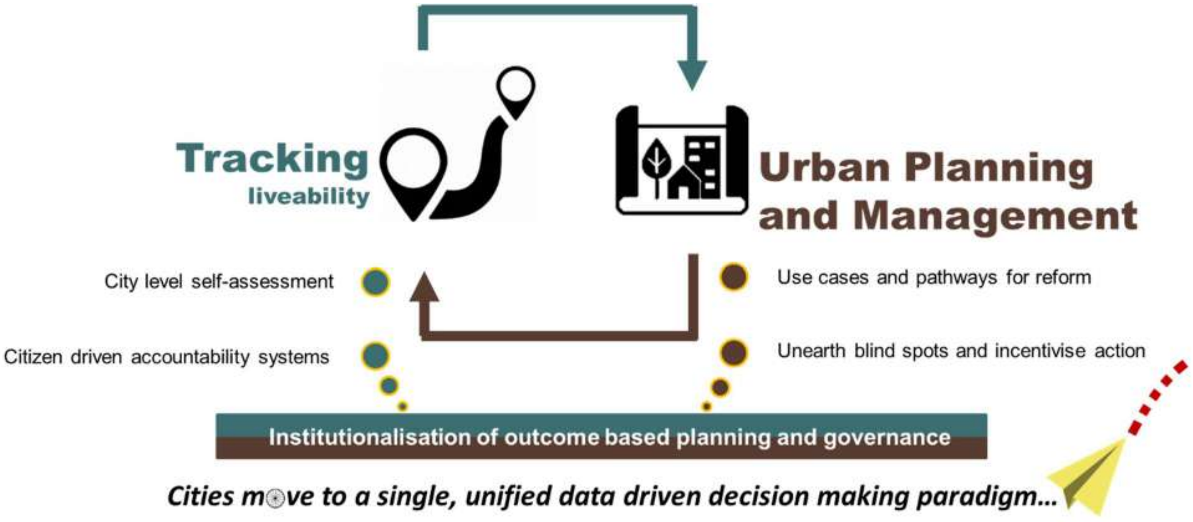
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

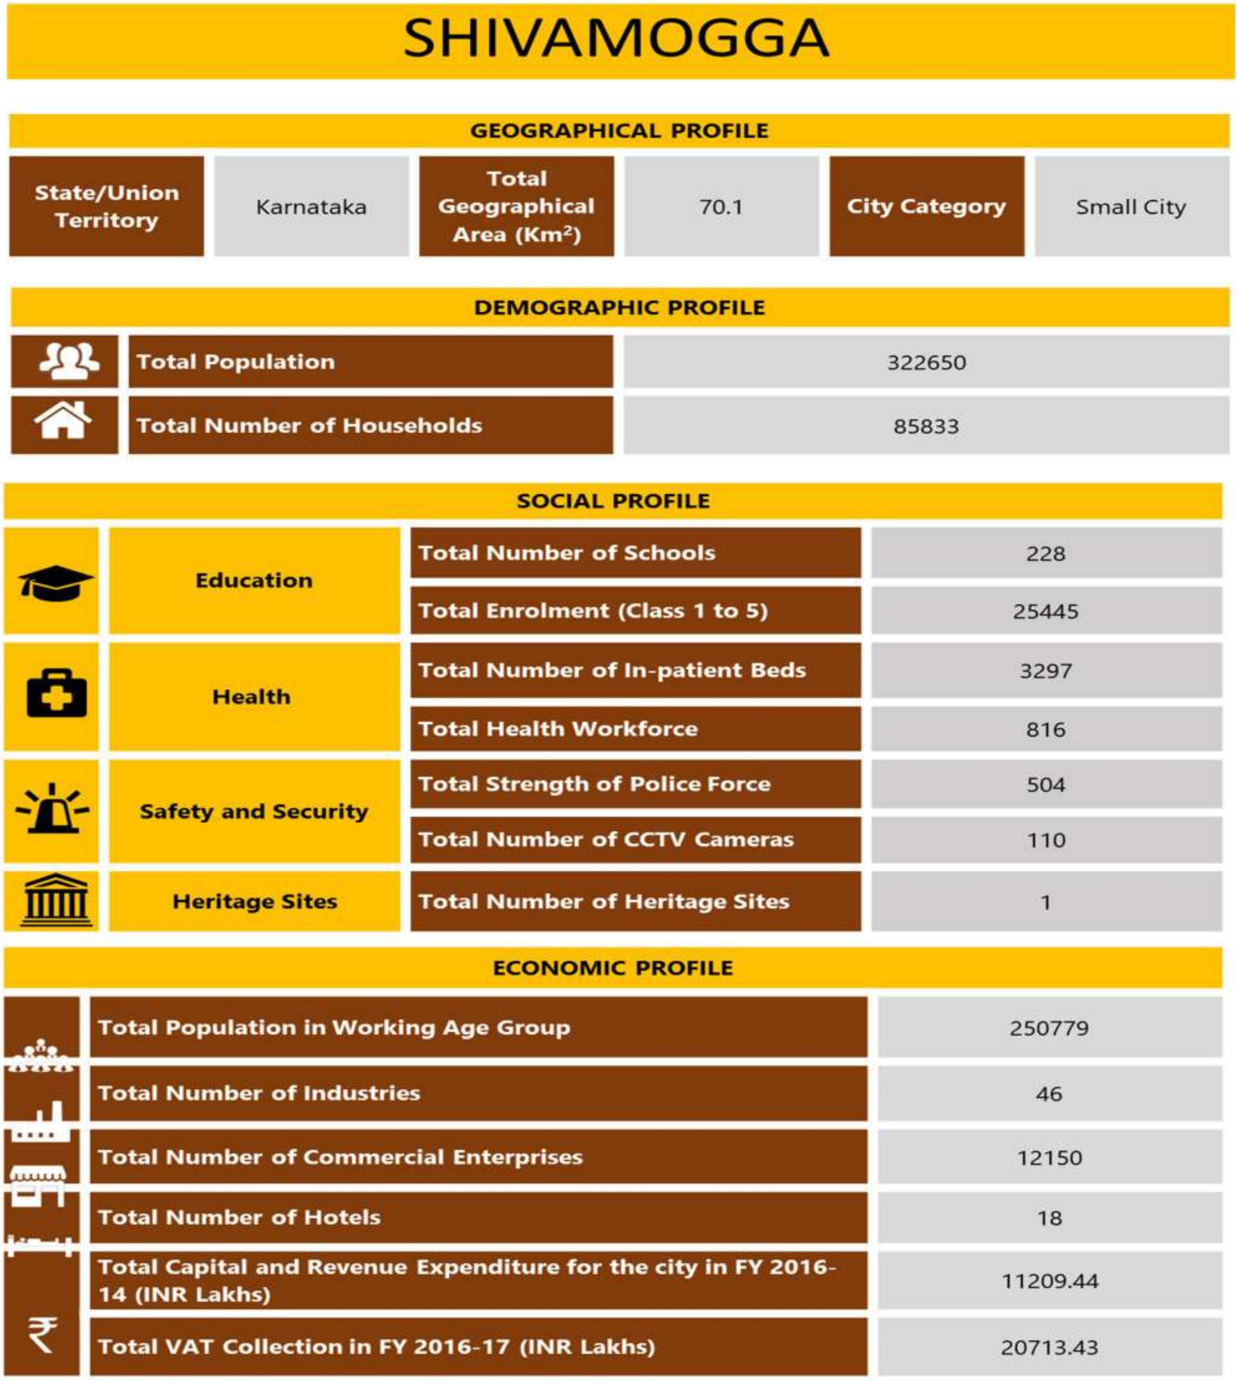


Tracking liveability
Urban Planning and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



SHIVAMOGGA

GEOGRAPHICAL PROFILE

State/Union Territory	Karnataka	Total Geographical Area (Km^2)	70.1	City Category	Small City

DEMOGRAPHIC PROFILE

Total Population	322650
Total Number of Households	85833

SOCIAL PROFILE

Education	Total Number of Schools	228
	Total Enrolment (Class 1 to 5)	25445
Health	Total Number of In-patient Beds	3297
	Total Health Workforce	816
Safety and Security	Total Strength of Police Force	504
	Total Number of CCTV Cameras	110
Heritage Sites	Total Number of Heritage Sites	1

ECONOMIC PROFILE

Total Population in Working Age Group	250779
Total Number of Industries	46
Total Number of Commercial Enterprises	12150
Total Number of Hotels	18
Total Capital and Revenue Expenditure for the city in FY 2016-14 (INR Lakhs)	11209.44
Total VAT Collection in FY 2016-17 (INR Lakhs)	20713.43

PHYSICAL PROFILE		
Water	**Average Quantity of Water Supplied (MLD)**	84
	Total Number of Water Connection	42346
Sanitation Facilities	**Total number of households with access to individual toilets in the city**	67694
	Total number of households in the city with access to community toilets in the city	1147
Solid Waste Management	**Daily average quantity of municipal solid waste collected in the city (Tonnes/day)**	112
	Total number of households covered through door-to-door collection of solid waste	62700
Waste Water	**Daily Average Quantum of Waste Water Generated in the City (MLD)**	12.32
	Daily average quantum of waste water treated by STPs in the city (MLD)	12.32
Electricity	**Total number of authorized electrical connections in the city**	130059
	Total electricity supplied to the city (kWh)	221458095
Public and Open Spaces	**Total area covered by green spaces in the city (m^2)**	1202000
Roads and Transport	**Total Length of Road Network in the City (Km)**	917
	Total length of arterial and sub-arterial road network in the city (Km)	35.75
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	9.3

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various ‘Category Sub-Indexes’ and a composite ‘City Liveability Index’ will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population

Pillars of Comprehensive Development	Category	Indicators
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from

Pillars of Comprehensive Development	Category	Indicators
		renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or

Pillars of Comprehensive Development	Category	Indicators
		septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

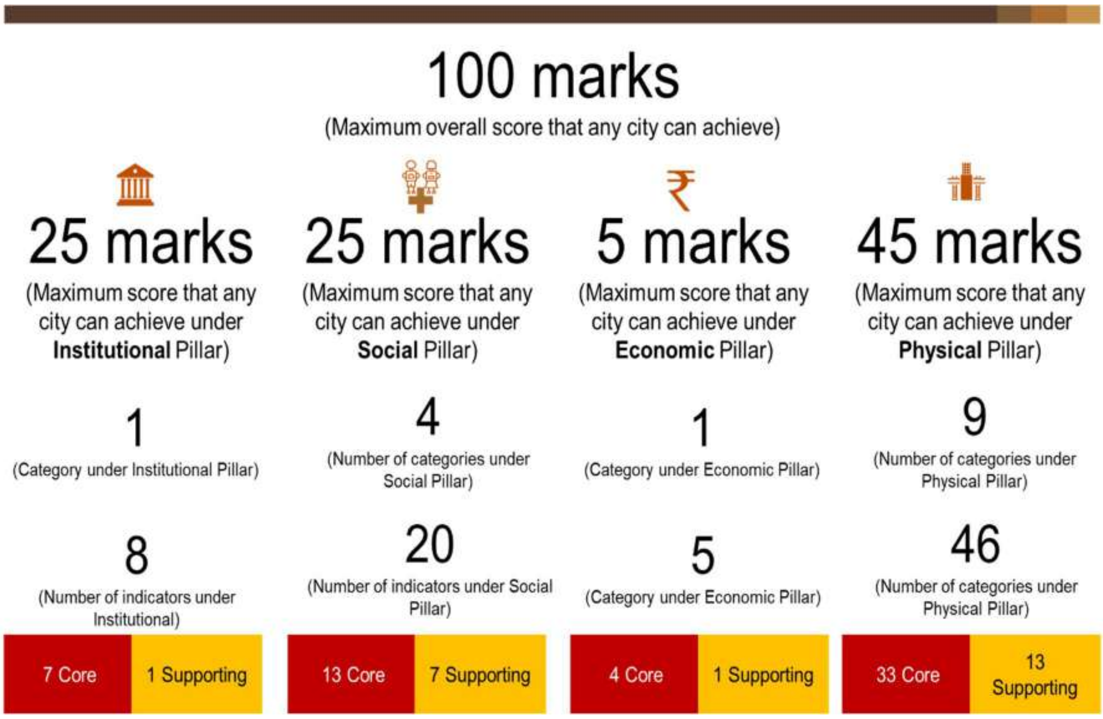
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks
(Maximum overall score that any city can achieve)

25 marks (Maximum score that any city can achieve under **Institutional** Pillar)	25 marks (Maximum score that any city can achieve under **Social** Pillar)	5 marks (Maximum score that any city can achieve under **Economic** Pillar)	45 marks (Maximum score that any city can achieve under **Physical** Pillar)
1 (Category under Institutional Pillar)	4 (Number of categories under Social Pillar)	1 (Category under Economic Pillar)	9 (Number of categories under Physical Pillar)
8 (Number of indicators under Institutional)	20 (Number of indicators under Social Pillar)	5 (Category under Economic Pillar)	46 (Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to "maximum within the comparison group" or "absolute benchmarks". For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and

development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Accounts Department Shivamogga Smart City Limited (SSCL)
Urban Local Body	For Park and Recreation Related Questions	Town Planning Department SSCL
Urban Local Body	For Water Supply and Drainage related questions	Engineering Department SSCL
Urban Local Body	For Heritage sites related data	Town Planning Department SSCL
Urban Local Body	For Ecological sites related data	Department of forest, ecology and environment
Urban Local Body	For Housing related data	Rajiv Gandhi rural housing corporation limited. SSCL
Urban Local Body	For Building plan related data	Town Planning Department SSCL
Urban Local Body	For Roads related data	Engineering Department SSCL
Urban Local Body	For Solid waste management related data	Environment Department
Urban Local Body	For IT services related data	IT Department
Urban Local Body	For Vendor committee related data	Urban Poverty Alleviation Cell Deendayal Antyodaya Yojana National Urban Livelihood Mission. (DAY_NULM)
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	Commercial Tax Department (Professional Tax related queries), Education Department (Population of age group between 6-14), Revenue Department, PMAY, District Employment Exchange, Development Authority, DULT (CMP related), KMDS (No. of Hits in the online service portals), Health Department, Pollution Department
Central / state Pollution control	Water Quality, Air Quality, Noise Quality	State Pollution department

Designated data owners	Subcategories	Data owners at city level
Board		
Development Authority	Building Infrastructure	Development Authority
	Construction planning	Development Authority and Town Planning Department, SSCL
	Green Building	Town Planning Department, SSCL
	Rain water harvesting	Town Planning Department, SSCL
	Universal Design Principle	Development Authority
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Mangalore Electricity Supply Company Limited
State Disaster management authority		Deputy Commissioner Office
State Education Department		Coordinator – SSA
State Health Department	Health care professionals	District Health Office / Taluk Health Office
	Citizen Services	District Health Office / Taluk Health Office
	Disease Prevalence	District Health Office / Taluk Health Office
	Health Infrastructure	District Health Office / Taluk Health Office
State Renewable Energy Development Agency	Renewable Energy	Mangalore Electricity Supply Company Limited
State Sales / Commercial Taxes Department		Assistant Commissioner, Commercial Tax Office
Town and Country Planning Department	Land Use	Development Authority
Traffic and Police Department		Deputy Police Commissioner's Office
Transport Authorities	Buses	Regional Transport Officer Office
	Registered Vehicles	Regional Transport Officer Office
	Sub urban rail transport	Not Applicable
	Mono Rail Authority	Not Applicable
	Tramways	Not Applicable
	Marine Transport Authority	Not Applicable

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 131 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

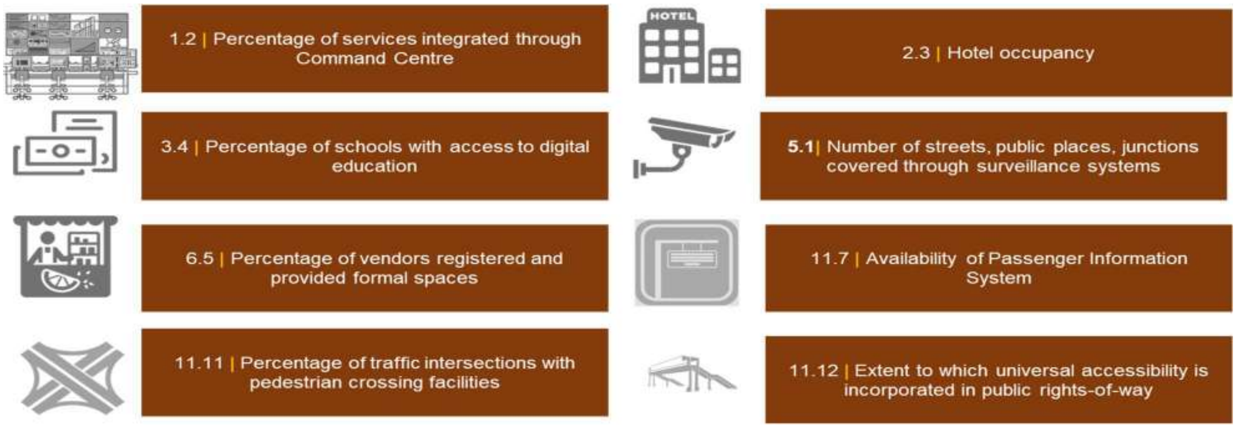
Data Owners	Number of Documents
Sales and Commercial Taxes	**2**
State Education Department	**4**
DISCOM/Electricity Department	**5**
Traffic and Police Department	**2**
Development Authority	**8**
Pollution Control Board	**2**
State Renewable Energy Department	**3**
Town and Country Planning	**1**
State Health Department	**6**
Transport Authority	**4**
Disaster Management	**1**
Urban Local Body	**93**
Total	**131***

* The count of documents is based on first round of submission.

4.4 Data Verification

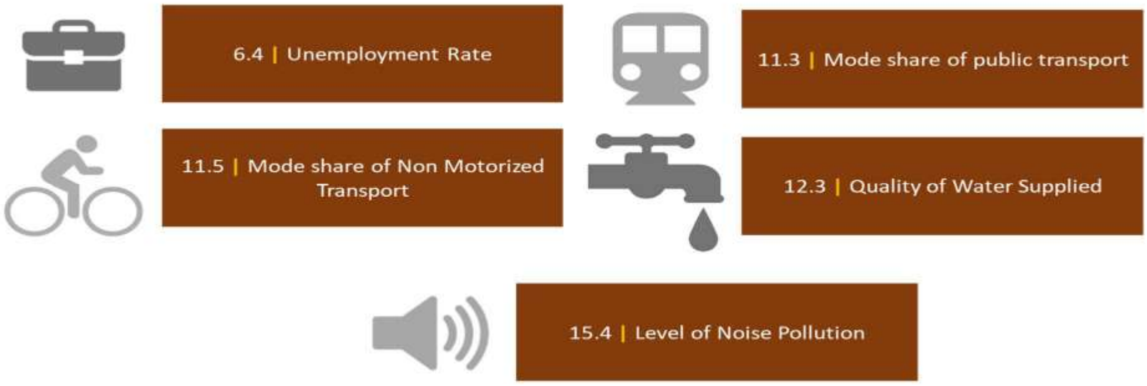
A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:



- 1.2 | Percentage of services integrated through Command Centre
- 2.3 | Hotel occupancy
- 3.4 | Percentage of schools with access to digital education
- 5.1 | Number of streets, public places, junctions covered through surveillance systems
- 6.5 | Percentage of vendors registered and provided formal spaces
- 11.7 | Availability of Passenger Information System
- 11.11 | Percentage of traffic intersections with pedestrian crossing facilities
- 11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.



- 6.4 | Unemployment Rate
- 11.3 | Mode share of public transport
- 11.5 | Mode share of Non Motorized Transport
- 12.3 | Quality of Water Supplied
- 15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

7. LA - Street Vendors
8. LA - Universal Design Principles

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend

etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**47.8**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	0.5
	1.1b death certificate	0.5
	1.1c trade license	0.75
	1.1d solid waste management	0
	1.1e water supply	0
	1.1f sewerage/drainage	0
	1.1g fogging	0
	1.1h property tax	1
	1.1i professional tax	0.75
	1.1j information	0.769230769
	1.1k Grievance redressal	1
	1.1l electricity	0.5
	1.1m Building plan	0.444444444
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**2.38**
Description	Services integrated through an integrated or a singular operations command centre	0.5
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**Non-Computable**
Description		
Sub Indicators	1.3a Building plan	0

	1.3b Birth/Death Certificate	0
	1.3c water supply	0
	1.3d solid waste management	0
	1.3e property tax	0
	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	0

Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**1.5**
Description		
Sub Indicators	1.4a water supply	0
	1.4b solid waste	0.5
	1.4c street lights	0
	1.4d sewerage	0
	1.4e professional tax	10
	1.4f parks and recreational spaces	0
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**115.67**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	1743.18
Denominator	Total demand raised for the year	1507
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**524.96**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	245.21

Denominator	Total O&M cost for providing water supply services during the year	46.71
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**12.21**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	2219.05
Denominator	Total expenditure (revenue and capital accounts) in the same year	18172.65
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	0
Denominator	Total number of wards	35
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	0
Denominator	Total number of historic buildings/sites identified	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	0
Denominator	Total number of ecologically important sites identified in the city	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**Non-**

		Computable
Description	Average Occupancy rate of Hotels	Data Unavailable
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0.89**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	100
Denominator	Total budget of the ULB (capital and revenue)	11209.44
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**11**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	11
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**75.82**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	40708
Denominator	Total population in the age group of 6-14 years	53688
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**75.32**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	19820
Denominator	Total female population in the age group of 6-14 years	26315
Unit	Percentage	
Benchmark	100%	

Indicator No: 3.3	**Primary education student-teacher ratio**	**55.8**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	25445
Denominator	Total number of teachers available for primary grades (public and private schools)	456
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	0
Denominator	Total number of schools	228
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**93.15**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	93.15028 949
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**97.96**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	26357860
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**102.19**
Formula:	*Numerator / Denominator*	

Numerator	Number of in-patient hospital beds in public and private hospitals	3297
Denominator	Total population of the city	322650
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**25.29**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	816
Denominator	Total population of the city	322650
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**35**
Description	Total response time for health-related distress calls received in the city	35
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.62**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	2013
Denominator	Total population of the city	322650
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.07**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	212
Denominator	Total population of the city	322650
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**12**
Formula:	*Numerator / Denominator*	

Numerator	Total number of CCTV cameras installed	110
Denominator	Total length of road network in the city	917
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**934.45**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	3015
Denominator	Total population of the city	322650
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**10.55**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	318
Denominator	Total crimes recorded in the same year	3015
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**25.41**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	82
Denominator	Total population of the city	322650
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**14.91**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	2687.85
Denominator	Total VAT/GST collection during preceding year	180.2558
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**1.07**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	2.3
Denominator	Total Professional Tax collection during preceding year	214.28
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**-4.21**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	-57
Denominator	Number of construction permits during preceding year	13.54
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	6805
Denominator	Total labour force in the city	53688
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**0**
Formula:	*Numerator / Denominator*	

Numerator	Number of street vendors registered and provided formal spaces	0
Denominator	Total number of vendors in the city	1555
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**6.77**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	817
Denominator	Total number of slum and EWS households in the city	120.66
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**2.18**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	8827704810
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**3.73**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	1202000
Denominator	Total population of the city	322650
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**24.69**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	7965710.9
Denominator	Total population of the city	322650

Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**23.22**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	16280000
Denominator	Total area of the city (total area of all land uses)	70100000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	322650
Denominator	Area allocated for residential land use (in hectares)	51478000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**118.71**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	101891
Denominator	Total number of households in the city	85833
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0

Denominator	Total number of electricity connections in the city	130059
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**730**
Description	Total number of sustained electrical interruptions in a year	730
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.68**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	75948
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	411.31
Denominator	Total energy consumption from all sources	221458095
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.33**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	886482.7483
Denominator	Total quantum of water and waste water handled during the period	2889.6
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.34**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	8697253

Denominator	Total number of street light installations	17506
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	0
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.79**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	221458095
Denominator	Total population of the city	322650
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.09**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	10
Denominator	Total area of the city (sq.km)	70.1
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**2.71**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	873
Denominator	Total population of the city	322650
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be**

		computed
Description	Mode share of public transport	35.49
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	917
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	0
Denominator	Total number of major transport interchanges in the city	3
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	0
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**0.33**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	1
Denominator	Total number of major interchanges in the city	3
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	0

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Denominator	Total number of signalised intersections in the city	7
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	0
Denominator	Total available on-street parking spaces in the city	13
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**0.51**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	9.3
Denominator	Total length of road network in the city	1834
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**76.47**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	13
Denominator	Total number of junctions/ intersections on major roads in the city	17
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**85.96**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	245
Denominator	Total number of public right-of-way areas in the city	285
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**45.38**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	38950

Denominator	Total number of households in the city	85833
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**260.34**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	84
Denominator	Total population of the city	322650
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	30
Denominator	Total number of samples tested for water quality	30
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**8.15**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	6.85
Denominator	Quantum of water put into the distribution system (mld)	84
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**1.1**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	466
Denominator	Total number of water connections in the city	42346
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	0

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	1333
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**85.76**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	80153
Denominator	Total number of properties in the city	93463
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**58.49**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	54662
Denominator	Total number of properties in the city	93463
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	12.32
Denominator	Total waste water generated in the city per day	12.32
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	12.32
Denominator	Total waste water received at treatment plants per day	12.32
Unit	Percentage	
Benchmark	20% or more	

Indicator No: 13.5	**Coverage of storm water drains**	**17.01**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	156
Denominator	Total length of road network in the city	917
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**74.2**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	72700
Denominator	Total number of households and establishments in the city	97983
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**71.79**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	112
Denominator	Total quantum of MSW generated in the city	156
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**10.71**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	360
Denominator	Average MSW generated in the city (tons per month)	3360
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**Non=Computable**

Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	Data Unavailable
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**Non=Computable**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	Data Unavailable
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**Non=Computable**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	Data Unavailable
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	Data Unavailable
Denominator	Total number of noise samples	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	Data Unavailable
Denominator	Total number of samples tested	Data Unavailable
Unit	Percentage	
Benchmark	100%

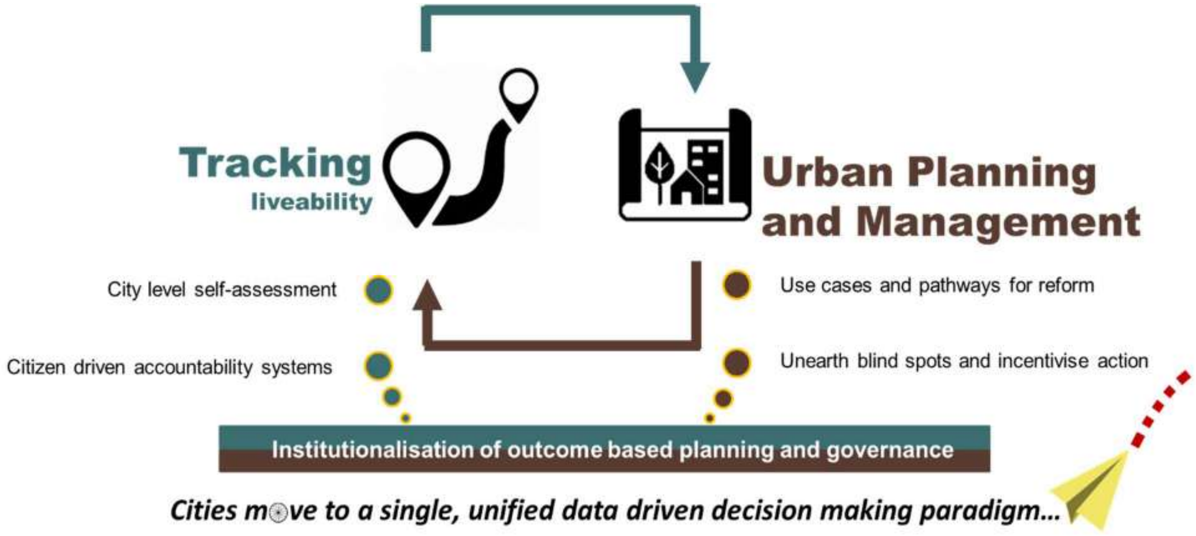
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

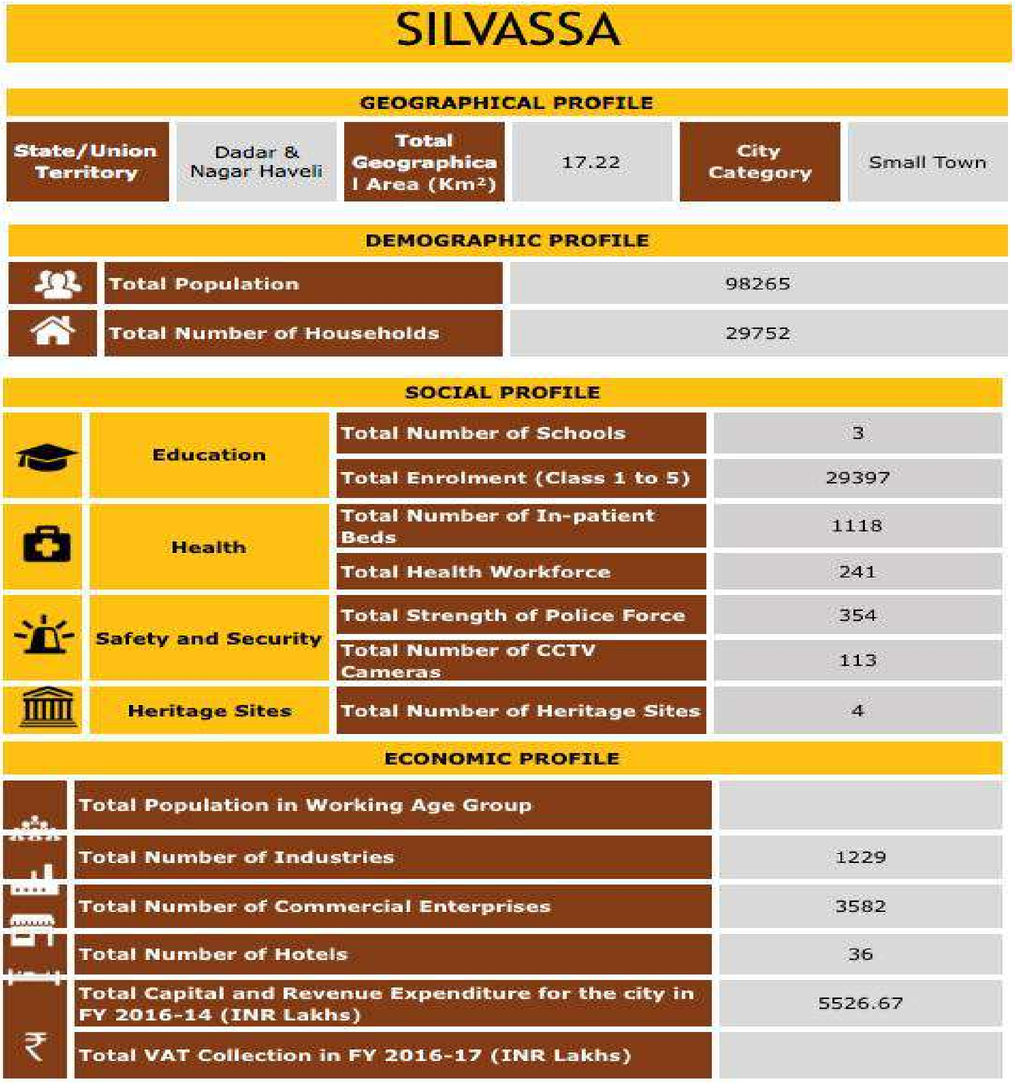


Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



SILVASSA

GEOGRAPHICAL PROFILE

State/Union Territory	Dadar & Nagar Haveli	**Total Geographical Area (Km^2)**	17.22	**City Category**	Small Town

DEMOGRAPHIC PROFILE

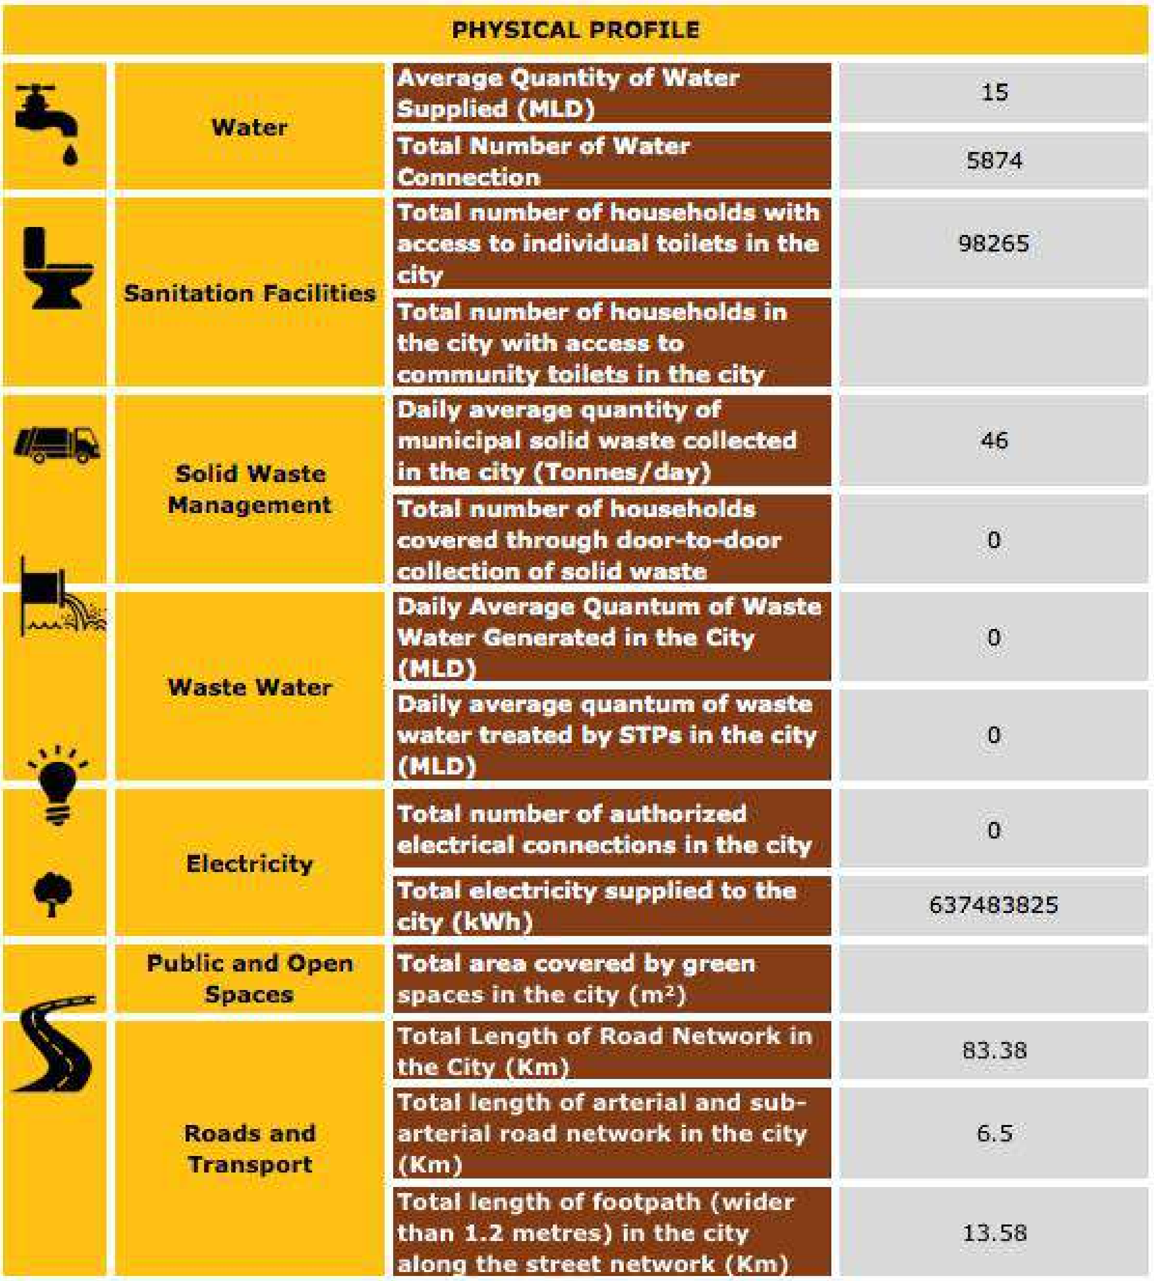
Total Population	98265
Total Number of Households	29752

SOCIAL PROFILE

Education	**Total Number of Schools**	3
	Total Enrolment (Class 1 to 5)	29397
Health	**Total Number of In-patient Beds**	1118
	Total Health Workforce	241
Safety and Security	**Total Strength of Police Force**	354
	Total Number of CCTV Cameras	113
Heritage Sites	**Total Number of Heritage Sites**	4

ECONOMIC PROFILE

Total Population in Working Age Group	
Total Number of Industries	1229
Total Number of Commercial Enterprises	3582
Total Number of Hotels	36
Total Capital and Revenue Expenditure for the city in FY 2016-14 (INR Lakhs)	5526.67
Total VAT Collection in FY 2016-17 (INR Lakhs)	



PHYSICAL PROFILE

Water	Average Quantity of Water Supplied (MLD)	15
	Total Number of Water Connection	5874
Sanitation Facilities	Total number of households with access to individual toilets in the city	98265
	Total number of households in the city with access to community toilets in the city	
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	46
	Total number of households covered through door-to-door collection of solid waste	0
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	0
	Daily average quantum of waste water treated by STPs in the city (MLD)	0
Electricity	Total number of authorized electrical connections in the city	0
	Total electricity supplied to the city (kWh)	637483825
Public and Open Spaces	Total area covered by green spaces in the city (m²)	
Roads and Transport	Total Length of Road Network in the City (Km)	83.38
	Total length of arterial and sub-arterial road network in the city (Km)	6.5
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	13.58

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indica tors). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive

development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1. Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in

Pillars of Comprehensive Development	Category	Indicators
		schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and In-**	7.1 Percentage of Slum/EWS households covered through

Pillars of Comprehensive Development	Category	Indicators
	clusiveness	formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks

Pillars of Comprehensive Development	Category	Indicators
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection

Pillars of Comprehensive Development	Category	Indicators
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through re-use
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2. Scoring and Computing Category Indices of Liveability

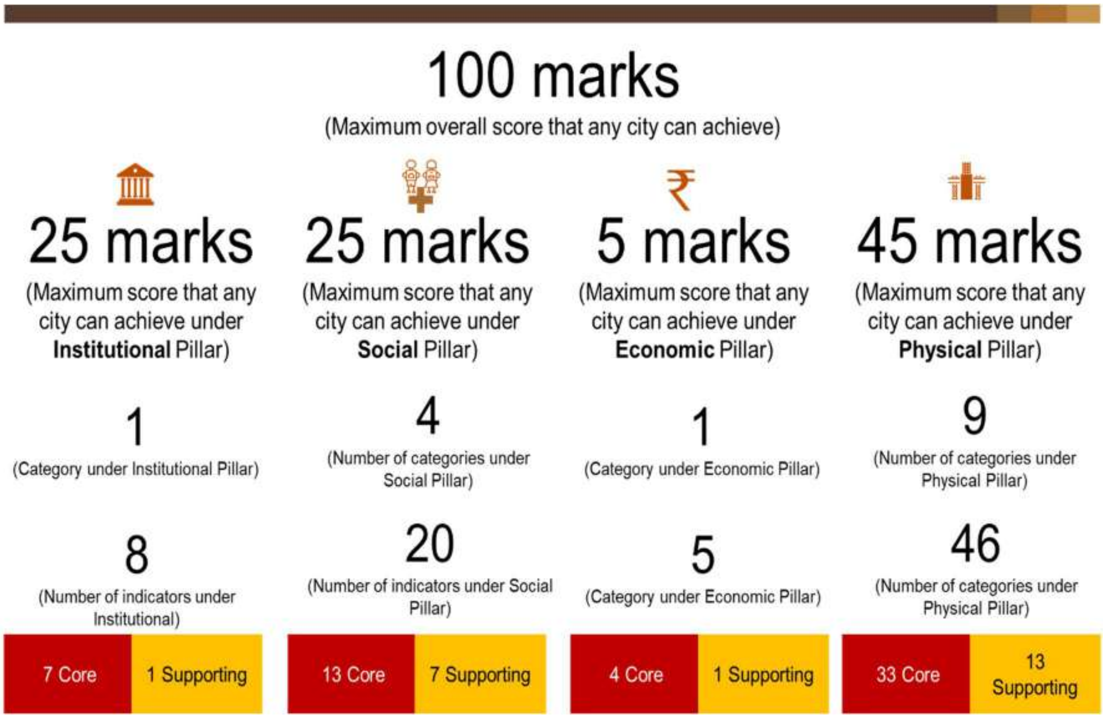
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3. Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks

(Maximum overall score that any city can achieve)

25 marks	**25 marks**	**5 marks**	**45 marks**
(Maximum score that any city can achieve under **Institutional** Pillar)	(Maximum score that any city can achieve under **Social** Pillar)	(Maximum score that any city can achieve under **Economic** Pillar)	(Maximum score that any city can achieve under **Physical** Pillar)
1 (Category under Institutional Pillar)	4 (Number of categories under Social Pillar)	1 (Category under Economic Pillar)	9 (Number of categories under Physical Pillar)
8 (Number of indicators under Institutional)	20 (Number of indicators under Social Pillar)	5 (Category under Economic Pillar)	46 (Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring. The list of benchmarks is presented in Annexure 1.

3.4. Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicatorvalueforthecity - indicatorvaluefortheworstperformingcity}{benchmark - indicatorvaluefortheworstperformingcity}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1. Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2. Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions

on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Account Department (Silvassa Municipal Council)
Urban Local Body	For Park and Recreation Related Questions	Forest Department-Silvassa
Urban Local Body	For Water Supply and Drainage related questions	Water Supply and Drainage Department Silvassa Municipal Council-Silvassa
Urban Local Body	For Heritage sites related data	Silvassa Municipal Council-Silvassa
Urban Local Body	For Ecological sites related data	Tourism Department-Silvassa
Urban Local Body	For Housing related data	Housing Department –SMC-Silvassa
Urban Local Body	For Building plan related data	Housing Department –SMC-Silvassa
Urban Local Body	For Roads related data	PWD and Silvassa Municipal Council-Silvassa
Urban Local Body	For Solid waste management related data	Silvassa Municipal Council-Silvassa
Urban Local Body	For IT services related data	Silvassa Municipal Council-Silvassa
Urban Local Body	For Vendor committee related data	Silvassa Municipal Council-Silvassa
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	ULB/SMC-Silvassa

Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Pollution Control Board-Silvassa
Development Authority	Building Infrastructure	Silvassa Municipal Council- Silvassa
	Construction planning	Silvassa Municipal Council- Silvassa
	Green Building	Silvassa Municipal Council- Silvassa
	Rain water harvesting	Silvassa Municipal Council- Silvassa
	Universal Design Principle	Silvassa Municipal Council- Silvassa
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Electricity Board, 66 KV Road-Silvassa
State Disaster management authority		
State Education Department		
State Health Department	Health care professionals	Shri. Vinoba Bhave Civil Hospital-Silvassa (Health Department)
	Citizen Services	Shri. Vinoba Bhave Civil Hospital-Silvassa (Health Department)
	Disease Prevalence	Shri. Vinoba Bhave Civil Hospital-Silvassa (Health Department)
	Health Infrastructure	Shri. Vinoba Bhave Civil Hospital-Silvassa (Health Department)
State Renewable Energy Development Agency		State Renewable Energy Development Agency 66 KV Road, Silvassa
State Sales / Commercial Taxes Department		Commercial Tax Department- Silvassa
Town and Country Planning Department	Land Use	Town and Country Planning Department, Silvassa
Traffic and Police Department		
Transport Authorities	Buses	Transport /RTO- Silvassa, D & NH
	Registered Vehicles	Transport /RTO- Silvassa, D & NH

	Sub urban rail transport	Not Applicable
	Mono Rail Authority	Not Applicable
	Tramways	Not Applicable
	Marine Transport Authority	Transport /RTO- Silvassa, D & NH

4.3. List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 17 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	1
State Education Department	1
DISCOM/Electricity Department	3
Traffic and Police Department	2
Development Authority	0
Pollution Control Board	0
State Renewable Energy Department	1
Town and Country Planning	1
State Health Department	3
Transport Authority	1
Disaster Management	1
Urban Local Body	3
Total	17

* The count of documents is based on first round of submission.

4.4. Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1| Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5. Physical Audit

The following map presents the indicators audited at city level.

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**22.9**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	0.25
	1.1b death certificate	0
	1.1c trade license	0
	1.1d solid waste management	0
	1.1e water supply	0
	1.1f sewerage/drainage	0
	1.1g fogging	0
	1.1h property tax	0
	1.1i professional tax	0
	1.1j information	0.615384615384615
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	0.111111111111111
Unit	Percentage	

Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**7.14**
Description	Services integrated through an integrated or a singular operations command centre	1.5
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**Non-Computable**
Description		
Sub Indicators	1.3a Building plan	NA
	1.3b Birth/Death Certificate	NA
	1.3c water supply	NA
	1.3d solid waste management	NA
	1.3e property tax	NA
	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	NA
	1.3i information	NA
	1.3j electricity	NA
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**0.14**
Description		

Sub Indicators	1.4a water supply	0
	1.4b solid waste	0.5
	1.4c street lights	0
	1.4d sewerage	0.5
	1.4e professional tax	0
	1.4f parks and recreational spaces	0
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**0.06**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	463.38
Denominator	Total demand raised for the year	742429.5
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**1894.98**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	41.5
Denominator	Total O&M cost for providing water supply services during the year	2.19
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**1298.27**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	-1570.65
Denominator	Total expenditure (revenue and capital accounts) in	-

	the same year	120.980000000001
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	NA
Denominator	Total number of wards	15
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	1
Denominator	Total number of historic buildings/sites identified	1
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**50**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	1
Denominator	Total number of ecologically important sites identified in the city	2

Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**19.2**
Description	Average Occupancy rate of Hotels	19.2
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	0
Denominator	Total budget of the ULB (capital and revenue)	5526.67
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**60**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	60
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**161.63**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	45031
Denominator	Total population in the age group of 6-14 years	27860

Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**134.52**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	17183
Denominator	Total female population in the age group of 6-14 years	12774
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**20.66**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	29397
Denominator	Total number of teachers available for primary grades (public and private schools)	1423
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**2433.33**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	73
Denominator	Total number of schools	3
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**10.1**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	

Numerator	Percentage	10.1006318870756
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**9.39**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	
Numerator	Percentage	53774
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**113.77**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	1118
Denominator	Total population of the city	98265
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**24.53**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	241
Denominator	Total population of the city	98265
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**Non-Computable**
Description	Total response time for health-related distress calls received in	Data

	the city	Unavailable
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**66.37**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	65217
Denominator	Total population of the city	98265
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**4.35**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	4275
Denominator	Total population of the city	98265
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**135.52**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	113
Denominator	Total length of road network in the city	83.38
Unit	Percentage	
Benchmark	100%	

Indicator No: 5.2	**Number of recorded crimes per lakh population**	**109.91**
Formula:	Numerator / Denominator	108
Numerator	Total number of crimes recorded in a year	98265
Denominator	Total population of the city	
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**22.22**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	24
Denominator	Total crimes recorded in the same year	108
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**7.12**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	7
Denominator	Total population of the city	98265
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**Non-Computable**
Formula:	*Numerator / Denominator*	

Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	NC
Denominator	Total VAT/GST collection during preceding year	NC
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**-100**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	-565311.58
Denominator	Total Professional Tax collection during preceding year	565319
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**-22.41**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	-13
Denominator	Number of construction permits during preceding year	0.58
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	NA

Denominator	Total labour force in the city	113484
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**41.94**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	1190
Denominator	Total number of vendors in the city	2837.1
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	NA
Denominator	Total number of slum and EWS households in the city	9.47
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	NA
Unit	Percentage	

Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	Data Unavailable
Denominator	Total population of the city	98265
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	Data Unavailable
Denominator	Total population of the city	98265
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	9.24
Denominator	Total area of the city (total area of all land uses)	17220000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**13424.18**

Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	98265
Denominator	Area allocated for residential land use (in hectares)	7.32
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at house-hold level	0
Denominator	Total number of households in the city	29752
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**Non-Computable** NA
Description	Total number of sustained electrical interruptions in a year	
Unit	Number	

Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**NC**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	NA
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	10
Denominator	Total energy consumption from all sources	637483825
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.27**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	545030
Denominator	Total quantum of water and waste water handled during the period	450
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.33**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	2055519.4

Denominator	Total number of street light installations	3054
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	Data Unavailable
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.58**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	637483825
Denominator	Total population of the city	98265
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.54**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	12.5
Denominator	Total area of the city (sq.km)	17.22
Unit	Transport length (kms) per square km	
Benchmark	>=1	

Indicator No: 11.2	**Availability of public transport**	**0.06**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	6
Denominator	Total population of the city	98265
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	0
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	83.38
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	Data Unavailable
Denominator	Total number of major transport interchanges in the city	2
Unit	Percentage	
Benchmark	>=75	

Indicator No: 11.6	**Mode share of non-motorised transport**	**To be computed**
Description	Mode share of non-motorised transport	0
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**0.5**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	1
Denominator	Total number of major interchanges in the city	2
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	NA
Denominator	Total number of signalised intersections in the city	5
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	NA
Denominator	Total available on-street parking spaces in the city	NA
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**8.14**

Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	13.58
Denominator	Total length of road network in the city	166.76
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**45.45**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	5
Denominator	Total number of junctions/ intersections on major roads in the city	11
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	0
Denominator	Total number of public right-of-way areas in the city	98
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**11.7**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	3480
Denominator	Total number of households in the city	29752

Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**152.65**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	15
Denominator	Total population of the city	98265
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	0
Denominator	Total number of samples tested for water quality	150
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	15
Denominator	Quantum of water put into the distribution system (mld)	15
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	NA
Denominator	Total number of water connections in the city	5874

Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**85.37**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	35
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	41
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**330.41**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	98303
Denominator	Total number of properties in the city	29752
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**3.96**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	1177
Denominator	Total number of properties in the city	29752
Unit	Percentage	
Benchmark	100%	

Indicator No: 13.3	**Collection efficiency of sewerage network**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	0
Denominator	Total waste water generated in the city per day	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	0
Denominator	Total waste water received at treatment plants per day	0
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**49.71**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	41.45
Denominator	Total length of road network in the city	83.38
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	0
Denominator	Total number of households and establishments in the city	33334
Unit	Percentage	

Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	46
Denominator	Total quantum of MSW generated in the city	46
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through re-use**	**44902.17**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	619650
Denominator	Average MSW generated in the city (tons per month)	1380
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**28.2**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	28.2
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**45.8**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	45.8
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	

Indicator No: 15.3	**Concentration of PM10 - air pollution**	
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	**217.3**
Unit	µg/m3	217.3
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	0
Denominator	Total number of noise samples	2
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	0
Denominator	Total number of samples tested	12
Unit	Percentage	
Benchmark	100%

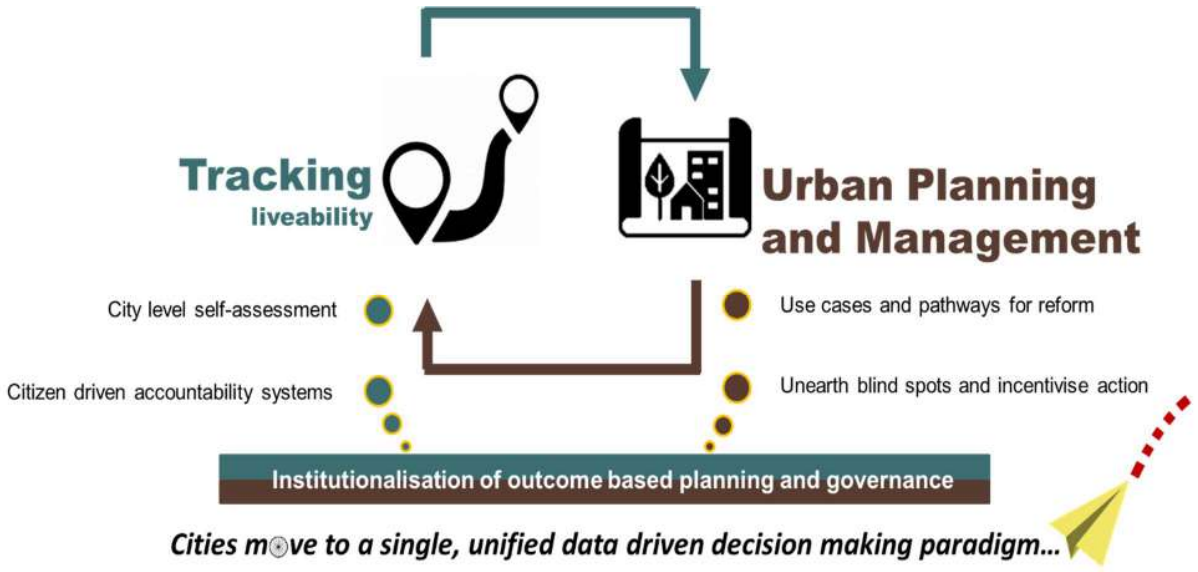
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

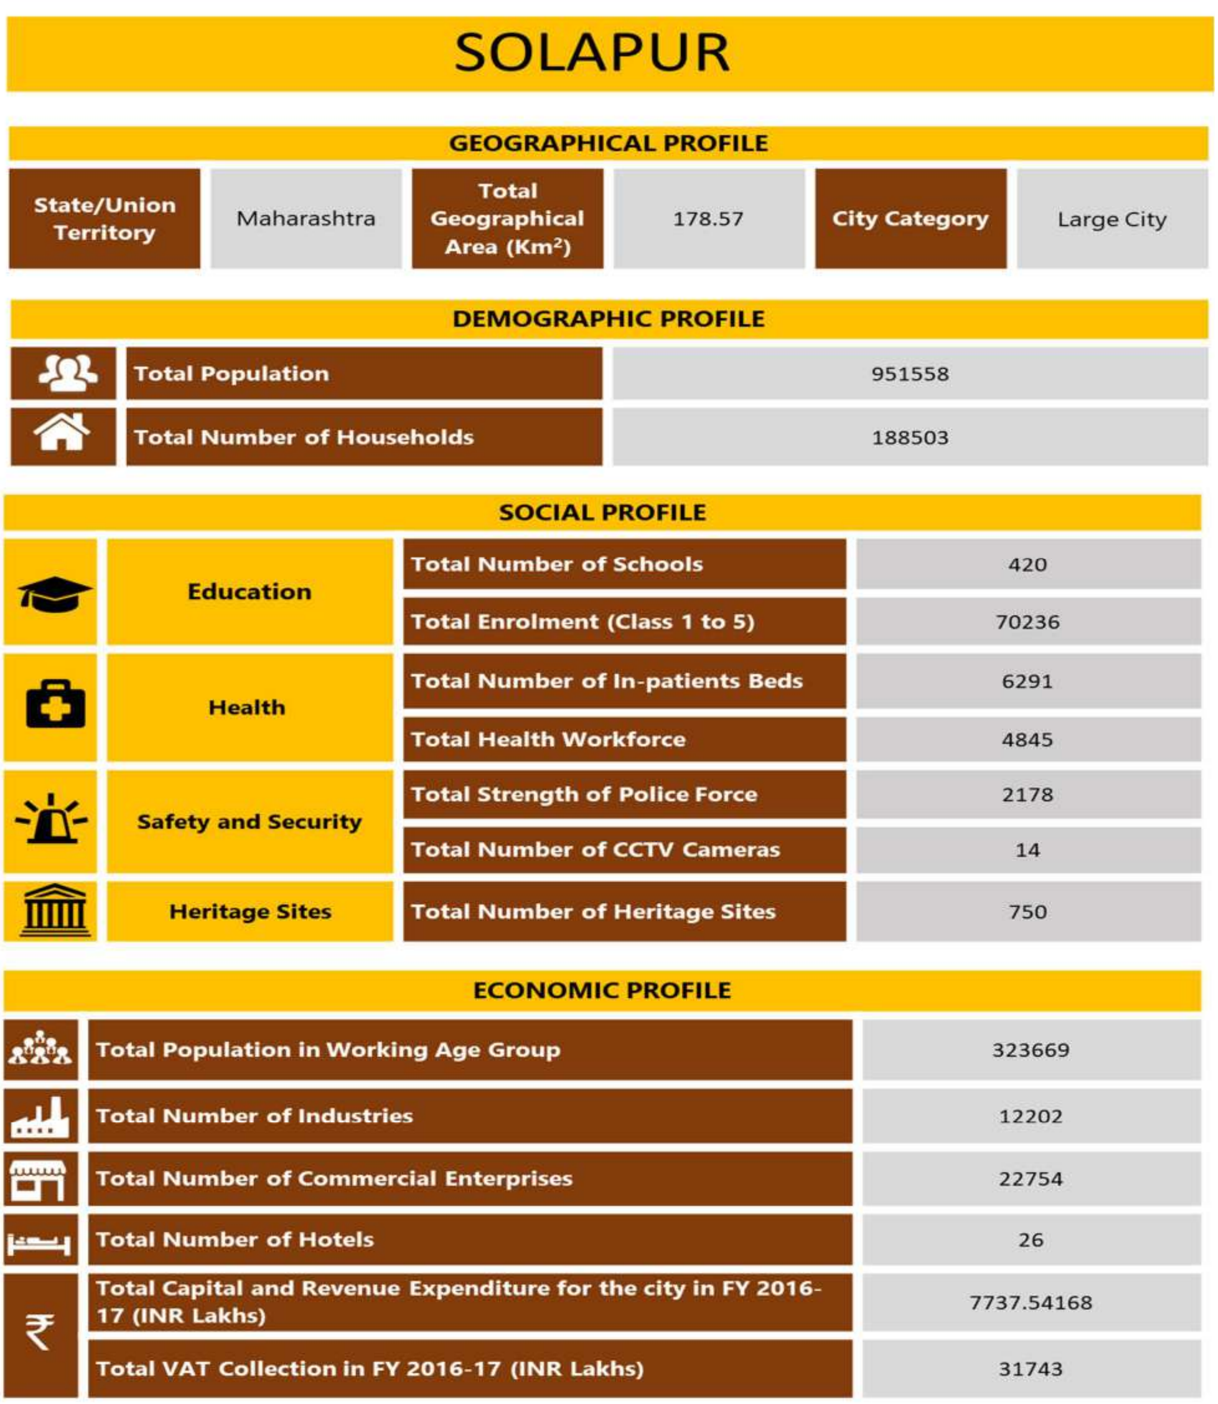


Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



SOLAPUR

GEOGRAPHICAL PROFILE

State/Union Territory	Maharashtra	**Total Geographical Area (Km^2)**	178.57	**City Category**	Large City

DEMOGRAPHIC PROFILE

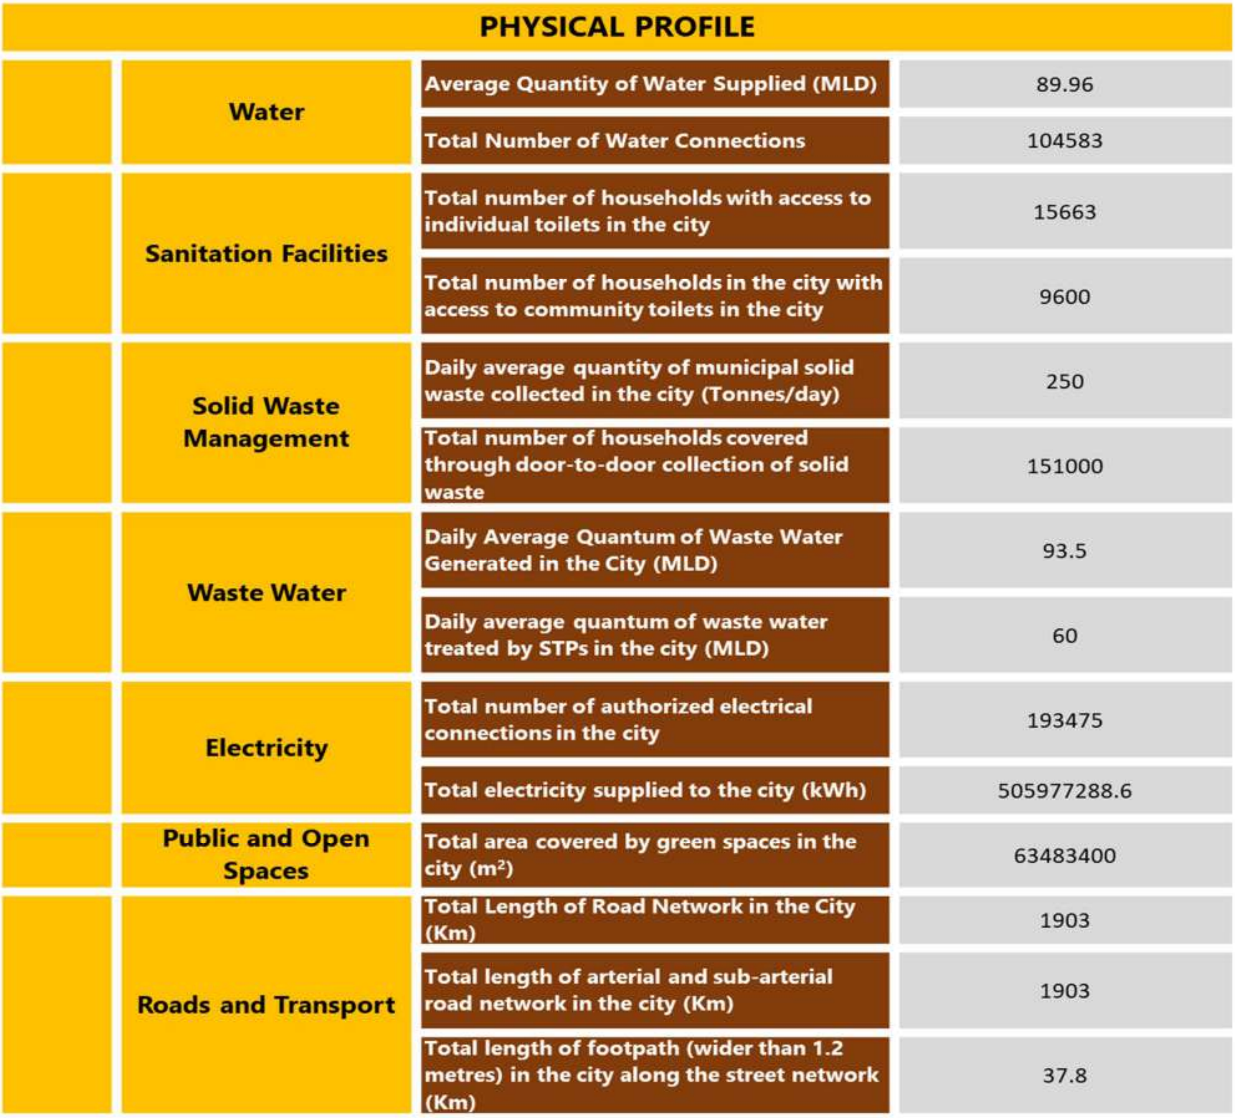
Total Population	951558
Total Number of Households	188503

SOCIAL PROFILE

Education	**Total Number of Schools**	420
	Total Enrolment (Class 1 to 5)	70236
Health	**Total Number of In-patients Beds**	6291
	Total Health Workforce	4845
Safety and Security	**Total Strength of Police Force**	2178
	Total Number of CCTV Cameras	14
Heritage Sites	**Total Number of Heritage Sites**	750

ECONOMIC PROFILE

Total Population in Working Age Group	323669
Total Number of Industries	12202
Total Number of Commercial Enterprises	22754
Total Number of Hotels	26
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	7737.54168
Total VAT Collection in FY 2016-17 (INR Lakhs)	31743



PHYSICAL PROFILE			
	Water	Average Quantity of Water Supplied (MLD)	89.96
		Total Number of Water Connections	104583
	Sanitation Facilities	Total number of households with access to individual toilets in the city	15663
		Total number of households in the city with access to community toilets in the city	9600
	Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	250
		Total number of households covered through door-to-door collection of solid waste	151000
	Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	93.5
		Daily average quantum of waste water treated by STPs in the city (MLD)	60
	Electricity	Total number of authorized electrical connections in the city	193475
		Total electricity supplied to the city (kWh)	505977288.6
	Public and Open Spaces	Total area covered by green spaces in the city (m^2)	63483400
	Roads and Transport	Total Length of Road Network in the City (Km)	1903
		Total length of arterial and sub-arterial road network in the city (Km)	1903
		Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	37.8

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various ‘Category Sub-Indexes’ and a composite ‘City Liveability Index’ will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies

Pillars of Comprehensive Development	Category	Indicators
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita

Pillars of Comprehensive Development	Category	Indicators
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced	15.1 Concentration of SO2- air pollution

Pillars of Comprehensive Development	Category	Indicators
	Pollution	15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

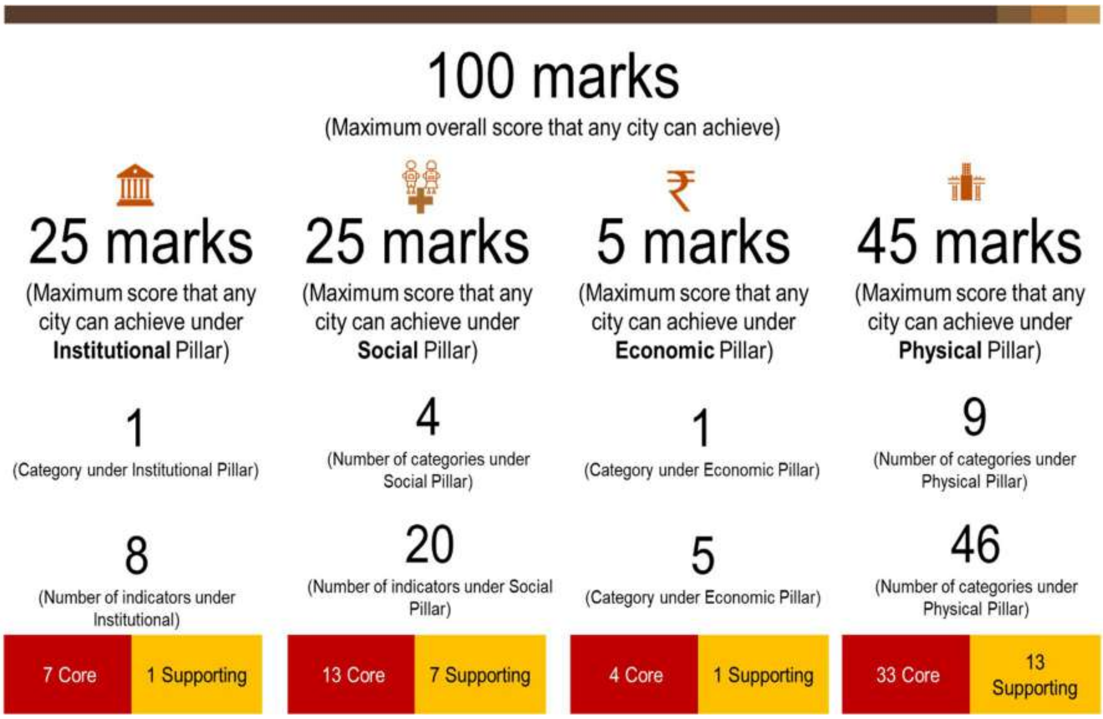
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks

(Maximum overall score that any city can achieve)

25 marks	25 marks	5 marks	45 marks
(Maximum score that any city can achieve under **Institutional** Pillar)	(Maximum score that any city can achieve under **Social** Pillar)	(Maximum score that any city can achieve under **Economic** Pillar)	(Maximum score that any city can achieve under **Physical** Pillar)
1	4	1	9
(Category under Institutional Pillar)	(Number of categories under Social Pillar)	(Category under Economic Pillar)	(Number of categories under Physical Pillar)
8	20	5	46
(Number of indicators under Institutional)	(Number of indicators under Social Pillar)	(Category under Economic Pillar)	(Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and

development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Accounts Dept
Urban Local Body	For Park and Recreation Related Questions	Garden Dept
Urban Local Body	For Water Supply and Drainage related questions	Water Supply and Drainage Dept
Urban Local Body	For Heritage sites related data	Smart City Office
Urban Local Body	For Ecological sites related data	Smart City Office
Urban Local Body	For Housing related data	City Engineer Dept
Urban Local Body	For Building plan related data	City Engineer Dept
Urban Local Body	For Roads related data	City Engineer Dept
Urban Local Body	For Solid waste management related data	Solid Waste Management, SMC
Urban Local Body	For IT services related data	Computer Dept., SMC
Urban Local Body	For Vendor committee related data	Market Dept., SMC
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	Light Dept., Health Dept., Property Tax Dept., Town Planning Dept., Swachh Maharashtra Mission Office, Land & Real Estate Dept., Sports Officer, Transport Dept., SMC School Board, etc.
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Maharashtra Pollution Control Board, Solapur.
Development Authority	Building Infrastructure	Building Permission Dept.

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 74 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	**1**
State Education Department	**1**
DISCOM/Electricity Department	**7**
Traffic and Police Department	**2**
Development Authority	**0**
Pollution Control Board	**2**
State Renewable Energy Department	**0**
Town and Country Planning	**0**
State Health Department	**4**
Transport Authority	**2**
Disaster Management	**1**
Urban Local Body	**54**
Total	**74***

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

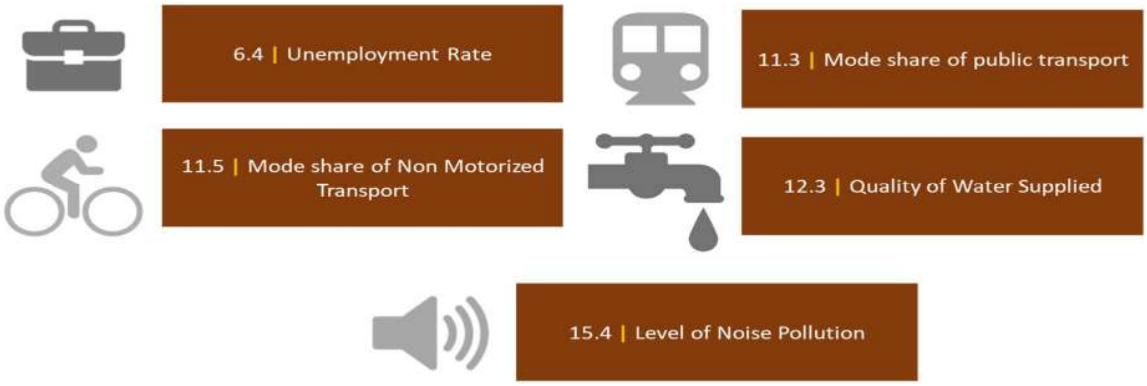
6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.



6.4 | Unemployment Rate

11.3 | Mode share of public transport

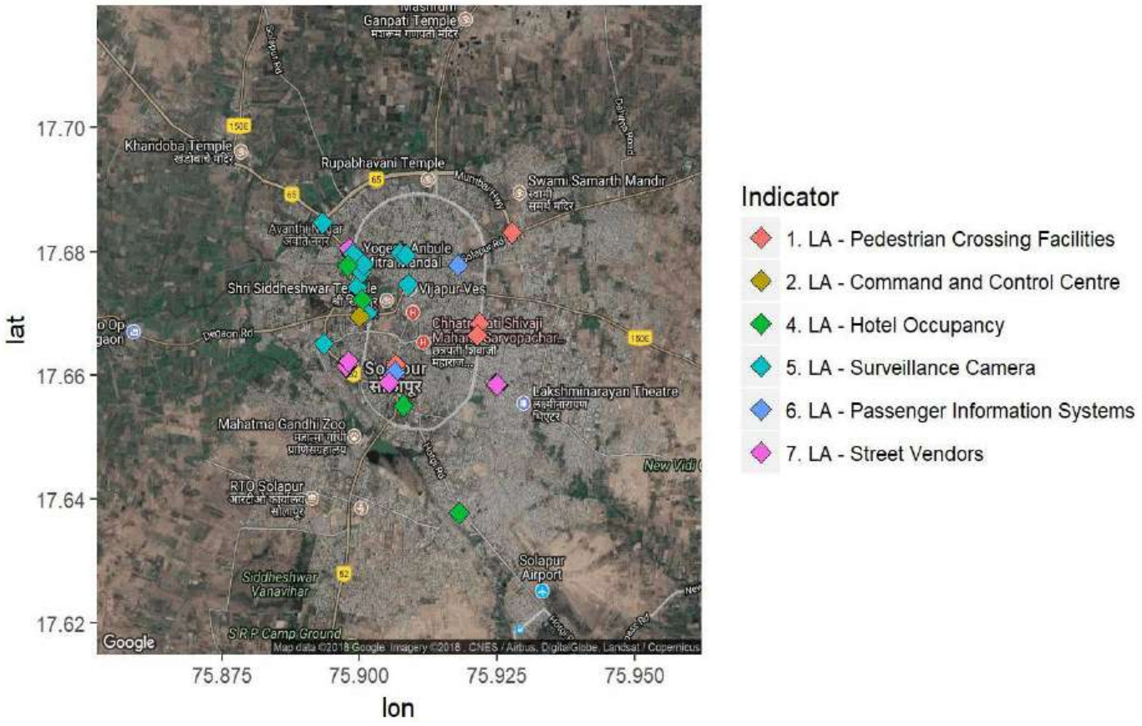
11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.



Indicator
1. LA - Pedestrian Crossing Facilities
2. LA - Command and Control Centre
4. LA - Hotel Occupancy
5. LA - Surveillance Camera
6. LA - Passenger Information Systems
7. LA - Street Vendors

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend

etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**75.21**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	1
	1.1c trade license	0
	1.1d solid waste management	1
	1.1e water supply	1
	1.1f sewerage/drainage	0.666666667
	1.1g fogging	0
	1.1h property tax	0.666666667
	1.1i professional tax	1
	1.1j information	1
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	0.444444444
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**19.05**
Description	Services integrated through an integrated or a singular operations command centre	4
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**6.3**
Description		
Sub Indicators	1.3a Building plan	0.000370468
	1.3b Birth/Death Certificate	2.10182E-06

	1.3c water supply	6.06772E-06
	1.3d solid waste management	0.006228732
	1.3e property tax	NA
	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	7.00605E-06
	1.3i information	0.084072647
	1.3j electricity	0.350122755
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**0.29**
Description		
Sub Indicators	1.4a water supply	2
	1.4b solid waste	0
	1.4c street lights	0
	1.4d sewerage	0
	1.4e professional tax	0
	1.4f parks and recreational spaces	0
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**84.79**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	10710.77
Denominator	Total demand raised for the year	12631.84
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**79.84**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	2282.40546

Denominator	Total O&M cost for providing water supply services during the year	2858.88
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**133.81**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	-44782.10283
Denominator	Total expenditure (revenue and capital accounts) in the same year	-33468.02762
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**30.77**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	8
Denominator	Total number of wards	26
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**50**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	2
Denominator	Total number of historic buildings/sites identified	4
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	0
Denominator	Total number of ecologically important sites identified in the city	1
Unit	Percentage	
Benchmark	100%	

Indicator No: 2.3	**Hotel Occupancy**	**17.14**
Description	Average Occupancy rate of Hotels	17.14285714
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0.43**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	33.51979
Denominator	Total budget of the ULB (capital and revenue)	7737.54168
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**153**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	153
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**64.77**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	113343
Denominator	Total population in the age group of 6-14 years	174987
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**64.1**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	53745
Denominator	Total female population in the age group of 6-14 years	83840
Unit	Percentage	
Benchmark	100%	

Indicator No: 3.3	**Primary education student-teacher ratio**	**51.45**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	70236
Denominator	Total number of teachers available for primary grades (public and private schools)	1365
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**7.14**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	30
Denominator	Total number of schools	420
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**95.49**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	95.48554406
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**99.91**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	210728352
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**66.11**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	6291
Denominator	Total population of the city	951558
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**50.92**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	4845
Denominator	Total population of the city	951558
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**17**
Description	Total response time for health-related distress calls received in the city	17
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.41**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	3934
Denominator	Total population of the city	951558
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.05**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	430
Denominator	Total population of the city	951558
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**0.74**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	14
Denominator	Total length of road network in the city	1903
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**455.46**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	4334
Denominator	Total population of the city	951558
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**9.78**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	424
Denominator	Total crimes recorded in the same year	4334
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**8.51**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	81
Denominator	Total population of the city	951558
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**6.61**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	1969
Denominator	Total VAT/GST collection during preceding year	297.74
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**57.23**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	859
Denominator	Total Professional Tax collection during preceding year	1501
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**-8.97**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	-240
Denominator	Number of construction permits during preceding year	26.77
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	139431
Denominator	Total labour force in the city	174987
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	

Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	0
Denominator	Total number of vendors in the city	4374.675
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**0.71**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	442
Denominator	Total number of slum and EWS households in the city	625.58
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**0**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	4295033600
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**66.72**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	63483400
Denominator	Total population of the city	951558
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**3.85**
Formula:	*Numerator / Denominator*	

Numerator	Total area of public and recreational places (sq.m.)	3659381.18
Denominator	Total population of the city	951558
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**0.68**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	1212000
Denominator	Total area of the city (total area of all land uses)	178570000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.08**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	951558
Denominator	Area allocated for residential land use (in hectares)	11600000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**85.83**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	161794
Denominator	Total number of households in the city	188503
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0.43**

Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	826
Denominator	Total number of electricity connections in the city	193475
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**2213**
Description	Total number of sustained electrical interruptions in a year	2213
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.62**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	566766
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	1182.38
Denominator	Total energy consumption from all sources	505977808.6
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.14**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	3111969.5
Denominator	Total quantum of water and waste water handled during the period	4498.8
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.33**

Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	17133386
Denominator	Total number of street light installations	40048
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	120106
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.72**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	505977808.6
Denominator	Total population of the city	951558
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.34**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	95
Denominator	Total area of the city (sq.km)	178.57
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.08**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	78
Denominator	Total population of the city	951558
Unit	Number per 1000 persons	
Benchmark	>=0.6	

Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	20
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**1.26**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	24
Denominator	Total length of road network in the city	1903
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**28.57**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	2
Denominator	Total number of major transport interchanges in the city	7
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	0
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**Non-Computable**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	NA
Denominator	Total number of major interchanges in the city	7
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	0
Denominator	Total number of signalised intersections in the city	17

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	10
Denominator	Total available on-street parking spaces in the city	10
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**0.99**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	37.8
Denominator	Total length of road network in the city	3806
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**193.75**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	31
Denominator	Total number of junctions/ intersections on major roads in the city	16
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**0.57**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	6
Denominator	Total number of public right-of-way areas in the city	1061
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**0.04**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	74
Denominator	Total number of households in the city	188503
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**94.54**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	89.96
Denominator	Total population of the city	951558
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied[2]**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	954
Denominator	Total number of samples tested for water quality	8130
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**50.02**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	45
Denominator	Quantum of water put into the distribution system (mld)	89.96
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**0.33**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	343
Denominator	Total number of water connections in the city	104583
Unit	Percentage	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	2510
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	2510
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**11.57**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	28592
Denominator	Total number of properties in the city	247210
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**78.41**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	193827
Denominator	Total number of properties in the city	247210
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	93.5
Denominator	Total waste water generated in the city per day	93.5
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**80**
Formula:	*Numerator / Denominator*	

Numerator	Quantum of waste water recycled or reused per day	48
Denominator	Total waste water received at treatment plants per day	60
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**0.95**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	18
Denominator	Total length of road network in the city	1903
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**80.09**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	169200
Denominator	Total number of households and establishments in the city	211257
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**83.33**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	250
Denominator	Total quantum of MSW generated in the city	300
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**0.6**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	45
Denominator	Average MSW generated in the city (tons per month)	7500
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**18**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	18
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**52**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	52
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**101**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	101
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	0
Denominator	Total number of noise samples	12
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	0
Denominator	Total number of samples tested	14
Unit	Percentage	
Benchmark	100%

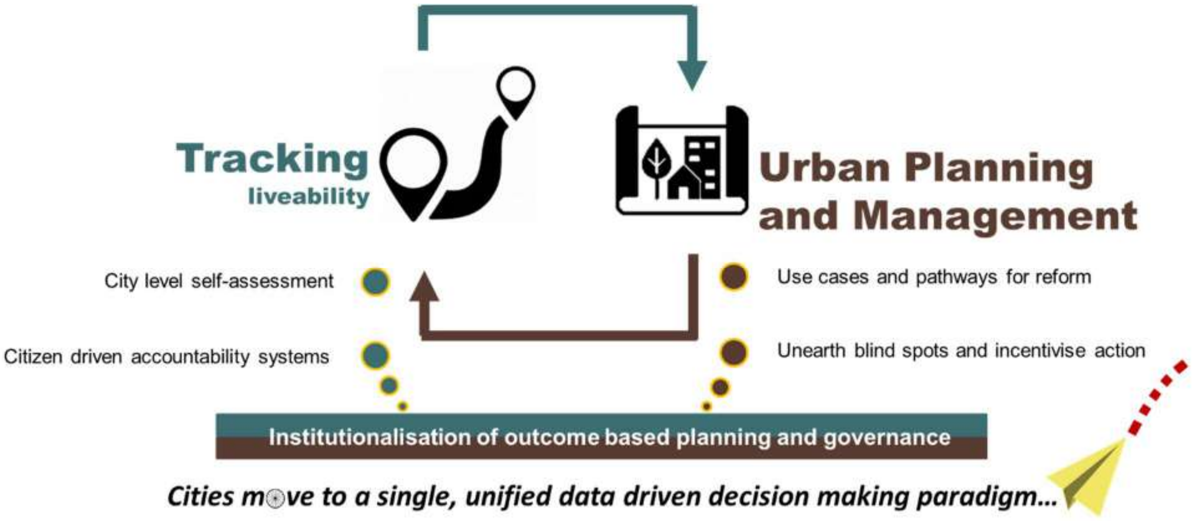
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).

SRINAGAR

GEOGRAPHICAL PROFILE

State/Union Territory	Jammu and Kashmir	Total Geographical Area (Km^2)	276	City Category	Metropolis

DEMOGRAPHIC PROFILE

Total Population	1206419
Total Number of Households	206080

SOCIAL PROFILE

Education	Total Number of Schools	67
	Total Enrolment (Class 1 to 5)	10419
Health	Total Number of In-patient Beds	3886
	Total Health Workforce	9986
Safety and Security	Total Strength of Police Force	4670
	Total Number of CCTV Cameras	323
Heritage Sites	Total Number of Heritage Sites	4

ECONOMIC PROFILE

Total Population in Working Age Group	411091
Total Number of Industries	5829
Total Number of Commercial Enterprises	77056
Total Number of Hotels	419
Total Capital and Revenue Expenditure for the city in FY 2016-14 (INR Lakhs)	15595.04
Total VAT Collection in FY 2016-17 (INR Lakhs)	98411.01

PHYSICAL PROFILE

Water	Average Quantity of Water Supplied (MLD)	113.21
	Total Number of Water Connection	129551
Sanitation Facilities	Total number of households with access to individual toilets in the city	1175918
	Total number of households in the city with access to community toilets in the city	30
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	0
	Total number of households covered through door-to-door collection of solid waste	142400
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	53.7
	Daily average quantum of waste water treated by STPs in the city (MLD)	53.7
Electricity	Total number of authorized electrical connections in the city	199993
	Total electricity supplied to the city (kWh)	1048025481
Public and Open Spaces	Total area covered by green spaces in the city (m^2)	132480
Roads and Transport	Total Length of Road Network in the City (Km)	1908
	Total length of arterial and sub-arterial road network in the city (Km)	560
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in

Pillars of Comprehensive Development	Category	Indicators
		schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density

Pillars of Comprehensive Development	Category	Indicators
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through

Pillars of Comprehensive Development	Category	Indicators
		meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

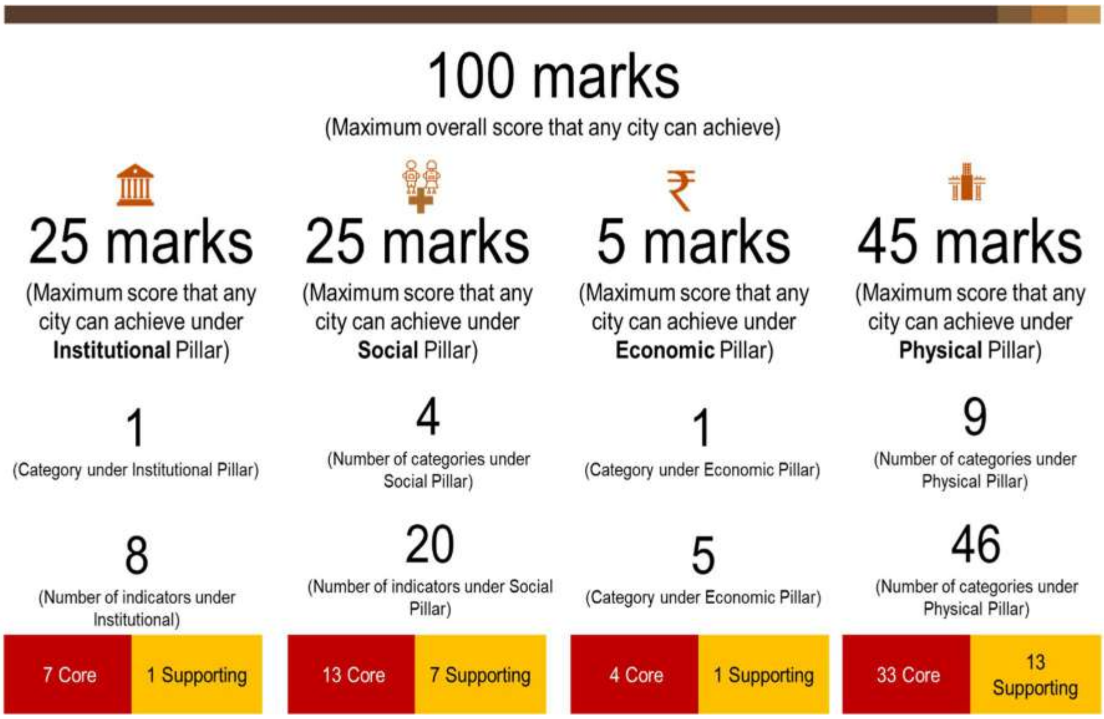
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks
(Maximum overall score that any city can achieve)
25 marks
(Maximum score that any city can achieve under Institutional Pillar)
25 marks
(Maximum score that any city can achieve under Social Pillar)
5 marks
(Maximum score that any city can achieve under Economic Pillar)
45 marks
(Maximum score that any city can achieve under Physical Pillar)
1
(Category under Institutional Pillar)
4
(Number of categories under Social Pillar)
1
(Category under Economic Pillar)
9
(Number of categories under Physical Pillar)
8
(Number of indicators under Institutional)
20
(Number of indicators under Social Pillar)
5
(Category under Economic Pillar)
46
(Number of categories under Physical Pillar)
7 Core
1 Supporting
13 Core
7 Supporting
4 Core
1 Supporting
33 Core
13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Accounts Section, Srinagar Municipal Corporation
Urban Local Body	For Park and Recreation Related Questions	Srinagar Municipal corporation
Urban Local Body	For Water Supply and Drainage related questions	Srinagar Municipal corporation
Urban Local Body	For Heritage sites related data	Srinagar Municipal Corporation
Urban Local Body	For Ecological sites related data	Srinagar Municipal Corporation
Urban Local Body	For Housing related data	Srinagar Municipal Corporation
Urban Local Body	For Building plan related data	Building Plan Section, Srinagar Municipal Corporation
Urban Local Body	For Roads related data	Public Work section, Srinagar Municipal Corporation
Urban Local Body	For Solid waste management related data	Solid Waste Management Section, Srinagar Municipal Corporation
Urban Local Body	For IT services related data	IT Section, Srinagar Municipal Corporation
Urban Local Body	For Vendor committee related data	Srinagar Municipal Corporation
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	
Central / state Pollution control	Water Quality, Air Quality, Noise Quality	J & KState Pollution Control Board

Designated data owners	Subcategories	Data owners at city level
Board		
Development Authority	Building Infrastructure	Srinagar development authority

Designated data owners	Subcategories	Data owners at city level
	Marine Transport Authority	NA

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 32 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	1
State Education Department	2
DISCOM/Electricity Department	1
Traffic and Police Department	1
Development Authority	2
Pollution Control Board	2
State Renewable Energy Department	1
Town and Country Planning	1
State Health Department	2
Transport Authority	1
Disaster Management	0
Urban Local Body	18
Total	32*

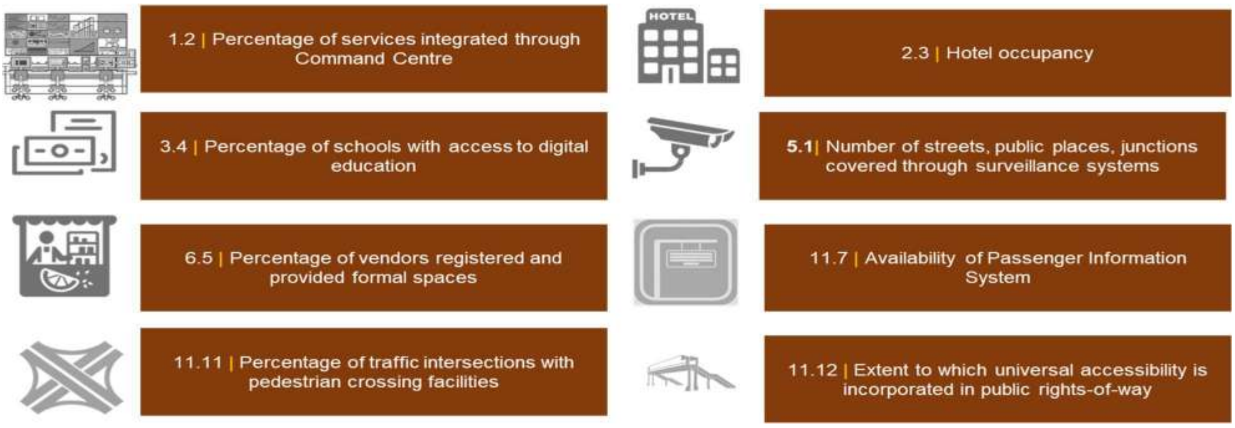
* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of

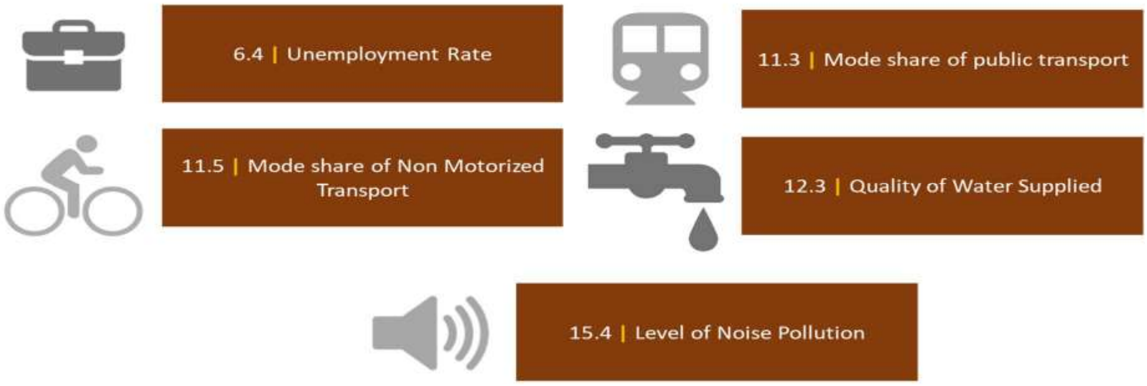
data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:



1.2 | Percentage of services integrated through Command Centre
HOTEL
2.3 | Hotel occupancy
3.4 | Percentage of schools with access to digital education
5.1 | Number of streets, public places, junctions covered through surveillance systems
6.5 | Percentage of vendors registered and provided formal spaces
11.7 | Availability of Passenger Information System
11.11 | Percentage of traffic intersections with pedestrian crossing facilities
11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.



6.4 | Unemployment Rate
11.3 | Mode share of public transport
11.5 | Mode share of Non Motorized Transport
12.3 | Quality of Water Supplied
15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**37.54**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	1
	1.1c trade license	0
	1.1d solid waste management	0
	1.1e water supply	0
	1.1f sewerage/drainage	0
	1.1g fogging	0

Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	NA
Denominator	Total demand raised for the year	NA
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**12.67**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	543.84
Denominator	Total O&M cost for providing water supply services during the year	4291.88
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**25.7**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	11345.74
Denominator	Total expenditure (revenue and capital accounts) in the same year	44147.66
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	NA
Denominator	Total number of wards	74
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**0.4**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	3
Denominator	Total number of historic buildings/sites identified	750
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	0
Denominator	Total number of ecologically important sites identified in the city	9
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**Non-Computable**
Description	Average Occupancy rate of Hotels	Data Unavailable
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	0
Denominator	Total budget of the ULB (capital and revenue)	15595.04
Unit	Percentage	

Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**Non-Computable**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	Data Unavailable
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**7.45**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	16124
Denominator	Total population in the age group of 6-14 years	216520
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**8.06**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	8314
Denominator	Total female population in the age group of 6-14 years	103183
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**7.92**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	10419
Denominator	Total number of teachers available for primary grades (public and private schools)	1315
Unit	Ratio	
Benchmark	1 teacher for every 30 students	

Indicator No: 3.4	**Percentage of schools with access to digital education**	**22.39**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	15
Denominator	Total number of schools	67
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**52.68**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	
Numerator	Percentage	**52.68**
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**83.79**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	
Numerator	Percentage	**83.79**
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**32.21**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	3886
Denominator	Total population of the city	1206419
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**82.77**
Formula:	*Numerator / Denominator*	

Numerator	Total number of qualified healthcare professionals	9986
Denominator	Total population of the city	1206419
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**Non-Computable**
Description	Total response time for health-related distress calls received in the city	NA
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.45**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	5411
Denominator	Total population of the city	1206419
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	24
Denominator	Total population of the city	1206419
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**16.93**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	323
Denominator	Total length of road network in the city	1908
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**232.84**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	2809
Denominator	Total population of the city	1206419
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**17.48**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	491
Denominator	Total crimes recorded in the same year	2809
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**4.89**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	59
Denominator	Total population of the city	1206419
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**5.84**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	5426.18
Denominator	Total VAT/GST collection during preceding year	929.8483
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	NA
Denominator	Total Professional Tax collection during preceding year	NA
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**-44.59**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	-33
Denominator	Number of construction permits during preceding year	0.74
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	5851
Denominator	Total labour force in the city	216520
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	NA
Denominator	Total number of vendors in the city	5413
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**11.54**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	14036
Denominator	Total number of slum and EWS households in the city	1216.71
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**Non-Compuatble**
Formula:	*Numerator / Denominator*	

Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	**Data Unavailable**
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**0.11**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	132480
Denominator	Total population of the city	1206419
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**15.54**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	18743909
Denominator	Total population of the city	1206419
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	NA
Denominator	Total area of the city (total area of all land uses)	276000000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	1206419
Denominator	Area allocated for residential land use (in hectares)	144870000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**73.6**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	151668
Denominator	Total number of households in the city	206080

Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	199993
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**165060**
Description	Total number of sustained electrical interruptions in a year	165060
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**NC**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	Data Unavailable
Unit	Hours	

Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	1341.6
Denominator	Total energy consumption from all sources	1048025481
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	0
Denominator	Total quantum of water and waste water handled during the period	5007.3
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.34**
Formula:	*Numerator / Denominator*	

Numerator	Energy consumption on street lighting	4401360
Denominator	Total number of street light installations	47260
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	0
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.58**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	1048025481
Denominator	Total population of the city	1206419
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.08**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	35
Denominator	Total area of the city (sq.km)	276
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**5.76**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	6951
Denominator	Total population of the city	1206419
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	46
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**1.42**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	27
Denominator	Total length of road network in the city	1908
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	NA
Denominator	Total number of major transport interchanges in the city	4
Unit	Percentage	
Benchmark	>=75	

Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	1.5
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**Non-Computable**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	NA
Denominator	Total number of major interchanges in the city	4
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	0
Denominator	Total number of signalised intersections in the city	33
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	28
Denominator	Total available on-street parking spaces in the city	28
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	Data Unavailable

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Denominator	Total length of road network in the city	3816
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**126.97**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	113
Denominator	Total number of junctions/ intersections on major roads in the city	89
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	0
Denominator	Total number of public right-of-way areas in the city	305
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	Data Unavailable
Denominator	Total number of households in the city	206080
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**93.84**

Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	113.21
Denominator	Total population of the city	1206419
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	28
Denominator	Total number of samples tested for water quality	28
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	Blank
Denominator	Quantum of water put into the distribution system (mld)	113.21
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	NA
Denominator	Total number of water connections in the city	129551
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**0**
Formula:	*Numerator / Denominator*	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	0
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	827
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**604.74**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	1245029
Denominator	Total number of properties in the city	205878
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**12.83**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	26419
Denominator	Total number of properties in the city	205878
Unit	Percentage	
Benchmark	100%	

Indicator No: 13.3	**Collection efficiency of sewerage network**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	53.7
Denominator	Total waste water generated in the city per day	53.7
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	53.7
Denominator	Total waste water received at treatment plants per day	53.7
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**28.72**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	548
Denominator	Total length of road network in the city	1908
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**74.59**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	211200
Denominator	Total number of households and establishments in	283136

	the city	
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	0
Denominator	Total quantum of MSW generated in the city	400
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	0
Denominator	Average MSW generated in the city (tons per month)	0
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**Non=Computable**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	Data Unavailable
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**Non=Computable**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	Data Unavailable
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	

Indicator No: 15.3	**Concentration of PM10 - air pollution**	**88.99**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	88.99
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	120
Denominator	Total number of noise samples	120
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	NA
Denominator	Total number of samples tested	NA
Unit	Percentage	
Benchmark	100%

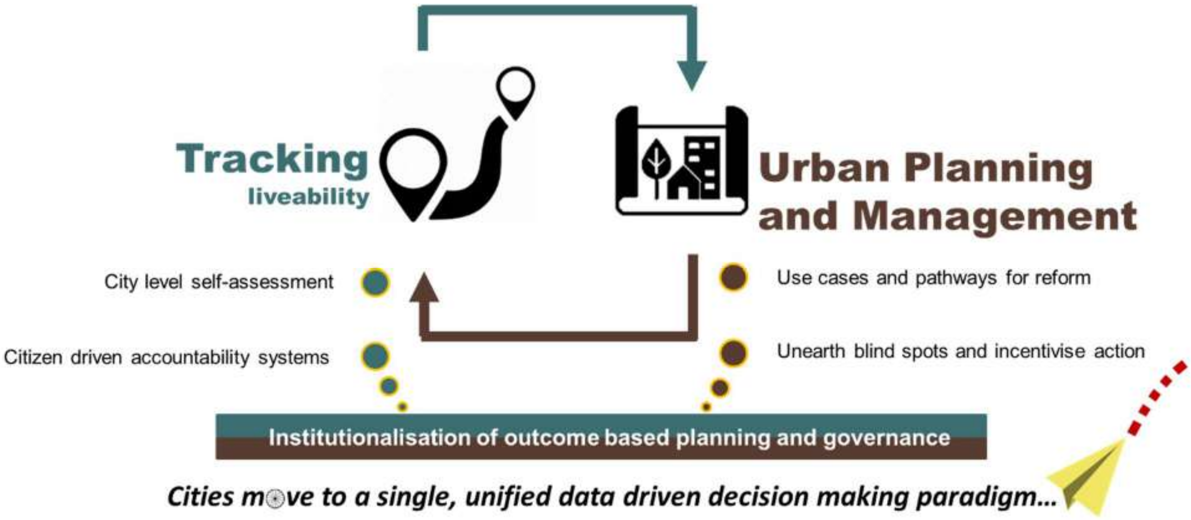
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

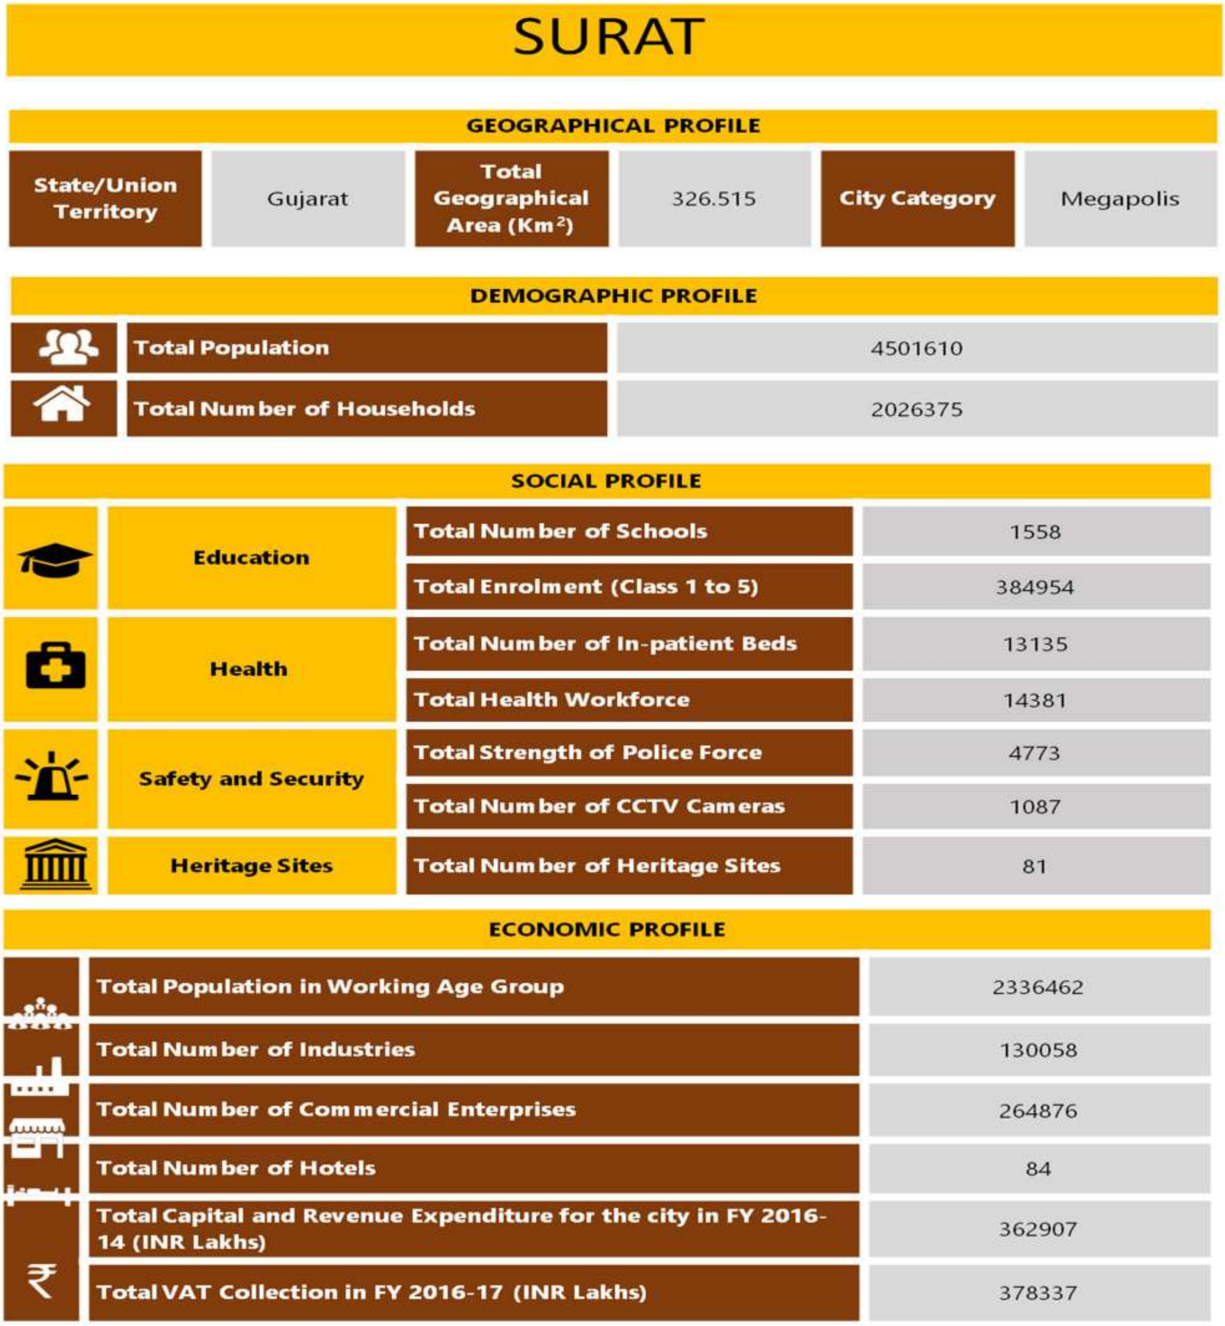


Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



SURAT

GEOGRAPHICAL PROFILE

State/Union Territory	Gujarat	**Total Geographical Area (Km^2)**	326.515	**City Category**	Megapolis

DEMOGRAPHIC PROFILE

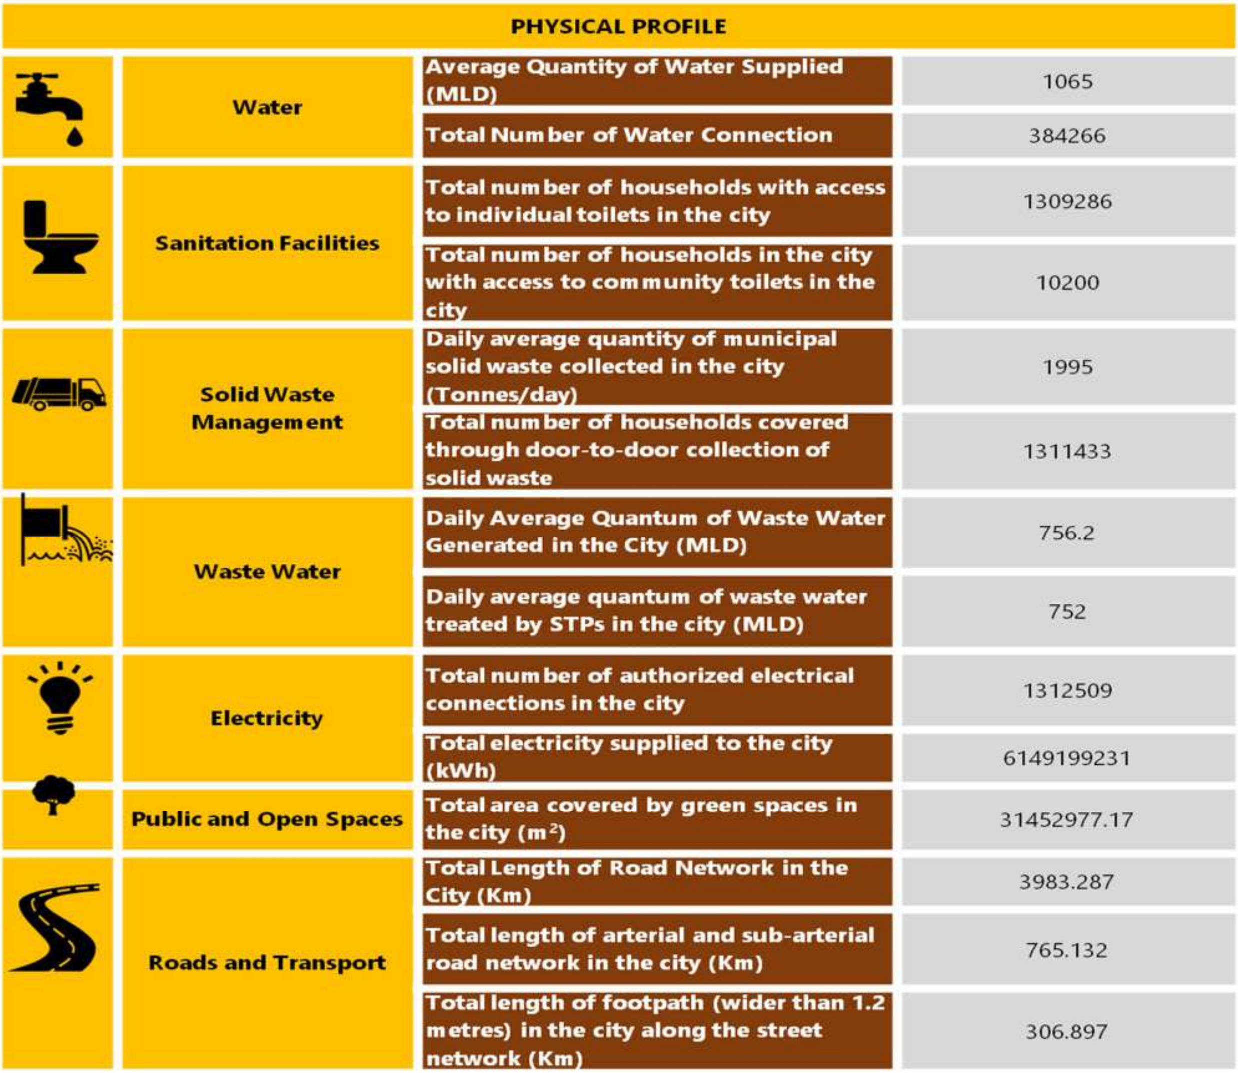
Total Population	4501610
Total Number of Households	2026375

SOCIAL PROFILE

Education	**Total Number of Schools**	1558
	Total Enrolment (Class 1 to 5)	384954
Health	**Total Number of In-patient Beds**	13135
	Total Health Workforce	14381
Safety and Security	**Total Strength of Police Force**	4773
	Total Number of CCTV Cameras	1087
Heritage Sites	**Total Number of Heritage Sites**	81

ECONOMIC PROFILE

Total Population in Working Age Group	2336462
Total Number of Industries	130058
Total Number of Commercial Enterprises	264876
Total Number of Hotels	84
Total Capital and Revenue Expenditure for the city in FY 2016-14 (INR Lakhs)	362907
Total VAT Collection in FY 2016-17 (INR Lakhs)	378337



PHYSICAL PROFILE		
Water	Average Quantity of Water Supplied (MLD)	1065
	Total Number of Water Connection	384266
Sanitation Facilities	Total number of households with access to individual toilets in the city	1309286
	Total number of households in the city with access to community toilets in the city	10200
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	1995
	Total number of households covered through door-to-door collection of solid waste	1311433
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	756.2
	Daily average quantum of waste water treated by STPs in the city (MLD)	752
Electricity	Total number of authorized electrical connections in the city	1312509
	Total electricity supplied to the city (kWh)	6149199231
Public and Open Spaces	Total area covered by green spaces in the city (m^2)	31452977.17
Roads and Transport	Total Length of Road Network in the City (Km)	3983.287
	Total length of arterial and sub-arterial road network in the city (Km)	765.132
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	306.897

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in

Pillars of Comprehensive Development	Category	Indicators
		schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density

Pillars of Comprehensive Development	Category	Indicators
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through

Pillars of Comprehensive Development	Category	Indicators
		meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

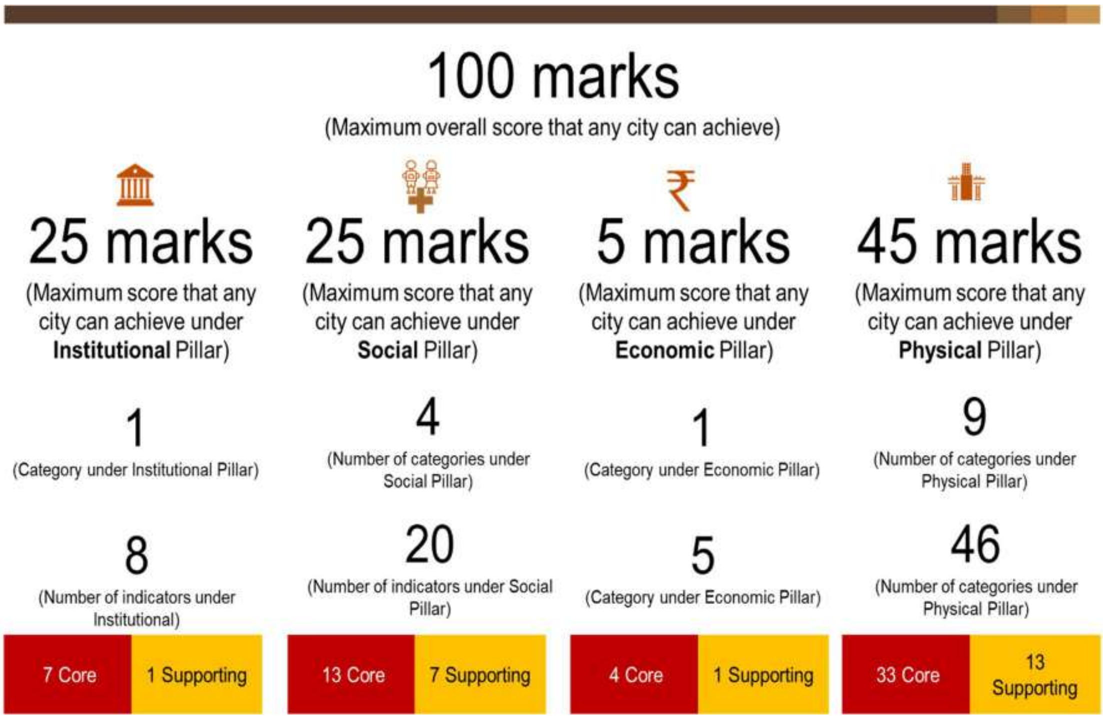
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks
(Maximum overall score that any city can achieve)
25 marks
(Maximum score that any city can achieve under Institutional Pillar)
25 marks
(Maximum score that any city can achieve under Social Pillar)
5 marks
(Maximum score that any city can achieve under Economic Pillar)
45 marks
(Maximum score that any city can achieve under Physical Pillar)
1
(Category under Institutional Pillar)
4
(Number of categories under Social Pillar)
1
(Category under Economic Pillar)
9
(Number of categories under Physical Pillar)
8
(Number of indicators under Institutional)
20
(Number of indicators under Social Pillar)
5
(Category under Economic Pillar)
46
(Number of categories under Physical Pillar)
7 Core
1 Supporting
13 Core
7 Supporting
4 Core
1 Supporting
33 Core
13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Account
Urban Local Body	For Park and Recreation Related Questions	Garden
Urban Local Body	For Water Supply and Drainage related questions	Drainage department/ hydraulic
Urban Local Body	For Heritage sites related data	Heritage/chief curator
Urban Local Body	For Ecological sites related data	Drainage department
Urban Local Body	For Housing related data	Slum upgradation cell
Urban Local Body	For Building plan related data	TDO
Urban Local Body	For Roads related data	Road development department
Urban Local Body	For Solid waste management related data	Health department
Urban Local Body	For IT services related data	ISD
Urban Local Body	For Vendor committee related data	Town planning
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Gujarat pollution control Board
Development Authority	Building Infrastructure	TDO
	Construction planning	TDO

Designated data owners	Subcategories	Data owners at city level
	Green Building	TDO
	Rain water harvesting	TDO
	Universal Design Principle	TDO
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Torrent power and Dakshin Gujarat Vij Company Limited
State Disaster management authority		CFO
State Education Department		Education department
State Health Department	Health care professionals	Health department
	Citizen Services	Health department
	Disease Prevalence	Health department
	Health Infrastructure	Health department
State Renewable Energy Development Agency		EEC
State Sales / Commercial Taxes Department		state tax joint commissioner office
Town and Country Planning Department	Land Use	Town planning
Traffic and Police Department		Traffic cell
Transport Authorities	Buses	BRTS, sitelink
	Registered Vehicles	Traffic
	Sub urban rail transport	-
	Mono Rail Authority	-
	Tramways	-
	Marine Transport Authority	-

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 95 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register,

signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	1
State Education Department	1
DISCOM /Electricity Department	3
Traffic and Police Department	3
Development Authority	13
Pollution Control Board	3
State Renewable Energy Department	2
Town and Country Planning	0
State Health Department	9
Transport Authority	1
Disaster Management	1
Urban Local Body	58
Total	95*

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

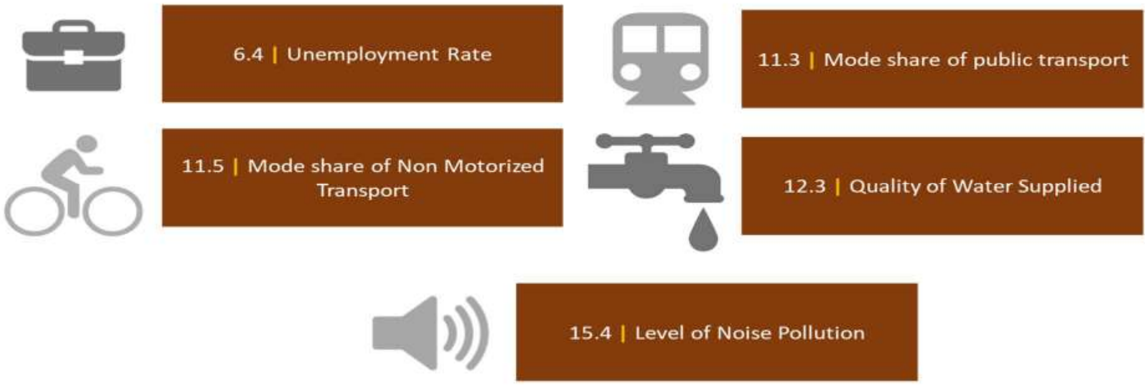
6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.



6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**77.61**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	0.75
	1.1b death certificate	0.75
	1.1c trade license	1
	1.1d solid waste management	0

Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**76.83**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	601103
Denominator	Total population in the age group of 6-14 years	782379
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**78.15**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	268557
Denominator	Total female population in the age group of 6-14 years	343649
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**38.37**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	384954
Denominator	Total number of teachers available for primary grades (public and private schools)	10033

Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**17.65**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	275
Denominator	Total number of schools	1558
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**99.04** 99.04453904
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**92.94** 4975935105
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**29.18**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	13135
Denominator	Total population of the city	4501610

Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**31.95**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	14381
Denominator	Total population of the city	4501610
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**11.03**
Description	Total response time for health-related distress calls received in the city	11.03
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.52**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	23203
Denominator	Total population of the city	4501610
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.17**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	7438
Denominator	Total population of the city	4501610
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**27.29**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	1087
Denominator	Total length of road network in the city	3983.287
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**872.8**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	39290
Denominator	Total population of the city	4501610
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**15.51**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	6094
Denominator	Total crimes recorded in the same year	39290
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**6.06**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	273
Denominator	Total population of the city	4501610
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**-7.56**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	-30921
Denominator	Total VAT/GST collection during preceding year	4092.58
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**9.42**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	1032
Denominator	Total Professional Tax collection during preceding year	10953
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**-8.18**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	-110
Denominator	Number of construction permits during preceding year	13.44
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	4448
Denominator	Total labour force in the city	782379
Unit	Per 1000 persons	

Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	0
Denominator	Total number of vendors in the city	19559.475
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**18.01**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	24426
Denominator	Total number of slum and EWS households in the city	1355.93
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**100** 1.06121E+12
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	**Per capita availability of green spaces**	**6.99**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	31452977.17

Denominator	Total population of the city	4501610
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	**Per capita availability of public and recreational places**	**0.49**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	2196467
Denominator	Total population of the city	4501610
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	0
Denominator	Total area of the city (total area of all land uses)	326515000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.03**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	4501610
Denominator	Area allocated for residential land use (in hectares)	140840000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**47.13**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	955032
Denominator	Total number of households in the city	2026375
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	1312509
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**9439**
Description	Total number of sustained electrical interruptions in a year	9439
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.74**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	373729
Unit	Hours	

Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	100237.93
Denominator	Total energy consumption from all sources	6149199231
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.27**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	14861083.33
Denominator	Total quantum of water and waste water handled during the period	54510
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.33**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	40488000
Denominator	Total number of street light installations	136279
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**0**
Formula:	*Numerator / Denominator*	

Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	729
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	1075309.79
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.44**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	6149199231
Denominator	Total population of the city	4501610
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.54**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	276.13
Denominator	Total area of the city (sq.km)	326.515
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.08**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	356
Denominator	Total population of the city	4501610
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	1

Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0.58**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	23
Denominator	Total length of road network in the city	3983.287
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**11.11**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	1
Denominator	Total number of major transport interchanges in the city	9
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	0.68
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**17**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	153
Denominator	Total number of major interchanges in the city	9
Unit	Percentage	

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**6.82**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	6
Denominator	Total number of signalised intersections in the city	88
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**61.39**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	6087
Denominator	Total available on-street parking spaces in the city	9916
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**3.85**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	306.897
Denominator	Total length of road network in the city	7966.574
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**112.55**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	269
Denominator	Total number of junctions/ intersections on major roads in the city	239
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is**	**21.18**

	incorporated in public rights-of-way	
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	481
Denominator	Total number of public right-of-way areas in the city	2271
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**57.91**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	1173452
Denominator	Total number of households in the city	2026375
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**236.58**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	1065
Denominator	Total population of the city	4501610
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied[2]**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	72824
Denominator	Total number of samples tested for water quality	74475

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**18.97**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	202
Denominator	Quantum of water put into the distribution system (mld)	1065
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**9.86**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	37896
Denominator	Total number of water connections in the city	384266
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**69.55**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	249
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	358
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**96.64**
Formula:	*Numerator / Denominator*	

Numerator	Total number of properties with access to individual and/or community toilets	1756237
Denominator	Total number of properties in the city	1817291
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**100.92**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	1833930
Denominator	Total number of properties in the city	1817291
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**99.44**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	752
Denominator	Total waste water generated in the city per day	756.2
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**90.03**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	677
Denominator	Total waste water received at treatment plants per day	752
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**21.89**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	872.07
Denominator	Total length of road network in the city	3983.287
Unit	Percentage	

Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**68.8**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	1576309
Denominator	Total number of households and establishments in the city	2291251
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	1995
Denominator	Total quantum of MSW generated in the city	1995
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**35.17**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	21050.11
Denominator	Average MSW generated in the city (tons per month)	59850
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**17**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	17
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean	

	concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**26**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	26
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**110**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	110
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	72
Denominator	Total number of noise samples	72
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	96
Denominator	Total number of samples tested	96
Unit	Percentage	
Benchmark	100%

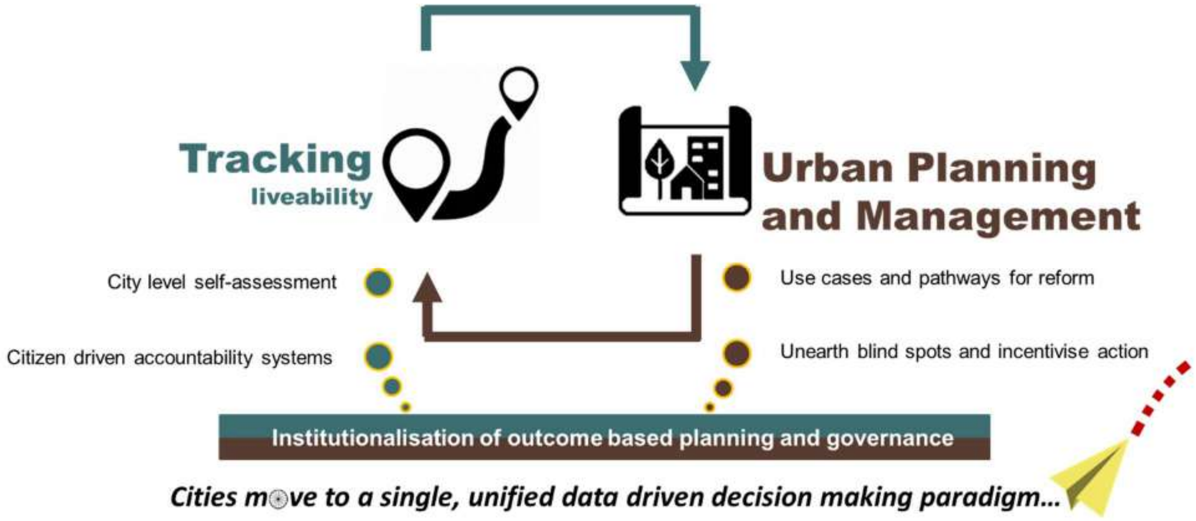
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance

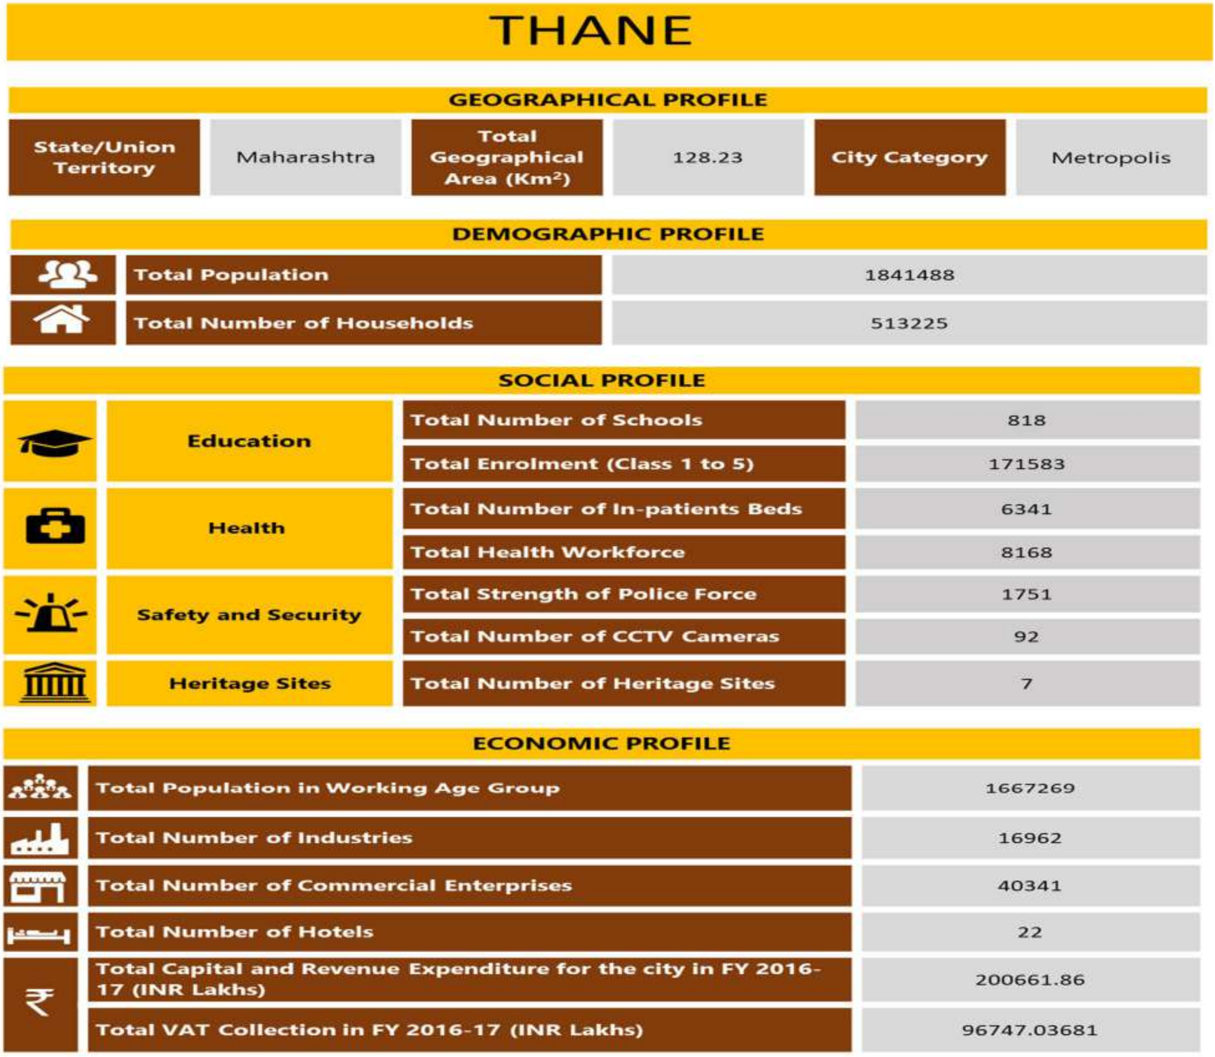
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart

cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



THANE

GEOGRAPHICAL PROFILE

State/Union Territory	Maharashtra	**Total Geographical Area (Km²)**	128.23	**City Category**	Metropolis

DEMOGRAPHIC PROFILE

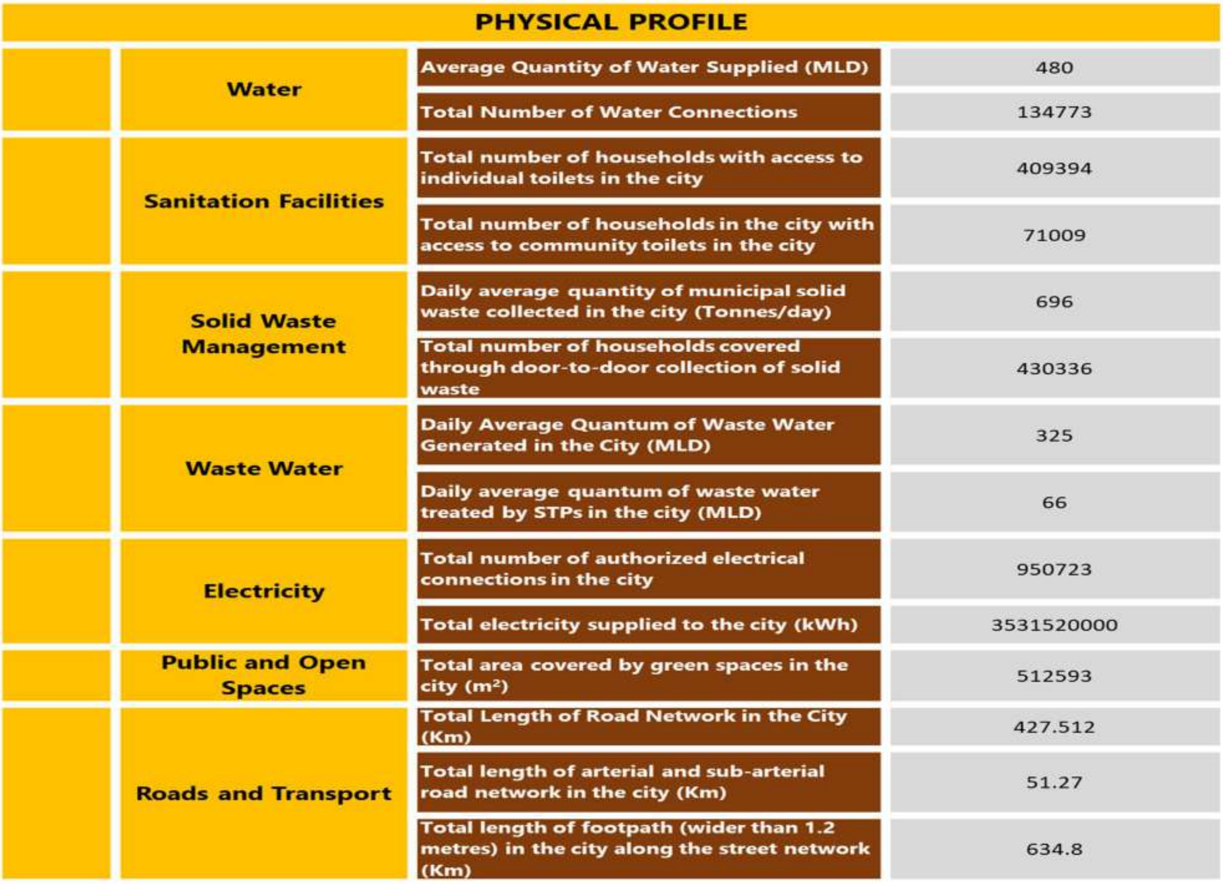
Total Population	1841488
Total Number of Households	513225

SOCIAL PROFILE

Education	**Total Number of Schools**	818
	Total Enrolment (Class 1 to 5)	171583
Health	**Total Number of In-patients Beds**	6341
	Total Health Workforce	8168
Safety and Security	**Total Strength of Police Force**	1751
	Total Number of CCTV Cameras	92
Heritage Sites	**Total Number of Heritage Sites**	7

ECONOMIC PROFILE

Total Population in Working Age Group	1667269
Total Number of Industries	16962
Total Number of Commercial Enterprises	40341
Total Number of Hotels	22
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	200661.86
Total VAT Collection in FY 2016-17 (INR Lakhs)	96747.03681



PHYSICAL PROFILE			
	Water	Average Quantity of Water Supplied (MLD)	480
		Total Number of Water Connections	134773
	Sanitation Facilities	Total number of households with access to individual toilets in the city	409394
		Total number of households in the city with access to community toilets in the city	71009
	Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	696
		Total number of households covered through door-to-door collection of solid waste	430336
	Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	325
		Daily average quantum of waste water treated by STPs in the city (MLD)	66
	Electricity	Total number of authorized electrical connections in the city	950723
		Total electricity supplied to the city (kWh)	3531520000
	Public and Open Spaces	Total area covered by green spaces in the city (m^2)	512593
	Roads and Transport	Total Length of Road Network in the City (Km)	427.512
		Total length of arterial and sub-arterial road network in the city (Km)	51.27
		Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	634.8

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education

Pillars of Comprehensive Development	Category	Indicators
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use	9.1 Share of mixed land use area in overall city land use

Pillars of Comprehensive Development	Category	Indicators
	and Compactness	9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces

Pillars of Comprehensive Development	Category	Indicators
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution

Pillars of Comprehensive Development	Category	Indicators
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

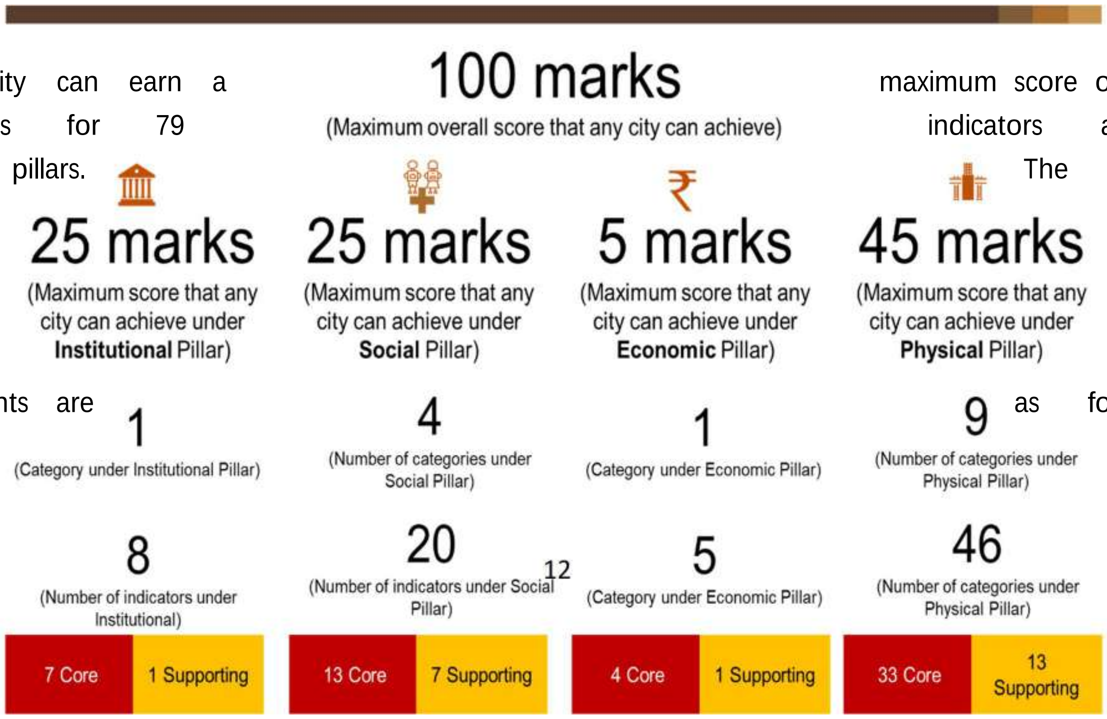
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows:



100 marks
(Maximum overall score that any city can achieve)
25 marks
(Maximum score that any city can achieve under Institutional Pillar)
25 marks
(Maximum score that any city can achieve under Social Pillar)
5 marks
(Maximum score that any city can achieve under Economic Pillar)
45 marks
(Maximum score that any city can achieve under Physical Pillar)
1
(Category under Institutional Pillar)
4
(Number of categories under Social Pillar)
1
(Category under Economic Pillar)
9
(Number of categories under Physical Pillar)
8
(Number of indicators under Institutional)
20
(Number of indicators under Social Pillar)
5
(Category under Economic Pillar)
46
(Number of categories under Physical Pillar)
7 Core
1 Supporting
13 Core
7 Supporting
4 Core
1 Supporting
33 Core
13 Supporting

Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Accounts department
Urban Local Body	For Park and Recreation Related Questions	Garden department
Urban Local Body	For Water Supply and	Water supply department

Designated data owners	Subcategories	Data owners at city level
	Drainage related questions	
Urban Local Body	For Heritage sites related data	Town planning department
Urban Local Body	For Ecological sites related data	Garden department
Urban Local Body	For Housing related data	Housing department
Urban Local Body	For Building plan related data	City engineer and town planning department
Urban Local Body	For Roads related data	City engineer department/ pwd dept
Urban Local Body	For Solid waste management related data	Solid waste management department
Urban Local Body	For IT services related data	It department
Urban Local Body	For Vendor committee related data	Encroachment department
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	Employment exchange department
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Water department and environment department, mpcb
Development Authority	Building Infrastructure	City engineer and town planning department
	Construction planning	Pwd department
	Green Building	Town planning department
	Rain water harvesting	Town planning department
	Universal Design Principle	City engineering department
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Electricity department
State Disaster management authority		Disaster management department
State Education Department		Education department
State Health Department	Health care professionals	Health department
	Citizen Services	Health department
	Disease Prevalence	Health department
	Health Infrastructure	Health department
State Renewable Energy Development Agency		Electricity department

Designated data owners	Subcategories	Data owners at city level
State Sales / Commercial Taxes Department		Sales tax department
Town and Country Planning Department	Land Use	Town planning department
Traffic and Police Department		Disaster management department
Transport Authorities	Buses	Transport department
	Registered Vehicles	Transport department (rto)
	Sub urban rail transport	Transport department
	Mono Rail Authority	Transport department
	Tramways	Transport department
	Marine Transport Authority	Transport department

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 200 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	**2**
State Education Department	**7**
DISCOM/Electricity Department	**0**
Traffic and Police Department	**14**
Development Authority	**2**
Pollution Control Board	**11**
State Renewable Energy Department	**2**
Town and Country Planning	**1**
State Health Department	**14**
Transport Authority	**28**
Disaster Management	**0**
Urban Local Body	**119**
Total	**200***

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

- 1.2 | Percentage of services integrated through Command Centre
- 2.3 | Hotel occupancy
- 3.4 | Percentage of schools with access to digital education
- **5.1** | Number of streets, public places, junctions covered through surveillance systems
- 6.5 | Percentage of vendors registered and provided formal spaces
- 11.7 | Availability of Passenger Information System
- 11.11 | Percentage of traffic intersections with pedestrian crossing facilities
- 11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

- 6.4 | Unemployment Rate
- 11.3 | Mode share of public transport
- 11.5 | Mode share of Non Motorized Transport
- 12.3 | Quality of Water Supplied
- 15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5 Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**71.25**
Description	Average citizen services available online	

Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	1
	1.1c trade license	0
	1.1d solid waste management	0.5
	1.1e water supply	1
	1.1f sewerage/drainage	0
	1.1g fogging	0.5
	1.1h property tax	0.666666667
	1.1i professional tax	0.75
	1.1j information	0.846153846
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	1
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**16.67**
Description	Services integrated through an integrated or a singular operations command centre	3.5
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**0.85**
Description		
Sub Indicators	1.3a Building plan	0.000209
	1.3b Birth/Death Certificate	9.05065E-08
	1.3c water supply	0.00691862
	1.3d solid waste management	0.019143758
	1.3e property tax	0.012422286
	1.3f professional tax (RC)	0.005210646

	1.3g professional tax (EC)	NA

Indicator No. 1.4	**Average delay in grievance redressal**	**1.33**
Description		
Sub Indicators	1.4a water supply	0.5
	1.4b solid waste	0
	1.4c street lights	0
	1.4d sewerage	0
	1.4e professional tax	NA
	1.4f parks and recreational spaces	7.5
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**133.84**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	52410.09895
Denominator	Total demand raised for the year	39159.81
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**54.53**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	9644.76
Denominator	Total O&M cost for providing water supply services during the year	17687.2
Unit	Percentage	
Benchmark	100%	

Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**40.27**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	197852.02
Denominator	Total expenditure (revenue and capital accounts) in the same year	491337.82
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**27.27**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	9
Denominator	Total number of wards	33
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**39.51**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	32
Denominator	Total number of historic buildings/sites identified	81
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**85.71**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	6
Denominator	Total number of ecologically important sites identified in the city	7
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**77.5**
Description	Average Occupancy rate of Hotels	77.5

Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**1.64**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	3298.76
Denominator	Total budget of the ULB (capital and revenue)	200661.86
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**972**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	972
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**88.51**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	268341
Denominator	Total population in the age group of 6-14 years	303170
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**88.14**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	126317
Denominator	Total female population in the age group of 6-14 years	143309
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**41.42**
Formula:	*Numerator / Denominator*	

Numerator	Total number of students in primary grades (public and private)	171583
Denominator	Total number of teachers available for primary grades (public and private schools)	4143
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**41.56**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	340
Denominator	Total number of schools	818
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**100.78**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	100.7750885
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**96.67**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	1007692233
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**34.43**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	6341
Denominator	Total population of the city	1841488
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	

Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**44.36**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	8168
Denominator	Total population of the city	1841488
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**30**
Description	Total response time for health-related distress calls received in the city	30
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.06**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	1172
Denominator	Total population of the city	1841488
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.08**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	1474
Denominator	Total population of the city	1841488
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**21.52**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	92
Denominator	Total length of road network in the city	427.512

Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**407.71**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	7508
Denominator	Total population of the city	1841488
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**22.31**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	1675
Denominator	Total crimes recorded in the same year	7508
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**27.26**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	502
Denominator	Total population of the city	1841488
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**15.81**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	13206.18028
Denominator	Total VAT/GST collection during preceding year	835.4085653
Unit	Percentage	

Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**4365.73**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	14037.55895
Denominator	Total Professional Tax collection during preceding year	321.54
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**-2.54**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	-5
Denominator	Number of construction permits during preceding year	1.97
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	36205
Denominator	Total labour force in the city	303170
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**5.34**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	961
Denominator	Total number of vendors in the city	18000
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**3.53**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	8721
Denominator	Total number of slum and EWS households in the city	2467.37
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**64.48**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	9564820183138150
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**0.28**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	512593
Denominator	Total population of the city	1841488
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**1.73**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	3182071.68
Denominator	Total population of the city	1841488
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	128230000
Denominator	Total area of the city (total area of all land uses)	128230000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.07**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	1841488
Denominator	Area allocated for residential land use (in hectares)	26656100
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**163.37**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	838438
Denominator	Total number of households in the city	513225
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**2.42**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	23000
Denominator	Total number of electricity connections in the city	950723

Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**6907**
Description	Total number of sustained electrical interruptions in a year	6907
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.74**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	351578
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	2924.235
Denominator	Total energy consumption from all sources	3531545130
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.29**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	3058333.333
Denominator	Total quantum of water and waste water handled during the period	16380
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.34**

Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	23887000
Denominator	Total number of street light installations	361125
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	1583284.87
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	1583284.87
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.29**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	3531545130
Denominator	Total population of the city	1841488
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.64**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	146.44
Denominator	Total area of the city (sq.km)	128.23
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**10.25**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	18882

Denominator	Total population of the city	1841488
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	74
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**2.34**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	10
Denominator	Total length of road network in the city	427.512
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**92.31**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	12
Denominator	Total number of major transport interchanges in the city	13
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	0.84
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**0.69**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	9
Denominator	Total number of major interchanges in the city	13
Unit	Percentage	

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	0
Denominator	Total number of signalised intersections in the city	19
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	968
Denominator	Total available on-street parking spaces in the city	968
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**74.24**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	634.8
Denominator	Total length of road network in the city	855.024
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**102.15**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	475
Denominator	Total number of junctions/ intersections on major roads in the city	465
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**82.9**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	1435
Denominator	Total number of public right-of-way areas in the city	1731

Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**91.43**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	469265
Denominator	Total number of households in the city	513225
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**260.66**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	480
Denominator	Total population of the city	1841488
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	10024
Denominator	Total number of samples tested for water quality	10795
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**37**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	177.6
Denominator	Quantum of water put into the distribution system (mld)	480
Unit	Percentage	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**4.15**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	5593
Denominator	Total number of water connections in the city	134773
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	237
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	237
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**277.27**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	480916
Denominator	Total number of properties in the city	173445
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**142.3**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	246811
Denominator	Total number of properties in the city	173445
Unit	Percentage	

Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**18.46**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	60
Denominator	Total waste water generated in the city per day	325
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	58
Denominator	Total waste water received at treatment plants per day	58
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**176.37**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	754
Denominator	Total length of road network in the city	427.512
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**81.79**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	452770
Denominator	Total number of households and establishments in the city	553566
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**86.35**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	696
Denominator	Total quantum of MSW generated in the city	806

Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**47.76**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	9972.5
Denominator	Average MSW generated in the city (tons per month)	20880
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**17**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	17
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**60**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	60
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**116**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	116
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	0
Denominator	Total number of noise samples	40
Unit	Percentage	
Benchmark		

Indicator No: 15.5	**Quality of water in public surface water bodies**	**90.36**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	300
Denominator	Total number of samples tested	332
Unit	Percentage	
Benchmark	100%	

LIVEABILITY ASSESSMENT

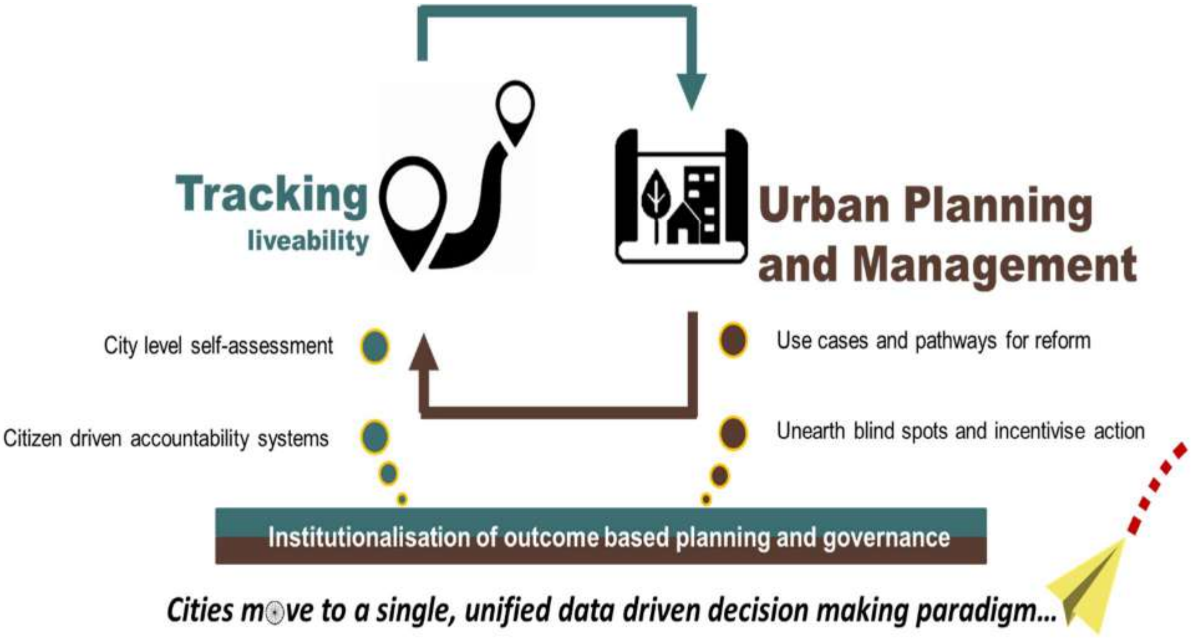
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

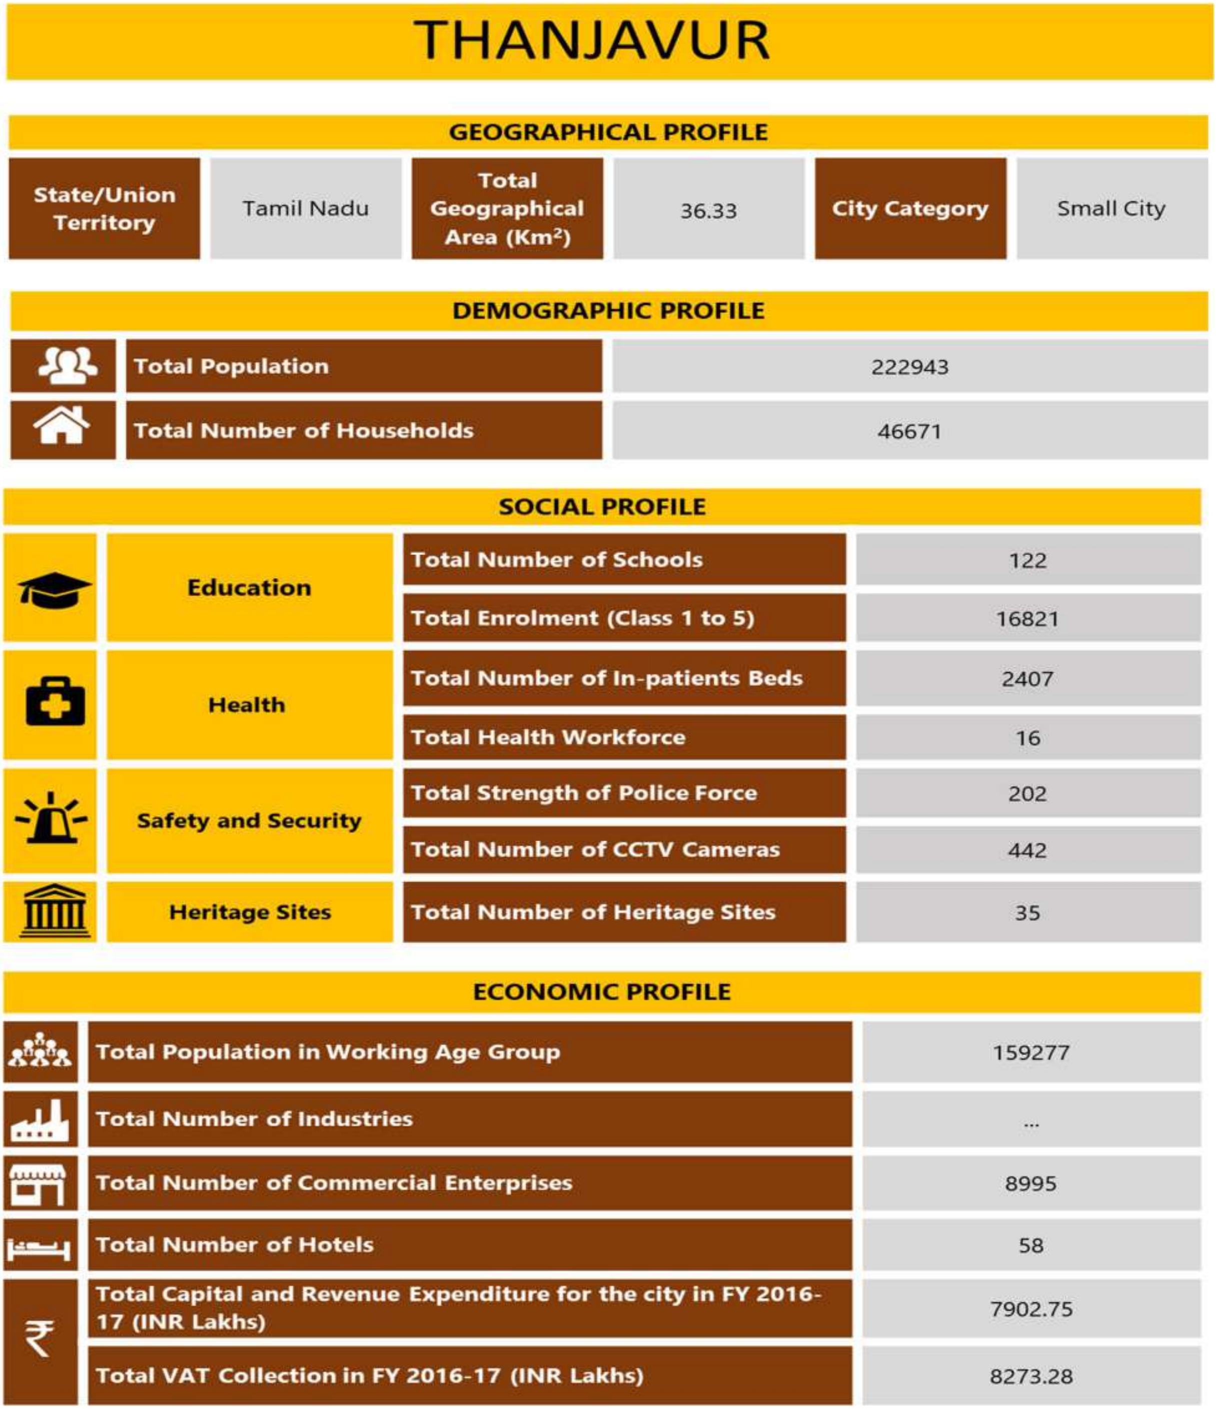


Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



THANJAVUR

GEOGRAPHICAL PROFILE

State/Union Territory	Tamil Nadu	**Total Geographical Area (Km^2)**	36.33	**City Category**	Small City

DEMOGRAPHIC PROFILE

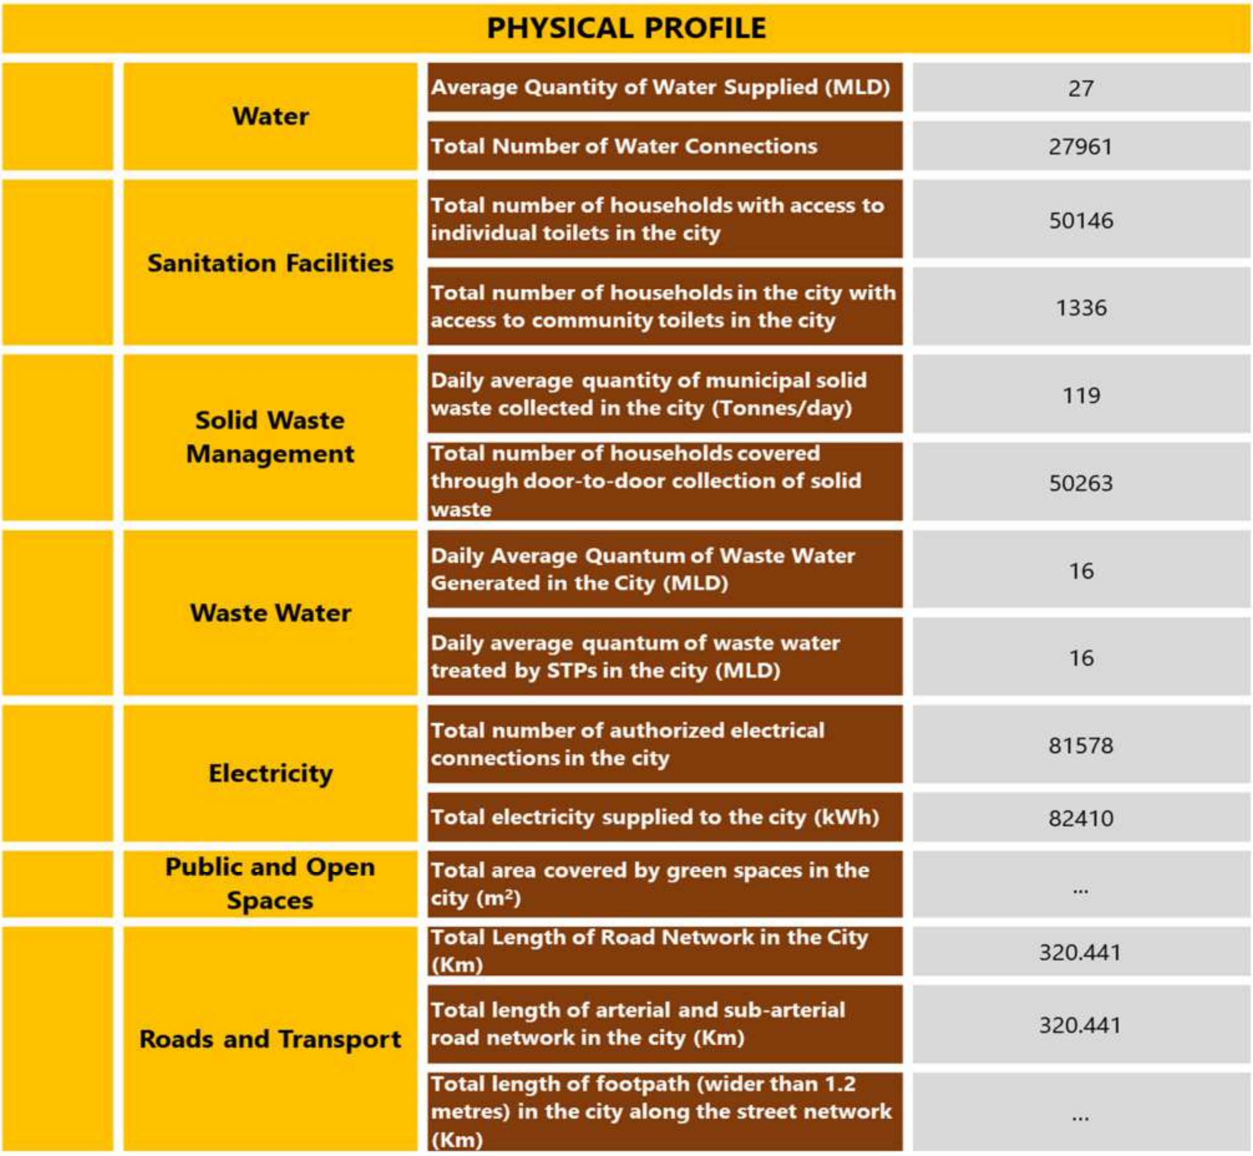
Total Population	222943
Total Number of Households	46671

SOCIAL PROFILE

Education	**Total Number of Schools**	122
	Total Enrolment (Class 1 to 5)	16821
Health	**Total Number of In-patients Beds**	2407
	Total Health Workforce	16
Safety and Security	**Total Strength of Police Force**	202
	Total Number of CCTV Cameras	442
Heritage Sites	**Total Number of Heritage Sites**	35

ECONOMIC PROFILE

Total Population in Working Age Group	159277
Total Number of Industries	...
Total Number of Commercial Enterprises	8995
Total Number of Hotels	58
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	7902.75
Total VAT Collection in FY 2016-17 (INR Lakhs)	8273.28



PHYSICAL PROFILE			
	Water	Average Quantity of Water Supplied (MLD)	27
		Total Number of Water Connections	27961
	Sanitation Facilities	Total number of households with access to individual toilets in the city	50146
		Total number of households in the city with access to community toilets in the city	1336
	Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	119
		Total number of households covered through door-to-door collection of solid waste	50263
	Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	16
		Daily average quantum of waste water treated by STPs in the city (MLD)	16
	Electricity	Total number of authorized electrical connections in the city	81578
		Total electricity supplied to the city (kWh)	82410
	Public and Open Spaces	Total area covered by green spaces in the city (m^2)	...
	Roads and Transport	Total Length of Road Network in the City (Km)	320.441
		Total length of arterial and sub-arterial road network in the city (Km)	320.441
		Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	...

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various ‘Category Sub-Indexes’ and a composite ‘City Liveability Index’ will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases

Pillars of Comprehensive Development	Category	Indicators
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle

Pillars of Comprehensive Development	Category	Indicators
		tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

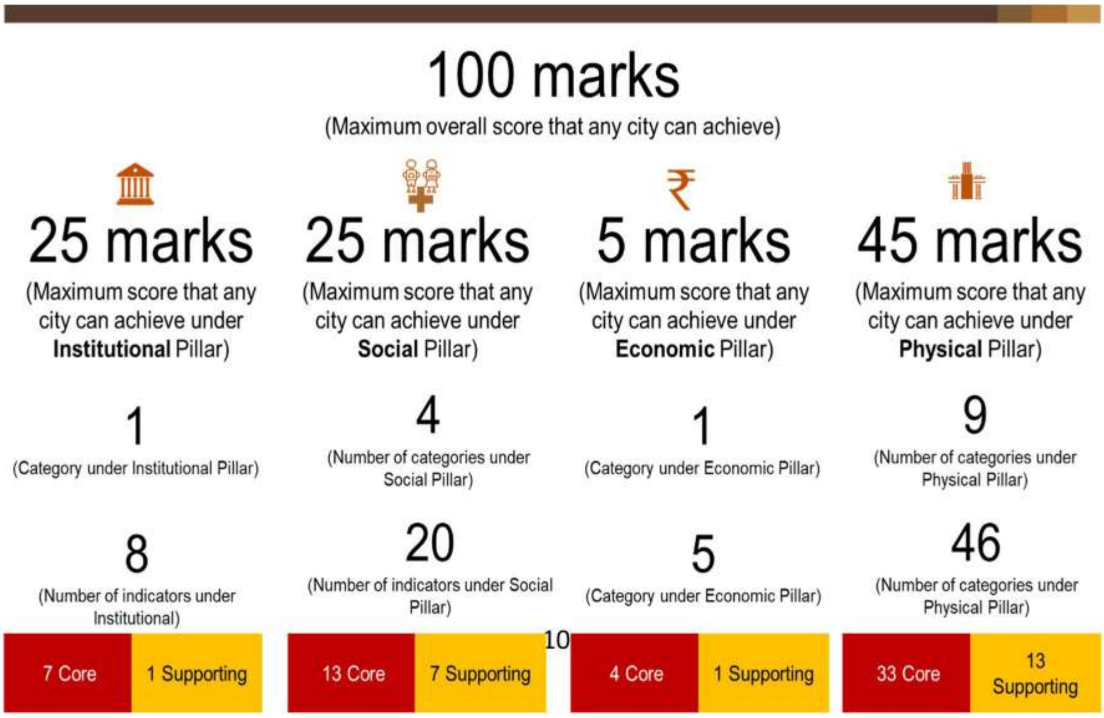
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks
(Maximum overall score that any city can achieve)
25 marks
(Maximum score that any city can achieve under Institutional Pillar)
25 marks
(Maximum score that any city can achieve under Social Pillar)
5 marks
(Maximum score that any city can achieve under Economic Pillar)
45 marks
(Maximum score that any city can achieve under Physical Pillar)
1
(Category under Institutional Pillar)
4
(Number of categories under Social Pillar)
1
(Category under Economic Pillar)
9
(Number of categories under Physical Pillar)
8
(Number of indicators under Institutional)
20
(Number of indicators under Social Pillar)
5
(Category under Economic Pillar)
46
(Number of categories under Physical Pillar)
7 Core
1 Supporting
13 Core
7 Supporting
4 Core
1 Supporting
33 Core
13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Accounts department, Thanjavur Corporation
Urban Local Body	For Park and Recreation Related Questions	Engineering Section Thanjavur Corporation
Urban Local Body	For Water Supply and Drainage related questions	Engineering Section, Thanjavur Corporation
Urban Local Body	For Heritage sites related data	
Urban Local Body	For Ecological sites related data	District Forest Department
Urban Local Body	For Housing related data	Town planning, Thanjavur Corporation
Urban Local Body	For Building plan related data	Town planning, Thanjavur Corporation
Urban Local Body	For Roads related data	Engineering Section, Public Work Department
Urban Local Body	For Solid waste management related data	Health Department , ULB , Thanjavur corporation

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For IT services related data	IT department, Thanjavur Corporation
Urban Local Body	For Vendor committee related data	Town planning, Thanjavur Corporation
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	Revenue Section Thanjavur Corporation
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	
Development Authority	Building Infrastructure	Local Planning Authority
	Construction planning	Local Planning Authority
	Green Building	Local Planning Authority
	Rain water harvesting	Local Planning Authority
	Universal Design Principle	Local Planning Authority
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Tamilnadu Electricity Board , Thanjavur
State Disaster management authority		District Disaster Management Department
State Education Department		District Education Department , Thanjavur
State Health Department	Health care professionals	Joint Director, Health Services, Thanjavur
	Citizen Services	Joint Director, Health Services, Thanjavur
	Disease Prevalence	Joint Director, Health Services, Thanjavur
	Health Infrastructure	Joint Director, Health Services, Thanjavur
State Renewable Energy Development Agency		
State Sales / Commercial Taxes Department		District Commercial Tax Department, Thanjavur
Town and Country Planning Department	Land Use	Town planning, Thanjavur Corporation
Traffic and Police Department		Police Department, Thanjavur
Transport Authorities	Buses	Tamilnadu State Transport Corporation, Thanjavur
	Registered Vehicles	Regional Transport Office, Thanjavur
	Sub urban rail transport	Not Applicable
	Mono Rail Authority	Not Applicable
	Tramways	Not Applicable
	Marine Transport Authority	Not Applicable

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 114 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

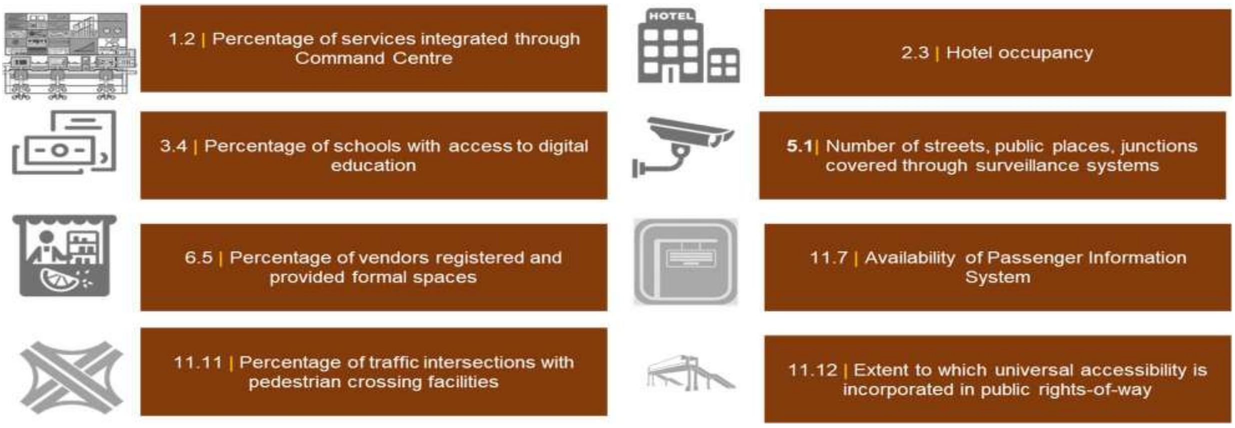
Data Owners	Number of Documents
Sales and Commercial Taxes	**1**
State Education Department	**3**
DISCOM/Electricity Department	**6**
Traffic and Police Department	**3**
Development Authority	**5**
Pollution Control Board	**0**
State Renewable Energy Department	**0**
Town and Country Planning	**4**
State Health Department	**0**
Transport Authority	**3**
Disaster Management	**0**
Urban Local Body	**89**
Total	**114***

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:



1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

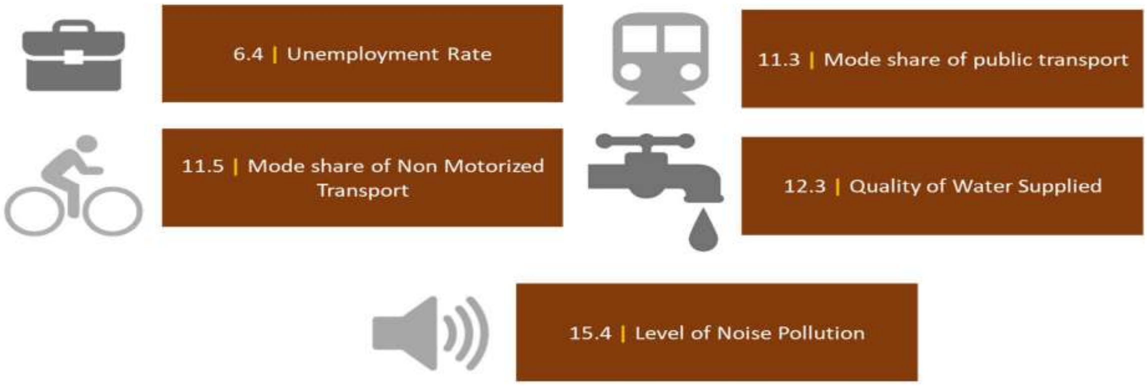
6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.



6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**78.99**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	1
	1.1c trade license	1
	1.1d solid waste management	1
	1.1e water supply	0.333333333
	1.1f sewerage/drainage	0.333333333
	1.1g fogging	1
	1.1h property tax	1
	1.1i professional tax	0.5
	1.1j information	0.769230769
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	0.333333333
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**0**
Description	Services integrated through an integrated or a singular operations command centre	0
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**Non-Computable**
Description		
Sub Indicators	1.3a Building plan	NA
	1.3b Birth/Death Certificate	NA
	1.3c water supply	NA

	1.3d solid waste management	NA
	1.3e property tax	NA
	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	NA
	1.3i information	NA
	1.3j electricity	NA
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**2.67**
Description		
Sub Indicators	1.4a water supply	0
	1.4b solid waste	NA
	1.4c street lights	NA
	1.4d sewerage	0
	1.4e professional tax	8
	1.4f parks and recreational spaces	NA
	1.4g building plan	NA
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**100.45**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	1259.37
Denominator	Total demand raised for the year	1253.69
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**39.21**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	213.59

Denominator	Total O&M cost for providing water supply services during the year	544.77
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**12.46**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	1797.975
Denominator	Total expenditure (revenue and capital accounts) in the same year	14428.235
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	Data Unavailable
Denominator	Total number of wards	51
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	7
Denominator	Total number of historic buildings/sites identified	7
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	NA
Denominator	Total number of ecologically important sites identified in the city	NA
Unit	Percentage	
Benchmark	100%	

Indicator No: 2.3	**Hotel Occupancy**	**32.5**
Description	Average Occupancy rate of Hotels	32.5
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	NA
Denominator	Total budget of the ULB (capital and revenue)	7902.75
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**Non-Computable**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	NA
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**88.06**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	29556
Denominator	Total population in the age group of 6-14 years	33564
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**72.12**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	11839
Denominator	Total female population in the age group of 6-14 years	16415
Unit	Percentage	

Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**33.18**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	16821
Denominator	Total number of teachers available for primary grades (public and private schools)	507
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**31.15**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	38
Denominator	Total number of schools	122
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**86.55**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	86.54648314
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**101.01**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	18694176
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**107.96**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	2407

Denominator	Total population of the city	222943
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**0.72**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	16
Denominator	Total population of the city	222943
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**Non-Computable**
Description	Total response time for health-related distress calls received in the city	NA
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.23**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	502
Denominator	Total population of the city	222943
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.03**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	60
Denominator	Total population of the city	222943
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**137.93**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	442
Denominator	Total length of road network in the city	320.441
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**924**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	2060
Denominator	Total population of the city	222943
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**0.49**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	10
Denominator	Total crimes recorded in the same year	2060
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**188.39**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	420
Denominator	Total population of the city	222943
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**9.02**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	684.53
Denominator	Total VAT/GST collection during preceding year	75.8875
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**95.85**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	206.26
Denominator	Total Professional Tax collection during preceding year	215.18
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	NC
Denominator	Number of construction permits during preceding year	NC
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	247241
Denominator	Total labour force in the city	33564
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	

Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	Data Unavailable
Denominator	Total number of vendors in the city	1032
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**4.45**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	1255
Denominator	Total number of slum and EWS households in the city	281.76
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**0**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	27838720
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	Data Unavailable
Denominator	Total population of the city	222943
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**0.01**
Formula:	*Numerator / Denominator*	

Numerator	Total area of public and recreational places (sq.m.)	2470.221
Denominator	Total population of the city	222943
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	NA
Denominator	Total area of the city (total area of all land uses)	36330000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	222943
Denominator	Area allocated for residential land use (in hectares)	19967300
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**141.4**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	65991
Denominator	Total number of households in the city	46671
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**100**

Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	81578
Denominator	Total number of electricity connections in the city	81578
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**81**
Description	Total number of sustained electrical interruptions in a year	81
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.81**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	56
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	NA
Denominator	Total energy consumption from all sources	103031
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.31**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	656101.75
Denominator	Total quantum of water and waste water handled during the period	1290
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.34**

Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	3742259.68
Denominator	Total number of street light installations	10349
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	NA
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	NA
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	103031
Denominator	Total population of the city	222943
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	Data Unavailable
Denominator	Total area of the city (sq.km)	36.33
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**9.89**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	2205
Denominator	Total population of the city	222943
Unit	Number per 1000 persons	
Benchmark	>=0.6	

Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	NA
Denominator	Total length of road network in the city	320.441
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	3
Denominator	Total number of major transport interchanges in the city	Data Unavailable
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**Non-Computable**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	Data Unavailable
Denominator	Total number of major interchanges in the city	Data Unavailable
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	Data Unavailable
Denominator	Total number of signalised intersections in the city	Data Unavailable
Unit	Percentage	
Benchmark	>=75	

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Indicator No: 11.9	**Availability of paid parking spaces**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	3
Denominator	Total available on-street parking spaces in the city	3
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	NA
Denominator	Total length of road network in the city	640.882
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	20
Denominator	Total number of junctions/ intersections on major roads in the city	20
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	NA
Denominator	Total number of public right-of-way areas in the city	813
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**59.91**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	27961
Denominator	Total number of households in the city	46671
Unit	Percentage	

Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**121.11**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	27
Denominator	Total population of the city	222943
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	NA
Denominator	Total number of samples tested for water quality	12
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**86.3**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	23.3
Denominator	Quantum of water put into the distribution system (mld)	27
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	NA
Denominator	Total number of water connections in the city	27961
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	NA
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	NA

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**21528.57**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	55759
Denominator	Total number of properties in the city	259
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**9150.58**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	23700
Denominator	Total number of properties in the city	259
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	16
Denominator	Total waste water generated in the city per day	16
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	NA
Denominator	Total waste water received at treatment plants per day	16
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**23.41**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	75
Denominator	Total length of road network in the city	320.441

Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**105.9**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	58948
Denominator	Total number of households and establishments in the city	55666
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**99.17**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	119
Denominator	Total quantum of MSW generated in the city	120
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	NA
Denominator	Average MSW generated in the city (tons per month)	3570
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**Non=Computable**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	Data Unavailable
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**Non=Computable**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	Data Unavailable
Unit	µg/m3	

Benchmark	Annual mean concentration of 40 μg/m3 OR Mean concentration over 24 hours of 80 μg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**Non=Computable**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	NA
Unit	μg/m3	
Benchmark	Annual mean concentration of 60 μg/m3 OR Mean concentration over 24 hours of 100 μg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	NA
Denominator	Total number of noise samples	NA
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	NA
Denominator	Total number of samples tested	NA
Unit	Percentage	
Benchmark	100%	

LIVEABILITY ASSESSMENT

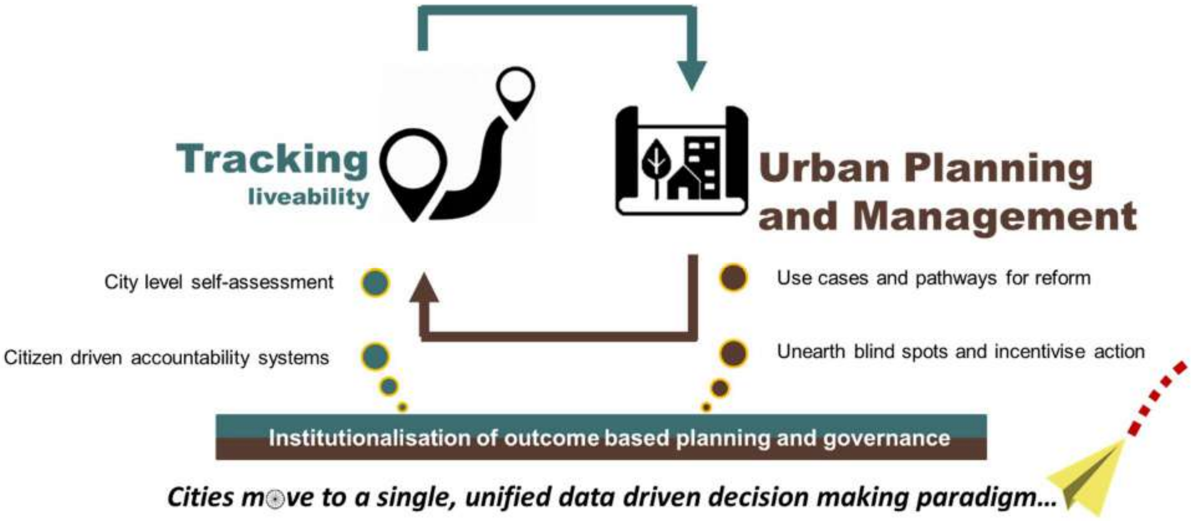
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



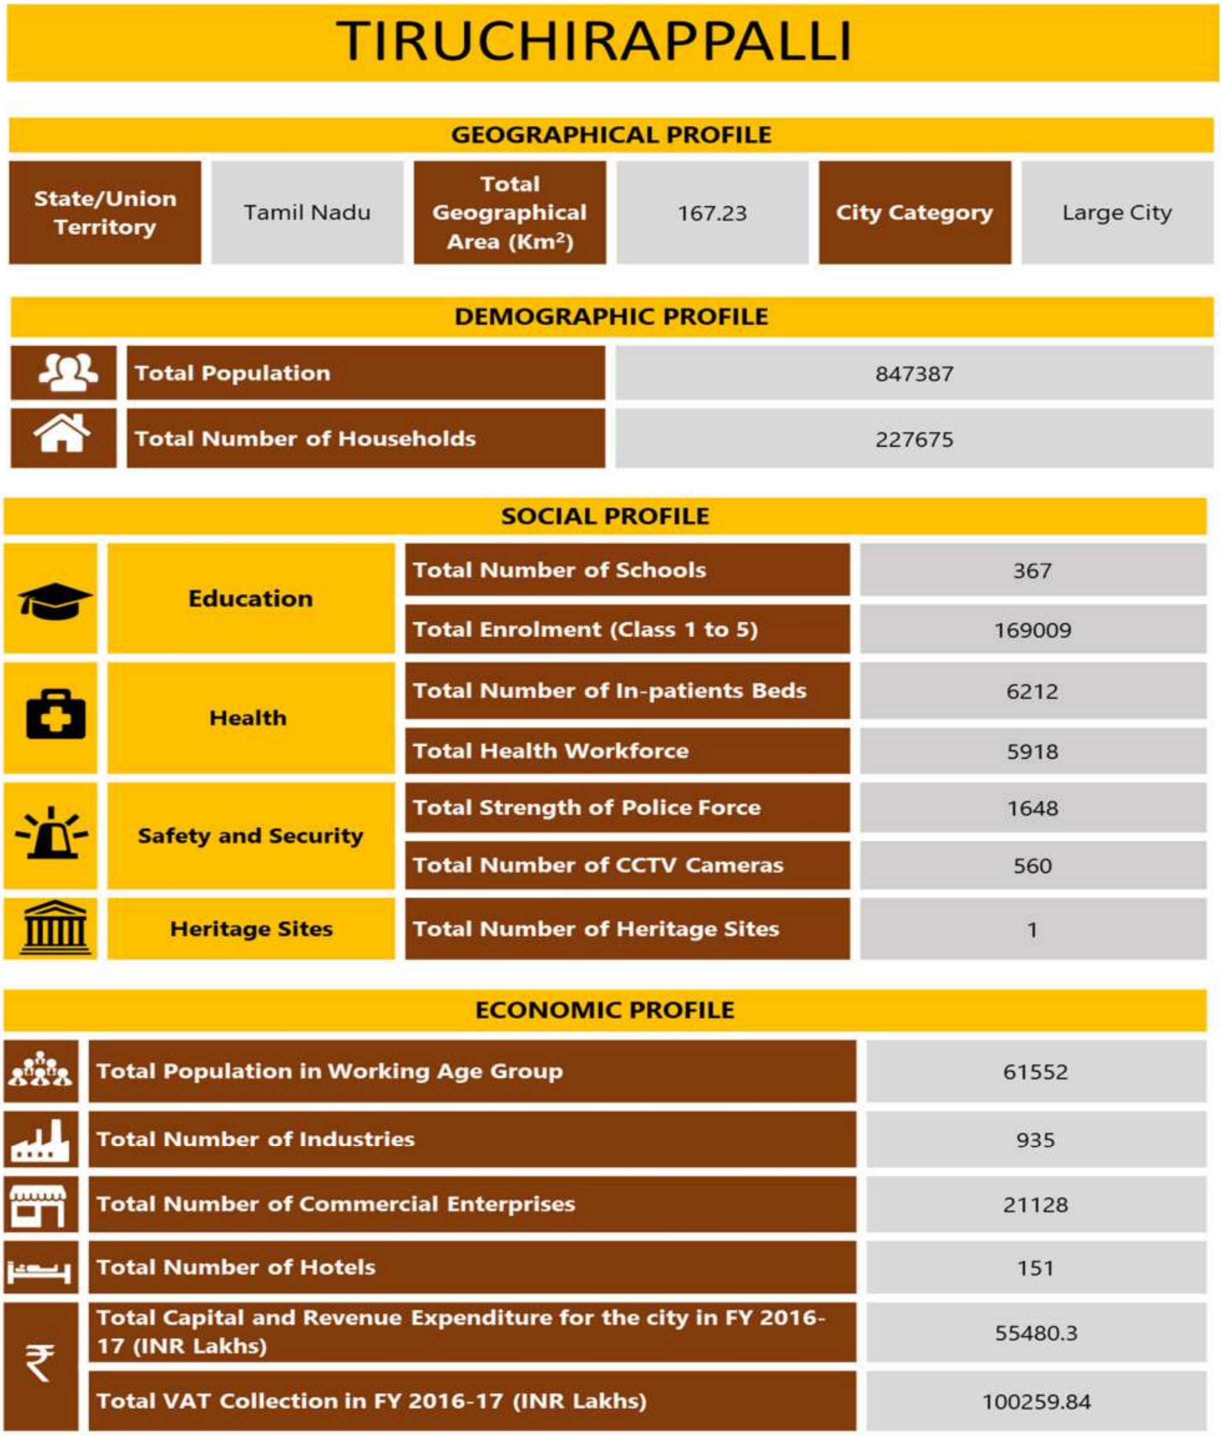
Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart

cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



TIRUCHIRAPPALLI

GEOGRAPHICAL PROFILE

State/Union Territory	Tamil Nadu	**Total Geographical Area (Km^2)**	167.23	**City Category**	Large City

DEMOGRAPHIC PROFILE

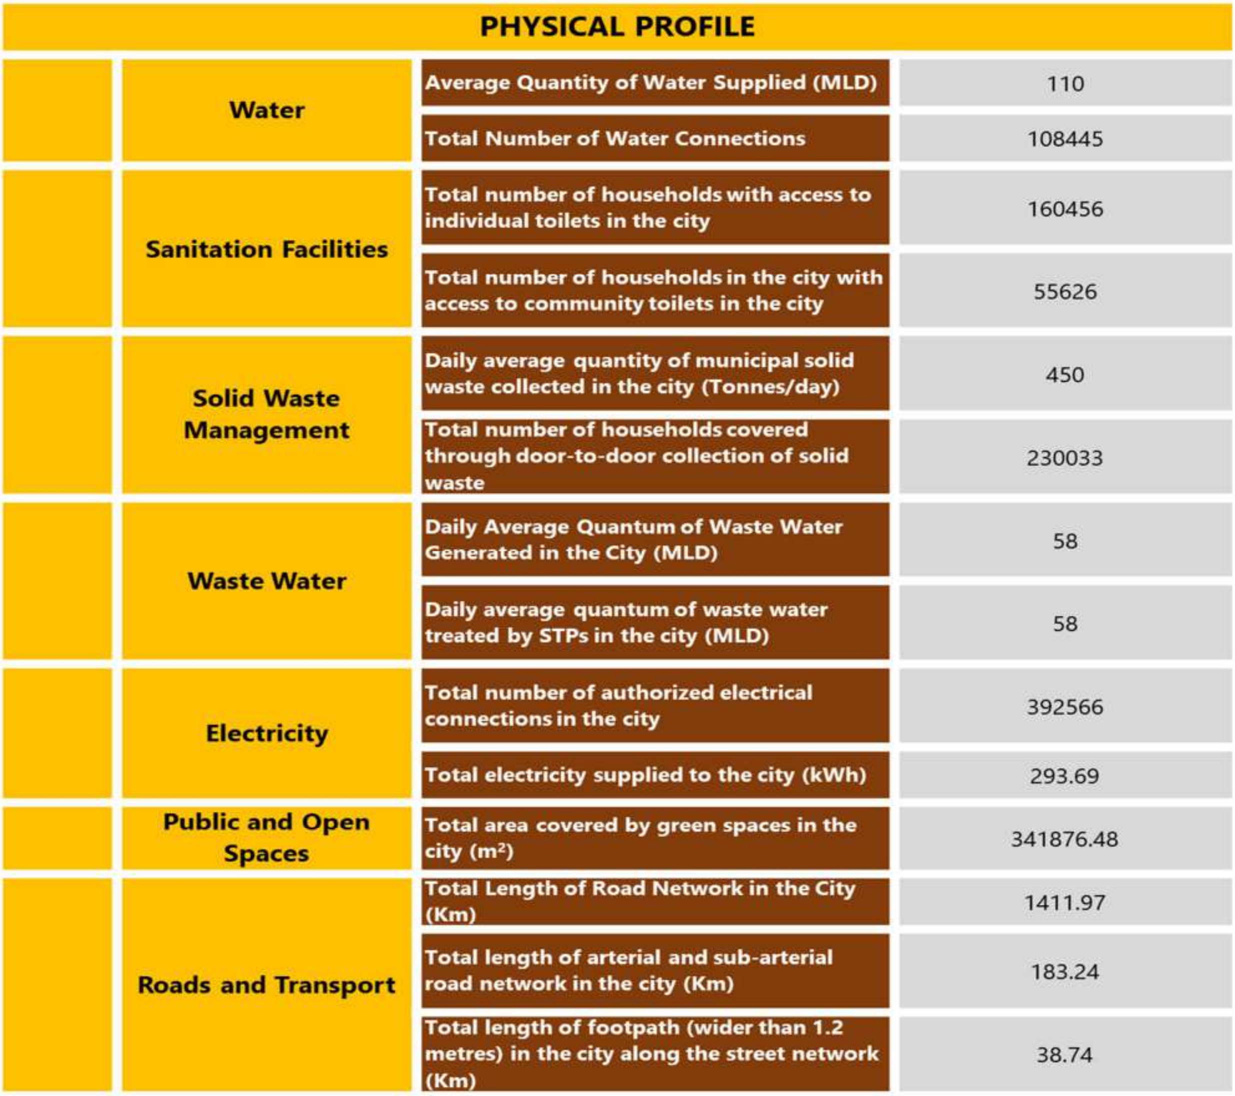
Total Population	847387
Total Number of Households	227675

SOCIAL PROFILE

Education	**Total Number of Schools**	367
	Total Enrolment (Class 1 to 5)	169009
Health	**Total Number of In-patients Beds**	6212
	Total Health Workforce	5918
Safety and Security	**Total Strength of Police Force**	1648
	Total Number of CCTV Cameras	560
Heritage Sites	**Total Number of Heritage Sites**	1

ECONOMIC PROFILE

Total Population in Working Age Group	61552
Total Number of Industries	935
Total Number of Commercial Enterprises	21128
Total Number of Hotels	151
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	55480.3
Total VAT Collection in FY 2016-17 (INR Lakhs)	100259.84



PHYSICAL PROFILE

	Water	Average Quantity of Water Supplied (MLD)	110
		Total Number of Water Connections	108445
	Sanitation Facilities	Total number of households with access to individual toilets in the city	160456
		Total number of households in the city with access to community toilets in the city	55626
	Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	450
		Total number of households covered through door-to-door collection of solid waste	230033
	Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	58
		Daily average quantum of waste water treated by STPs in the city (MLD)	58
	Electricity	Total number of authorized electrical connections in the city	392566
		Total electricity supplied to the city (kWh)	293.69
	Public and Open Spaces	Total area covered by green spaces in the city (m^2)	341876.48
	Roads and Transport	Total Length of Road Network in the City (Km)	1411.97
		Total length of arterial and sub-arterial road network in the city (Km)	183.24
		Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	38.74

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education

Pillars of Comprehensive Development	Category	Indicators
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical

Pillars of Comprehensive Development	Category	Indicators
		services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities

Pillars of Comprehensive Development	Category	Indicators
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections 12.2 Per capita supply of water 12.3 Quality of water supplied 12.4 Level of non-revenue water – NRW 12.5 Percentage of water connections covered through meters 12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets 13.2 Coverage of sewerage network and/or septage 13.3 Collection efficiency of sewerage network 13.4 Extent of reuse and recycling of waste water 13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection 14.2 Efficiency of collection of municipal solid waste 14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution 15.2 Concentration of NO2- air pollution 15.3 Concentration of PM10 - air pollution 15.4 Level of noise pollution 15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

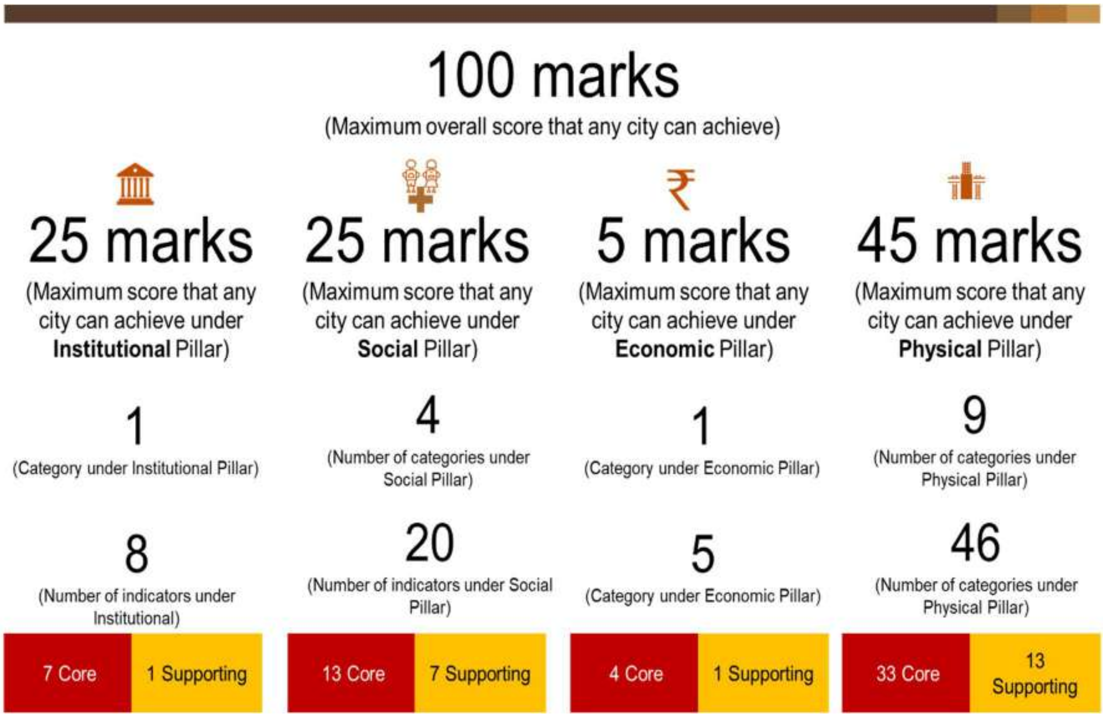
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks
(Maximum overall score that any city can achieve)
25 marks
(Maximum score that any city can achieve under Institutional Pillar)
25 marks
(Maximum score that any city can achieve under Social Pillar)
5 marks
(Maximum score that any city can achieve under Economic Pillar)
45 marks
(Maximum score that any city can achieve under Physical Pillar)
1
(Category under Institutional Pillar)
4
(Number of categories under Social Pillar)
1
(Category under Economic Pillar)
9
(Number of categories under Physical Pillar)
8
(Number of indicators under Institutional)
20
(Number of indicators under Social Pillar)
5
(Category under Economic Pillar)
46
(Number of categories under Physical Pillar)
7 Core
1 Supporting
13 Core
7 Supporting
4 Core
1 Supporting
33 Core
13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring. The list of benchmarks is presented in Annexure 1.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Accounts department
Urban Local Body	For Park and Recreation Related Questions	Engineering Section
Urban Local Body	For Water Supply and Drainage related questions	Engineering Section
Urban Local Body	For Heritage sites related data	Town planning
Urban Local Body	For Ecological sites related data	Town planning
Urban Local Body	For Housing related data	Town planning
Urban Local Body	For Building plan related data	Town planning
Urban Local Body	For Roads related data	Engineering Section

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Solid waste management related data	Health Department
Urban Local Body	For IT services related data	IT department
Urban Local Body	For Vendor committee related data	Town planning
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	Revenue Section
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Pollution Control Board, Collectorate, Tiruchirappalli.
Development Authority	Building Infrastructure	Town planning
	Construction planning	Town planning

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 170 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	**2**
State Education Department	**4**
DISCOM/Electricity Department	**8**
Traffic and Police Department	**1**
Development Authority	**12**
Pollution Control Board	**1**
State Renewable Energy Department	**1**
Town and Country Planning	**3**
State Health Department	**8**
Transport Authority	**9**
Disaster Management	**1**
Urban Local Body	**63**
Total	**113***

* The count of documents is based on first round of submission.

Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

- 1.2 | Percentage of services integrated through Command Centre
- 2.3 | Hotel occupancy
- 3.4 | Percentage of schools with access to digital education
- **5.1**| Number of streets, public places, junctions covered through surveillance systems
- 6.5 | Percentage of vendors registered and provided formal spaces
- 11.7 | Availability of Passenger Information System
- 11.11 | Percentage of traffic intersections with pedestrian crossing facilities
- 11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

- 6.4 | Unemployment Rate
- 11.3 | Mode share of public transport
- 11.5 | Mode share of Non Motorized Transport
- 12.3 | Quality of Water Supplied
- 15.4 | Level of Noise Pollution

4.4 Physical Audit

The following map presents the indicators audited at city level.

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**20.86**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	0.25
	1.1b death certificate	0
	1.1c trade license	0
	1.1d solid waste management	0
	1.1e water supply	0
	1.1f sewerage/drainage	0
	1.1g fogging	0
	1.1h property tax	0
	1.1i professional tax	0
	1.1j information	0.461538462
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**0**
Description	Services integrated through an integrated or a singular operations command centre	0
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**1.23**
Description		
Sub Indicators	1.3a Building plan	0
	1.3b Birth/Death Certificate	0.00159805

	1.3c water supply	0.001146651
	1.3d solid waste management	0.021153263
	1.3e property tax	0.004623593
	1.3f professional tax (RC)	0
	1.3g professional tax (EC)	0
	1.3h complaints/ grievance redressal	0.000162854
	1.3i information	0.000289124
	1.3j electricity	0.094251667
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**1.29**
Description		
Sub Indicators	1.4a water supply	0
	1.4b solid waste	0
	1.4c street lights	0
	1.4d sewerage	0
	1.4e professional tax	9
	1.4f parks and recreational spaces	0
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**70.82**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	6597.08032
Denominator	Total demand raised for the year	9315.34683
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**44.83**
Formula:	*Numerator / Denominator*	

Numerator	Total collection of user charges in water supply in a year	2144.73
Denominator	Total O&M cost for providing water supply services during the year	4784.1
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**57.46**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	71217.33
Denominator	Total expenditure (revenue and capital accounts) in the same year	123949.33
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**6.15**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	4
Denominator	Total number of wards	65
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	7
Denominator	Total number of historic buildings/sites identified	7
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	1
Denominator	Total number of ecologically important sites identified in the city	1
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**55**
Description	Average Occupancy rate of Hotels	55
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0.02**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	8.5
Denominator	Total budget of the ULB (capital and revenue)	55480.3
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**62**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	62
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**163.11**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	207653
Denominator	Total population in the age group of 6-14 years	127306
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**77.92**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	48650
Denominator	Total female population in the age group of 6-14 years	62437
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**63.59**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	169009
Denominator	Total number of teachers available for primary grades (public and private schools)	2658
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**17.98**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	66
Denominator	Total number of schools	367
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**89.44**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	89.43893166
Numerator	Percentage	

Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**93.39**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	170142428
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**73.31**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	6212
Denominator	Total population of the city	847387
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**69.84**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	5918
Denominator	Total population of the city	847387
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**14**
Description	Total response time for health-related distress calls received in the city	14
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.07**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	578
Denominator	Total population of the city	847387
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases	

	(amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.02**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	200
Denominator	Total population of the city	847387
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**39.66**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	560
Denominator	Total length of road network in the city	1411.97
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**1056.31**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	8951
Denominator	Total population of the city	847387
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**2.21**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	198
Denominator	Total crimes recorded in the same year	8951
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size	

	classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**16.4**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	139
Denominator	Total population of the city	847387
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**41.6**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	29455.62
Denominator	Total VAT/GST collection during preceding year	708.0422
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**-80.1**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	-8812.66028
Denominator	Total Professional Tax collection during preceding year	11002.2653
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**-21.98**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	-247
Denominator	Number of construction permits during preceding year	11.24
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	73380
Denominator	Total labour force in the city	127306
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	0
Denominator	Total number of vendors in the city	3182.65
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**38.47**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	14766
Denominator	Total number of slum and EWS households in the city	383.83
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**100**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	11158334677736
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**0.4**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	341876.48
Denominator	Total population of the city	847387
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**1.27**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	1077115.056
Denominator	Total population of the city	847387
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**37.13**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	62100000
Denominator	Total area of the city (total area of all land uses)	167230000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	847387
Denominator	Area allocated for residential land use (in hectares)	62100000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a	

	benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**137.96**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	314105
Denominator	Total number of households in the city	227675
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	392566
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**225**
Description	Total number of sustained electrical interruptions in a year	225
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.81**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	25920
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	1.1
Denominator	Total energy consumption from all sources	3722.69
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.22**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	2097289.167
Denominator	Total quantum of water and waste water handled during the period	5040
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.34**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	11810674
Denominator	Total number of street light installations	36800
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	0
Unit	Percentage	

Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	3722.69
Denominator	Total population of the city	847387
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.7**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	239
Denominator	Total area of the city (sq.km)	167.23
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.58**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	493
Denominator	Total population of the city	847387
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	40
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	1411.97
Unit	Percentage	
Benchmark	>=50	

Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	5
Denominator	Total number of major transport interchanges in the city	5
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport[1]**	**To be computed**
Description	Mode share of non-motorised transport	0
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**0.4**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	2
Denominator	Total number of major interchanges in the city	5
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**37.66**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	29
Denominator	Total number of signalised intersections in the city	77
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	0
Denominator	Total available on-street parking spaces in the city	0
Unit		

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**1.37**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	38.74
Denominator	Total length of road network in the city	2823.94
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**74.07**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	20
Denominator	Total number of junctions/ intersections on major roads in the city	27
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**70.19**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	871
Denominator	Total number of public right-of-way areas in the city	1241
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**46.48**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	105828
Denominator	Total number of households in the city	227675
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**129.81**
Formula:	*Numerator / Denominator*	

Numerator	Total quantity of water supplied into the distribution system	110
Denominator	Total population of the city	847387
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	108
Denominator	Total number of samples tested for water quality	394
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**17.45**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	19.2
Denominator	Quantum of water put into the distribution system (mld)	110
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	108445
Denominator	Total number of water connections in the city	108445
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**2.09**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	155
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	7415

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**101.19**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	218863
Denominator	Total number of properties in the city	216282
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**75.15**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	162536
Denominator	Total number of properties in the city	216282
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	58
Denominator	Total waste water generated in the city per day	58
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**103.45**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	60
Denominator	Total waste water received at treatment plants per day	58
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**3.05**
Formula:	*Numerator / Denominator*	

Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	43.12
Denominator	Total length of road network in the city	1411.97
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**93.1**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	231645
Denominator	Total number of households and establishments in the city	248803
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	450
Denominator	Total quantum of MSW generated in the city	450
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**85.16**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	11496.9
Denominator	Average MSW generated in the city (tons per month)	13500
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**12.1**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	12.1
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**19.43**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	19.43
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**87.38**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	87.38
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	0
Denominator	Total number of noise samples	0
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	0
Denominator	Total number of samples tested	0
Unit	Percentage	
Benchmark	100%

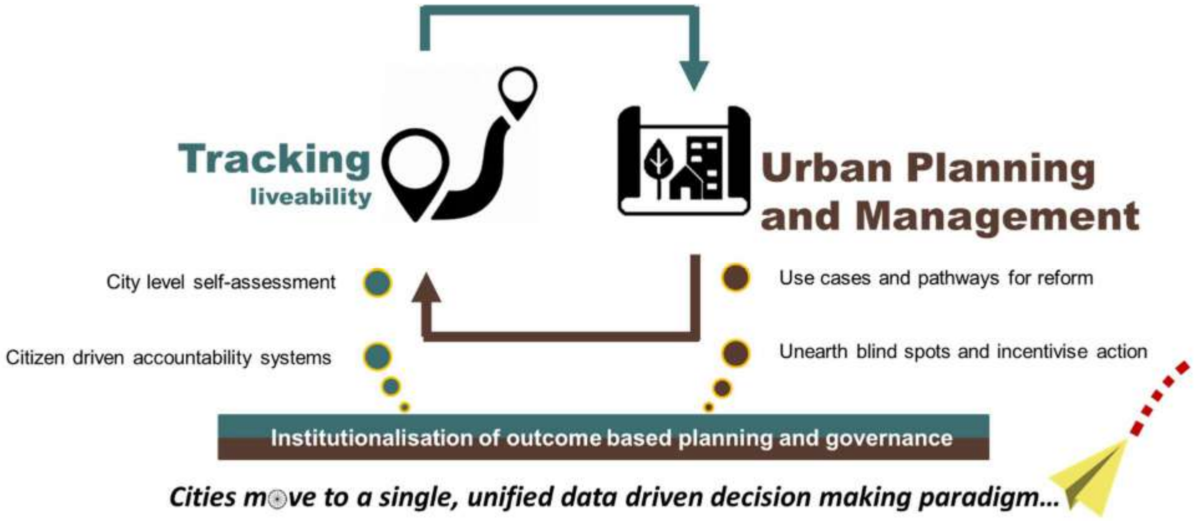
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance

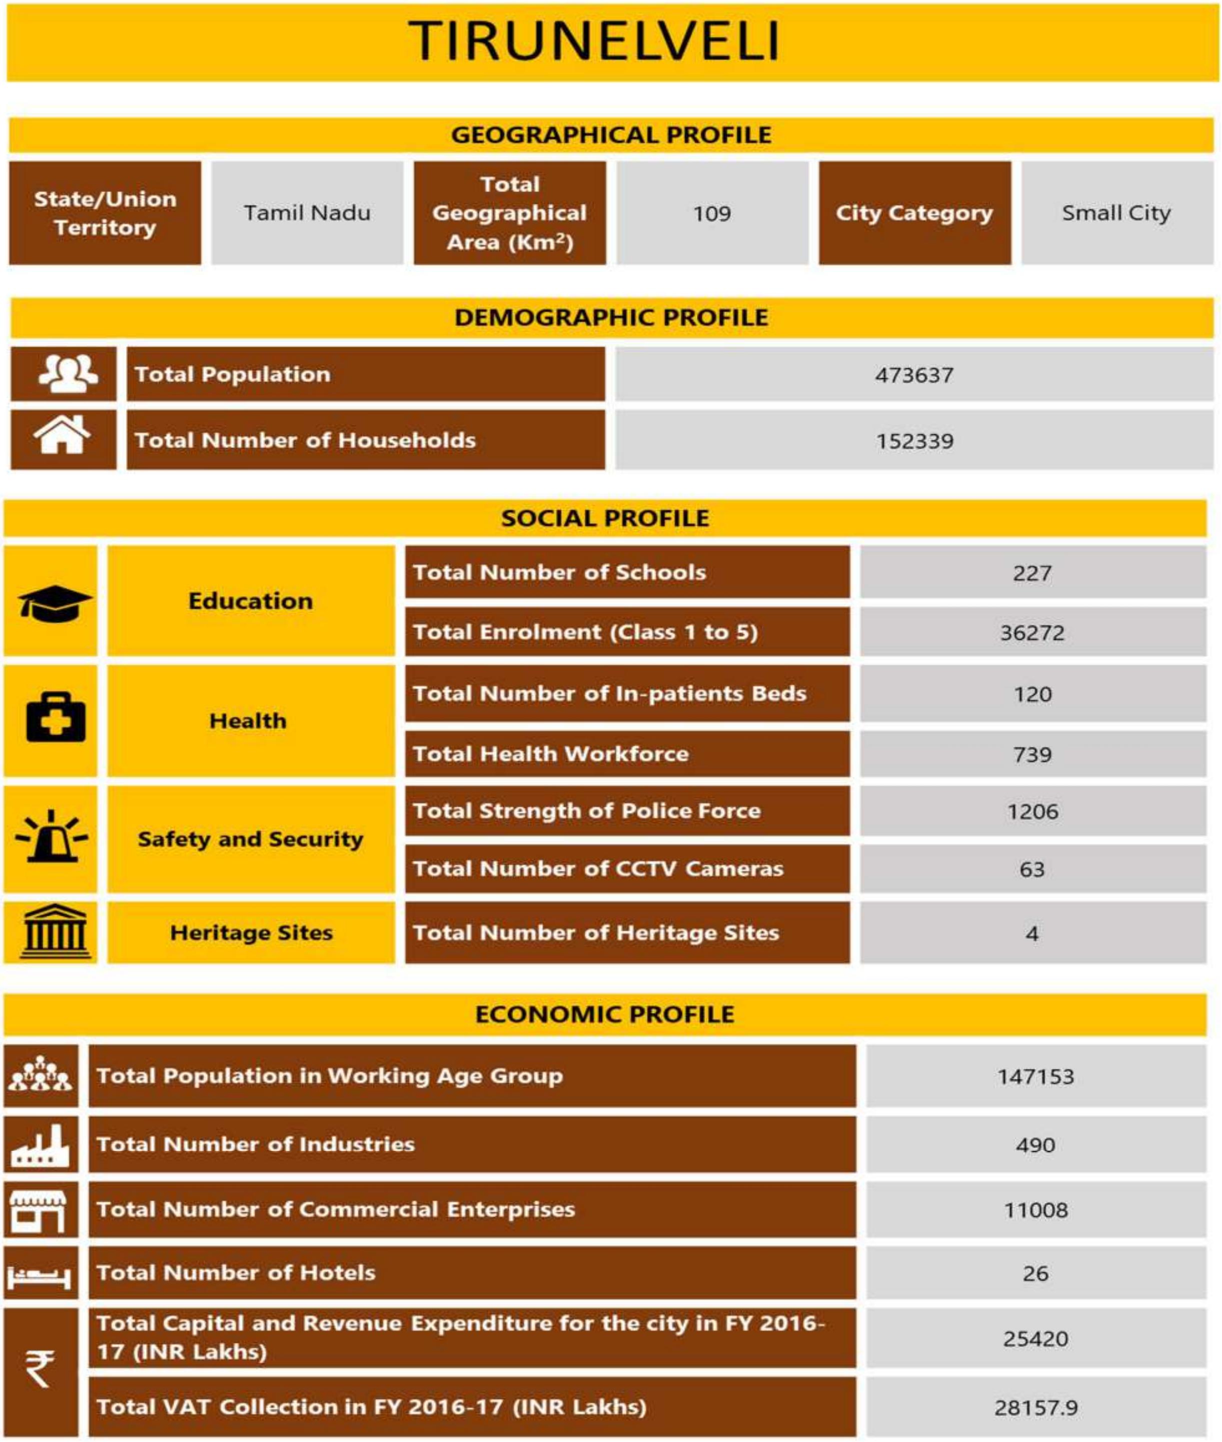
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart

cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



TIRUNELVELI

GEOGRAPHICAL PROFILE

State/Union Territory	Tamil Nadu	Total Geographical Area (Km^2)	109	City Category	Small City

DEMOGRAPHIC PROFILE

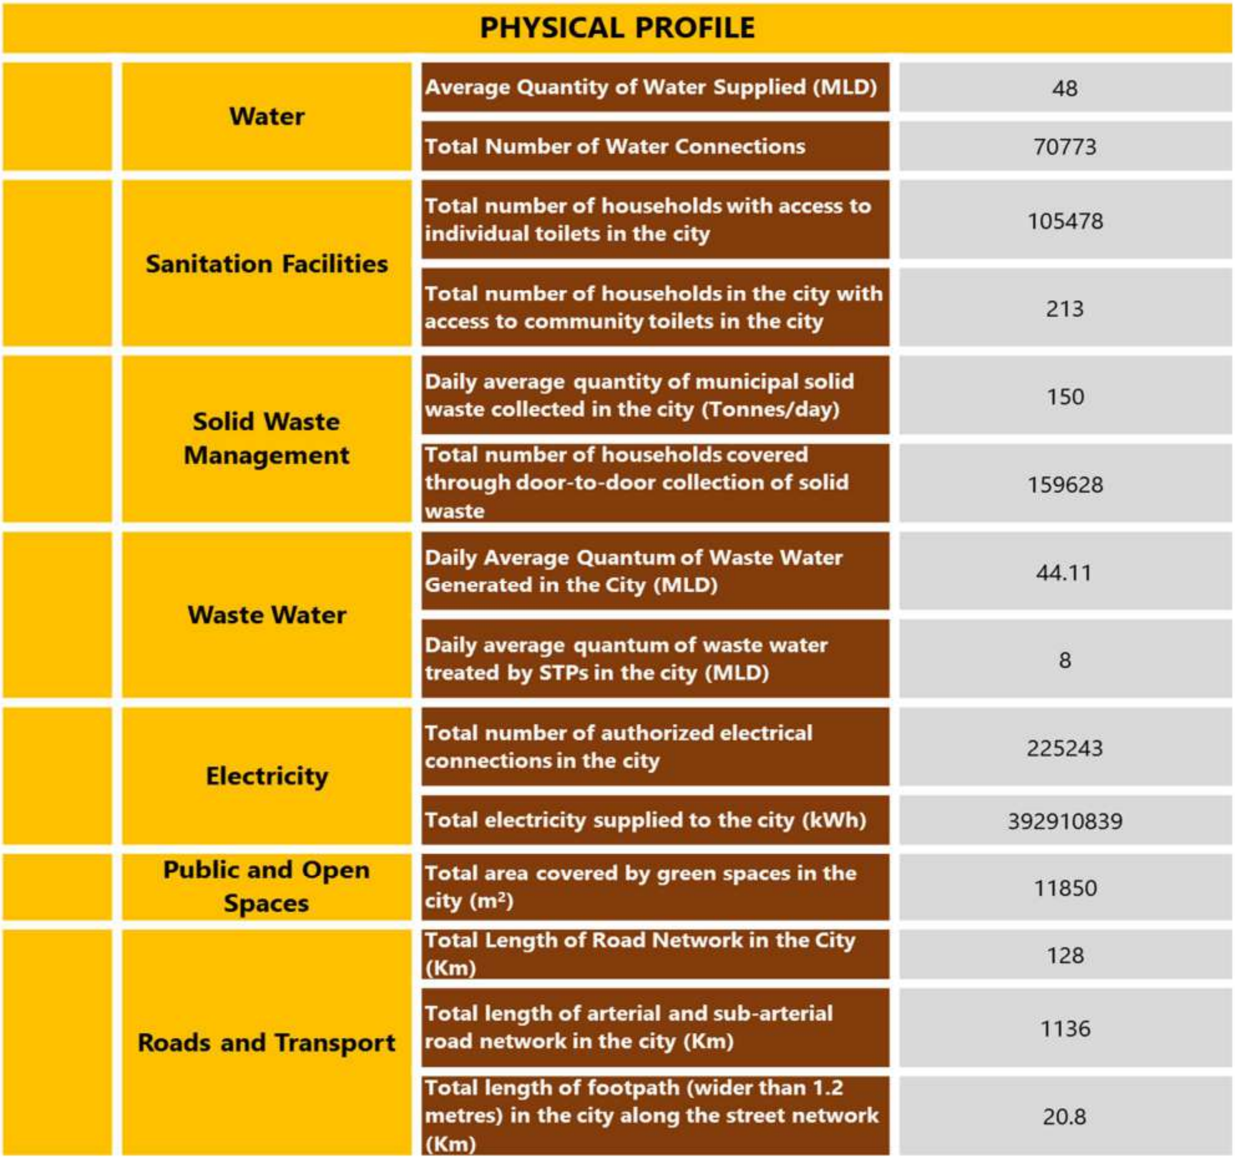
Total Population	473637
Total Number of Households	152339

SOCIAL PROFILE

Education	Total Number of Schools	227
	Total Enrolment (Class 1 to 5)	36272
Health	Total Number of In-patients Beds	120
	Total Health Workforce	739
Safety and Security	Total Strength of Police Force	1206
	Total Number of CCTV Cameras	63
Heritage Sites	Total Number of Heritage Sites	4

ECONOMIC PROFILE

Total Population in Working Age Group	147153
Total Number of Industries	490
Total Number of Commercial Enterprises	11008
Total Number of Hotels	26
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	25420
Total VAT Collection in FY 2016-17 (INR Lakhs)	28157.9



PHYSICAL PROFILE			
	Water	**Average Quantity of Water Supplied (MLD)**	48
		Total Number of Water Connections	70773
	Sanitation Facilities	**Total number of households with access to individual toilets in the city**	105478
		Total number of households in the city with access to community toilets in the city	213
	Solid Waste Management	**Daily average quantity of municipal solid waste collected in the city (Tonnes/day)**	150
		Total number of households covered through door-to-door collection of solid waste	159628
	Waste Water	**Daily Average Quantum of Waste Water Generated in the City (MLD)**	44.11
		Daily average quantum of waste water treated by STPs in the city (MLD)	8
	Electricity	**Total number of authorized electrical connections in the city**	225243
		Total electricity supplied to the city (kWh)	392910839
	Public and Open Spaces	**Total area covered by green spaces in the city (m^2)**	11850
	Roads and Transport	**Total Length of Road Network in the City (Km)**	128
		Total length of arterial and sub-arterial road network in the city (Km)	1136
		Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	20.8

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various ‘Category Sub-Indexes’ and a composite ‘City Liveability Index’ will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education

Pillars of Comprehensive Development	Category	Indicators
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use	9.1 Share of mixed land use area in overall city land use

Pillars of Comprehensive Development	Category	Indicators
	and Compactness	9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m

Pillars of Comprehensive Development	Category	Indicators
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections 12.2 Per capita supply of water 12.3 Quality of water supplied 12.4 Level of non-revenue water – NRW 12.5 Percentage of water connections covered through meters 12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets 13.2 Coverage of sewerage network and/or septage 13.3 Collection efficiency of sewerage network 13.4 Extent of reuse and recycling of waste water 13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection 14.2 Efficiency of collection of municipal solid waste 14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution 15.2 Concentration of NO2- air pollution 15.3 Concentration of PM10 - air pollution 15.4 Level of noise pollution

Pillars of Comprehensive Development	Category	Indicators
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

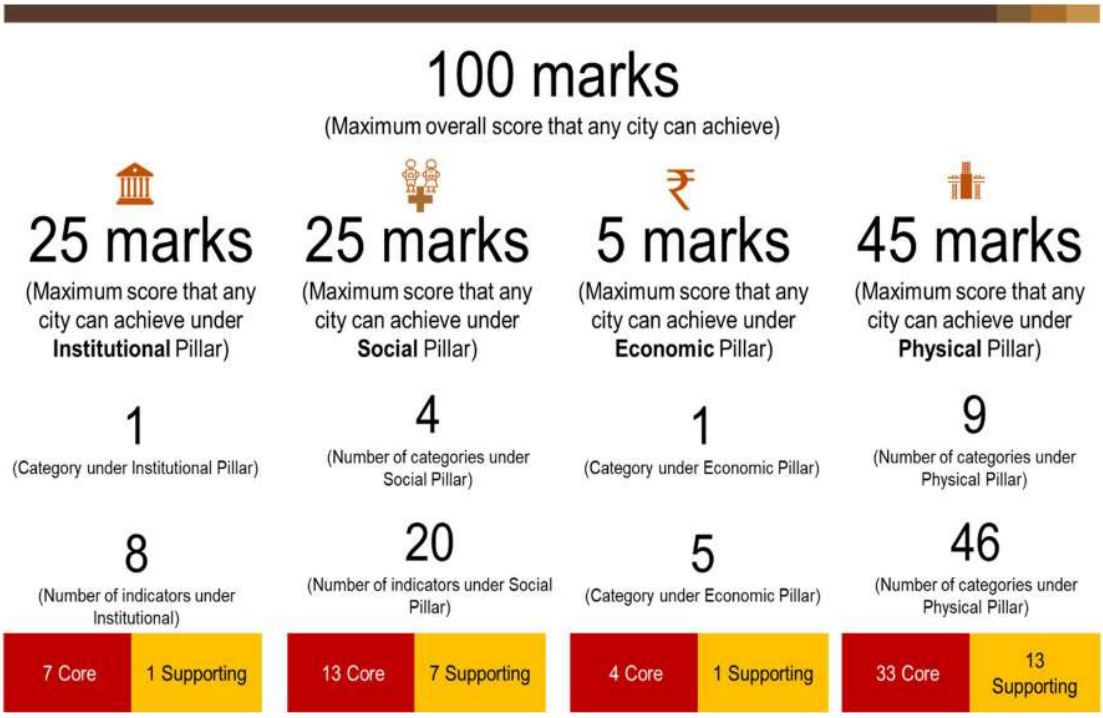
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks
(Maximum overall score that any city can achieve)
25 marks
(Maximum score that any city can achieve under Institutional Pillar)
25 marks
(Maximum score that any city can achieve under Social Pillar)
5 marks
(Maximum score that any city can achieve under Economic Pillar)
45 marks
(Maximum score that any city can achieve under Physical Pillar)
1
(Category under Institutional Pillar)
4
(Number of categories under Social Pillar)
1
(Category under Economic Pillar)
9
(Number of categories under Physical Pillar)
8
(Number of indicators under Institutional)
20
(Number of indicators under Social Pillar)
5
(Category under Economic Pillar)
46
(Number of categories under Physical Pillar)
7 Core
1 Supporting
13 Core
7 Supporting
4 Core
1 Supporting
33 Core
13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring. The list of benchmarks is presented in Annexure 1.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	ULB – Account section
Urban Local Body	For Park and Recreation Related Questions	Town and country Planning Department
Urban Local Body	For Water Supply and Drainage related questions	ULB – Development Authority – Engineering
Urban Local Body	For Heritage sites related data	ULB – Development Authority - Engineering
Urban Local Body	For Ecological sites related data	ULB – Development Authority - Engineering
Urban Local Body	For Housing related data	Town and Country Planning Department
Urban Local Body	For Building plan related data	Town and Country Planning Department
Urban Local Body	For Roads related data	ULB – Development Authority Department

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Solid waste management related data	ULB – Health Department
Urban Local Body	For IT services related data	ULB – Information technical section
Urban Local Body	For Vendor committee related data	ULB – Health Department
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	Tourism Department, revenue department
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	State pollution control Board – Tirunelveli District Sipco - pettai
Development Authority	Building Infrastructure	ULB – Development Authority - Engineering
	Construction planning	Town and country planning Department
	Green Building	Town and country planning department
	Rain water harvesting	Town and country planning Department
	Universal Design Principle	Health Department
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Tamilnadu Electricity Board
State Disaster management authority		Central command control center – Disaster Management – Revenue department – Collector office
State Education Department		Chief Educational Officer - Tirunelveli
State Health Department	Health care professionals	ULB – Health Department
	Citizen Services	ULB – Health Department
	Disease Prevalence	Joint Director of Health Services through ULB Health Department
	Health Infrastructure	Joint Director of Health Services through ULB Health Department
State Renewable Energy Development Agency		Tamilnadu Electricity Board - Tirunelveli
State Sales / Commercial Taxes Department		District sales / commercial Tax office – deputy commissioner - Tirunelveli
Town and Country Planning Department	Land Use	Town and country Planning Department
Traffic and Police Department		City police commissioner office –Traffic and Crime – police Department

Designated data owners	Subcategories	Data owners at city level
Transport Authorities	Buses	Tamilnadu state transport corporation
	Registered Vehicles	Regional Transporting Office - Tirunelveli
	Sub urban rail transport	Not applicable
	Mono Rail Authority	Not applicable
	Tramways	Not applicable
	Marine Transport Authority	Not applicable

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 73 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of secondary documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	**2**
State Education Department	**1**
DISCOM/Electricity Department	**5**
Traffic and Police Department	**6**
Development Authority	**4**
Pollution Control Board	**4**
State Renewable Energy Department	**1**
Town and Country Planning	**2**
State Health Department	**7**
Transport Authority	**6**
Disaster Management	**1**
Urban Local Body	**34**
Total	**73***

* The count of documents is based on first round of submission.

Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

- 1.2 | Percentage of services integrated through Command Centre
- 2.3 | Hotel occupancy
- 3.4 | Percentage of schools with access to digital education
- 5.1 | Number of streets, public places, junctions covered through surveillance systems
- 6.5 | Percentage of vendors registered and provided formal spaces
- 11.7 | Availability of Passenger Information System
- 11.11 | Percentage of traffic intersections with pedestrian crossing facilities
- 11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

- 6.4 | Unemployment Rate
- 11.3 | Mode share of public transport
- 11.5 | Mode share of Non Motorized Transport
- 12.3 | Quality of Water Supplied
- 15.4 | Level of Noise Pollution

4.4 Physical Audit

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**2.01**
Description		
Sub Indicators	1.3a Building plan	0
	1.3b Birth/Death Certificate	0.000167322

	1.3c water supply	0
	1.3d solid waste management	0
	1.3e property tax	0.152153596
	1.3f professional tax (RC)	0.02316108
	1.3g professional tax (EC)	0.024583069
	1.3h complaints/ grievance redressal	0
	1.3i information	2.74472E-05
	1.3j electricity	0.000554956
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**123.64**
Description		
Sub Indicators	1.4a water supply	1
	1.4b solid waste	0
	1.4c street lights	0
	1.4d sewerage	1
	1.4e professional tax	0.5
	1.4f parks and recreational spaces	0
	1.4g building plan	863
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**68.79**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	1913
Denominator	Total demand raised for the year	2781
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**462.86**
Formula:	*Numerator / Denominator*	

Numerator	Total collection of user charges in water supply in a year	1458
Denominator	Total O&M cost for providing water supply services during the year	315
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**15.07**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	8964
Denominator	Total expenditure (revenue and capital accounts) in the same year	59495
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**98.18**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	54
Denominator	Total number of wards	55
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**300**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	3
Denominator	Total number of historic buildings/sites identified	1
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**158.33**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	19
Denominator	Total number of ecologically important sites identified in the city	12
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**52.29**
Description	Average Occupancy rate of Hotels	52.28571429
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	0
Denominator	Total budget of the ULB (capital and revenue)	25420
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**0**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	0
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**83.6**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	63515
Denominator	Total population in the age group of 6-14 years	75978
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**83.6**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	31024
Denominator	Total female population in the age group of 6-14 years	37109
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**21.65**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	36272
Denominator	Total number of teachers available for primary grades (public and private schools)	1675
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**22.47**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	51
Denominator	Total number of schools	227
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**74.26**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	74.25619334
Numerator	Percentage	

Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**122.1**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	83216047
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**2.53**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	120
Denominator	Total population of the city	473637
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**15.6**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	739
Denominator	Total population of the city	473637
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**10**
Description	Total response time for health-related distress calls received in the city	10
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.16**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	771
Denominator	Total population of the city	473637
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases	

	(amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.08**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	386
Denominator	Total population of the city	473637
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**49.22**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	63
Denominator	Total length of road network in the city	128
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**902.17**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	4273
Denominator	Total population of the city	473637
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**6.23**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	266
Denominator	Total crimes recorded in the same year	4273
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size	

	classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**17.95**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	85
Denominator	Total population of the city	473637
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**-6.31**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	-1896.32
Denominator	Total VAT/GST collection during preceding year	300.5422
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**6.05**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	19
Denominator	Total Professional Tax collection during preceding year	314
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**-30.63**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	-524
Denominator	Number of construction permits during preceding year	17.11
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	340266
Denominator	Total labour force in the city	75978
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**21.06**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	400
Denominator	Total number of vendors in the city	1899.45
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**74.82**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	5670
Denominator	Total number of slum and EWS households in the city	75.78
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**0.03**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	742023660
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**0.03**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	11850
Denominator	Total population of the city	473637
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**0.05**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	26000
Denominator	Total population of the city	473637
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**0.04**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	43460
Denominator	Total area of the city (total area of all land uses)	109000000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**7.93**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	473637
Denominator	Area allocated for residential land use (in hectares)	59757
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a	

	benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**147.86**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	225243
Denominator	Total number of households in the city	152339
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	225243
Denominator	Total number of electricity connections in the city	225243
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**12**
Description	Total number of sustained electrical interruptions in a year	12
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.81**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	0
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	247
Denominator	Total energy consumption from all sources	392910839
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.31**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	1015191.583
Denominator	Total quantum of water and waste water handled during the period	1680
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.34**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	10747465
Denominator	Total number of street light installations	25243
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	6692
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	5353
Unit	Percentage	

Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.78**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	392910839
Denominator	Total population of the city	473637
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.64**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	17511
Denominator	Total area of the city (sq.km)	109
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.43**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	202
Denominator	Total population of the city	473637
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	0
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	128
Unit	Percentage	
Benchmark	>=50	

Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	NA
Denominator	Total number of major transport interchanges in the city	3
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	0
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**Non-Computable**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	NA
Denominator	Total number of major interchanges in the city	3
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	0
Denominator	Total number of signalised intersections in the city	4
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	2
Denominator	Total available on-street parking spaces in the city	2

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**8.13**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	20.8
Denominator	Total length of road network in the city	256
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**39.74**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	31
Denominator	Total number of junctions/ intersections on major roads in the city	78
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**79.17**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	475
Denominator	Total number of public right-of-way areas in the city	600
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**46.46**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	70773
Denominator	Total number of households in the city	152339
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**101.34**

Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	48
Denominator	Total population of the city	473637
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	48
Denominator	Total number of samples tested for water quality	48
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**1.83**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	0.88
Denominator	Quantum of water put into the distribution system (mld)	48
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	70773
Denominator	Total number of water connections in the city	70773
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**102.93**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	1123

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	1091
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**74.7**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	112024
Denominator	Total number of properties in the city	149974
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**185.28**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	277866
Denominator	Total number of properties in the city	149974
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**24.94**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	11
Denominator	Total waste water generated in the city per day	44.11
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	8
Denominator	Total waste water received at treatment plants per day	8
Unit	Percentage	

Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**211.12**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	270.23
Denominator	Total length of road network in the city	128
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**105.08**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	171643
Denominator	Total number of households and establishments in the city	163347
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	150
Denominator	Total quantum of MSW generated in the city	150
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**51**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	2295
Denominator	Average MSW generated in the city (tons per month)	4500
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**Non=Computable**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	Data Unavailable
Unit	μg/m3	
Benchmark	Annual mean concentration of 50 μg/m3 OR Mean concentration over 24 hours of 80 μg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**Non=Computable**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	Data Unavailable
Unit	μg/m3	
Benchmark	Annual mean concentration of 40 μg/m3 OR Mean concentration over 24 hours of 80 μg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**0**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	0
Unit	μg/m3	
Benchmark	Annual mean concentration of 60 μg/m3 OR Mean concentration over 24 hours of 100 μg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	0
Denominator	Total number of noise samples	0
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	12
Denominator	Total number of samples tested	12
Unit	Percentage	
Benchmark	100%

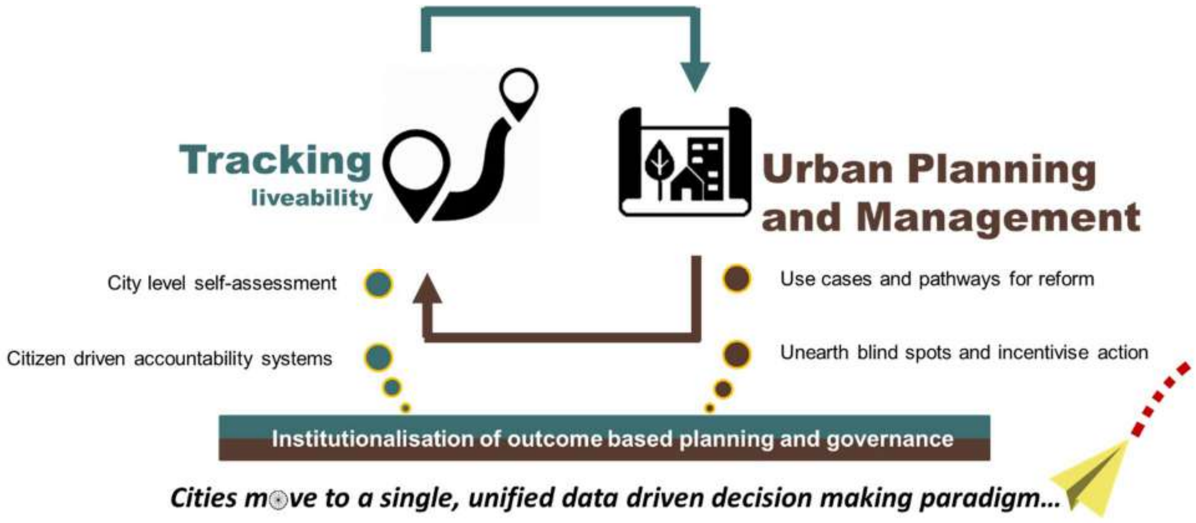
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

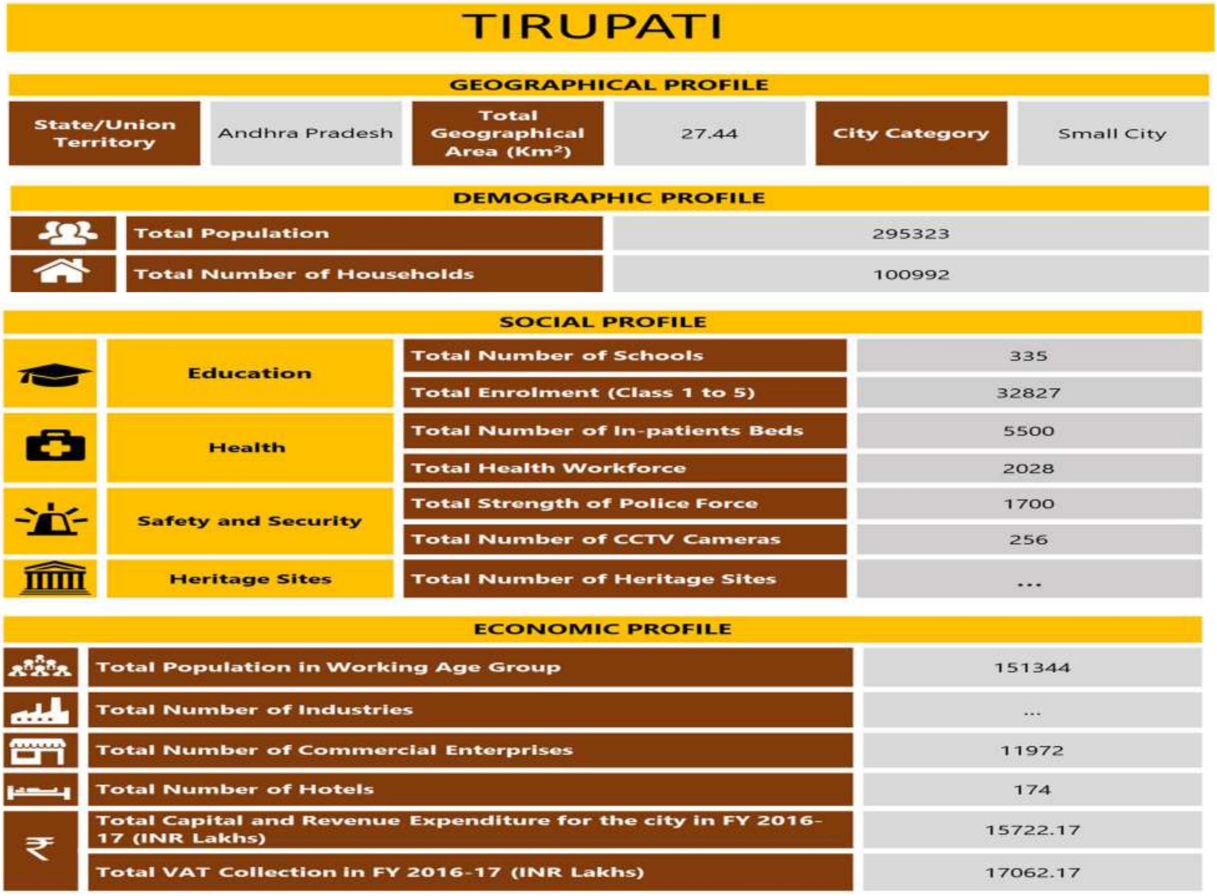


Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



TIRUPATI

GEOGRAPHICAL PROFILE

State/Union Territory	Andhra Pradesh	Total Geographical Area (Km²)	27.44	City Category	Small City

DEMOGRAPHIC PROFILE

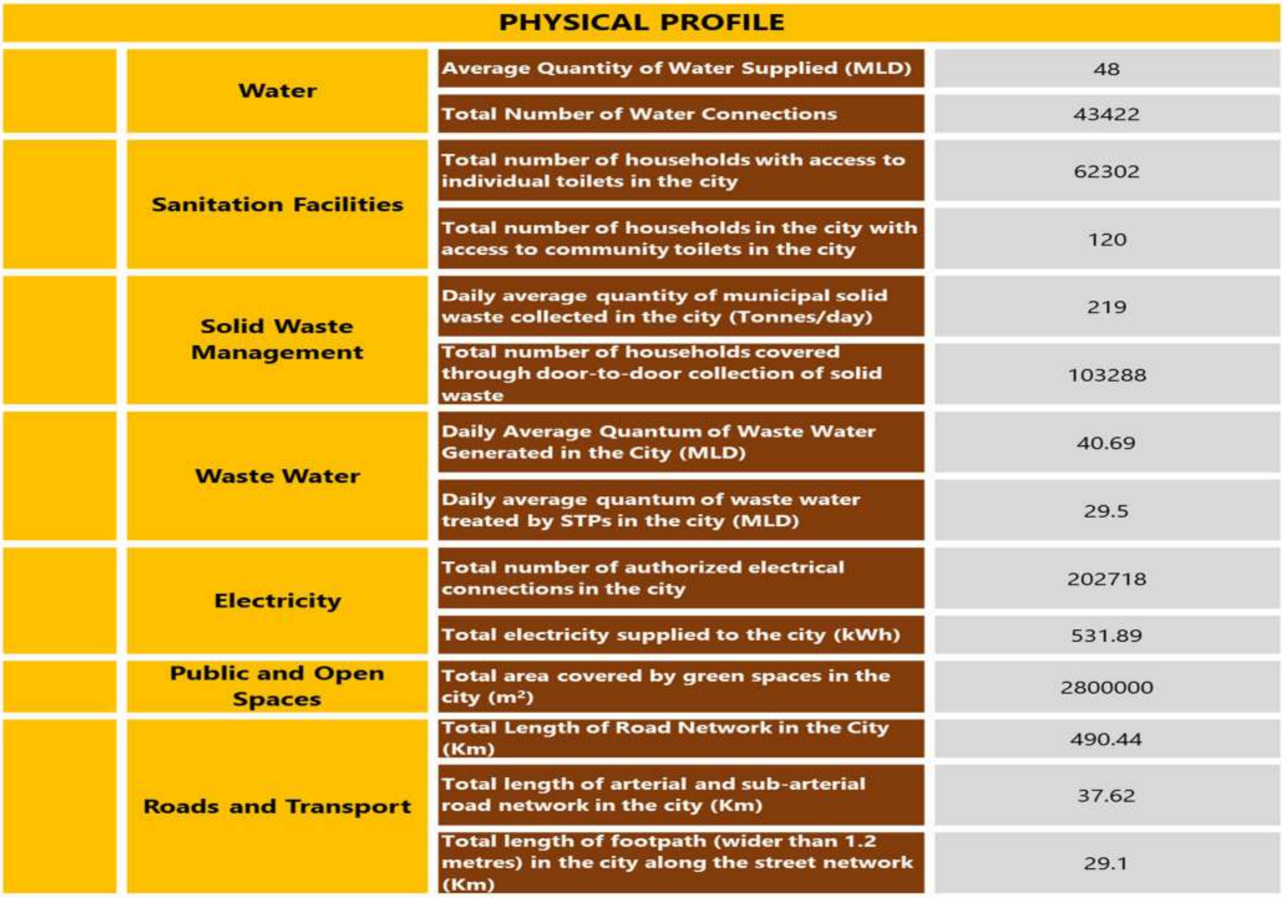
Total Population	295323
Total Number of Households	100992

SOCIAL PROFILE

Education	Total Number of Schools	335
	Total Enrolment (Class 1 to 5)	32827
Health	Total Number of In-patients Beds	5500
	Total Health Workforce	2028
Safety and Security	Total Strength of Police Force	1700
	Total Number of CCTV Cameras	256
Heritage Sites	Total Number of Heritage Sites	...

ECONOMIC PROFILE

Total Population in Working Age Group	151344
Total Number of Industries	...
Total Number of Commercial Enterprises	11972
Total Number of Hotels	174
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	15722.17
Total VAT Collection in FY 2016-17 (INR Lakhs)	17062.17



PHYSICAL PROFILE			
	Water	Average Quantity of Water Supplied (MLD)	48
		Total Number of Water Connections	43422
	Sanitation Facilities	Total number of households with access to individual toilets in the city	62302
		Total number of households in the city with access to community toilets in the city	120
	Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	219
		Total number of households covered through door-to-door collection of solid waste	103288
	Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	40.69
		Daily average quantum of waste water treated by STPs in the city (MLD)	29.5
	Electricity	Total number of authorized electrical connections in the city	202718
		Total electricity supplied to the city (kWh)	531.89
	Public and Open Spaces	Total area covered by green spaces in the city (m^2)	2800000
	Roads and Transport	Total Length of Road Network in the City (Km)	490.44
		Total length of arterial and sub-arterial road network in the city (Km)	37.62
		Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	29.1

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various ‘Category Sub-Indexes’ and a composite ‘City Liveability Index’ will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies

Pillars of Comprehensive Development	Category	Indicators
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport

Pillars of Comprehensive Development	Category	Indicators
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

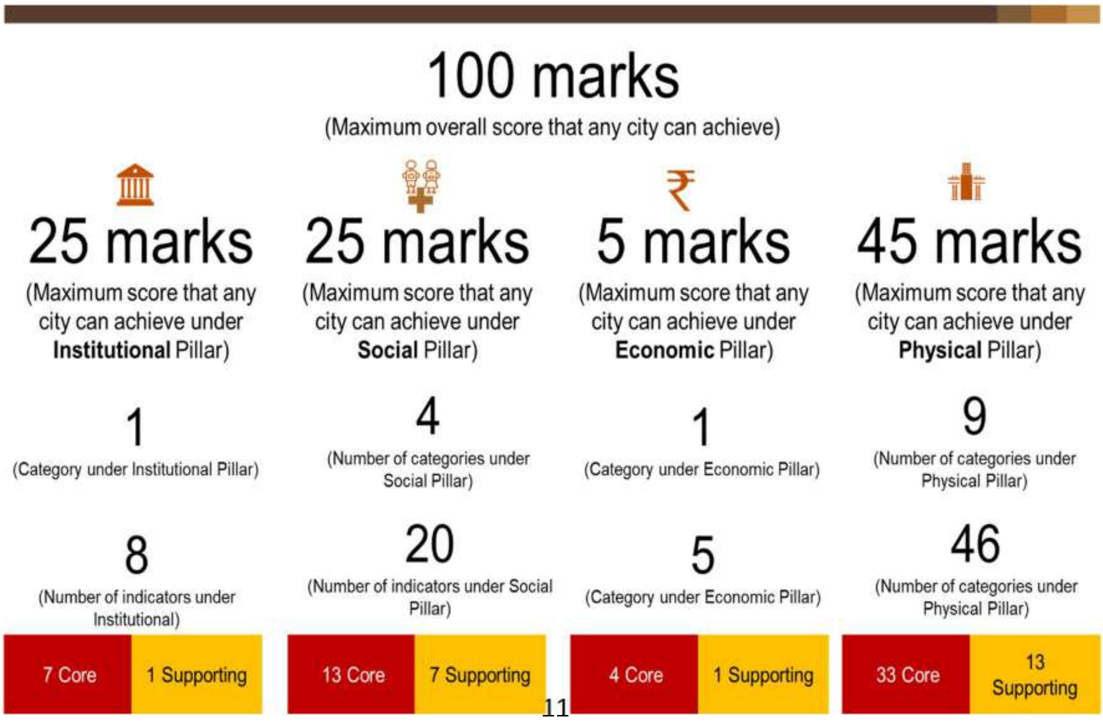
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks

(Maximum overall score that any city can achieve)

Institutional	Social	Economic	Physical
25 marks (Maximum score that any city can achieve under **Institutional** Pillar)	25 marks (Maximum score that any city can achieve under **Social** Pillar)	5 marks (Maximum score that any city can achieve under **Economic** Pillar)	45 marks (Maximum score that any city can achieve under **Physical** Pillar)
1 (Category under Institutional Pillar)	4 (Number of categories under Social Pillar)	1 (Category under Economic Pillar)	9 (Number of categories under Physical Pillar)
8 (Number of indicators under Institutional)	20 (Number of indicators under Social Pillar)	5 (Category under Economic Pillar)	46 (Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to "maximum within the comparison group" or "absolute benchmarks". For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring. The list of benchmarks is presented in Annexure 1.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry.

The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Account Section
Urban Local Body	For Park and Recreation Related Questions	Deputy Engineer zone 5 section
Urban Local Body	For Water Supply and Drainage related questions	Deputy Executive Engineer zone 4 section
Urban Local Body	For Heritage sites related data	Assistant City Planner -1
Urban Local Body	For Ecological sites related data	Municipal Engineer zone 4 section
Urban Local Body	For Housing related data	Housing Section
Urban Local Body	For Building plan related data	Town Planning section
Urban Local Body	For Roads related data	Asst Engineer section
Urban Local Body	For Solid waste management related data	Deputy Executive Engineer zone 4 section
Urban Local Body	For IT services related data	VOICE section
Urban Local Body	For Vendor committee related data	UCD Section
Urban Local Body	Any other departments involved in providing data for questions mentioned	Heads of the Departments

Designated data owners	Subcategories	Data owners at city level
	under Urban Local Body	
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Pollution Control Board
Development Authority	Building Infrastructure	Tirupati Urban Development Authority Planning section
	Construction planning	Tirupati Urban Development Authority Planning section
	Green Building	Tirupati Urban Development Authority Planning section
	Rain water harvesting	Tirupati Urban Development Authority Planning section
	Universal Design Principle	Tirupati Urban Development Authority Planning section
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Southern power/DISCOM, Tirupati
State Disaster management authority		District Disaster Management Authority
State Education Department		Mandal Education Officer (Urban)
State Health Department	Health care professionals	Medical Health Officer
	Citizen Services	Medical Health Officer
	Disease Prevalence	Medical Health Officer
	Health Infrastructure	Medical Health Officer
State Renewable Energy Development Agency	Renewable Energy	Non-Conventional Energy Development Corporation of Andhra Pradesh
State Sales / Commercial Taxes Department		Commercial Tax
Town and Country Planning Department	Land Use	Planning section
Traffic and Police Department		Deputy Superintendent of Police
Transport Authorities	Buses	District Transport Dept-APSRTC
	Registered Vehicles	District Transport
	Sub urban rail transport	No
	Mono Rail Authority	No
	Tramways	No
	Marine Transport Authority	No

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 92 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	**1**
State Education Department	**5**
DISCOM/Electricity Department	**6**
Traffic and Police Department	**20**
Development Authority	**1**
Pollution Control Board	**7**
State Renewable Energy Department	**2**
Town and Country Planning	**1**
State Health Department	**2**
Transport Authority	**2**
Disaster Management	**0**
Urban Local Body	**45**
Total	**92***

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

- 1.2 | Percentage of services integrated through Command Centre
- 2.3 | Hotel occupancy
- 3.4 | Percentage of schools with access to digital education
- **5.1** | Number of streets, public places, junctions covered through surveillance systems
- 6.5 | Percentage of vendors registered and provided formal spaces
- 11.7 | Availability of Passenger Information System
- 11.11 | Percentage of traffic intersections with pedestrian crossing facilities
- 11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

- 6.4 | Unemployment Rate
- 11.3 | Mode share of public transport
- 11.5 | Mode share of Non Motorized Transport
- 12.3 | Quality of Water Supplied
- 15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5 Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**80.92**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	0.75
	1.1b death certificate	0.75
	1.1c trade license	1
	1.1d solid waste management	0.5
	1.1e water supply	1
	1.1f sewerage/drainage	1
	1.1g fogging	0
	1.1h property tax	1
	1.1i professional tax	0.75

Sub Indicators	1.4a water supply	0
	1.4b solid waste	0
	1.4c street lights	0
	1.4d sewerage	0.5
	1.4e professional tax	6
	1.4f parks and recreational spaces	0
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**98.2**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	4102.14
Denominator	Total demand raised for the year	4177.39
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**5.7**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	114.35
Denominator	Total O&M cost for providing water supply services during the year	2005.33
Unit	Percentage	
Benchmark	100%	

Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**2575.56**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	-17571.23
Denominator	Total expenditure (revenue and capital accounts) in the same year	-682.23
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	50
Denominator	Total number of wards	50
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	4
Denominator	Total number of historic buildings/sites identified	4
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**60**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	3
Denominator	Total number of ecologically important sites identified in the city	5
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**25.71**
Description	Average Occupancy rate of Hotels	25.71428571
Unit	Percentage	

Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0.09**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	13.64
Denominator	Total budget of the ULB (capital and revenue)	15722.17
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**244**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	244
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**118.19**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	54061
Denominator	Total population in the age group of 6-14 years	45740
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**110.81**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	24200
Denominator	Total female population in the age group of 6-14 years	21839
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**48.42**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	32827
Denominator	Total number of teachers available for primary grades (public and private schools)	678

Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**67.16**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	225
Denominator	Total number of schools	335
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**162.1**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	162.1007524
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**121.72**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	51246381
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**186.24**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	5500
Denominator	Total population of the city	295323
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**68.67**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	2028
Denominator	Total population of the city	295323
Unit	Number per 10,000 population	

Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**0**
Description	Total response time for health-related distress calls received in the city	0
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.15**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	430
Denominator	Total population of the city	295323
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.13**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	371
Denominator	Total population of the city	295323
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**52.2**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	256
Denominator	Total length of road network in the city	490.44
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**515.37**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	1522
Denominator	Total population of the city	295323
Unit	Crimes per lakh	

Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**16.29**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	248
Denominator	Total crimes recorded in the same year	1522
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**16.93**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	50
Denominator	Total population of the city	295323
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**32.42**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	4177.55
Denominator	Total VAT/GST collection during preceding year	128.8462
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**5.14**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	28.2
Denominator	Total Professional Tax collection during preceding year	548.94
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 6.3	**Increase in issuance of Construction Permits**	**39.45**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	144
Denominator	Number of construction permits during preceding year	3.65
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	Data Unavailable
Denominator	Total labour force in the city	45740
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	0
Denominator	Total number of vendors in the city	1318
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**2.6**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	1039
Denominator	Total number of slum and EWS households in the city	399.81
Unit	Percentage	
Benchmark	100%	

Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**1.43**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	190600867080
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**9.48**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	2800000
Denominator	Total population of the city	295323
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**2.68**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	791245
Denominator	Total population of the city	295323
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	0
Denominator	Total area of the city (total area of all land uses)	27440000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.02**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	295323

Denominator	Area allocated for residential land use (in hectares)	13276000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**169.06**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	170740
Denominator	Total number of households in the city	100992
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	202718
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**6713**
Description	Total number of sustained electrical interruptions in a year	6713
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.79**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	15029
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable**	**0.81**

	sources	
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	6346
Denominator	Total energy consumption from all sources	531.89
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.31**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	1256252.083
Denominator	Total quantum of water and waste water handled during the period	2325
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.34**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	2449865
Denominator	Total number of street light installations	10703
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	398250
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	531.89
Denominator	Total population of the city	295323
Unit	kWh per capita	

Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.58**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	25
Denominator	Total area of the city (sq.km)	27.44
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.8**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	237
Denominator	Total population of the city	295323
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	27
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	490.44
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	3
Denominator	Total number of major transport interchanges in the city	3
Unit	Percentage	

Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	0.5
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**18.33**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	55
Denominator	Total number of major interchanges in the city	3
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	0
Denominator	Total number of signalised intersections in the city	24
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**66.87**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	81.25
Denominator	Total available on-street parking spaces in the city	121.5
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**2.97**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	29.1
Denominator	Total length of road network in the city	980.88
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**112.5**
Formula:	*Numerator / Denominator*	

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Numerator	Total number of intersections with pedestrian crossing facilities on major roads	36
Denominator	Total number of junctions/ intersections on major roads in the city	32
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**4.9**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	51
Denominator	Total number of public right-of-way areas in the city	1041
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**38.97**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	39352
Denominator	Total number of households in the city	100992
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**162.53**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	48
Denominator	Total population of the city	295323
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	22307
Denominator	Total number of samples tested for water quality	22418
Unit	Percentage	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**27.54**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	13.22
Denominator	Quantum of water put into the distribution system (mld)	48
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**5.28**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	2291
Denominator	Total number of water connections in the city	43422
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**436.74**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	3031
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	694
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**105.62**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	68632
Denominator	Total number of properties in the city	64981
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**96.85**
Formula:	*Numerator / Denominator*	

Numerator	Total number of properties with connection to waste water management systems	62934
Denominator	Total number of properties in the city	64981
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**72.5**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	29.5
Denominator	Total waste water generated in the city per day	40.69
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	29.5
Denominator	Total waste water received at treatment plants per day	29.5
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**8.11**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	39.77
Denominator	Total length of road network in the city	490.44
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**100.83**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	113907
Denominator	Total number of households and establishments in the city	112964
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private	219

	operator	
Denominator	Total quantum of MSW generated in the city	219
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**124.2**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	8160
Denominator	Average MSW generated in the city (tons per month)	6570
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**5.1**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	5.1
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**12**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	12
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**61.9**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	61.9
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	80
Denominator	Total number of noise samples	80
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**Non-Computable**

Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	0
Denominator	Total number of samples tested	0
Unit	Percentage	
Benchmark	100%	

LIVEABILITY ASSESSMENT

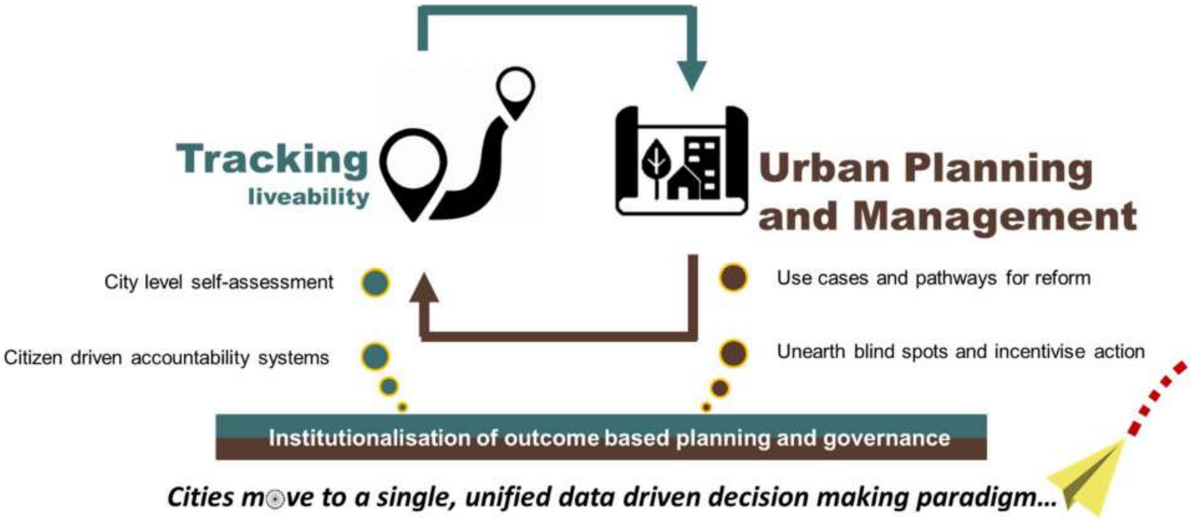
Table 5: Details of Indicator Values 21

1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



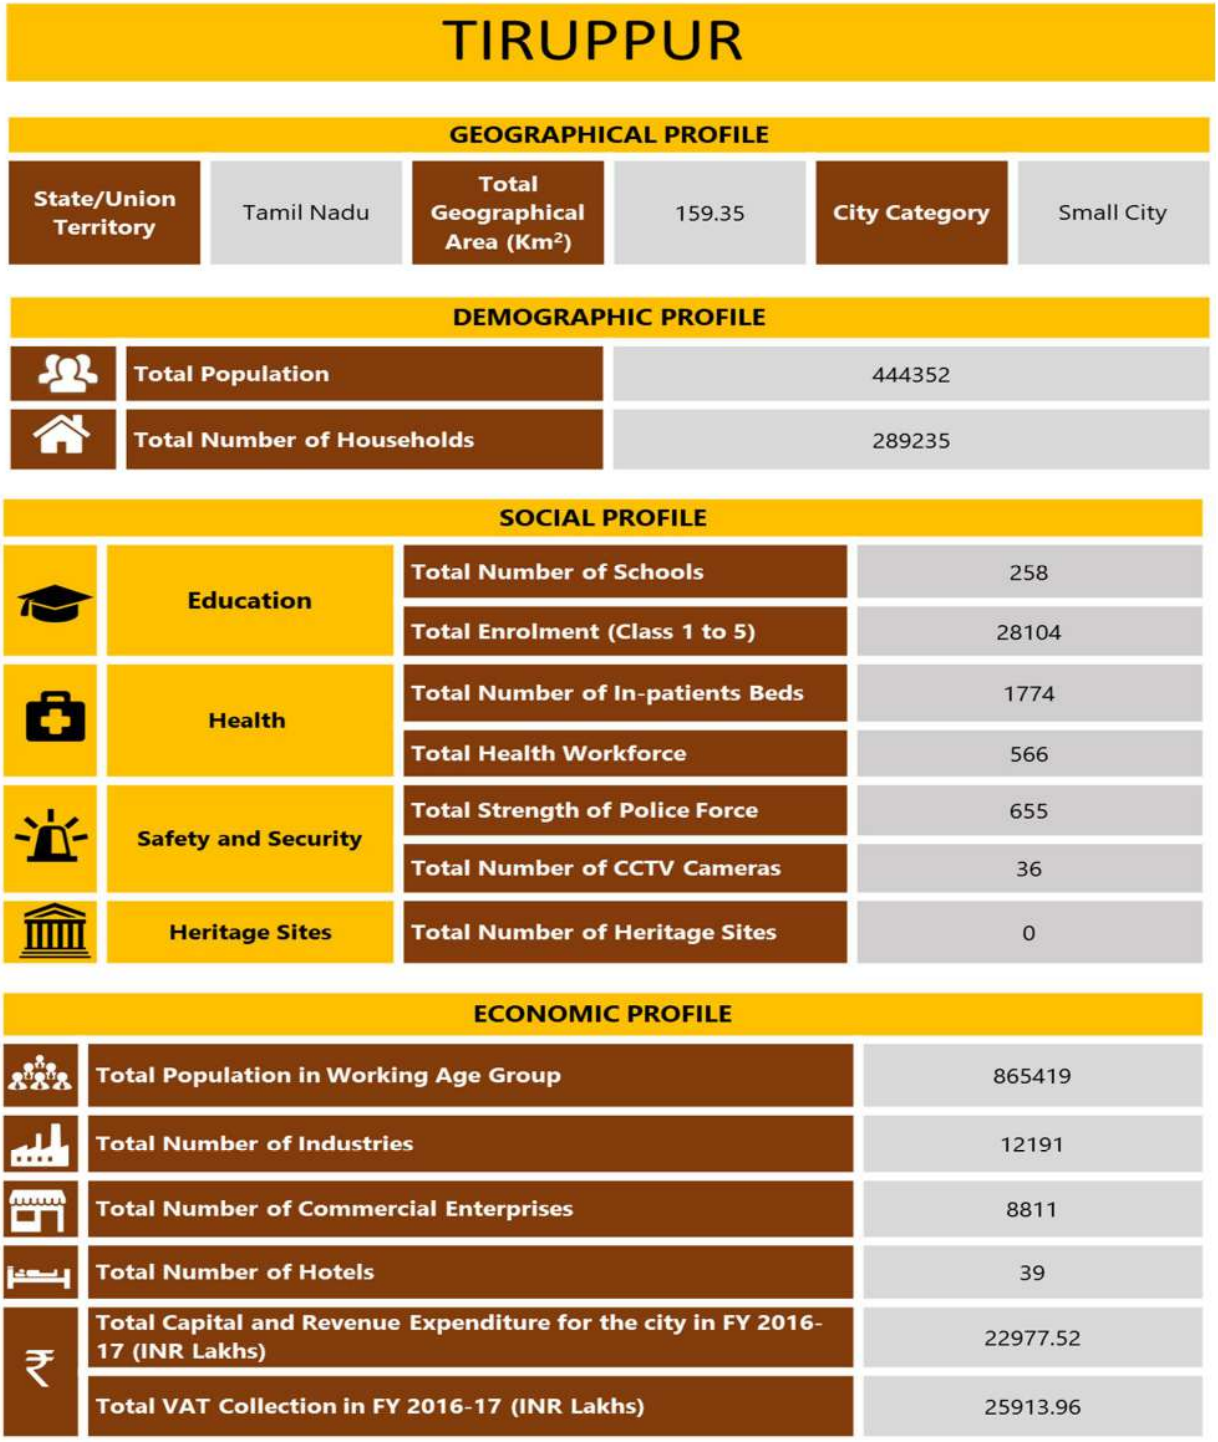
Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart

cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



TIRUPPUR

GEOGRAPHICAL PROFILE

State/Union Territory	Tamil Nadu	**Total Geographical Area (Km²)**	159.35	**City Category**	Small City

DEMOGRAPHIC PROFILE

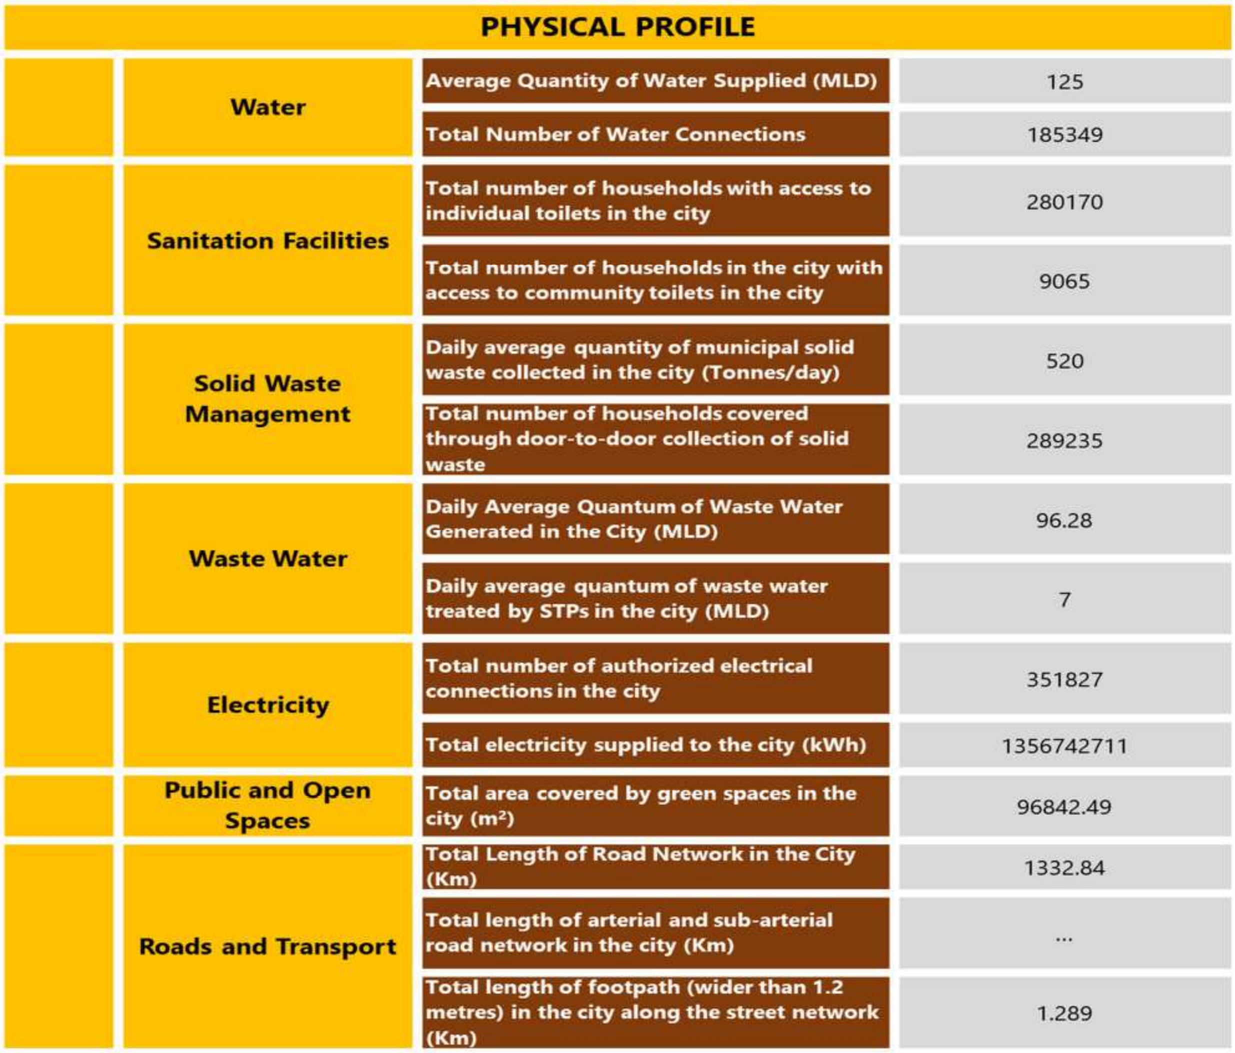
Total Population	444352
Total Number of Households	289235

SOCIAL PROFILE

Education	**Total Number of Schools**	258
	Total Enrolment (Class 1 to 5)	28104
Health	**Total Number of In-patients Beds**	1774
	Total Health Workforce	566
Safety and Security	**Total Strength of Police Force**	655
	Total Number of CCTV Cameras	36
Heritage Sites	**Total Number of Heritage Sites**	0

ECONOMIC PROFILE

Total Population in Working Age Group	865419
Total Number of Industries	12191
Total Number of Commercial Enterprises	8811
Total Number of Hotels	39
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	22977.52
Total VAT Collection in FY 2016-17 (INR Lakhs)	25913.96



PHYSICAL PROFILE			
	Water	Average Quantity of Water Supplied (MLD)	125
		Total Number of Water Connections	185349
	Sanitation Facilities	Total number of households with access to individual toilets in the city	280170
		Total number of households in the city with access to community toilets in the city	9065
	Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	520
		Total number of households covered through door-to-door collection of solid waste	289235
	Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	96.28
		Daily average quantum of waste water treated by STPs in the city (MLD)	7
	Electricity	Total number of authorized electrical connections in the city	351827
		Total electricity supplied to the city (kWh)	1356742711
	Public and Open Spaces	Total area covered by green spaces in the city (m^2)	96842.49
	Roads and Transport	Total Length of Road Network in the City (Km)	1332.84
		Total length of arterial and sub-arterial road network in the city (Km)	...
		Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	1.289

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various ‘Category Sub-Indexes’ and a composite ‘City Liveability Index’ will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education

Pillars of Comprehensive Development	Category	Indicators
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population 4.2 Healthcare professionals per 10,000 population 4.3 Average response time in case of health emergencies 4.4 Period prevalence of water borne diseases 4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras 5.2 Number of recorded crimes per lakh population 5.3 Extent of crimes recorded against women, children and elderly per year 5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection 6.2 Increase in collection of Professional Tax 6.3 Increase in issuance of Construction permits 6.4 Unemployment rate 6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing 7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces 8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use 9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical

Pillars of Comprehensive Development	Category	Indicators
		services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities

Pillars of Comprehensive Development	Category	Indicators
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

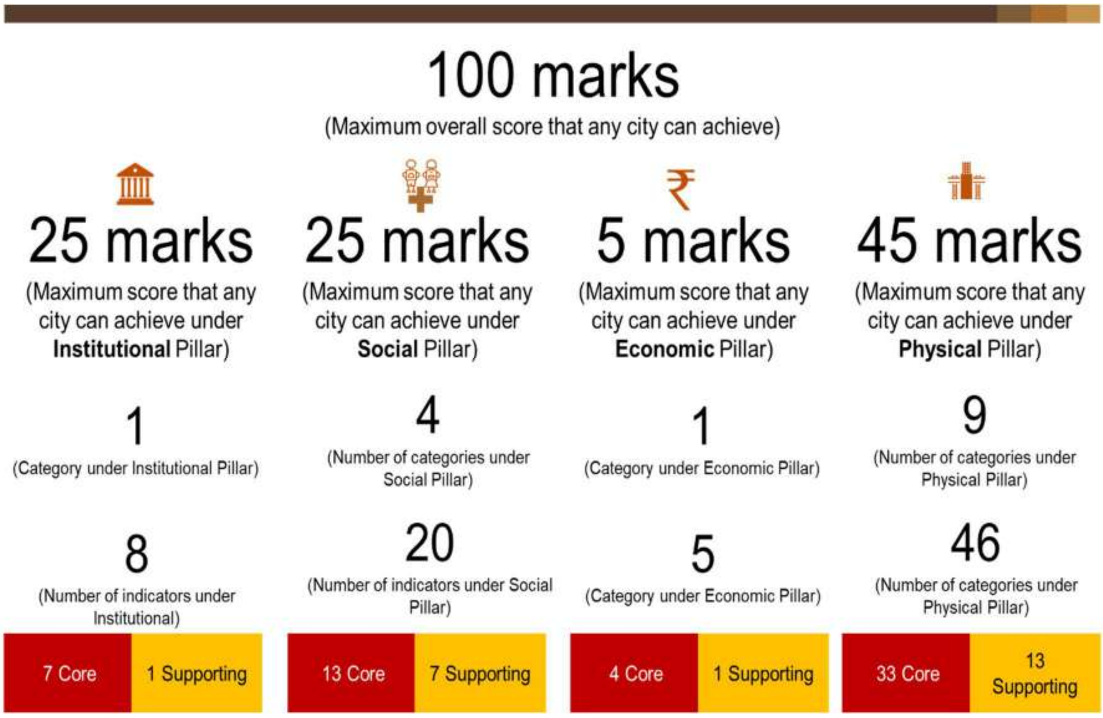
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks

(Maximum overall score that any city can achieve)

25 marks	25 marks	5 marks	45 marks
(Maximum score that any city can achieve under **Institutional** Pillar)	(Maximum score that any city can achieve under **Social** Pillar)	(Maximum score that any city can achieve under **Economic** Pillar)	(Maximum score that any city can achieve under **Physical** Pillar)
1 (Category under Institutional Pillar)	4 (Number of categories under Social Pillar)	1 (Category under Economic Pillar)	9 (Number of categories under Physical Pillar)
8 (Number of indicators under Institutional)	20 (Number of indicators under Social Pillar)	5 (Category under Economic Pillar)	46 (Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to "maximum within the comparison group" or "absolute benchmarks". For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring. The list of benchmarks is presented in Annexure 1.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Account Section, Tirupur Municipal Corporation
Urban Local Body	For Park and Recreation Related Questions	Town and country Planning Department Planning Department, Tirupur Municipal Corporation
Urban Local Body	For Water Supply and Drainage related questions	Engineering Department, Tirupur Municipal Corporation
Urban Local Body	For Heritage sites related data	Engineering Department, Tirupur Municipal Corporation
Urban Local Body	For Ecological sites related data	Engineering Department, Tirupur Municipal Corporation
Urban Local Body	For Housing related data	Town and Country Planning Department Planning Department, Tirupur Municipal Corporation

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Building plan related data	Town and Country Planning Department Planning Department, Tirupur Municipal Corporation
Urban Local Body	For Roads related data	Tirupur Municipal Corporation
Urban Local Body	For Solid waste management related data	Solid waste management Unit , Tirupur Municipal Corporation
Urban Local Body	For IT services related data	IT Department, Tirupur Municipal Corporation
Urban Local Body	For Vendor committee related data	Tirupur Municipal Corporation
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Tamil Nadu State pollution control Board
Development Authority	Building Infrastructure	Town and country planning Department Tirupur Municipal Corporation
	Construction planning	Town and country planning Department Tirupur Municipal Corporation
	Green Building	Town and country planning department
	Rain water harvesting	Town and country planning department
	Universal Design Principle	Town and country planning Department
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Tamilnadu Electricity Board
State Disaster management authority		Disaster Management – Collector office
State Education Department		District Education Department
State Health Department	Health care professionals	City Health Officer- Tirupur Municipal Corporation
	Citizen Services	City Health Officer- Tirupur Municipal Corporation
	Disease Prevalence	City Health Officer- Tirupur Municipal Corporation
	Health Infrastructure	City Health Officer- Tirupur Municipal Corporation

Designated data owners	Subcategories	Data owners at city level
State Renewable Energy Development Agency		Tamilnadu Electricity Board
State Sales / Commercial Taxes Department		District sales / commercial Tax office, Tirupur
Town and Country Planning Department	Land Use	Town and country Planning Department, Tirupur
Traffic and Police Department		City police commissioner office, Tirupur
Transport Authorities	Buses	Tamilnadu state transport corporation
	Registered Vehicles	Regional Transporting Office, Tirupur
	Sub urban rail transport	
	Mono Rail Authority	
	Tramways	
	Marine Transport Authority	

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 130 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	1
State Education Department	6
DISCOM/Electricity Department	10
Traffic and Police Department	4
Development Authority	6
Pollution Control Board	2
State Renewable Energy Department	1
Town and Country Planning	2
State Health Department	20
Transport Authority	8
Disaster Management	1

Urban Local Body	**69**
Total	**130***

* The count of documents is based on first round of submission.

Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1| Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.4 Physical Audit

The following map presents the indicators audited at city level.

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**69.71**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	0.75
	1.1c trade license	1
	1.1d solid waste management	0
	1.1e water supply	1
	1.1f sewerage/drainage	1
	1.1g fogging	0
	1.1h property tax	0.666666667
	1.1i professional tax	0.5
	1.1j information	0.923076923
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	0.222222222
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**0**
Description	Services integrated through an integrated or a singular operations command centre	0
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**6.98**
Description		
Sub Indicators	1.3a Building plan	NA
	1.3b Birth/Death Certificate	0.00075897

	1.3c water supply	0.35914733
	1.3d solid waste management	0.056407983
	1.3e property tax	0.084746828
	1.3f professional tax (RC)	0
	1.3g professional tax (EC)	0.035503462
	1.3h complaints/ grievance redressal	0
	1.3i information	0.091420766
	1.3j electricity	0.00060399
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**0.14**
Description		
Sub Indicators	1.4a water supply	0
	1.4b solid waste	0
	1.4c street lights	1
	1.4d sewerage	0
	1.4e professional tax	0
	1.4f parks and recreational spaces	0
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**91.7**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	4446.83
Denominator	Total demand raised for the year	4849.54
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**28.36**
Formula:	*Numerator / Denominator*	

Numerator	Total collection of user charges in water supply in a year	1802.78
Denominator	Total O&M cost for providing water supply services during the year	6356.04
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**12.43**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	6645.69
Denominator	Total expenditure (revenue and capital accounts) in the same year	53450.51
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**6.67**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	4
Denominator	Total number of wards	60
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	NA
Denominator	Total number of historic buildings/sites identified	NA
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	NA
Denominator	Total number of ecologically important sites identified in the city	NA
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**71**
Description	Average Occupancy rate of Hotels	71
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	0
Denominator	Total budget of the ULB (capital and revenue)	22977.52
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**4**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	4
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**98.25**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	63941
Denominator	Total population in the age group of 6-14 years	65079
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**102.8**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	32628
Denominator	Total female population in the age group of 6-14 years	31738
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**34.02**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	28104
Denominator	Total number of teachers available for primary grades (public and private schools)	826
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**28.29**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	73
Denominator	Total number of schools	258
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**88.05**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	88.05403042
Numerator	Percentage	

Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**92.09**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	144475426
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**39.92**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	1774
Denominator	Total population of the city	444352
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**12.74**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	566
Denominator	Total population of the city	444352
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**15.3**
Description	Total response time for health-related distress calls received in the city	15.3
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.87**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	3859
Denominator	Total population of the city	444352
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases	

	(amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.17**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	752
Denominator	Total population of the city	444352
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**2.7**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	36
Denominator	Total length of road network in the city	1332.84
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**1673.67**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	7437
Denominator	Total population of the city	444352
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**2**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	149
Denominator	Total crimes recorded in the same year	7437
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size	

	classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**51.76**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	230
Denominator	Total population of the city	444352
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**22.8**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	4811.37
Denominator	Total VAT/GST collection during preceding year	211.0259
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**5.27**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	10.35
Denominator	Total Professional Tax collection during preceding year	196.24
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**-23.18**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	-682
Denominator	Number of construction permits during preceding year	29.42
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	13721
Denominator	Total labour force in the city	65079
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**141.86**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	2308
Denominator	Total number of vendors in the city	1626.975
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**13.19**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	9789
Denominator	Total number of slum and EWS households in the city	742.19
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**11.33**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	9874332630096
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**0.22**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	96842.49
Denominator	Total population of the city	444352
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**0.34**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	153020.85
Denominator	Total population of the city	444352
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**12.95**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	20640000
Denominator	Total area of the city (total area of all land uses)	159350000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.02**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	444352
Denominator	Area allocated for residential land use (in hectares)	20640000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a	

	benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**75.17**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	217406
Denominator	Total number of households in the city	289235
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	351827
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**4747**
Description	Total number of sustained electrical interruptions in a year	4747
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.58**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	131124
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	814
Denominator	Total energy consumption from all sources	1395530543
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.32**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	1633964.583
Denominator	Total quantum of water and waste water handled during the period	3960
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.34**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	7591275
Denominator	Total number of street light installations	28935
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	0
Unit	Percentage	

Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.7**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	1395530543
Denominator	Total population of the city	444352
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.24**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	55
Denominator	Total area of the city (sq.km)	159.35
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.7**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	310
Denominator	Total population of the city	444352
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	NA
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	1332.84
Unit	Percentage	
Benchmark	>=50	

Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	2
Denominator	Total number of major transport interchanges in the city	2
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	NA
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**Non-Computable**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	NA
Denominator	Total number of major interchanges in the city	2
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	0
Denominator	Total number of signalised intersections in the city	19
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	NA
Denominator	Total available on-street parking spaces in the city	NA

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**0.05**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	1.289
Denominator	Total length of road network in the city	2665.68
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	0
Denominator	Total number of junctions/ intersections on major roads in the city	332
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**11.04**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	37
Denominator	Total number of public right-of-way areas in the city	335
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**74.19**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	214596
Denominator	Total number of households in the city	289235
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**281.31**

Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	125
Denominator	Total population of the city	444352
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied[2]**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	35
Denominator	Total number of samples tested for water quality	35
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**30.4**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	38
Denominator	Quantum of water put into the distribution system (mld)	125
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**50.12**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	92897
Denominator	Total number of water connections in the city	185349
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**10.99**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	248

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	2256
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**121.04**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	301721
Denominator	Total number of properties in the city	249264
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**105.76**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	263619
Denominator	Total number of properties in the city	249264
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**7.27**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	7
Denominator	Total waste water generated in the city per day	96.28
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**195.71**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	13.7
Denominator	Total waste water received at treatment plants per day	7
Unit	Percentage	

Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**1.36**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	18.062
Denominator	Total length of road network in the city	1332.84
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**99.99**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	298003
Denominator	Total number of households and establishments in the city	298046
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	520
Denominator	Total quantum of MSW generated in the city	520
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**1.42**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	221.84
Denominator	Average MSW generated in the city (tons per month)	15600
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**Non=Computable**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	Data Unavailable
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**Non=Computable**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	Data Unavailable
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**Non=Computable**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	Data Unavailable
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	4
Denominator	Total number of noise samples	6
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	Data Unavailable
Denominator	Total number of samples tested	Data Unavailable
Unit	Percentage	
Benchmark	100%

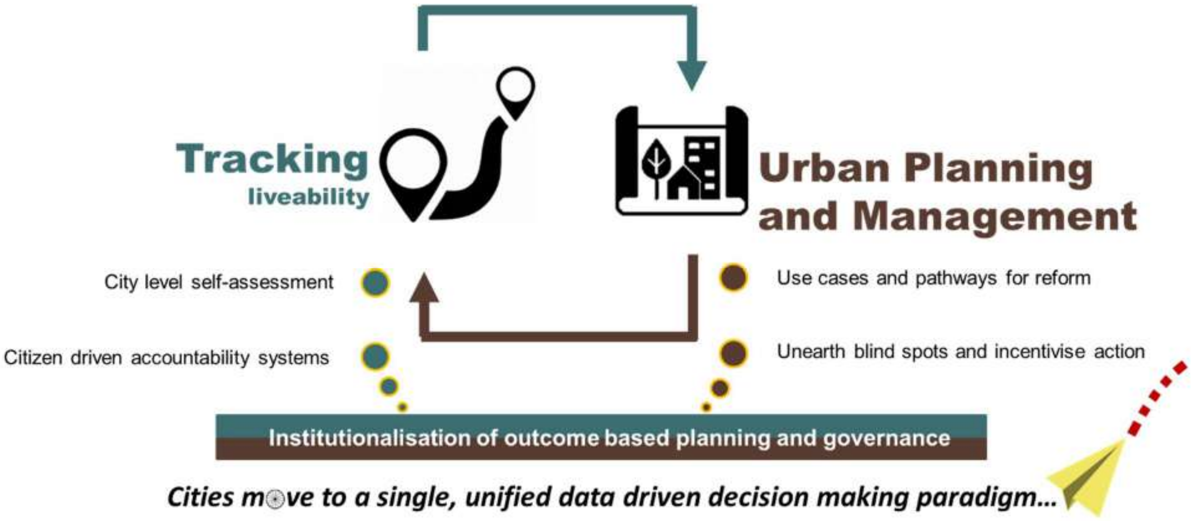
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance

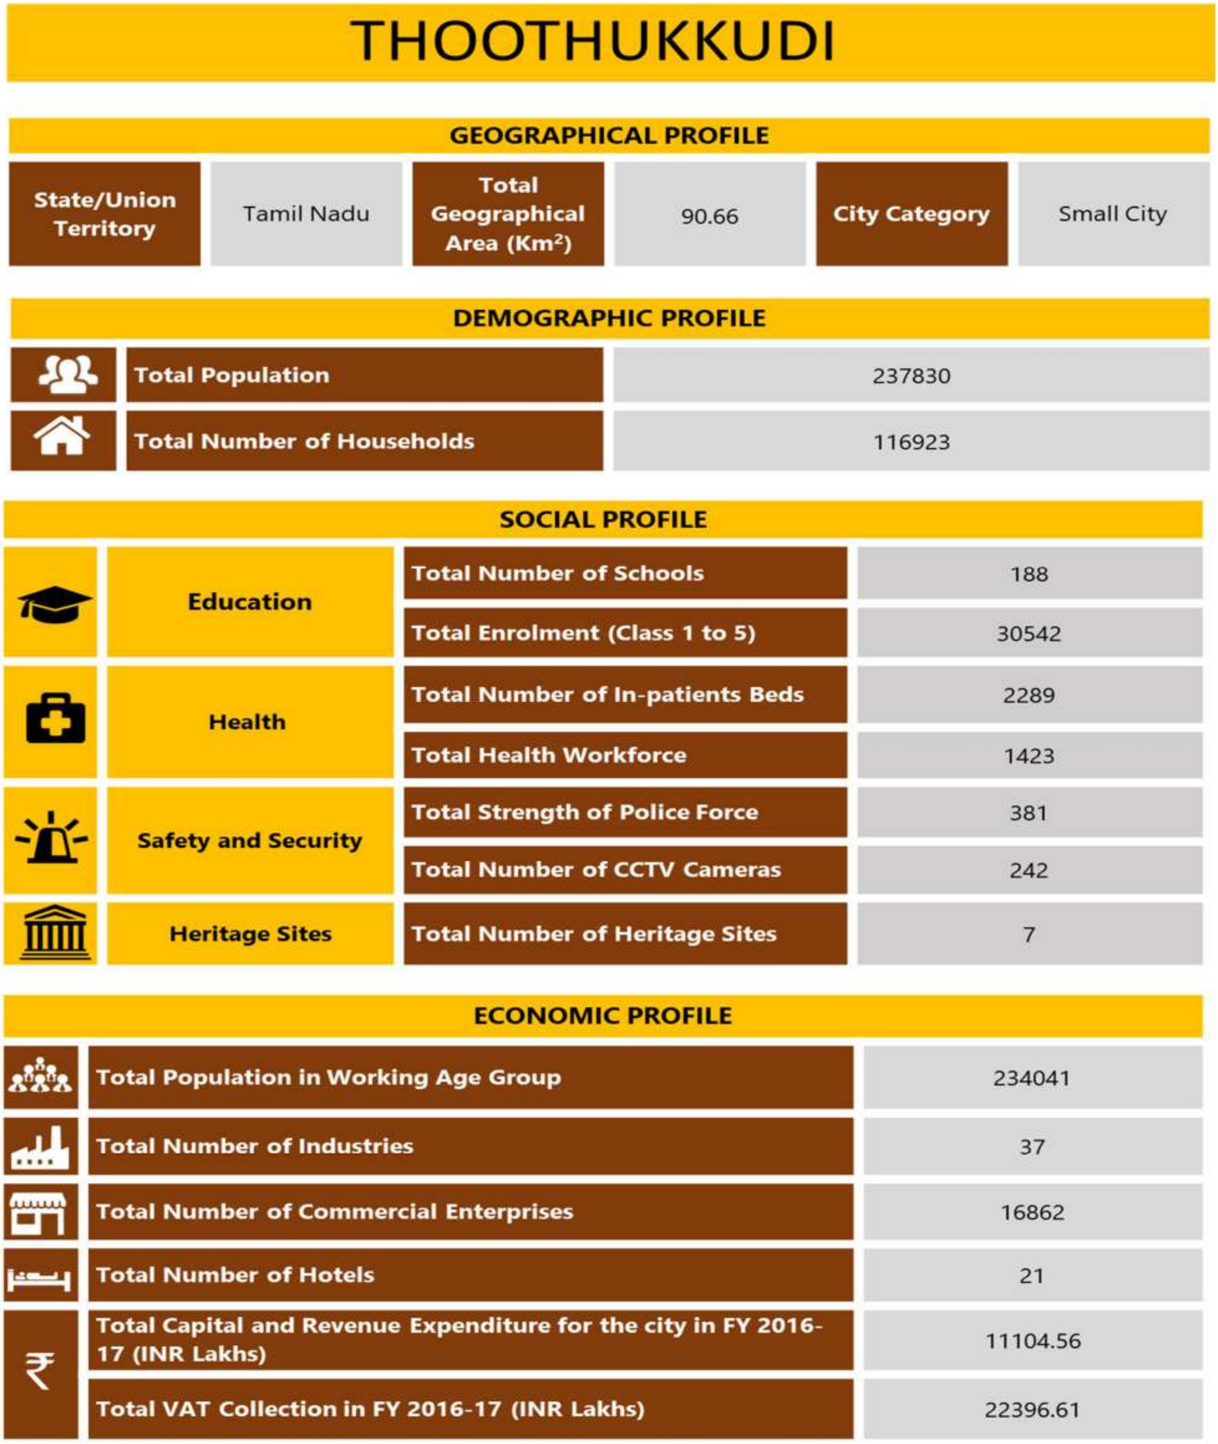
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart

cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



THOOTHUKKUDI

GEOGRAPHICAL PROFILE

State/Union Territory	Tamil Nadu	Total Geographical Area (Km^2)	90.66	City Category	Small City

DEMOGRAPHIC PROFILE

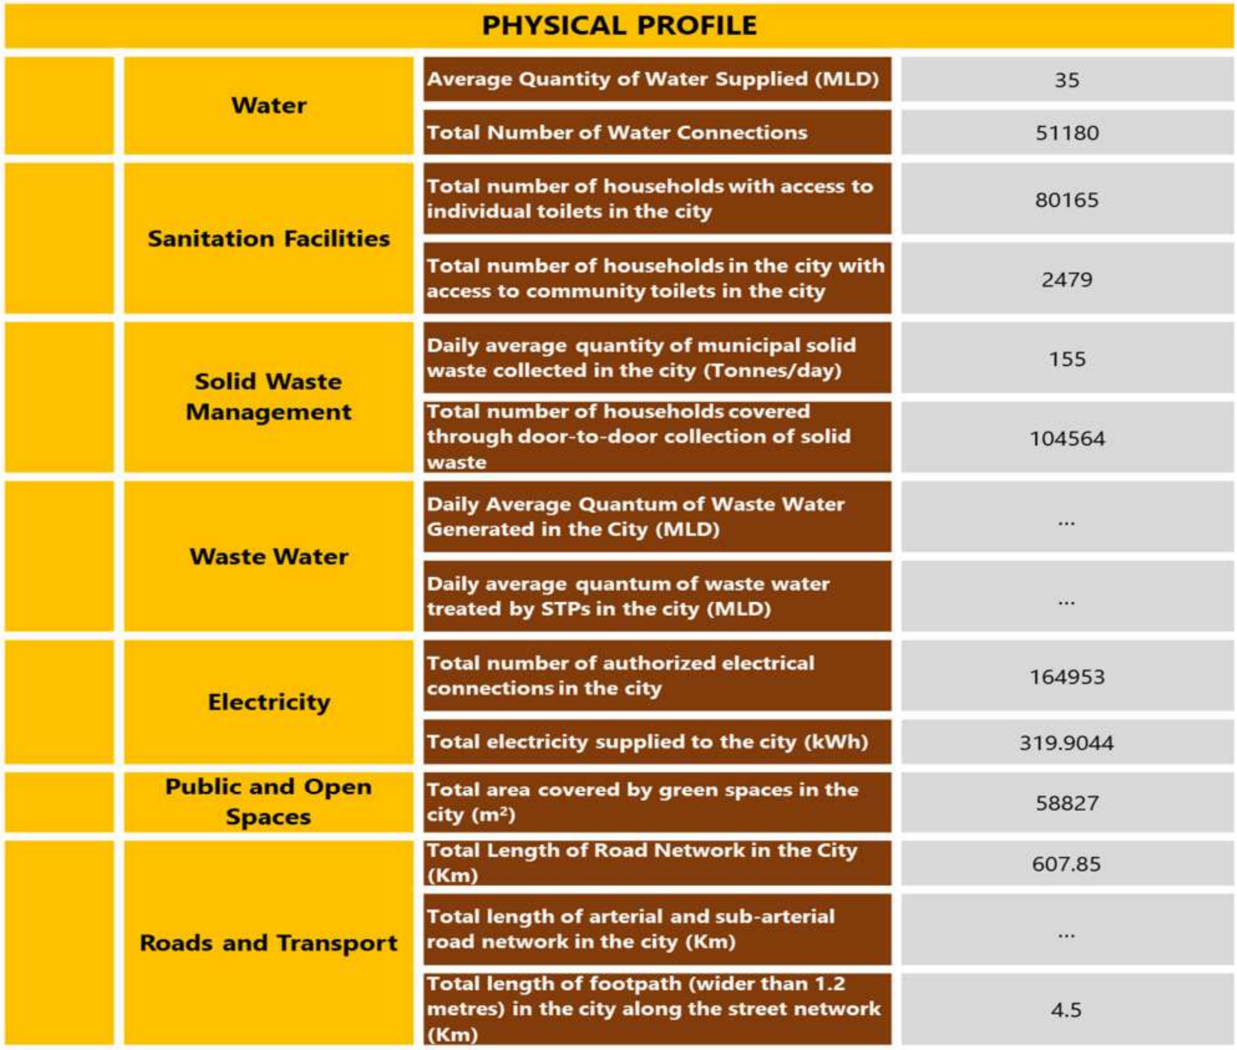
Total Population	237830
Total Number of Households	116923

SOCIAL PROFILE

Education	Total Number of Schools	188
	Total Enrolment (Class 1 to 5)	30542
Health	Total Number of In-patients Beds	2289
	Total Health Workforce	1423
Safety and Security	Total Strength of Police Force	381
	Total Number of CCTV Cameras	242
Heritage Sites	Total Number of Heritage Sites	7

ECONOMIC PROFILE

Total Population in Working Age Group	234041
Total Number of Industries	37
Total Number of Commercial Enterprises	16862
Total Number of Hotels	21
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	11104.56
Total VAT Collection in FY 2016-17 (INR Lakhs)	22396.61



PHYSICAL PROFILE			
	Water	Average Quantity of Water Supplied (MLD)	35
		Total Number of Water Connections	51180
	Sanitation Facilities	Total number of households with access to individual toilets in the city	80165
		Total number of households in the city with access to community toilets in the city	2479
	Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	155
		Total number of households covered through door-to-door collection of solid waste	104564
	Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	…
		Daily average quantum of waste water treated by STPs in the city (MLD)	…
	Electricity	Total number of authorized electrical connections in the city	164953
		Total electricity supplied to the city (kWh)	319.9044
	Public and Open Spaces	Total area covered by green spaces in the city (m^2)	58827
	Roads and Transport	Total Length of Road Network in the City (Km)	607.85
		Total length of arterial and sub-arterial road network in the city (Km)	…
		Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	4.5

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various ‘Category Sub-Indexes’ and a composite ‘City Liveability Index’ will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education

Pillars of Comprehensive Development	Category	Indicators
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical

Pillars of Comprehensive Development	Category	Indicators
		services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities

Pillars of Comprehensive Development	Category	Indicators
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

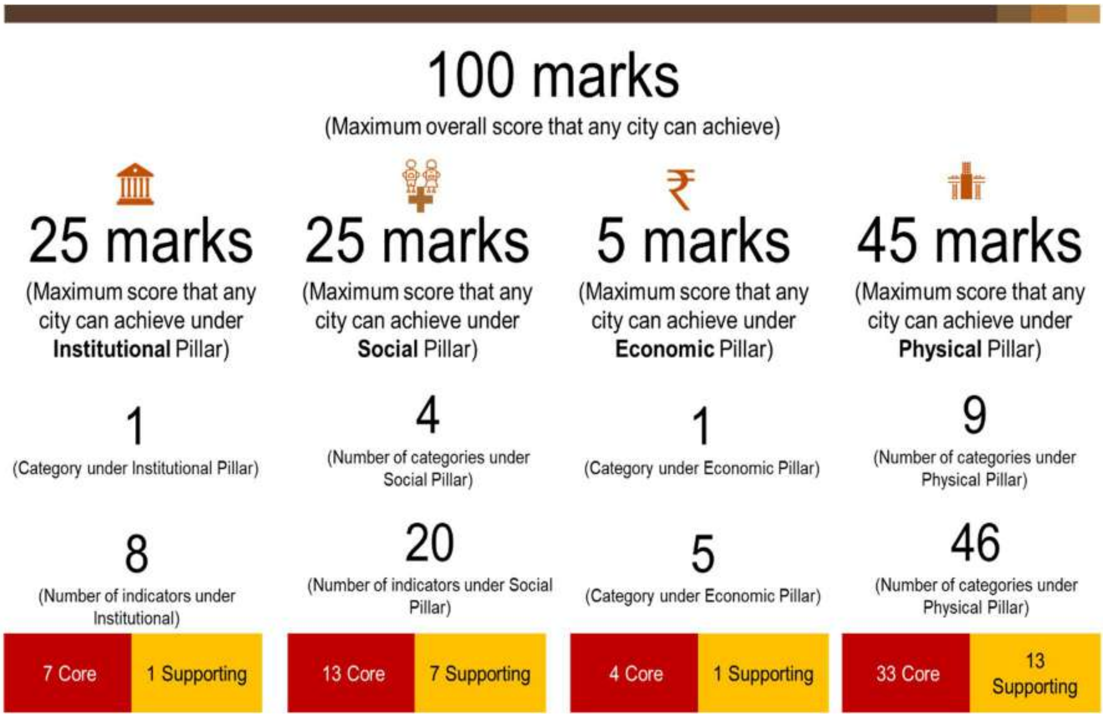
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks
(Maximum overall score that any city can achieve)
25 marks
(Maximum score that any city can achieve under **Institutional** Pillar)

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring. The list of benchmarks is presented in Annexure 1.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Accounts Section-Urban Local Body
Urban Local Body	For Park and Recreation Related Questions	Urban Local Body
Urban Local Body	For Water Supply and Drainage related questions	Water Supply section-Urban Local Body
Urban Local Body	For Heritage sites related data	Not Applicable
Urban Local Body	For Ecological sites related data	Urban Local Body
Urban Local Body	For Housing related data	Slum Clearence Board-Tirunelveli
Urban Local Body	For Building plan related data	Town Planning-Urban
Urban Local Body	For Roads related data	Urban Local Body

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Solid waste management related data	Urban Local Body
Urban Local Body	For IT services related data	Urban Local Body
Urban Local Body	For Vendor committee related data	Urban Local Body
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	Urban Local Body
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	State Pollution Control Board
Development Authority	Building Infrastructure	Urban Local Body
	Construction planning	Urban Local Body
	Green Building	Urban Local Body
	Rain water harvesting	Urban Local Body
	Universal Design Principle	Urban Local Body
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Tamilnadu Electricity Board
State Disaster management authority		State Disaster Management Authority
State Education Department		Education Department
State Health Department	Health care professionals	Urban Local Body
	Citizen Services	Urban Local Body
	Disease Prevalence	Urban Local Body
	Health Infrastructure	Urban Local Body
State Renewable Energy Development Agency		Tamilnadu Electricity Board
State Sales / Commercial Taxes Department		Tax Department
Town and Country Planning Department	Land Use	Local Planning Authority
Traffic and Police Department		Police Department
Transport Authorities	Buses	TamilNadu State Transport Corporation
	Registered Vehicles	Road Transport Authority
	Sub urban rail transport	Not Applicable

Designated data owners	Subcategories	Data owners at city level
	Mono Rail Authority	Not Applicable
	Tramways	Not Applicable
	Marine Transport Authority	Not Applicable

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 170 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	**1**
State Education Department	**1**
DISCOM/Electricity Department	**8**
Traffic and Police Department	**8**
Development Authority	**2**
Pollution Control Board	**3**
State Renewable Energy Department	**3**
Town and Country Planning	**3**
State Health Department	**8**
Transport Authority	**7**
Disaster Management	**1**
Urban Local Body	**125**
Total	**170***

* The count of documents is based on first round of submission.

Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1| Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.4 Physical Audit

The following map presents the indicators audited at city level.

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**62.92**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	0.75
	1.1b death certificate	0.75
	1.1c trade license	0.5
	1.1d solid waste management	0
	1.1e water supply	1
	1.1f sewerage/drainage	0
	1.1g fogging	0
	1.1h property tax	1
	1.1i professional tax	1
	1.1j information	0.846153846
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	0.333333333
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**2.38**
Description	Services integrated through an integrated or a singular operations command centre	0.5
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**0.03**
Description		
Sub Indicators	1.3a Building plan	0
	1.3b Birth/Death Certificate	0.000115979

	1.3c water supply	0.000227953
	1.3d solid waste management	4.20468E-06
	1.3e property tax	0.00010404
	1.3f professional tax (RC)	0
	1.3g professional tax (EC)	0
	1.3h complaints/ grievance redressal	5.95664E-06
	1.3i information	0.002123365
	1.3j electricity	1.8187E-05
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**0.58**
Description		
Sub Indicators	1.4a water supply	1.5
	1.4b solid waste	0
	1.4c street lights	1
	1.4d sewerage	1
	1.4e professional tax	NA
	1.4f parks and recreational spaces	0
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**53.25**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	1804.97451
Denominator	Total demand raised for the year	3389.91378
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**101.64**
Formula:	*Numerator / Denominator*	

Numerator	Total collection of user charges in water supply in a year	883.25
Denominator	Total O&M cost for providing water supply services during the year	869.01
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**13.48**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	3156.68
Denominator	Total expenditure (revenue and capital accounts) in the same year	23416.25
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	0
Denominator	Total number of wards	60
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	NA
Denominator	Total number of historic buildings/sites identified	NA
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	0
Denominator	Total number of ecologically important sites identified in the city	1
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**56**
Description	Average Occupancy rate of Hotels	56
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	0
Denominator	Total budget of the ULB (capital and revenue)	11104.56
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**3**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	3
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**128.12**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	49819
Denominator	Total population in the age group of 6-14 years	38884
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**127.65**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	24716
Denominator	Total female population in the age group of 6-14 years	19362
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**21.54**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	30542
Denominator	Total number of teachers available for primary grades (public and private schools)	1418
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**22.87**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	43
Denominator	Total number of schools	188
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**89.41**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	89.41181339
Numerator	Percentage	

Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**96.63**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	41582376
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**96.25**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	2289
Denominator	Total population of the city	237830
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**59.83**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	1423
Denominator	Total population of the city	237830
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**50**
Description	Total response time for health-related distress calls received in the city	50
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.05**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	127
Denominator	Total population of the city	237830
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases	

	(amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.23**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	549
Denominator	Total population of the city	237830
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**39.81**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	242
Denominator	Total length of road network in the city	607.85
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**1409.83**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	3353
Denominator	Total population of the city	237830
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**8.62**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	289
Denominator	Total crimes recorded in the same year	3353
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size	

	classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**23.97**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	57
Denominator	Total population of the city	237830
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**9.18**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	1883.63
Denominator	Total VAT/GST collection during preceding year	205.1298
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**1.94**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	7.34247
Denominator	Total Professional Tax collection during preceding year	379.1817
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**-14.75**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	-27
Denominator	Number of construction permits during preceding year	1.83
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	196396
Denominator	Total labour force in the city	38884
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	NA
Denominator	Total number of vendors in the city	972.1
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**23.42**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	8875
Denominator	Total number of slum and EWS households in the city	378.96
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**13.22**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	1324594083544
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**0.25**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	58827
Denominator	Total population of the city	237830
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**6.06**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	1440646
Denominator	Total population of the city	237830
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**0.1**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	92200
Denominator	Total area of the city (total area of all land uses)	90660000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**33.5**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	237830
Denominator	Area allocated for residential land use (in hectares)	7100
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a	

	benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**24.53**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	28676
Denominator	Total number of households in the city	116923
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	NA
Denominator	Total number of electricity connections in the city	164953
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**51**
Description	Total number of sustained electrical interruptions in a year	51
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.81**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	2175
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0.6**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	61
Denominator	Total energy consumption from all sources	832.4044
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	520237.25
Denominator	Total quantum of water and waste water handled during the period	NA
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.34**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	4165696
Denominator	Total number of street light installations	15258
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	NA
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	NA
Unit	Percentage	

Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	832.4044
Denominator	Total population of the city	237830
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.78**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	7347
Denominator	Total area of the city (sq.km)	90.66
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.42**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	99
Denominator	Total population of the city	237830
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	NA
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	NA
Denominator	Total length of road network in the city	607.85
Unit	Percentage	
Benchmark	>=50	

Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	NA
Denominator	Total number of major transport interchanges in the city	3
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport[1]**	**To be computed**
Description	Mode share of non-motorised transport	NA
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**Non-Computable**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	NA
Denominator	Total number of major interchanges in the city	3
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**75**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	3
Denominator	Total number of signalised intersections in the city	4
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	3
Denominator	Total available on-street parking spaces in the city	NA

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**0.37**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	4.5
Denominator	Total length of road network in the city	1215.7
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	NA
Denominator	Total number of junctions/ intersections on major roads in the city	5
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**0.71**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	5
Denominator	Total number of public right-of-way areas in the city	700
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**41.35**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	48347
Denominator	Total number of households in the city	116923
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**147.16**

Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	35
Denominator	Total population of the city	237830
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied[2]**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	25
Denominator	Total number of samples tested for water quality	25
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	Blank
Denominator	Quantum of water put into the distribution system (mld)	35
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	51180
Denominator	Total number of water connections in the city	51180
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**14.19**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	22

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	155
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**71.85**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	102444
Denominator	Total number of properties in the city	142573
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**54.32**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	77450
Denominator	Total number of properties in the city	142573
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	NA
Denominator	Total waste water generated in the city per day	NA
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	NA
Denominator	Total waste water received at treatment plants per day	NA
Unit	Percentage	

Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**1.29**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	7.85
Denominator	Total length of road network in the city	607.85
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**93.93**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	125670
Denominator	Total number of households and establishments in the city	133785
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**73.81**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	155
Denominator	Total quantum of MSW generated in the city	210
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**19.4**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	902.287
Denominator	Average MSW generated in the city (tons per month)	4650
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**13.54**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	13.54
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**13.1**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	13.1
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**184.51**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	184.51
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	0
Denominator	Total number of noise samples	0
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	48
Denominator	Total number of samples tested	48
Unit	Percentage	
Benchmark	100%

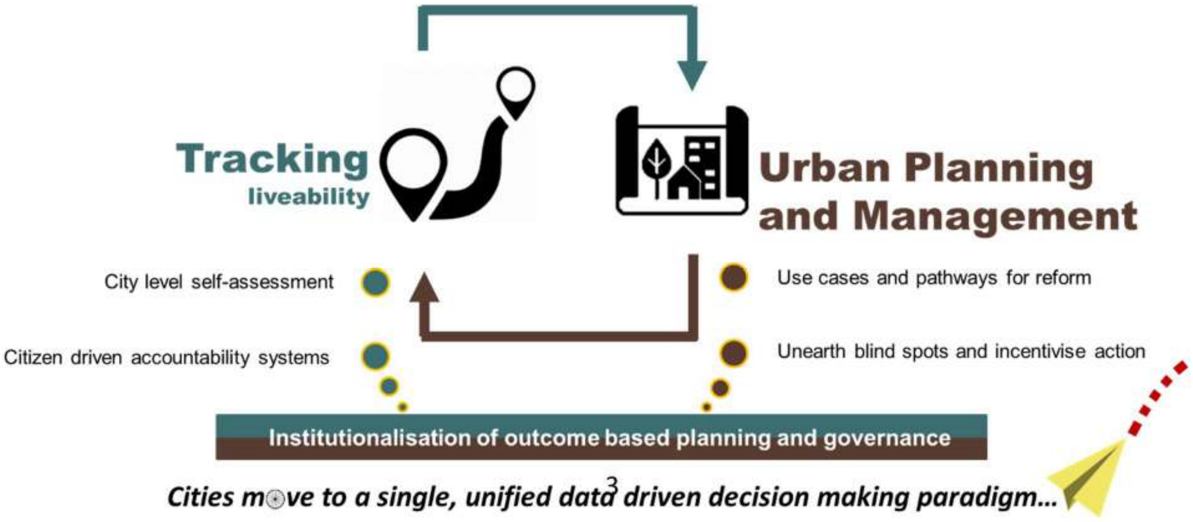
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



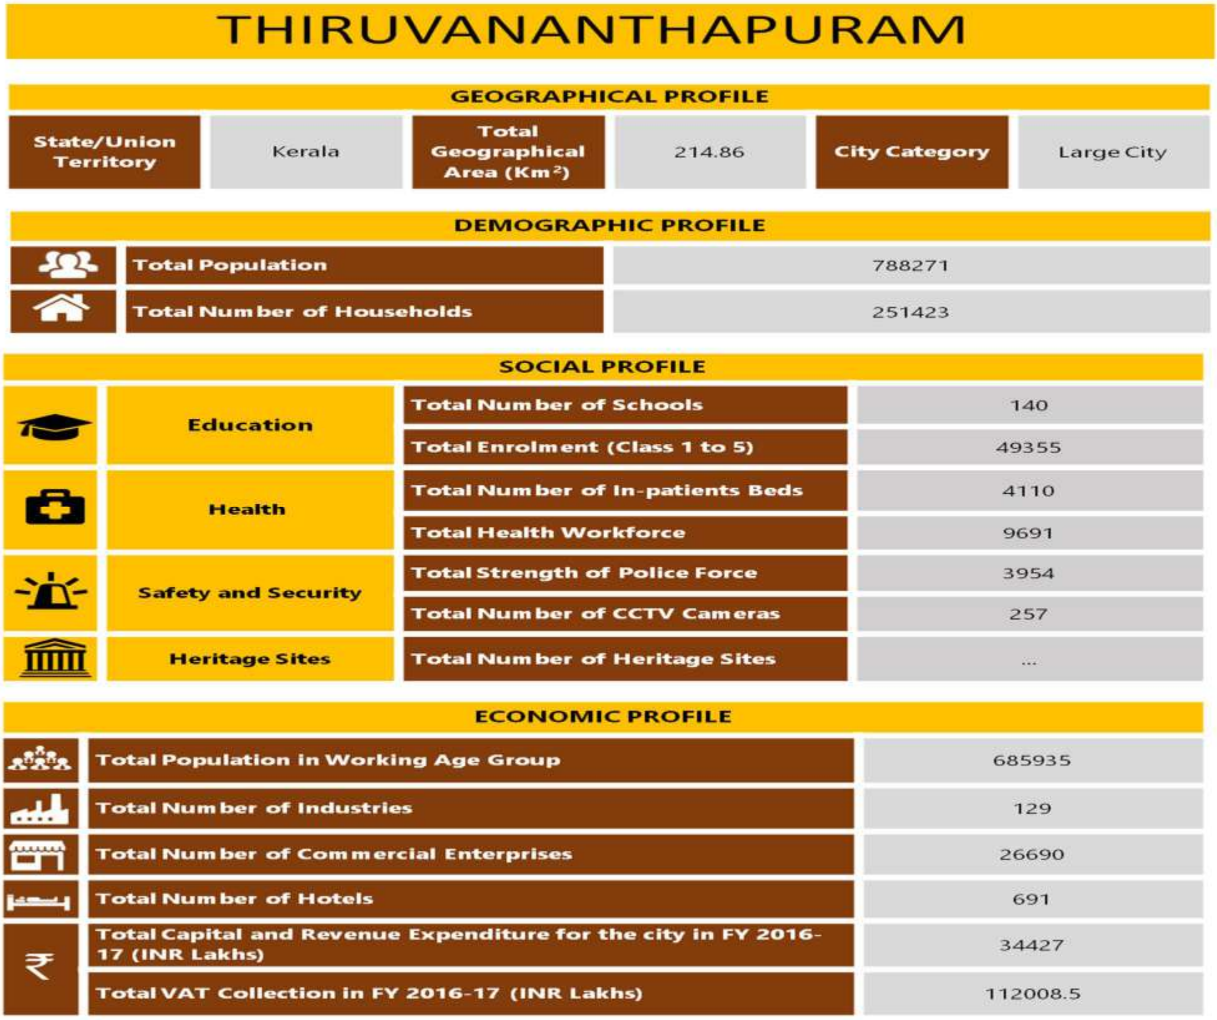
Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance

Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



THIRUVANANTHAPURAM

GEOGRAPHICAL PROFILE

State/Union Territory	Kerala	Total Geographical Area (Km²)	214.86	City Category	Large City

DEMOGRAPHIC PROFILE

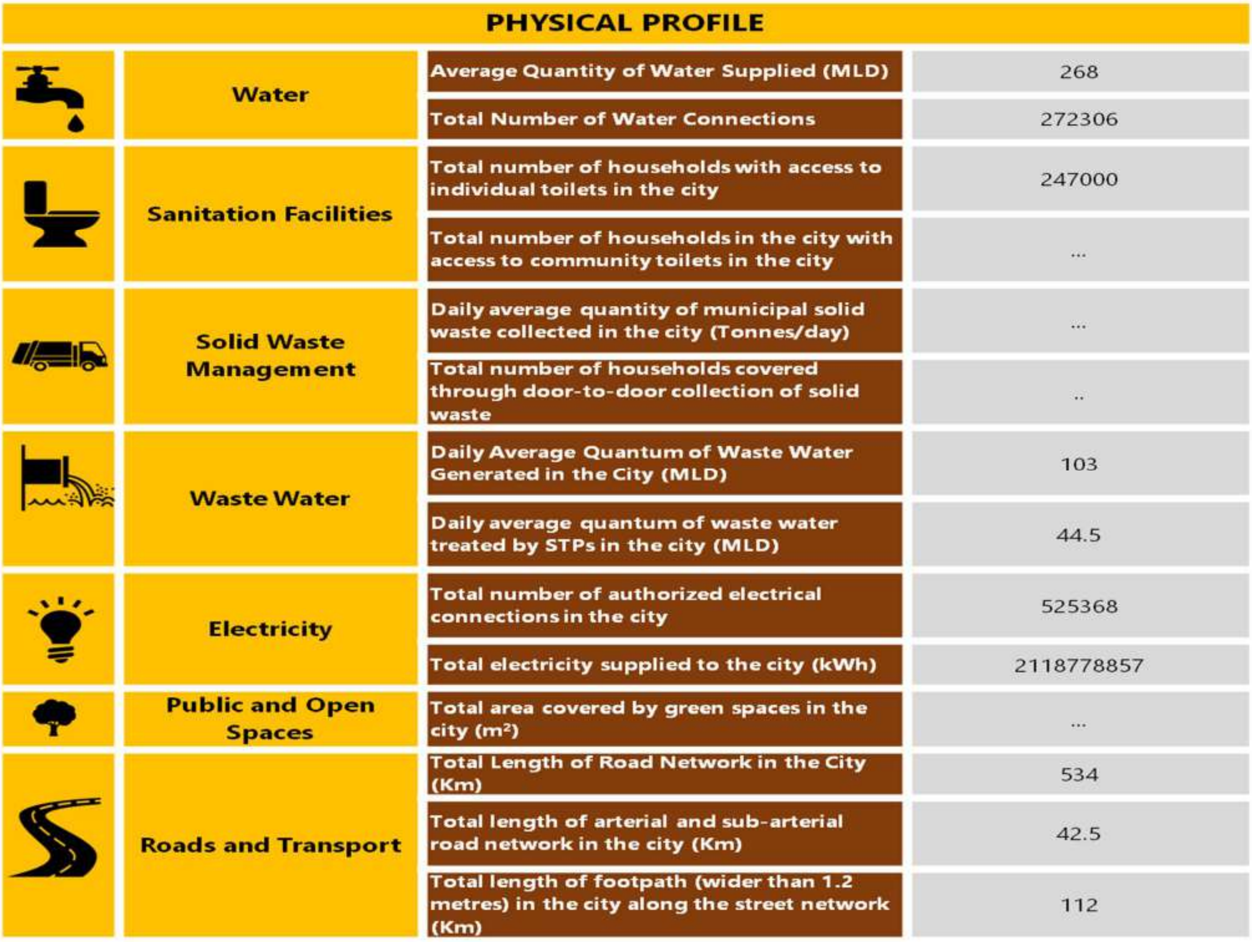
	Total Population	788271
	Total Number of Households	251423

SOCIAL PROFILE

	Education	Total Number of Schools	140
		Total Enrolment (Class 1 to 5)	49355
	Health	Total Number of In-patients Beds	4110
		Total Health Workforce	9691
	Safety and Security	Total Strength of Police Force	3954
		Total Number of CCTV Cameras	257
	Heritage Sites	Total Number of Heritage Sites	...

ECONOMIC PROFILE

	Total Population in Working Age Group	685935
	Total Number of Industries	129
	Total Number of Commercial Enterprises	26690
	Total Number of Hotels	691
₹	Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	34427
	Total VAT Collection in FY 2016-17 (INR Lakhs)	112008.5



PHYSICAL PROFILE		
Water	Average Quantity of Water Supplied (MLD)	268
	Total Number of Water Connections	272306
Sanitation Facilities	Total number of households with access to individual toilets in the city	247000
	Total number of households in the city with access to community toilets in the city	...
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	...
	Total number of households covered through door-to-door collection of solid waste	..
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	103
	Daily average quantum of waste water treated by STPs in the city (MLD)	44.5
Electricity	Total number of authorized electrical connections in the city	525368
	Total electricity supplied to the city (kWh)	2118778857
Public and Open Spaces	Total area covered by green spaces in the city (m²)	...
Roads and Transport	Total Length of Road Network in the City (Km)	534
	Total length of arterial and sub-arterial road network in the city (Km)	42.5
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	112

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education

Pillars of Comprehensive Development	Category	Indicators
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use	9.1 Share of mixed land use area in overall city land use

Pillars of Comprehensive Development	Category	Indicators
	and Compactness	9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces

Pillars of Comprehensive Development	Category	Indicators
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution

Pillars of Comprehensive Development	Category	Indicators
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

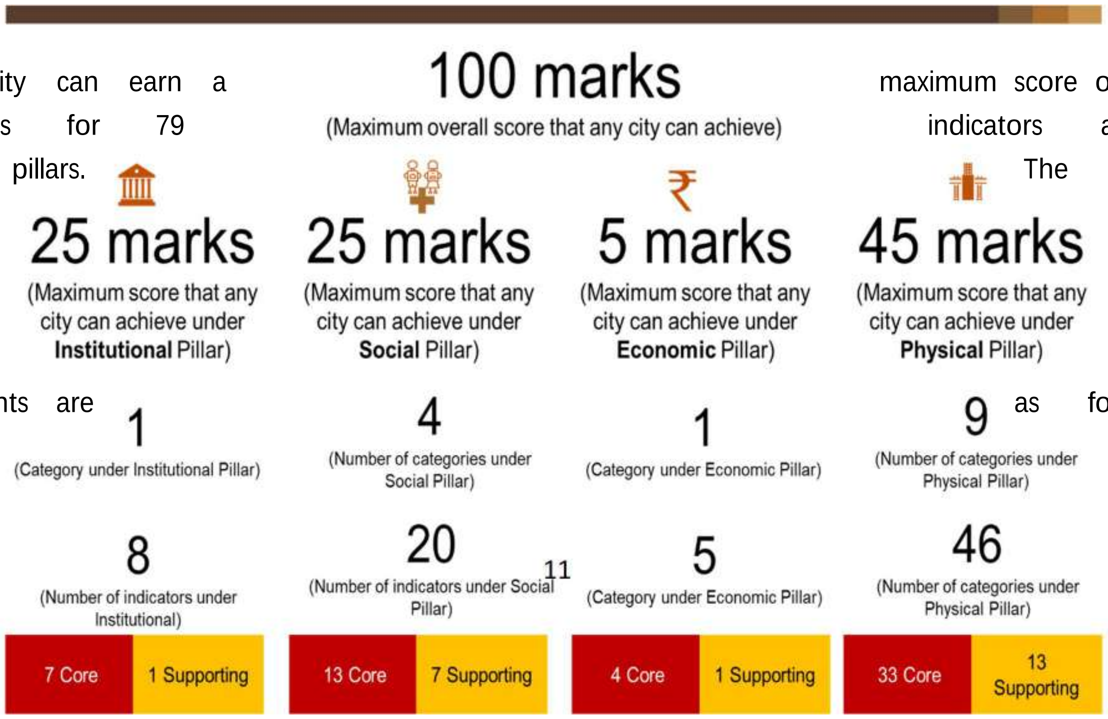
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows:



100 marks
(Maximum overall score that any city can achieve)

25 marks	25 marks	5 marks	45 marks
(Maximum score that any city can achieve under **Institutional** Pillar)	(Maximum score that any city can achieve under **Social** Pillar)	(Maximum score that any city can achieve under **Economic** Pillar)	(Maximum score that any city can achieve under **Physical** Pillar)
1 (Category under Institutional Pillar)	4 (Number of categories under Social Pillar)	1 (Category under Economic Pillar)	9 (Number of categories under Physical Pillar)
8 (Number of indicators under Institutional)	20 (Number of indicators under Social Pillar)	5 (Category under Economic Pillar)	46 (Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{\mathit{indicator\ value\ for\ the\ city} - \mathit{indicator\ value\ for\ the\ worst\ performing\ city}}{\mathit{benchmark} - \mathit{indicator\ value\ for\ the\ worst\ performing\ city}}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	ULB accounts department
Urban Local Body	For Park and Recreation Related Questions	ULB Engineering department, health department and ULB secretary
Urban Local Body	For Water Supply and Drainage related questions	Kerala Water authority and Kerala water authority sewerage division

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Heritage sites related data	Archeological survey of India site
Urban Local Body	For Ecological sites related data	ULB master plan document provided by ULB secretary
Urban Local Body	For Housing related data	PMAY data provided by Rahul project officer PMAY
Urban Local Body	For Building plan related data	ULB Engineering department
Urban Local Body	For Roads related data	Kerala Road Fund Board and Public Works department
Urban Local Body	For Solid waste management related data	ULB Health department
Urban Local Body	For IT services related data	ULB Information technology department
Urban Local Body	For Vendor committee related data	NULM department of ULB
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	State Pollution control board
Development Authority	Building Infrastructure	ULB Engineering department
	Construction planning	ULB Engineering department
	Green Building	ULB Engineering department
	Rain water harvesting	ULB Engineering department
	Universal Design Principle	ULB Engineering department
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Kerala State Electricity Board
State Disaster management authority		ULB disaster management cell
State Education Department		District education office
State Health Department	Health care professionals	Medical council, Dental council,
	Citizen Services	District medical office
	Disease Prevalence	District medical office
	Health Infrastructure	District medical office
State Renewable Energy Development Agency		Agency for Non-conventional Energy and Rural Technology (ANERT)
State Sales / Commercial		State commercial tax

Designated data owners	Subcategories	Data owners at city level
Taxes Department		department
Town and Country Planning Department	Land Use	Town and country planning department
Traffic and Police Department		Kerala Police
Transport Authorities	Buses	Kerala state road transport corporation
	Registered Vehicles	Trivandrum Road transport office
	Sub urban rail transport	NA
	Mono Rail Authority	NA
	Tramways	NA
	Marine Transport Authority	NA

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 58 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	1
State Education Department	1
DISCOM/Electricity Department	**2**
Traffic and Police Department	**2**

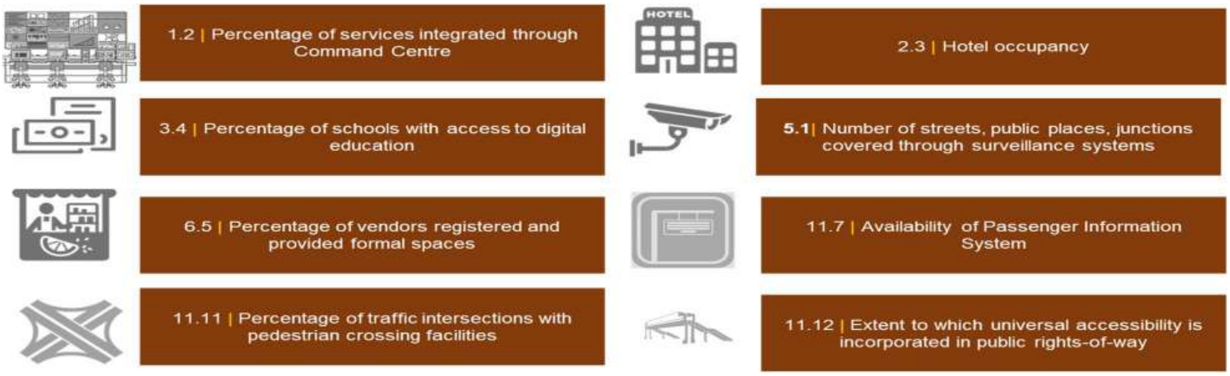
4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:



1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate

Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**46.25**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	0.75
	1.1b death certificate	0.75
	1.1c trade license	0
	1.1d solid waste management	0
	1.1e water supply	0.333333333
	1.1f sewerage/drainage	0
	1.1g fogging	0
	1.1h property tax	0.666666667
	1.1i professional tax	0
	1.1j information	0.846153846
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	0.666666667
Unit	Percentage	

Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**7.14**
Description	Services integrated through an integrated or a singular operations command centre	1.5
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**39.3**
Description		
Sub Indicators	1.3a Building plan	NA
	1.3b Birth/Death Certificate	NA
	1.3c water supply	NA
	1.3d solid waste management	NA
	1.3e property tax	NA
	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	NA
	1.3i information	NA
	1.3j electricity	0.39295313
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**1.33**
Description		
Sub Indicators	1.4a water supply	0
	1.4b solid waste	0
	1.4c street lights	0
	1.4d sewerage	0
	1.4e professional tax	0

	1.4f parks and recreational spaces	8
	1.4g building plan	NA
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**94.64**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	8789
Denominator	Total demand raised for the year	9287
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**3462.14**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	9694
Denominator	Total O&M cost for providing water supply services during the year	280
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**-74.04**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	-32393
Denominator	Total expenditure (revenue and capital accounts) in the same year	43751
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	100
Denominator	Total number of wards	100
Unit	Percentage	

Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	Data Unavailable
Denominator	Total number of historic buildings/sites identified	35
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	2
Denominator	Total number of ecologically important sites identified in the city	2
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**Non-Computable**
Description	Average Occupancy rate of Hotels	Data Unavailable
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**40697.62**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	14010968
Denominator	Total budget of the ULB (capital and revenue)	34427
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	

Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**602**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	602
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**80.94**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	88187
Denominator	Total population in the age group of 6-14 years	108956
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**89.08**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	47631
Denominator	Total female population in the age group of 6-14 years	53469
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	49355
Denominator	Total number of teachers available for primary grades (public and private schools)	Data Unavailable
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**70**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to	98

	digital resources such as NKN)	
Denominator	Total number of schools	140
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**111.37** 111.3713438
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**149.11** 186830446
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**52.14**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	4110
Denominator	Total population of the city	788271
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**122.94**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	9691
Denominator	Total population of the city	788271
Unit	Number per 10,000 population	

Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**1**
Description	Total response time for health-related distress calls received in the city	1
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	20
Denominator	Total population of the city	788271
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**1.19**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	9356
Denominator	Total population of the city	788271
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**48.13**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	257
Denominator	Total length of road network in the city	534
Unit	Percentage	
Benchmark	100%	

Indicator No: 5.2	**Number of recorded crimes per lakh population**	**6945.07**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	54746
Denominator	Total population of the city	788271
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**1.19**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	649
Denominator	Total crimes recorded in the same year	54746
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**1.19**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	649
Denominator	Total population of the city	54746
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**20.32**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	18918.7
Denominator	Total VAT/GST collection during preceding year	930.898

Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**9.15**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	315
Denominator	Total Professional Tax collection during preceding year	3442
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**7.94**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	540
Denominator	Number of construction permits during preceding year	68.05
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	85400
Denominator	Total labour force in the city	108956
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**0.26**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	7
Denominator	Total number of vendors in the city	2723.9

Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**14.99**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	8005
Denominator	Total number of slum and EWS households in the city	533.87
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**Non-Computable** Data Unavailable
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	**Per capita availability of green spaces**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	Data Unavailable
Denominator	Total population of the city	788271
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	**Per capita availability of public and recreational places**	**1.35**

Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	1062396
Denominator	Total population of the city	788271
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**12.47**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	26800000
Denominator	Total area of the city (total area of all land uses)	214860000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	788271
Denominator	Area allocated for residential land use (in hectares)	90673233
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**172.24**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	433055
Denominator	Total number of households in the city	251423
Unit	Percentage	

Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	525368
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**4561**
Description	Total number of sustained electrical interruptions in a year	4561
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.81**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	7900
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	426
Denominator	Total energy consumption from all sources	2118778857
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and**	**0.28**

	sewerage	
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	2253307.833
Denominator	Total quantum of water and waste water handled during the period	9375
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	701472741
Denominator	Total number of street light installations	86138
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	1054681
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.34**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	2118778857
Denominator	Total population of the city	788271
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated	

	as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.25**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	84.3
Denominator	Total area of the city (sq.km)	214.86
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.5**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	393
Denominator	Total population of the city	788271
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	43
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	534
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**85.71**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	6

Denominator	Total number of major transport interchanges in the city	7
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	0.074
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**0.29**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	2
Denominator	Total number of major interchanges in the city	7
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	Data Unavailable
Denominator	Total number of signalised intersections in the city	Data Unavailable
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	1
Denominator	Total available on-street parking spaces in the city	1
Unit		

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**10.49**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	112
Denominator	Total length of road network in the city	1068
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	74
Denominator	Total number of junctions/ intersections on major roads in the city	74
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**0.33**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	1
Denominator	Total number of public right-of-way areas in the city	300
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**82.95**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	208565
Denominator	Total number of households in the city	251423
Unit	Percentage	
Benchmark	100%	

Indicator No: 12.2	**Per capita supply of water**	**339.98**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	268
Denominator	Total population of the city	788271
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	Data Unavailable
Denominator	Total number of samples tested for water quality	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**35**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	93.8
Denominator	Quantum of water put into the distribution system (mld)	268
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**100.04**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	272422
Denominator	Total number of water connections in the city	272306
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**10.93**
Formula:	*Numerator / Denominator*	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	831
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	7604
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**95.28**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	273629
Denominator	Total number of properties in the city	287189
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**102.14**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	293346
Denominator	Total number of properties in the city	287189
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**43.2**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	44.5
Denominator	Total waste water generated in the city per day	103
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**95.96**

Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	42.7
Denominator	Total waste water received at treatment plants per day	44.5
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**22.43**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	119.78
Denominator	Total length of road network in the city	534
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	0
Denominator	Total number of households and establishments in the city	278113
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	0
Denominator	Total quantum of MSW generated in the city	350
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or	Data Unavailable

	recycled (tons per month)	
Denominator	Average MSW generated in the city (tons per month)	0
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**10.01**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	10.01
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**25.32**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	25.32
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**52.5**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	52.5
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	Data Unavailable
Denominator	Total number of noise samples	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**40**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed	24

	standards	
Denominator	Total number of samples tested	60
Unit	Percentage	
Benchmark	100%

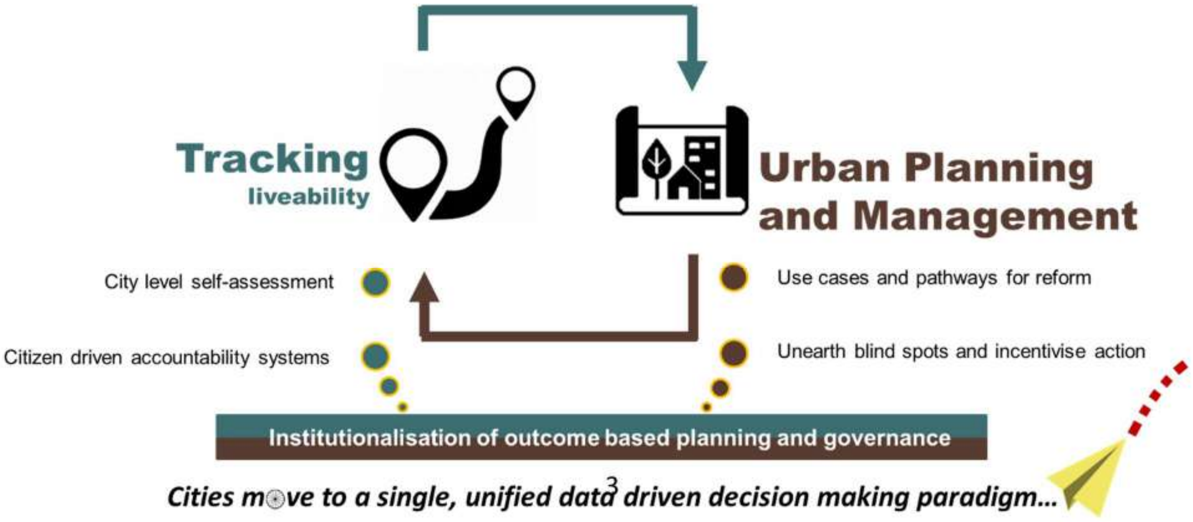
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

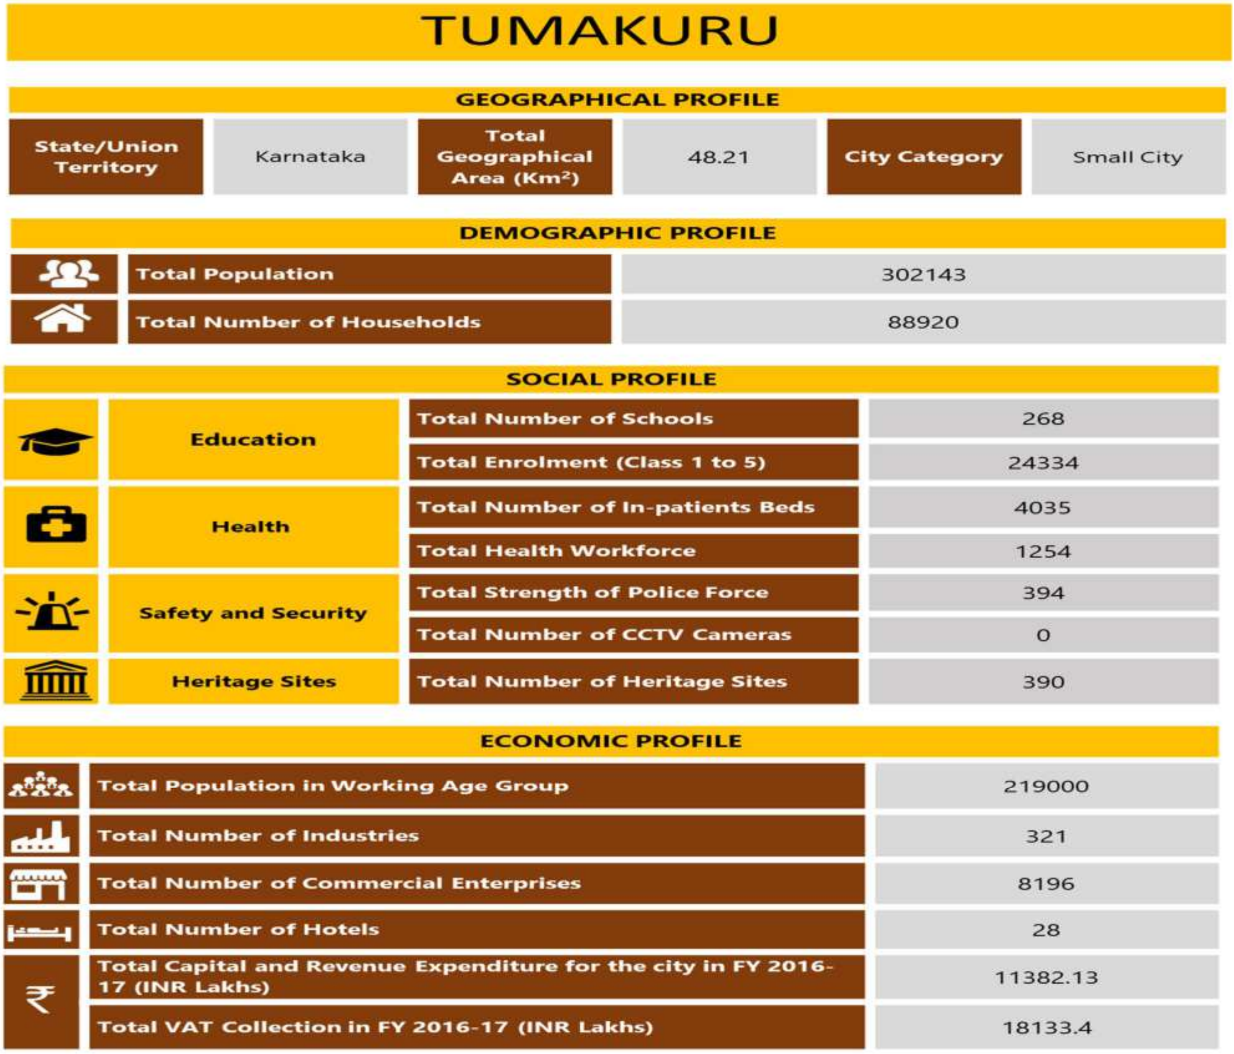


Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



TUMAKURU

GEOGRAPHICAL PROFILE

State/Union Territory	Karnataka	Total Geographical Area (Km^2)	48.21	City Category	Small City

DEMOGRAPHIC PROFILE

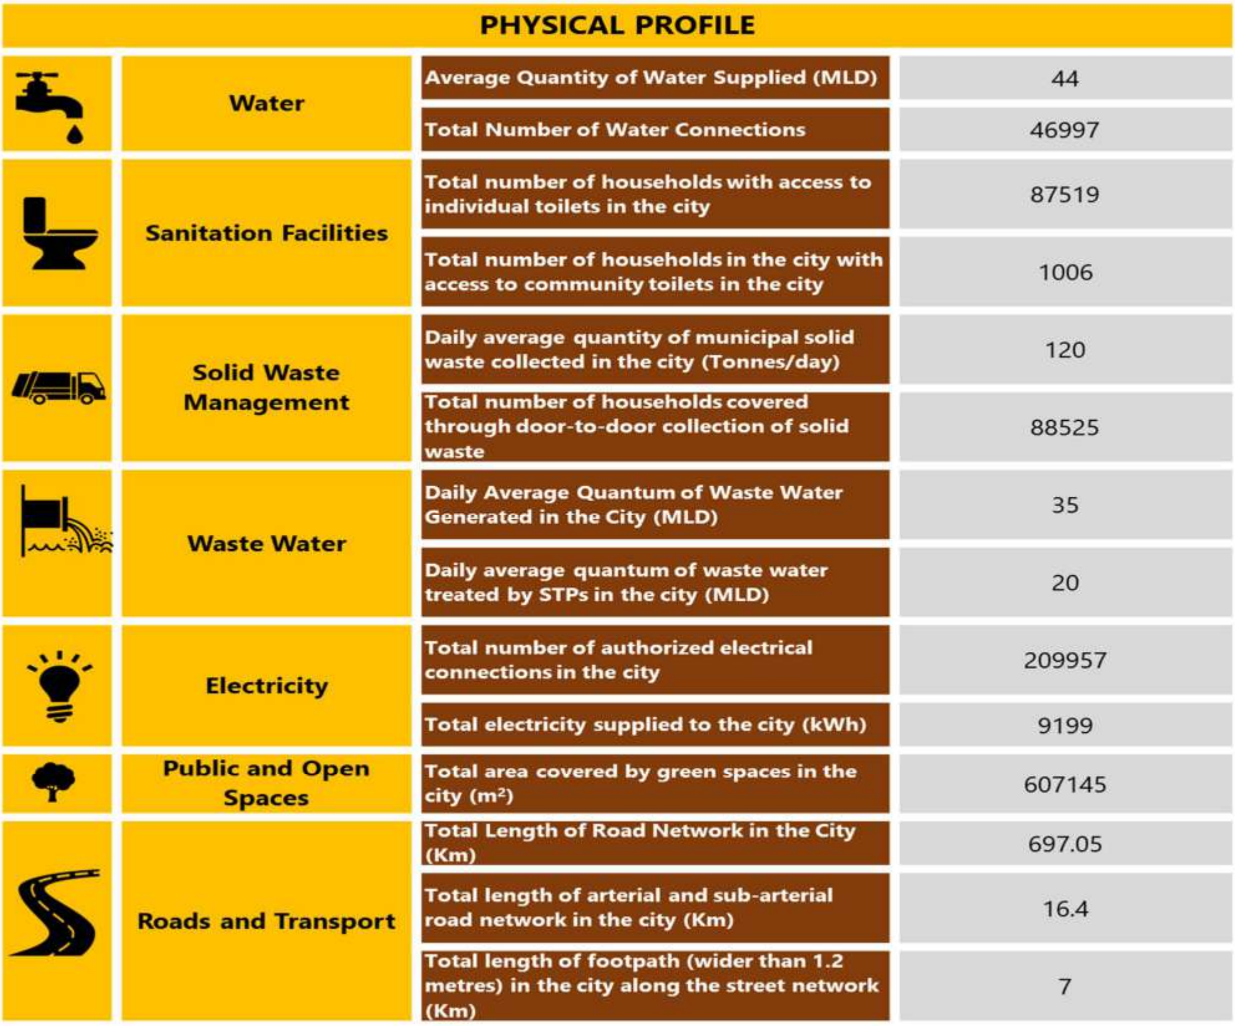
Total Population	302143
Total Number of Households	88920

SOCIAL PROFILE

Education	Total Number of Schools	268
	Total Enrolment (Class 1 to 5)	24334
Health	Total Number of In-patients Beds	4035
	Total Health Workforce	1254
Safety and Security	Total Strength of Police Force	394
	Total Number of CCTV Cameras	0
Heritage Sites	Total Number of Heritage Sites	390

ECONOMIC PROFILE

Total Population in Working Age Group	219000
Total Number of Industries	321
Total Number of Commercial Enterprises	8196
Total Number of Hotels	28
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	11382.13
Total VAT Collection in FY 2016-17 (INR Lakhs)	18133.4



PHYSICAL PROFILE		
Water	Average Quantity of Water Supplied (MLD)	44
	Total Number of Water Connections	46997
Sanitation Facilities	Total number of households with access to individual toilets in the city	87519
	Total number of households in the city with access to community toilets in the city	1006
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	120
	Total number of households covered through door-to-door collection of solid waste	88525
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	35
	Daily average quantum of waste water treated by STPs in the city (MLD)	20
Electricity	Total number of authorized electrical connections in the city	209957
	Total electricity supplied to the city (kWh)	9199
Public and Open Spaces	Total area covered by green spaces in the city (m^2)	607145
Roads and Transport	Total Length of Road Network in the City (Km)	697.05
	Total length of arterial and sub-arterial road network in the city (Km)	16.4
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	7

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary

Pillars of Comprehensive Development	Category	Indicators
		education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density

Pillars of Comprehensive Development	Category	Indicators
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian

Pillars of Comprehensive Development	Category	Indicators
		crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

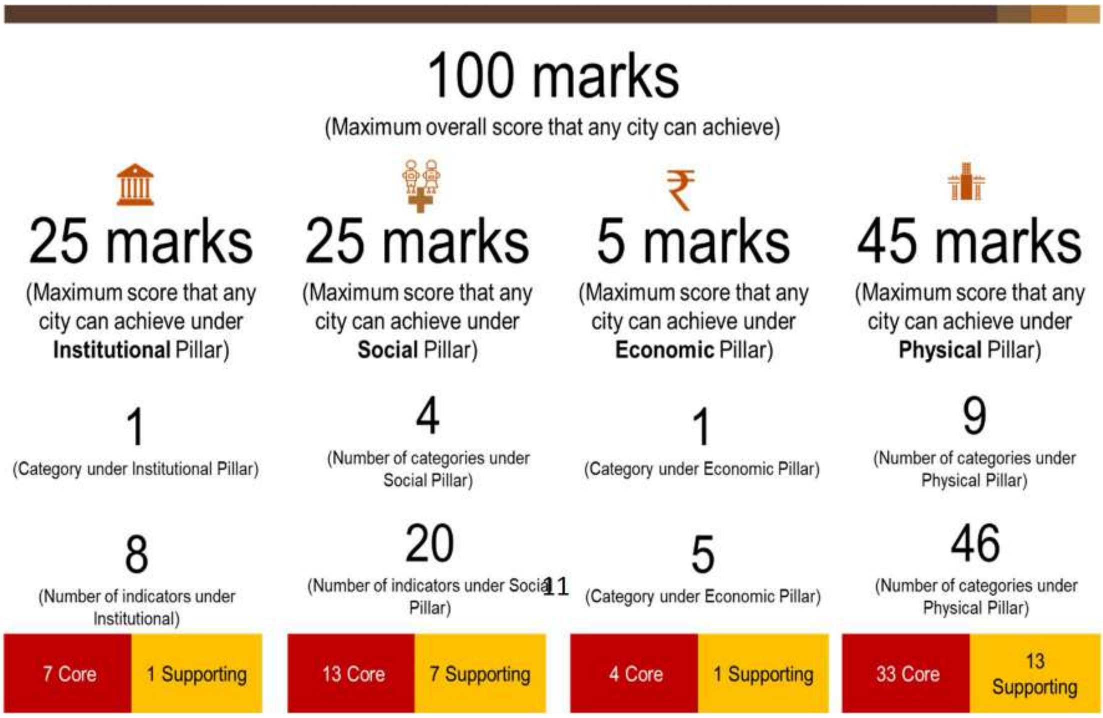
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks

(Maximum overall score that any city can achieve)

25 marks	25 marks	5 marks	45 marks
(Maximum score that any city can achieve under **Institutional** Pillar)	(Maximum score that any city can achieve under **Social** Pillar)	(Maximum score that any city can achieve under **Economic** Pillar)	(Maximum score that any city can achieve under **Physical** Pillar)
1	4	1	9
(Category under Institutional Pillar)	(Number of categories under Social Pillar)	(Category under Economic Pillar)	(Number of categories under Physical Pillar)
8	20	5	46
(Number of indicators under Institutional)	(Number of indicators under Social Pillar)	(Category under Economic Pillar)	(Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry.

The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Accounts Department
Urban Local Body	For Park and Recreation Related Questions	Engineering (civil) Section
Urban Local Body	For Water Supply and Drainage related questions	Engineering (ele) Section
Urban Local Body	For Heritage sites related data	Engineering (Civil) Section
Urban Local Body	For Ecological sites related data	Engineering (Civil) Section
Urban Local Body	For Housing related data	National Urban Livelihoods Mission
Urban Local Body	For Building plan related data	Building license section
Urban Local Body	For Roads related data	Engineering (Civil) Section
Urban Local Body	For Solid waste management related data	Environment Section
Urban Local Body	For IT services related data	Income Tax Section
Urban Local Body	For Vendor committee related data	National Urban Livelihoods Mission
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	Professional Tax, Department of Health & Family Welfare Services, Karnataka Slum Development Board, Under Ground Drainage section, Karnataka Industrial Area

Designated data owners	Subcategories	Data owners at city level
		Development Board, Statistical Department, Tumkur Urban Development Authority, Karnataka State Road Transport Corporation, Employment Department.
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	State Pollution Control Board
Development Authority	Building Infrastructure	Building license section, City Corporation Tumkur
	Construction planning	Building license section, City Corporation Tumkur
	Green Building	Building license section, City Corporation Tumkur
	Rain water harvesting	Building license section, City Corporation Tumkur
	Universal Design Principle	Engineering (Civil) section, City Corporation Tumkur
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Accounts and Technical Section
State Disaster management authority		Not Applicable
State Education Department		Block Resource Center
State Health Department	Health care professionals	District Health Officer Section
	Citizen Services	District Health Officer Section
	Disease Prevalence	District Health Officer Section
	Health Infrastructure	District Health Officer Section
State Renewable Energy Development Agency	Renewable Energy	Accounts and Technical Section of Bangalore Electricity Supply Company Ltd., (BESCOM)
State Sales / Commercial Taxes Department		Commercial taxes Department(LGSTO 175 & 170)
Town and Country Planning Department	Land Use	Planning Section .
Traffic and Police Department		District Crime Record Bureau (DCRB Section)
Transport Authorities	Buses	Divisional Traffic Section & Depot computerization system
	Registered Vehicles	Road Transport Office
	Sub urban rail transport	Not Applicable

Designated data owners	Subcategories	Data owners at city level
	Mono Rail Authority	Not Applicable
	Tramways	Not Applicable
	Marine Transport Authority	Not Applicable

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 135 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	**3**
State Education Department	**8**
DISCOM/Electricity Department	**1**
Traffic and Police Department	**2**
Development Authority	**6**
Pollution Control Board	**2**
State Renewable Energy Department	**1**
Town and Country Planning	**14**
State Health Department	**4**
Transport Authority	**6**
Disaster Management	**1**
Urban Local Body	**87**
Total	**135***

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5 Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc.,

and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**57.15**
Description	Average citizen services available online

Sub Indicators	1.4a water supply	0
	1.4b solid waste	0
	1.4c street lights	0.5
	1.4d sewerage	0
	1.4e professional tax	0
	1.4f parks and recreational spaces	0.5
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**83.79**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	2026.29
Denominator	Total demand raised for the year	2418.4
Unit	Percentage	

Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**21.88**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	487.21
Denominator	Total O&M cost for providing water supply services during the year	2227
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**-0.11**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	-19.77
Denominator	Total expenditure (revenue and capital accounts) in the same year	17474.43
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	0
Denominator	Total number of wards	35
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	0
Denominator	Total number of historic buildings/sites identified	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered**	**Non-**

	through projects for restoration	**Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	0
Denominator	Total number of ecologically important sites identified in the city	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**2.43**
Description	Average Occupancy rate of Hotels	2.428571429
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0.2**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	22.75
Denominator	Total budget of the ULB (capital and revenue)	11382.13
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**1**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	1
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**79.75**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	38820
Denominator	Total population in the age group of 6-14 years	48678
Unit	Percentage	

Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**78.92**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	18753
Denominator	Total female population in the age group of 6-14 years	23762
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**21.53**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	24334
Denominator	Total number of teachers available for primary grades (public and private schools)	1130
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**52.99**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	142
Denominator	Total number of schools	268
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**108.01**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	108.008501
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**107.41**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	23636340
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**133.55**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	4035
Denominator	Total population of the city	302143
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**41.5**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	1254
Denominator	Total population of the city	302143
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**15**
Description	Total response time for health-related distress calls received in the city	15
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**1.83**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	5520
Denominator	Total population of the city	302143
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.07**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	202
Denominator	Total population of the city	302143
Unit	Percentage	

Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	0
Denominator	Total length of road network in the city	697.05
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**463.36**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	1400
Denominator	Total population of the city	302143
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**11.71**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	164
Denominator	Total crimes recorded in the same year	1400
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**31.44**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	95
Denominator	Total population of the city	302143
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**26.9**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	3843.88
Denominator	Total VAT/GST collection during preceding year	142.8952
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**-8.79**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	-51.59
Denominator	Total Professional Tax collection during preceding year	586.69
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**51.41**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	474
Denominator	Number of construction permits during preceding year	9.22
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	2894
Denominator	Total labour force in the city	48678
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	

Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	0
Denominator	Total number of vendors in the city	1216.95
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**2.15**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	163
Denominator	Total number of slum and EWS households in the city	75.75
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**14.94**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	69235291876
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**2.01**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	607145
Denominator	Total population of the city	302143
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	

Indicator No: 8.2	Per capita availability of public and recreational places	**7.6**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	2296646.96
Denominator	Total population of the city	302143
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	Data Unavailable
Denominator	Total area of the city (total area of all land uses)	48210000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**46.83**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	302143
Denominator	Area allocated for residential land use (in hectares)	6451.52
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**132.59**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	117895

Denominator	Total number of households in the city	88920
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	209957
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**1194**
Description	Total number of sustained electrical interruptions in a year	1194
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.77**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	24270
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0.09**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	110
Denominator	Total energy consumption from all sources	9559
Unit	Percentage	

Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.34**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	179454.5833
Denominator	Total quantum of water and waste water handled during the period	1920
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.34**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	19071250
Denominator	Total number of street light installations	39892
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	0
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	9559
Denominator	Total population of the city	302143
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated	

	as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.58**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	75
Denominator	Total area of the city (sq.km)	48.21
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.17**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	51
Denominator	Total population of the city	302143
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	12
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	697.05
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	0
Denominator	Total number of major transport interchanges in the city	2
Unit	Percentage	
Benchmark	>=75	

Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**0.5**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	1
Denominator	Total number of major interchanges in the city	2
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	5
Denominator	Total number of signalised intersections in the city	5
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	0
Denominator	Total available on-street parking spaces in the city	4.1
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**0.5**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	7
Denominator	Total length of road network in the city	1394.1
Unit	Percentage	
Benchmark	>=75	

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	10
Denominator	Total number of junctions/ intersections on major roads in the city	10
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	0
Denominator	Total number of public right-of-way areas in the city	78
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**50.62**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	45007
Denominator	Total number of households in the city	88920
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**145.63**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	44
Denominator	Total population of the city	302143
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	

Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	48
Denominator	Total number of samples tested for water quality	48
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**34.09**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	15
Denominator	Quantum of water put into the distribution system (mld)	44
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	0
Denominator	Total number of water connections in the city	46997
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**2.23**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	40
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	1792
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Indicator No: 13.1	**Coverage of toilets**	**92.91**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	91486
Denominator	Total number of properties in the city	98471
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**53.38**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	52559
Denominator	Total number of properties in the city	98471
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**57.14**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	20
Denominator	Total waste water generated in the city per day	35
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	20
Denominator	Total waste water received at treatment plants per day	20
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**153.07**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	1067
Denominator	Total length of road network in the city	697.05
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**99.59**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	96721
Denominator	Total number of households and establishments in the city	97116
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**92.31**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	120
Denominator	Total quantum of MSW generated in the city	130
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**1.07**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	38.35
Denominator	Average MSW generated in the city (tons per month)	3600
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**3.99**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	3.99
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**31.5**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	31.5
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	

Indicator No: 15.3	**Concentration of PM10 - air pollution**	**105**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	105
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	Data Unavailable
Denominator	Total number of noise samples	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	48
Denominator	Total number of samples tested	48
Unit	Percentage	
Benchmark	100%

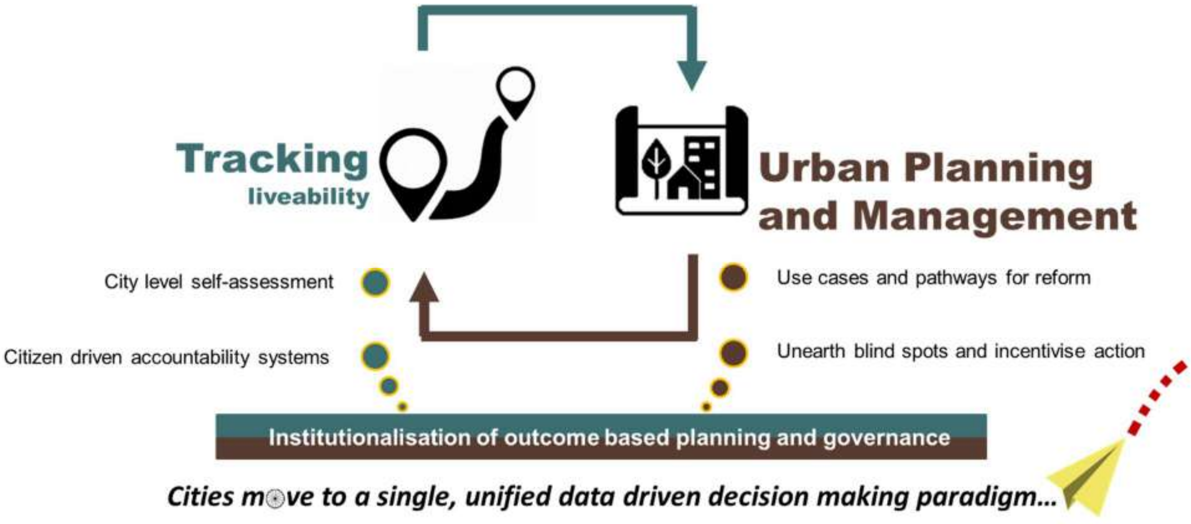
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

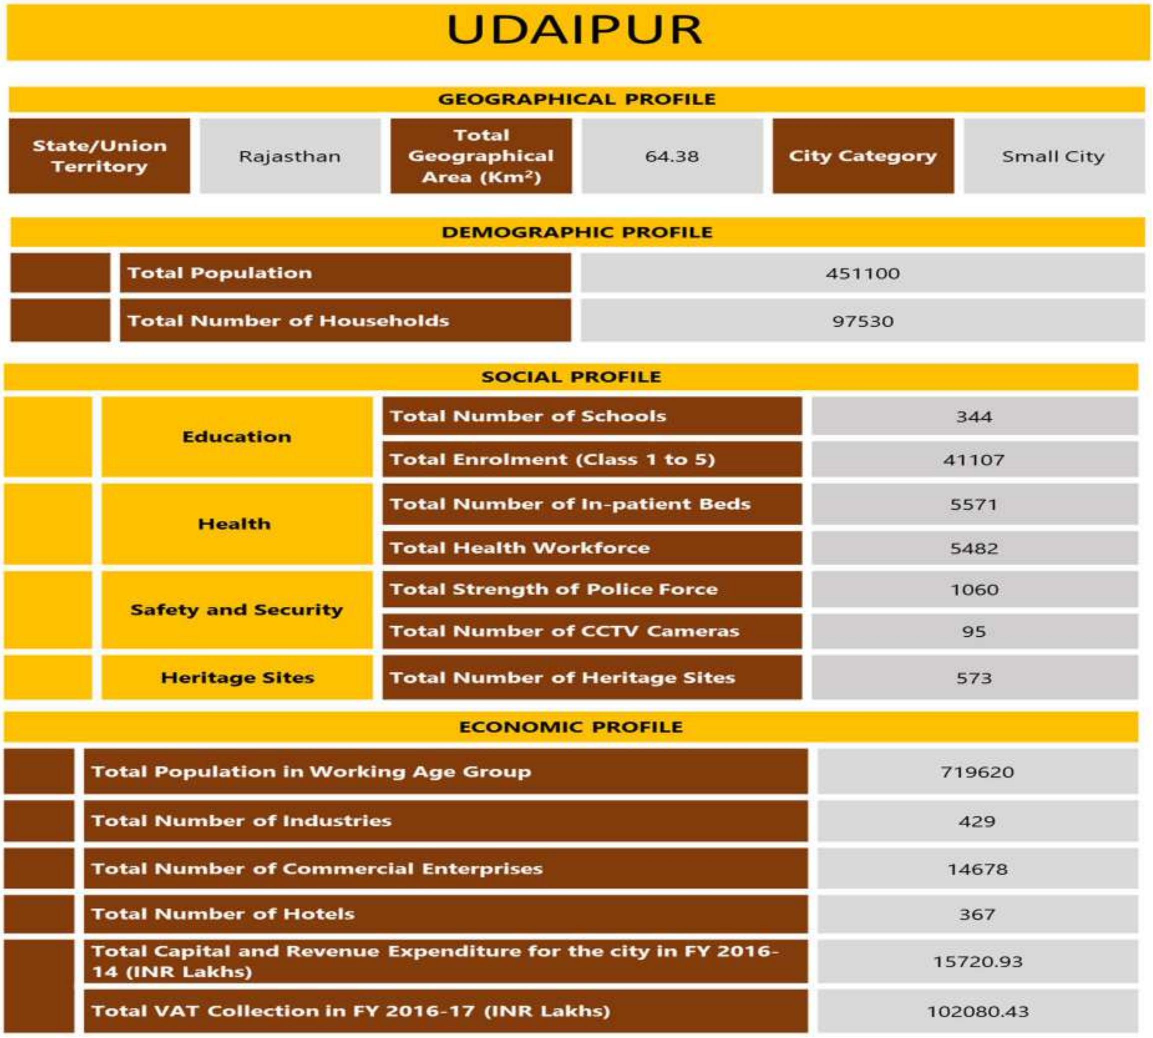


Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



UDAIPUR

GEOGRAPHICAL PROFILE

State/Union Territory	Rajasthan	**Total Geographical Area (Km²)**	64.38	**City Category**	Small City

DEMOGRAPHIC PROFILE

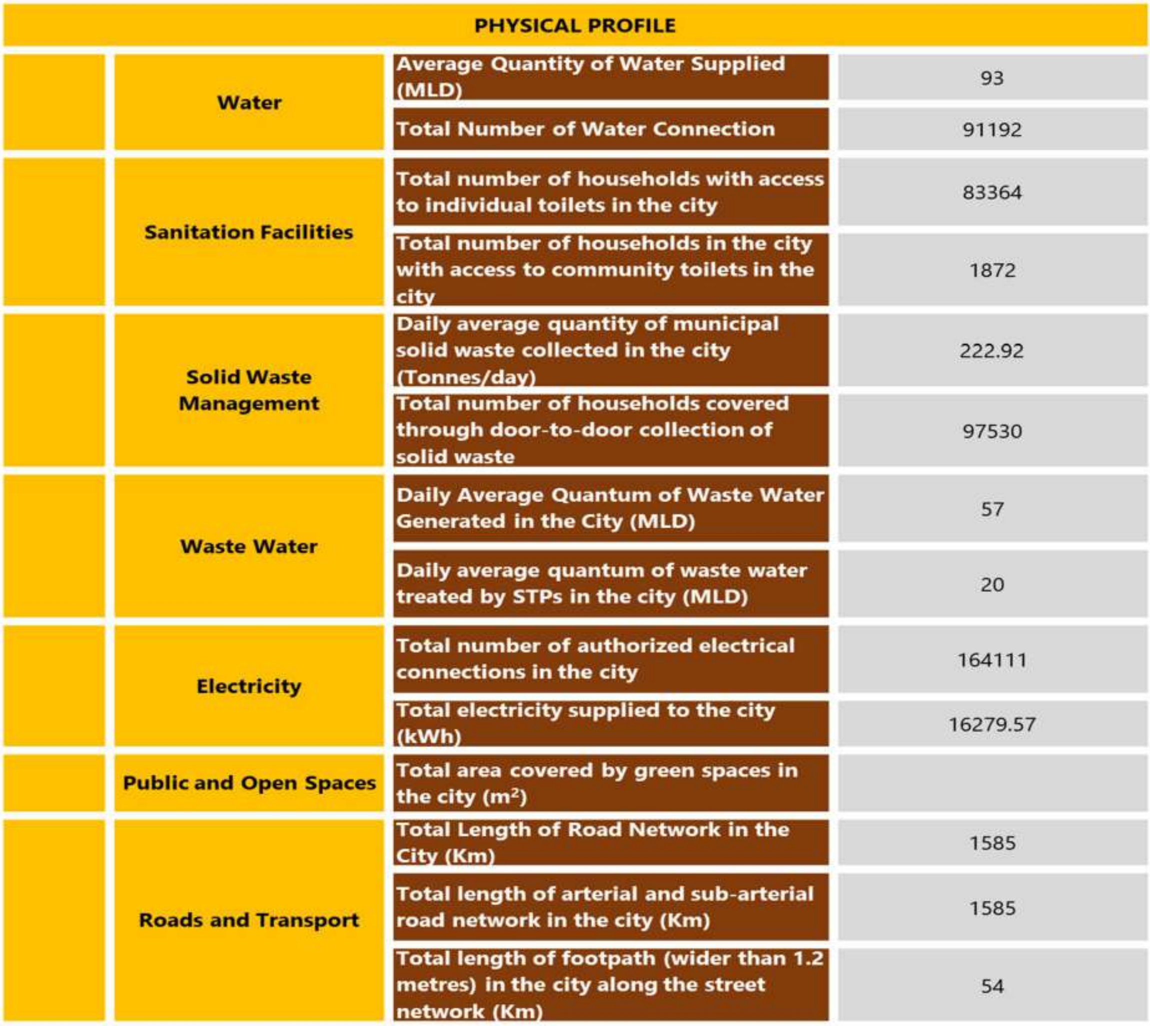
	Total Population	451100
	Total Number of Households	97530

SOCIAL PROFILE

	Education	**Total Number of Schools**	344
		Total Enrolment (Class 1 to 5)	41107
	Health	**Total Number of In-patient Beds**	5571
		Total Health Workforce	5482
	Safety and Security	**Total Strength of Police Force**	1060
		Total Number of CCTV Cameras	95
	Heritage Sites	**Total Number of Heritage Sites**	573

ECONOMIC PROFILE

	Total Population in Working Age Group	719620
	Total Number of Industries	429
	Total Number of Commercial Enterprises	14678
	Total Number of Hotels	367
	Total Capital and Revenue Expenditure for the city in FY 2016-14 (INR Lakhs)	15720.93
	Total VAT Collection in FY 2016-17 (INR Lakhs)	102080.43



PHYSICAL PROFILE			
	Water	Average Quantity of Water Supplied (MLD)	93
		Total Number of Water Connection	91192
	Sanitation Facilities	Total number of households with access to individual toilets in the city	83364
		Total number of households in the city with access to community toilets in the city	1872
	Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	222.92
		Total number of households covered through door-to-door collection of solid waste	97530
	Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	57
		Daily average quantum of waste water treated by STPs in the city (MLD)	20
	Electricity	Total number of authorized electrical connections in the city	164111
		Total electricity supplied to the city (kWh)	16279.57
	Public and Open Spaces	Total area covered by green spaces in the city (m^2)	
	Roads and Transport	Total Length of Road Network in the City (Km)	1585
		Total length of arterial and sub-arterial road network in the city (Km)	1585
		Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	54

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary

Pillars of Comprehensive Development	Category	Indicators
		education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density

Pillars of Comprehensive Development	Category	Indicators
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian

Pillars of Comprehensive Development	Category	Indicators
		crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

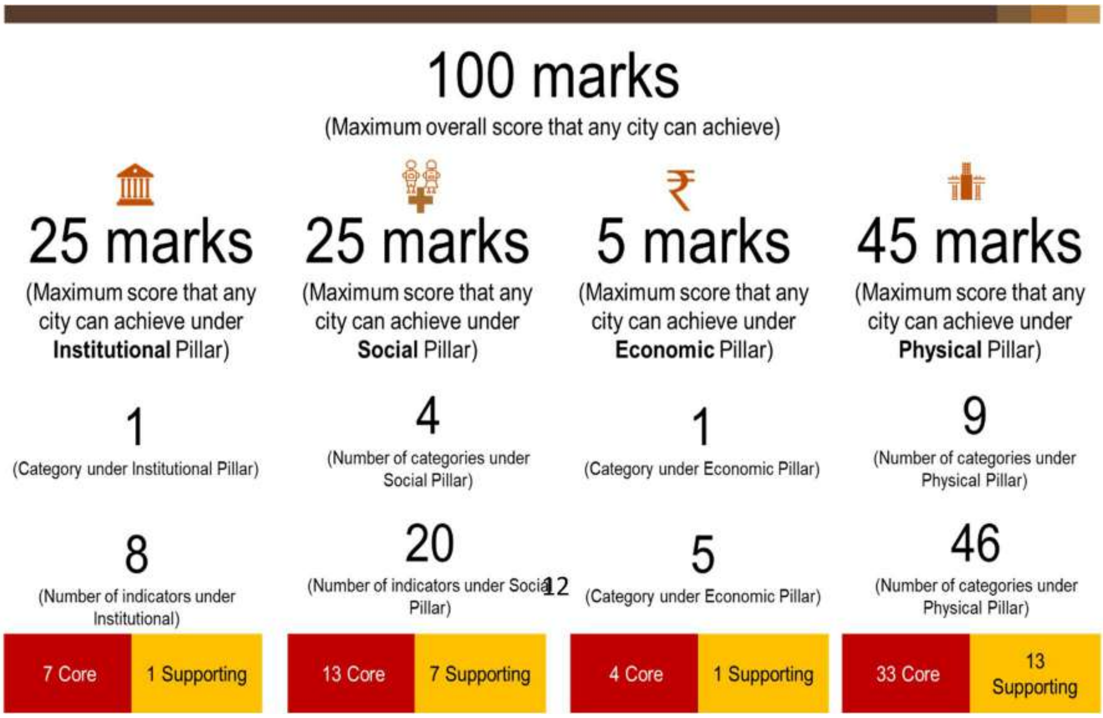
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks
(Maximum overall score that any city can achieve)
25 marks
(Maximum score that any city can achieve under **Institutional** Pillar)
25 marks
(Maximum score that any city can achieve under **Social** Pillar)
5 marks
(Maximum score that any city can achieve under **Economic** Pillar)
45 marks
(Maximum score that any city can achieve under **Physical** Pillar)
1
(Category under Institutional Pillar)
4
(Number of categories under Social Pillar)
1
(Category under Economic Pillar)
9
(Number of categories under Physical Pillar)
8
(Number of indicators under Institutional)
20
(Number of indicators under Social Pillar)
5
(Category under Economic Pillar)
46
(Number of categories under Physical Pillar)
7 Core
1 Supporting
13 Core

4 Core
1 Supporting
33 Core
13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to "maximum within the comparison group" or "absolute benchmarks". For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark -\ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Municipal corporation
Urban Local Body	For Park and Recreation Related Questions	Municipal corporation
Urban Local Body	For Water Supply and Drainage related questions	Municipal corporation
Urban Local Body	For Heritage sites related data	Municipal corporation
Urban Local Body	For Ecological sites related data	Municipal corporation
Urban Local Body	For Housing related data	Nagar vikas pranyas
Urban Local Body	For Building plan related data	Nagar vikas pranyas
Urban Local Body	For Roads related data	Municipal corporation
Urban Local Body	For Solid waste management related data	Municipal corporation
Urban Local Body	For IT services related data	Municipal corporation
Urban Local Body	For Vendor committee related data	Municipal corporation
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	Public health engineering department
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Pollution control board
Development Authority	Building Infrastructure	UIT{nagar vikas pranyas}
	Construction planning	UIT
	Green Building	UIT
	Rain water harvesting	Municipal corporation
	Universal Design Principle	Municipal corporation,UIT

Designated data owners	Subcategories	Data owners at city level
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	AVVNL
State Disaster management authority		Disaster control office
State Education Department		
State Health Department	Health care professionals	Public health department
	Citizen Services	Municipal corporation
	Disease Prevalence	Public health department
	Health Infrastructure	Public health department
State Renewable Energy Development Agency		AVVNL
State Sales / Commercial Taxes Department		Revenue department
Town and Country Planning Department	Land Use	UIT
Traffic and Police Department		City police headquarters
Transport Authorities	Buses	MUNICIPAL CORPORATION
	Registered Vehicles	ROAD TRANSPORT OFFICE
	Sub urban rail transport	Not Applicable
	Mono Rail Authority	Not Applicable
	Tramways	Not Applicable
	Marine Transport Authority	Not Applicable

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 50 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

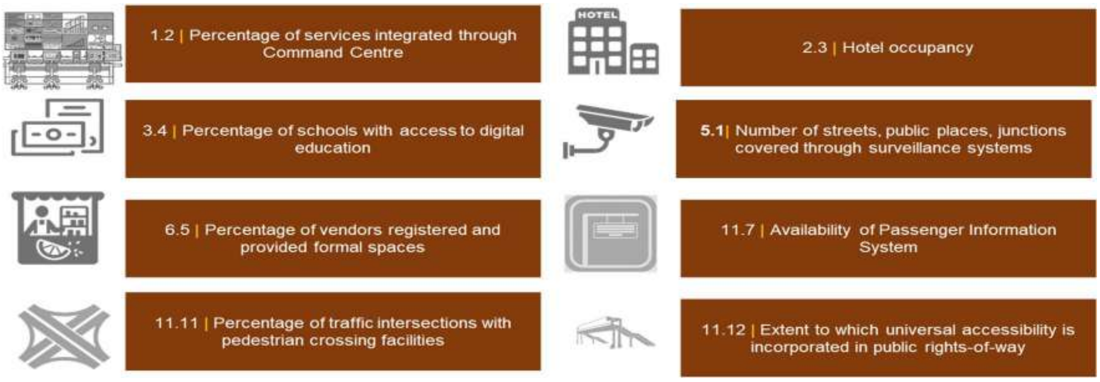
Data Owners	Number of Documents
Sales and Commercial Taxes	**0**
State Education Department	**2**
DISCOM/Electricity Department	**4**
Traffic and Police Department	**0**
Development Authority	**0**
Pollution Control Board	**3**
State Renewable Energy Department	**1**
Town and Country Planning	**0**
State Health Department	**2**
Transport Authority	**2**
Disaster Management	**0**
Urban Local Body	**36**
Total	**50***

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:



1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were

found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate

Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**51.48**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	1
	1.1c trade license	0
	1.1d solid waste management	0
	1.1e water supply	1
	1.1f sewerage/drainage	0
	1.1g fogging	0
	1.1h property tax	0
	1.1i professional tax	0
	1.1j information	0.692307692
	1.1k Grievance redressal	1
	1.1l electricity	1

	1.1m Building plan	1
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**0**
Description	Services integrated through an integrated or a singular operations command centre	0
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**Non-Computable**
Description		
Sub Indicators	1.3a Building plan	NA
	1.3b Birth/Death Certificate	NA
	1.3c water supply	NA
	1.3d solid waste management	NA
	1.3e property tax	NA
	1.3f professional tax (RC)	NA

Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**75.15**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	1073.34
Denominator	Total demand raised for the year	1428.18
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**44.97**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	2391.07
Denominator	Total O&M cost for providing water supply services during the year	5316.88
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**-1625.16**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	-22927.72
Denominator	Total expenditure (revenue and capital accounts) in the same year	1410.8
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	Data Unavailable

Denominator	Total number of wards	55
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**2.56**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	10
Denominator	Total number of historic buildings/sites identified	390
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	Data Unavailable
Denominator	Total number of ecologically important sites identified in the city	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**Non-Computable**
Description	Average Occupancy rate of Hotels	Data Unavailable
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	

Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0.75**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	117.6
Denominator	Total budget of the ULB (capital and revenue)	15720.93
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**1**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	1
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**85.95**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	65885
Denominator	Total population in the age group of 6-14 years	76651
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**84.71**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	29824
Denominator	Total female population in the age group of 6-14 years	35206
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**21.2**

Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	41107
Denominator	Total number of teachers available for primary grades (public and private schools)	1939
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**27.91**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	96
Denominator	Total number of schools	344
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**91.24**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	91.23699757
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**98.11**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	70165680
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**123.5**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	5571

Denominator	Total population of the city	451100
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**121.53**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	5482
Denominator	Total population of the city	451100
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**30**
Description	Total response time for health-related distress calls received in the city	30
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**4.18**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	18873
Denominator	Total population of the city	451100
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**2.59**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	11664
Denominator	Total population of the city	451100
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**5.99**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	95
Denominator	Total length of road network in the city	1585
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**774.55**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	3494
Denominator	Total population of the city	451100
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**12.54**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	438
Denominator	Total crimes recorded in the same year	3494
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**17.73**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	80
Denominator	Total population of the city	451100
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**2.58**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	2567.3
Denominator	Total VAT/GST collection during preceding year	995.1313
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	NA
Denominator	Total Professional Tax collection during preceding year	NA
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**40**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	100
Denominator	Number of construction permits during preceding year	2.5
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	2975
Denominator	Total labour force in the city	76651

Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**24.53**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	750
Denominator	Total number of vendors in the city	3058
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**39.2**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	7602
Denominator	Total number of slum and EWS households in the city	193.93
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**0**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	1327488
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	Data

		Unavailable
Denominator	Total population of the city	451100
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**0.8**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	360000
Denominator	Total population of the city	451100
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	0
Denominator	Total area of the city (total area of all land uses)	64380000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	451100
Denominator	Area allocated for residential land use (in hectares)	32580000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**148.57**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	144898
Denominator	Total number of households in the city	97530
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**116.97**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	191960
Denominator	Total number of electricity connections in the city	164111
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**Non-Computable**
Description	Total number of sustained electrical interruptions in a year	Data Unavailable
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**Non-Computable**

Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	Data Unavailable
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	1095585
Denominator	Total energy consumption from all sources	16279.57
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.29**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	2823529.333
Denominator	Total quantum of water and waste water handled during the period	3390
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.34**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	6950739
Denominator	Total number of street light installations	36701
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	0
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	16279.57
Denominator	Total population of the city	451100
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.58**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	533.52
Denominator	Total area of the city (sq.km)	64.38
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.1**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	47
Denominator	Total population of the city	451100
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	2

Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0.32**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	5
Denominator	Total length of road network in the city	1585
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	1
Denominator	Total number of major transport interchanges in the city	1
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**Non-Computable**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	Data Unavailable
Denominator	Total number of major interchanges in the city	1
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	0

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Denominator	Total number of signalised intersections in the city	4
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**50**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	9
Denominator	Total available on-street parking spaces in the city	18
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**1.7**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	54
Denominator	Total length of road network in the city	3170
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**48**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	12
Denominator	Total number of junctions/ intersections on major roads in the city	25
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**2.12**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	8
Denominator	Total number of public right-of-way areas in the city	377
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**44.72**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	43618
Denominator	Total number of households in the city	97530
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**206.16**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	93
Denominator	Total population of the city	451100
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	0
Denominator	Total number of samples tested for water quality	365
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	Blank
Denominator	Quantum of water put into the distribution system (mld)	93
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**90.53**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	82553

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Denominator	Total number of water connections in the city	91192
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**80.87**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	296
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	366
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**87.39**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	85236
Denominator	Total number of properties in the city	97530
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**215.19**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	209872
Denominator	Total number of properties in the city	97530
Unit	Percentage	
Benchmark	100%	

Indicator No: 13.3	**Collection efficiency of sewerage network**	**35.09**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	20
Denominator	Total waste water generated in the city per day	57
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**285**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	57
Denominator	Total waste water received at treatment plants per day	20
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**21.77**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	345
Denominator	Total length of road network in the city	1585
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**87.26**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	97918
Denominator	Total number of households and establishments in the city	112208
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private	222.92

	operator	
Denominator	Total quantum of MSW generated in the city	222.92
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**19.85**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	1327.5
Denominator	Average MSW generated in the city (tons per month)	6687.6
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**6.85**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	6.8458
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**35.16**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	35.1633
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**98.17**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	98.1666
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	4
Denominator	Total number of noise samples	4

Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	12
Denominator	Total number of samples tested	12
Unit	Percentage	
Benchmark	100%	

LIVEABILITY ASSESSMENT
DRAFT REPORT

Ministry of Urban Development
Government of India

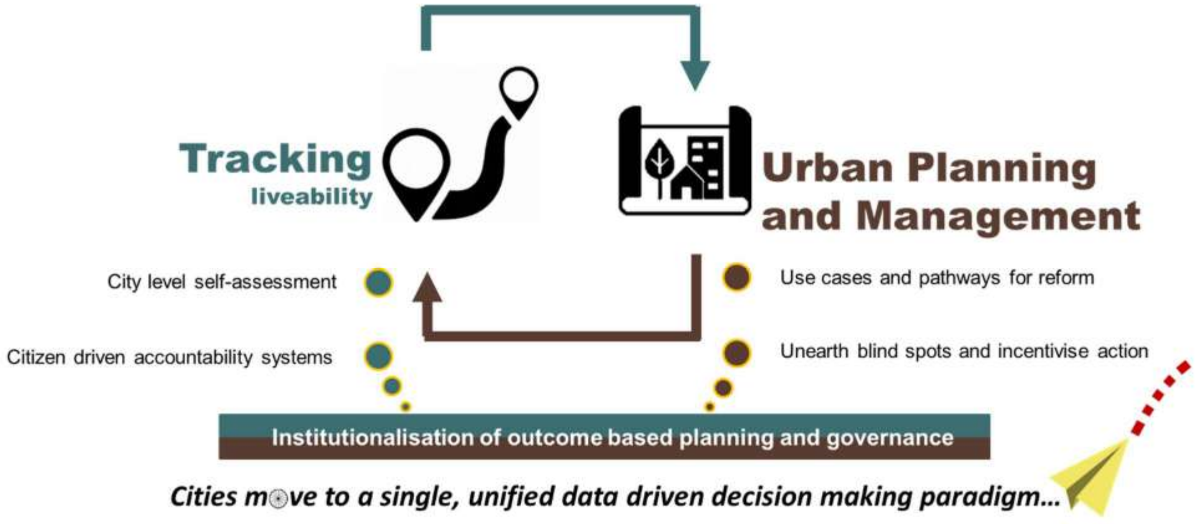
Table 5: Details of Indicator Values 19

1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

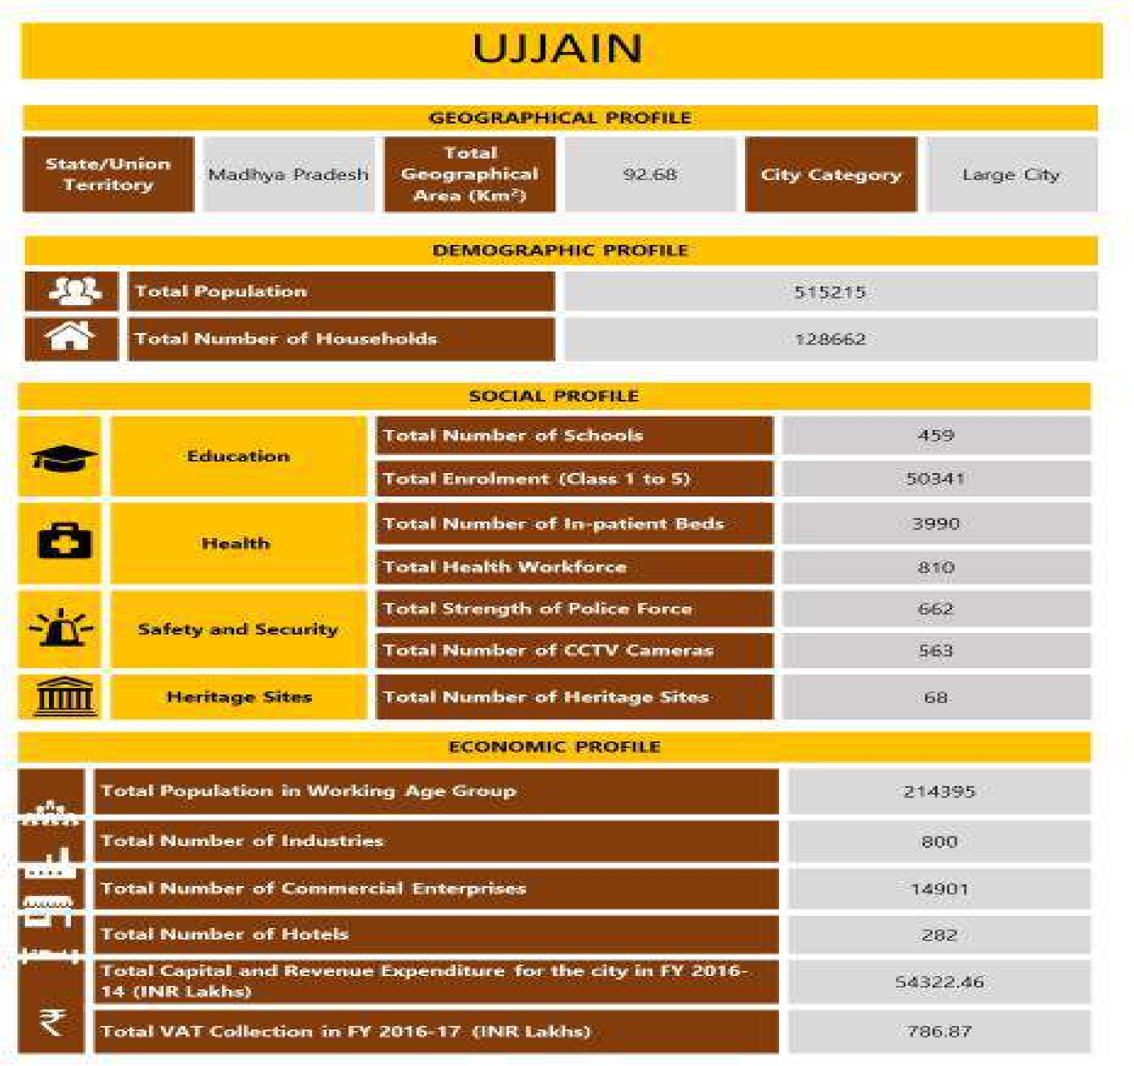


Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



UJJAIN

GEOGRAPHICAL PROFILE

State/Union Territory	Madhya Pradesh	Total Geographical Area (Km²)	92.68	City Category	Large City

DEMOGRAPHIC PROFILE

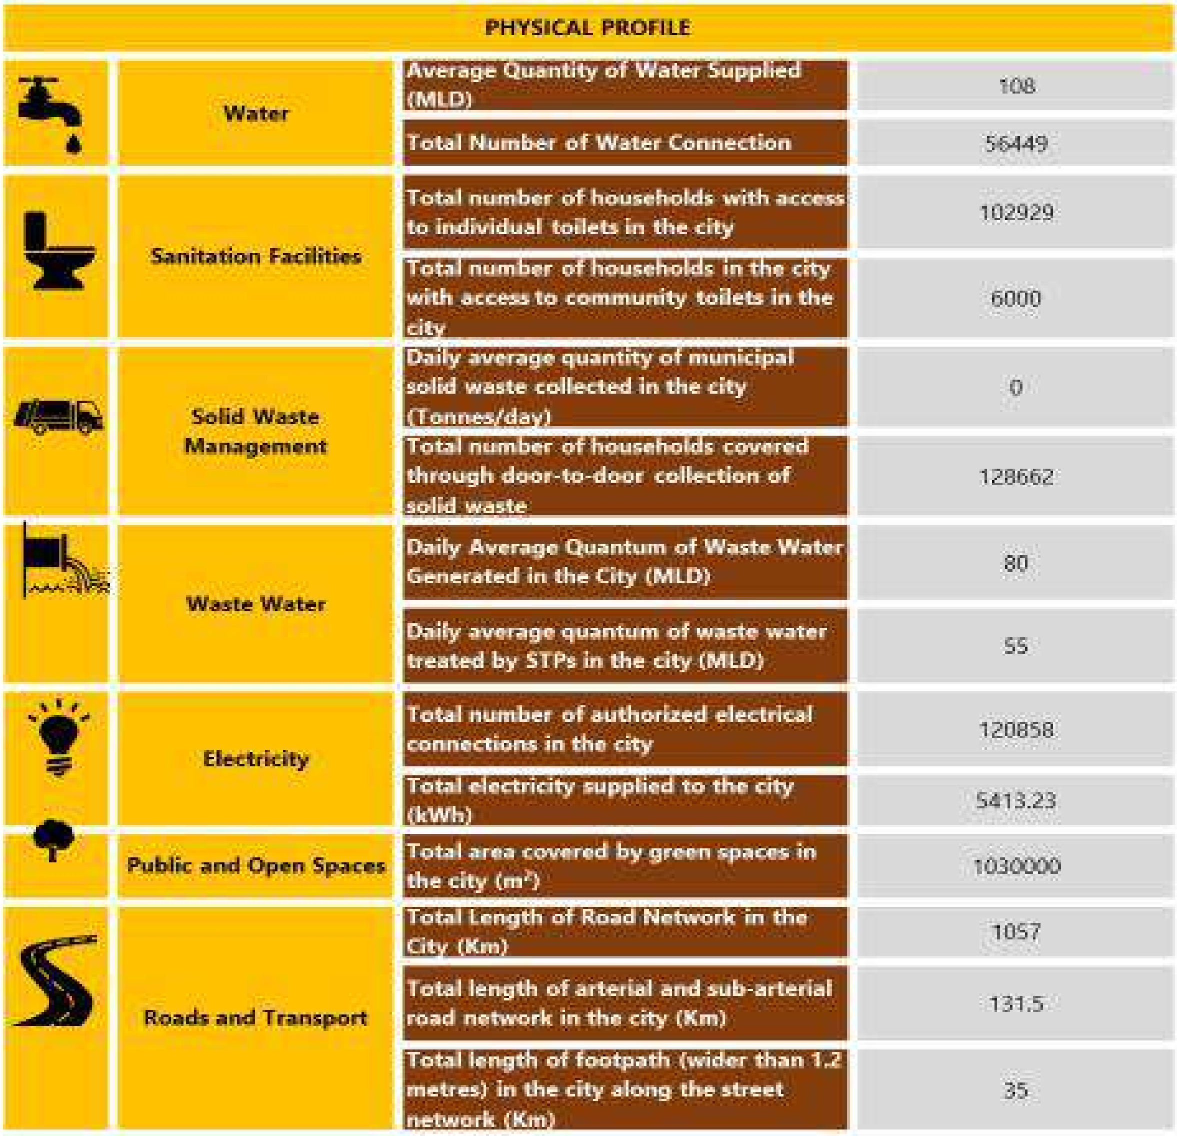
Total Population	515215
Total Number of Households	128662

SOCIAL PROFILE

Education	Total Number of Schools	459
	Total Enrolment (Class 1 to 5)	50341
Health	Total Number of In-patient Beds	3990
	Total Health Workforce	810
Safety and Security	Total Strength of Police Force	662
	Total Number of CCTV Cameras	563
Heritage Sites	Total Number of Heritage Sites	68

ECONOMIC PROFILE

Total Population in Working Age Group	214395
Total Number of Industries	800
Total Number of Commercial Enterprises	14901
Total Number of Hotels	282
Total Capital and Revenue Expenditure for the city in FY 2016-14 (INR Lakhs)	54322.46
Total VAT Collection in FY 2016-17 (INR Lakhs)	786.87



PHYSICAL PROFILE		
Water	Average Quantity of Water Supplied (MLD)	108
	Total Number of Water Connection	56449
Sanitation Facilities	Total number of households with access to individual toilets in the city	102929
	Total number of households in the city with access to community toilets in the city	6000
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	0
	Total number of households covered through door-to-door collection of solid waste	128662
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	80
	Daily average quantum of waste water treated by STPs in the city (MLD)	55
Electricity	Total number of authorized electrical connections in the city	120858
	Total electricity supplied to the city (kWh)	5413.23
Public and Open Spaces	Total area covered by green spaces in the city (m^2)	1030000
Roads and Transport	Total Length of Road Network in the City (Km)	1057
	Total length of arterial and sub-arterial road network in the city (Km)	131.5
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	35

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education

Pillars of Comprehensive Development	Category	Indicators
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places

Pillars of Comprehensive Development	Category	Indicators
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization

Pillars of Comprehensive Development	Category	Indicators
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution

Pillars of Comprehensive Development	Category	Indicators
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

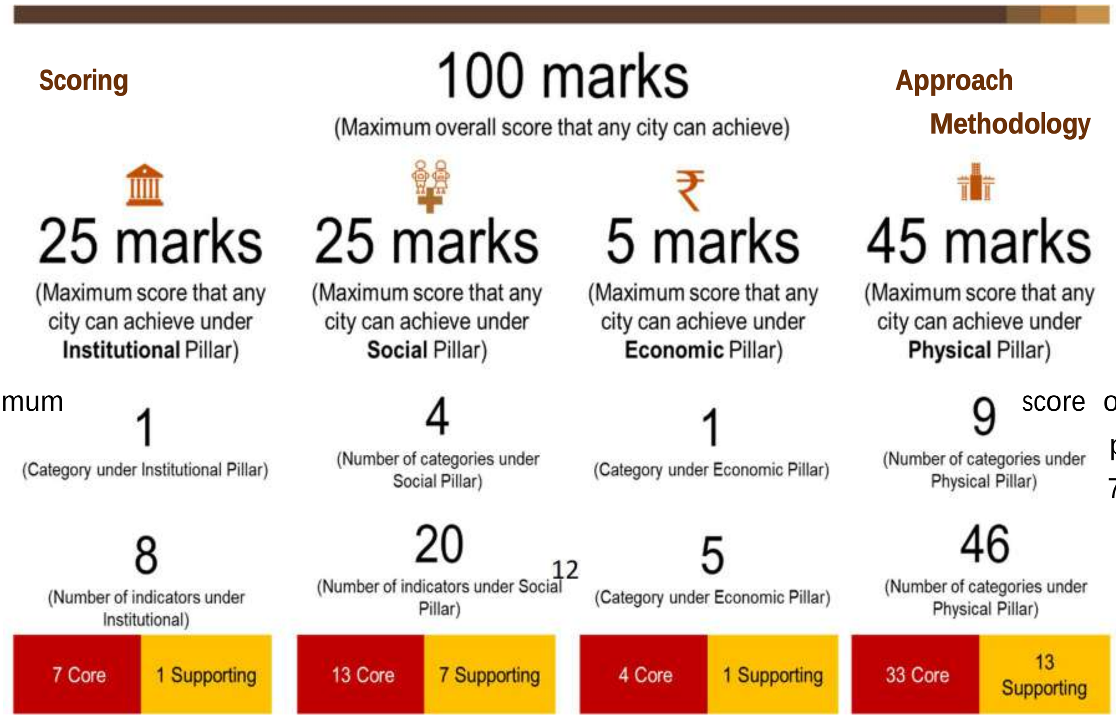
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79



100 marks
(Maximum overall score that any city can achieve)

25 marks (Maximum score that any city can achieve under **Institutional** Pillar)	25 marks (Maximum score that any city can achieve under **Social** Pillar)	5 marks (Maximum score that any city can achieve under **Economic** Pillar)	45 marks (Maximum score that any city can achieve under **Physical** Pillar)
1 (Category under Institutional Pillar)	4 (Number of categories under Social Pillar)	1 (Category under Economic Pillar)	9 (Number of categories under Physical Pillar)
8 (Number of indicators under Institutional)	20 (Number of indicators under Social Pillar)	5 (Category under Economic Pillar)	46 (Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by

the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Sub categories	Data owners at city level
	Accounts	Accounts Department, Ujjain Municipal Corporation
	Park and Recreation	Ujjain Municipal Corporation
	Water Supply and Drainage	Water Supply department, Ujjain Municipal Corporation
	Heritage sites	Ujjain Municipal Corporation
	Ecological sites	Ujjain Municipal Corporation

Designated data owners	Sub categories	Data owners at city level
Urban Local Body	Housing	Housing section, Ujjain Municipal Corporation
	Building plan	Ujjain Municipal Corporation
	Roads	Ujjain Municipal Corporation
	Solid waste management	Solid waste management, Ujjain Municipal Corporation
	IT services	IT Section, Ujjain Municipal Corporation
	Vendor committee	Ujjain Municipal Corporation
	Any other departments involved in providing data for questions mentioned under Urban Local Body	
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Madhya Pradesh Pollution Control Board
Development Authority	Building Infrastructure	Ujjain Development Authority
	Construction planning	Ujjain Development Authority
	Green Building	Ujjain Development Authority
	Rain water harvesting	Ujjain Development Authority
	Universal Design Principle	Ujjain Development Authority
DISCOM /Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Madhya Pradesh Paschim Kshetra Vidyut Vitaran Company limited
State Disaster management authority		District Disaster management Office
State Education Department		District Education Department
State Health Department	Health care professionals	Health Department
	Citizen Services	Health Department
	Disease Prevalence	Health Department
	Health Infrastructure	Health Department
State Renewable Energy Development Agency		Madhya Pradesh New and Renewable Energy Department
State Sales / Commercial Taxes Department		Department of Commercial Taxes
Town and Country Planning Department	Land Use	Town and country planning
Traffic and Police		Traffic and Police Department,

Designated data owners	Sub categories	Data owners at city level
Department		Ujjain
Transport Authorities	Buses	Regional Transport Office
	Registered Vehicles	Madhya Pradesh Transport Department
	Sub urban rail transport	NA
	Mono Rail Authority	NA
	Tramways	NA
	Marine Transport Authority	NA

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 67 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	3
State Education Department	3
DISCOM/Electricity Department	6
Traffic and Police Department	5
Development Authority	7
Pollution Control Board	3
State Renewable Energy Department	5
Town and Country Planning	2
State Health Department	4
Transport Authority	9
Disaster Management	2
Urban Local Body	18
Total	67

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1| Number of streets, public places, junctions covered through surveillance systems

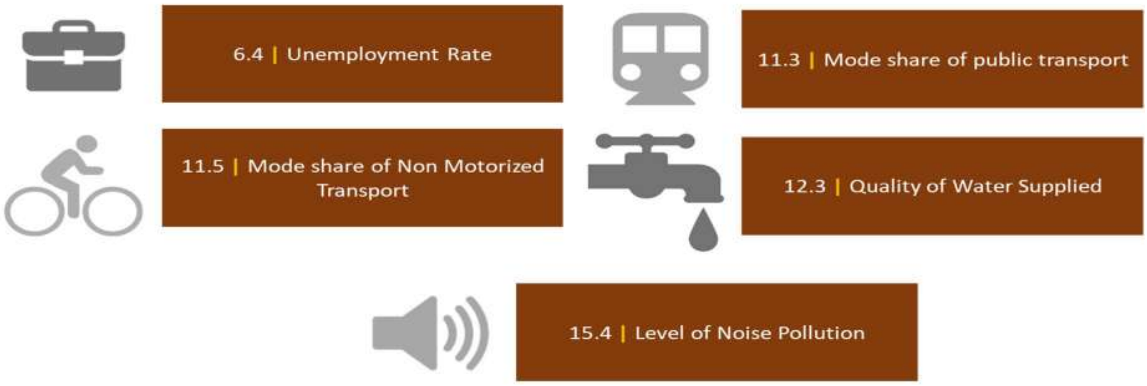
6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.



6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

8. LA - Universal Design Principles

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	**Indicator title**
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**88.56**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	1
	1.1c trade license	1
	1.1d solid waste management	1
	1.1e water supply	1
	1.1f sewerage/drainage	0.666666667
	1.1g fogging	0
	1.1h property tax	1
	1.1i professional tax	1
	1.1j information	0.846153846
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	1
Unit	Percentage	
Benchmark	100%	

Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**11.9**
Description	Services integrated through an integrated or a singular operations command centre	2.5
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**10.88**
Description		
Sub Indicators	1.3a Building plan	0.023195392
	1.3b Birth/Death Certificate	NA
	1.3c water supply	0.003245962
	1.3d solid waste management	0.000976291
	1.3e property tax	0.000405745
	1.3f professional tax (RC)	0.072407801
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	0.024261716
	1.3i information	0.000190212
	1.3j electricity	0.745354052
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**0**
Description		
Sub Indicators	1.4a water supply	0
	1.4b solid waste	0
	1.4c street lights	0
	1.4d sewerage	0
	1.4e professional tax	0
	1.4f parks and recreational spaces	0
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**39.41**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	2154.15
Denominator	Total demand raised for the year	5466.53
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**43.65**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	689.08

Denominator	Total O&M cost for providing water supply services during the year	1578.7
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**-15.94**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	-4192.65
Denominator	Total expenditure (revenue and capital accounts) in the same year	26296.81
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	54
Denominator	Total number of wards	54
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**16.93**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	97
Denominator	Total number of historic buildings/sites identified	573
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**66.67**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	2
Denominator	Total number of ecologically important sites identified in the city	3

Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**48.57**
Description	Average Occupancy rate of Hotels	48.57142857
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0.13**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	69.6
Denominator	Total budget of the ULB (capital and revenue)	54322.46
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**689**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	689
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**83.17**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	77603
Denominator	Total population in the age group of 6-14 years	93311
Unit	Percentage	
Benchmark	100%	

Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**81.79**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	36050
Denominator	Total female population in the age group of 6-14 years	44074
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**97.56**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	50341
Denominator	Total number of teachers available for primary grades (public and private schools)	516
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**0.22**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	1
Denominator	Total number of schools	459
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**87.87**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	87.87352771
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**92.38**

Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	80114100
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**77.44**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	3990
Denominator	Total population of the city	515215
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**15.72**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	810
Denominator	Total population of the city	515215
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**30**
Description	Total response time for health-related distress calls received in the city	30
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**8.35**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	43005
Denominator	Total population of the city	515215

Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	38
Denominator	Total population of the city	515215
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**53.26**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	563
Denominator	Total length of road network in the city	1057
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**305.31**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	1573
Denominator	Total population of the city	515215
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**99.17**
Formula:	*Numerator / Denominator*	

Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	1560
Denominator	Total crimes recorded in the same year	1573
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**13.39**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	69
Denominator	Total population of the city	515215
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**-19.39**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	-189.26
Denominator	Total VAT/GST collection during preceding year	9.7613
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**-4.86**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	-26.47
Denominator	Total Professional Tax collection during preceding year	544.4
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 6.3	**Increase in issuance of Construction Permits**	**31.28**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	563
Denominator	Number of construction permits during preceding year	18
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	22085
Denominator	Total labour force in the city	93311
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**90.45**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	2110
Denominator	Total number of vendors in the city	2332.775
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**7.06**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	5183

Denominator	Total number of slum and EWS households in the city	733.96
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**23.27** 11577502575360
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	**Per capita availability of green spaces**	**2**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	1030000
Denominator	Total population of the city	515215
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	**Per capita availability of public and recreational places**	**0.98**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	504450
Denominator	Total population of the city	515215
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**0.58**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	539400
Denominator	Total area of the city (total area of all land uses)	92680000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	515215
Denominator	Area allocated for residential land use (in hectares)	35930000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**74.19**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	95450
Denominator	Total number of households in the city	128662
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**1.57**
Formula:	*Numerator / Denominator*	

Numerator	Number of electrical connections (residential and commercial) with smart meters	1896
Denominator	Total number of electricity connections in the city	120858
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**5837**
Description	Total number of sustained electrical interruptions in a year	5837
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.8**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	44028
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0.34**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	1037.05
Denominator	Total energy consumption from all sources	24613.23
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.28**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	1101097.25

Denominator	Total quantum of water and waste water handled during the period	4890
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.32**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	24287049
Denominator	Total number of street light installations	39320
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	2000
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	276971
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	24613.23
Denominator	Total population of the city	515215
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.7**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	164
Denominator	Total area of the city (sq.km)	92.68
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.11**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	57
Denominator	Total population of the city	515215
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	27.52
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	1057
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	NA

Denominator	Total number of major transport interchanges in the city	3
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	0.33
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**0.67**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	2
Denominator	Total number of major interchanges in the city	3
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	0
Denominator	Total number of signalised intersections in the city	16
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	0
Denominator	Total available on-street parking spaces in the city	0
Unit		

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**1.66**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	35
Denominator	Total length of road network in the city	2114
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	20
Denominator	Total number of junctions/ intersections on major roads in the city	20
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**23.26**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	40
Denominator	Total number of public right-of-way areas in the city	172
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**11.66**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	15000
Denominator	Total number of households in the city	128662

Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**209.62**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	108
Denominator	Total population of the city	515215
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	48
Denominator	Total number of samples tested for water quality	48
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**0.51**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	0.5464
Denominator	Quantum of water put into the distribution system (mld)	108
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**15.91**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	8981
Denominator	Total number of water connections in the city	56449
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**2.57**

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	58
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	2258
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**83.3**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	119583
Denominator	Total number of properties in the city	143563
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**58.62**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	84162
Denominator	Total number of properties in the city	143563
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**68.75**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	55
Denominator	Total waste water generated in the city per day	80
Unit	Percentage	
Benchmark	100%	

Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	0
Denominator	Total waste water received at treatment plants per day	55
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**1.32**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	14
Denominator	Total length of road network in the city	1057
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	143563
Denominator	Total number of households and establishments in the city	143563
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	0
Denominator	Total quantum of MSW generated in the city	180
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**Non-**

Formula:	*Numerator / Denominator*	**Computable**
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	5156
Denominator	Average MSW generated in the city (tons per month)	0
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**13.07**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	13.07
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**14.75**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	14.75
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**72.85**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	72.85
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	44
Denominator	Total number of noise samples	96
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**0**

Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	0
Denominator	Total number of samples tested	48
Unit	Percentage	
Benchmark	100%

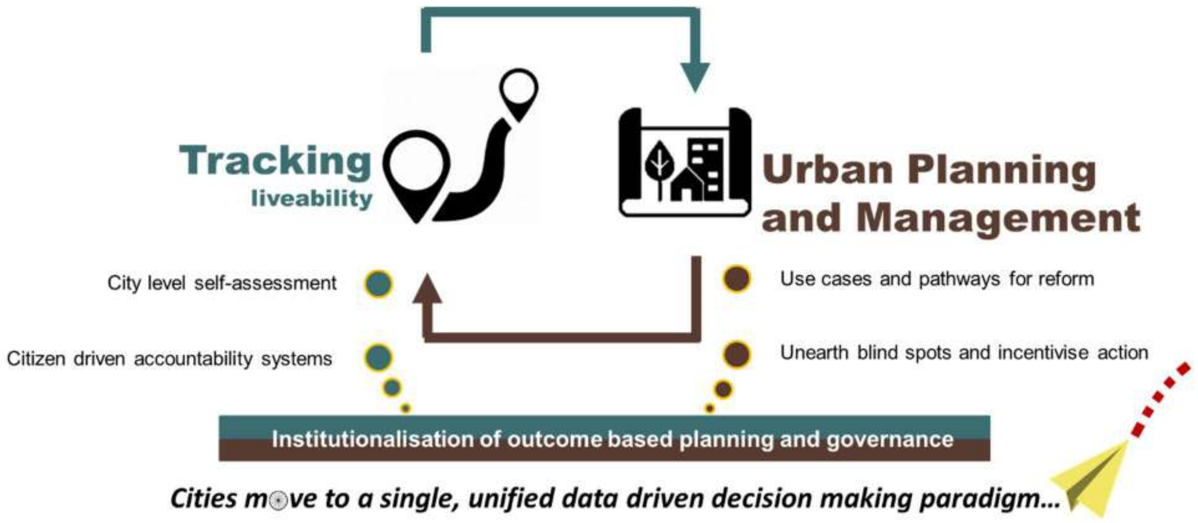
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



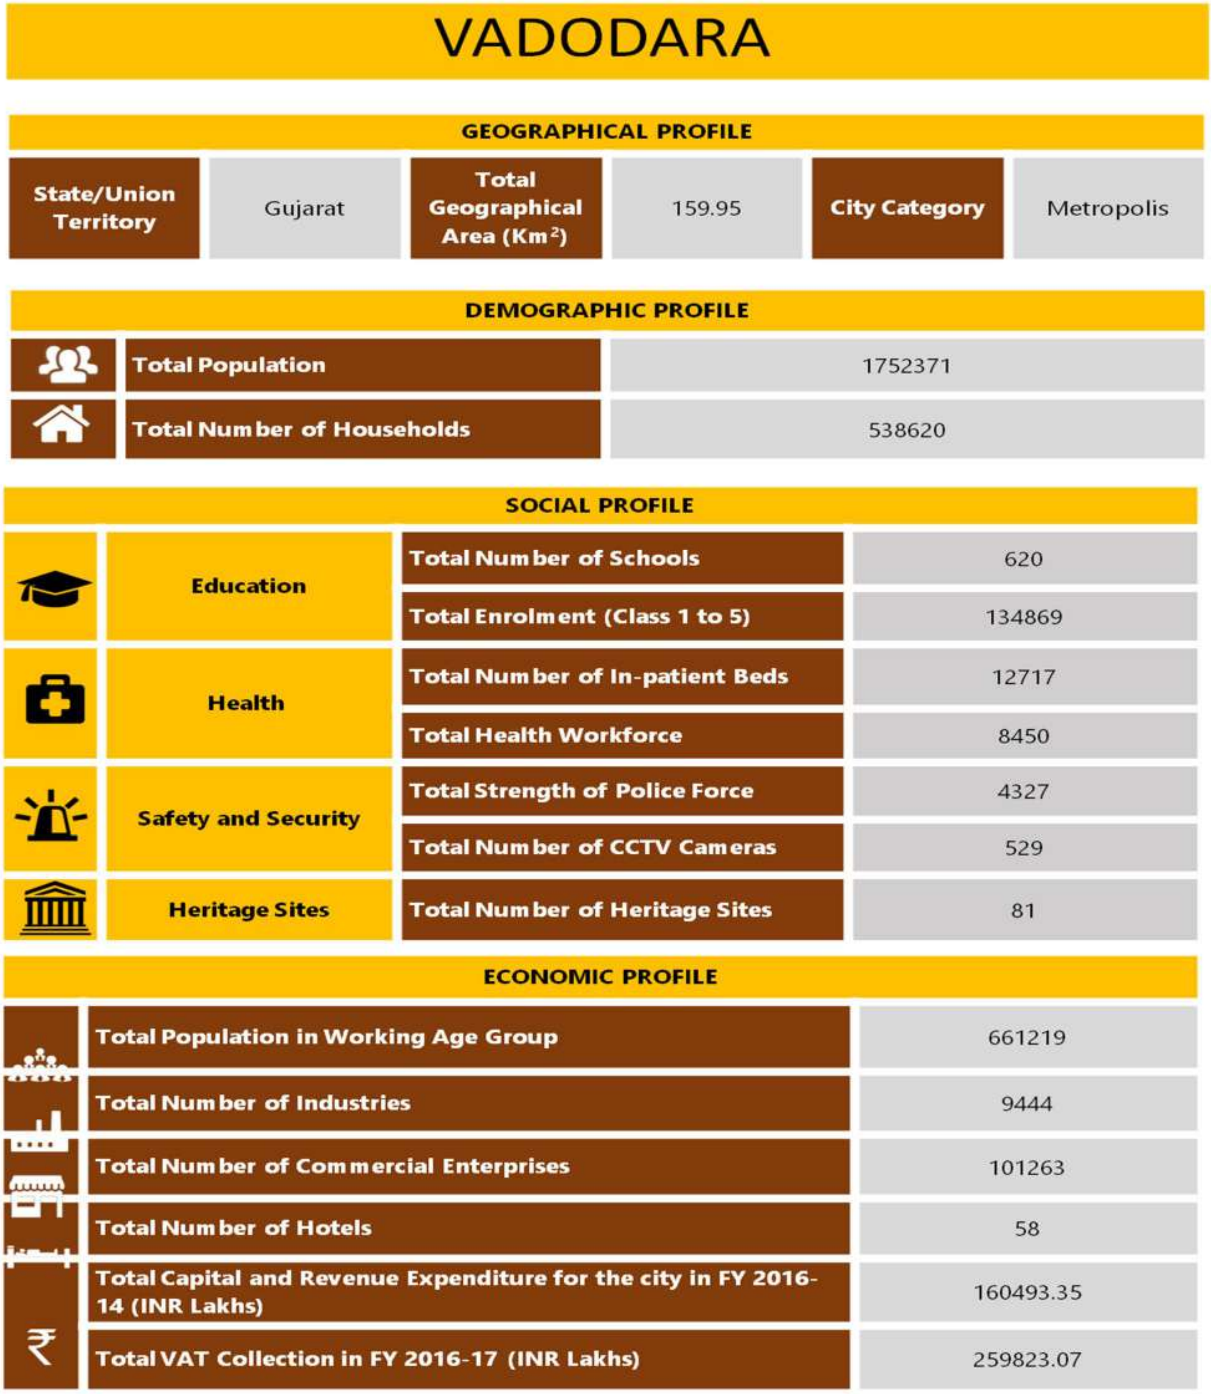
Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance

Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



VADODARA

GEOGRAPHICAL PROFILE

State/Union Territory	Gujarat	**Total Geographical Area (Km^2)**	159.95	**City Category**	Metropolis

DEMOGRAPHIC PROFILE

Total Population	1752371
Total Number of Households	538620

SOCIAL PROFILE

Education	**Total Number of Schools**	620
	Total Enrolment (Class 1 to 5)	134869
Health	**Total Number of In-patient Beds**	12717
	Total Health Workforce	8450
Safety and Security	**Total Strength of Police Force**	4327
	Total Number of CCTV Cameras	529
Heritage Sites	**Total Number of Heritage Sites**	81

ECONOMIC PROFILE

Total Population in Working Age Group	661219
Total Number of Industries	9444
Total Number of Commercial Enterprises	101263
Total Number of Hotels	58
Total Capital and Revenue Expenditure for the city in FY 2016-14 (INR Lakhs)	160493.35
Total VAT Collection in FY 2016-17 (INR Lakhs)	259823.07

PHYSICAL PROFILE		
Water	**Average Quantity of Water Supplied (MLD)**	470
	Total Number of Water Connection	678363
Sanitation Facilities	**Total number of households with access to individual toilets in the city**	638539
	Total number of households in the city with access to community toilets in the city	1344
Solid Waste Management	**Daily average quantity of municipal solid waste collected in the city (Tonnes/day)**	1200
	Total number of households covered through door-to-door collection of solid waste	538620
Waste Water	**Daily Average Quantum of Waste Water Generated in the City (MLD)**	359
	Daily average quantum of waste water treated by STPs in the city (MLD)	341
Electricity	**Total number of authorized electrical connections in the city**	665380
	Total electricity supplied to the city (kWh)	1883118077
Public and Open Spaces	**Total area covered by green spaces in the city (m^2)**	26600000
Roads and Transport	**Total Length of Road Network in the City (Km)**	1455
	Total length of arterial and sub-arterial road network in the city (Km)	78
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	149.55

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population

Pillars of Comprehensive Development	Category	Indicators
		enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services

Pillars of Comprehensive Development	Category	Indicators
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting

Pillars of Comprehensive Development	Category	Indicators
		facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

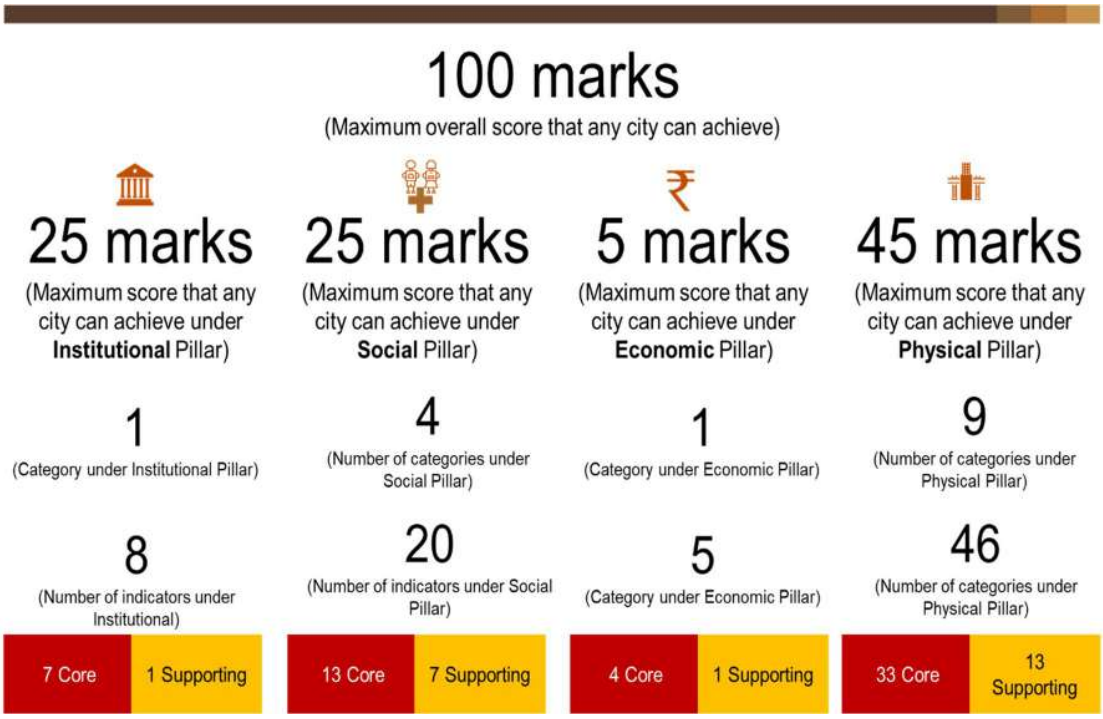
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks

(Maximum overall score that any city can achieve)

25 marks (Maximum score that any city can achieve under **Institutional** Pillar)	25 marks (Maximum score that any city can achieve under **Social** Pillar)	5 marks (Maximum score that any city can achieve under **Economic** Pillar)	45 marks (Maximum score that any city can achieve under **Physical** Pillar)
1 (Category under Institutional Pillar)	4 (Number of categories under Social Pillar)	1 (Category under Economic Pillar)	9 (Number of categories under Physical Pillar)
8 (Number of indicators under Institutional)	20 (Number of indicators under Social Pillar)	5 (Category under Economic Pillar)	46 (Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Accounts dep.
Urban Local Body	For Park and Recreation Related Questions	Parks and Garden
Urban Local Body	For Water Supply and Drainage related questions	Housing building and Drainage
Urban Local Body	For Heritage sites related data	Heritage dep.
Urban Local Body	For Ecological sites related data	Yet not charge taken by any department
Urban Local Body	For Housing related data	Housing building
Urban Local Body	For Building plan related data	Town planning
Urban Local Body	For Roads related data	Road dep.
Urban Local Body	For Solid waste management related data	Solid waste management
Urban Local Body	For IT services related data	IT dep.
Urban Local Body	For Vendor committee related data	Estate dep.
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	Affordable housing
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Pollution control board
Development Authority	Building Infrastructure	Town planning
	Construction planning	Housing building, town

Designated data owners	Subcategories	Data owners at city level
		planning
	Green Building	Town planing
	Rain water harvesting	Town planing
	Universal Design Principle	Solid west management
DISCOM /Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	MGVCL/ Madhya Gujarat
State Disaster management authority		Fire and Emergency services
State Education Department		Education dep. (SSA)
State Health Department	Health care professionals	Health dep.
	Citizen Services	Health dep.
	Disease Prevalence	Health dep.
	Health Infrastructure	Health dep.
State Renewable Energy Development Agency		Gujarat Energy Development Agency (GEDA)
State Sales / Commercial Taxes Department		state tax Joint commissioner office
Town and Country Planning Department	Land Use	Development authority, town planning department
Traffic and Police Department		Traffic and Police Department
Transport Authorities	Buses	Vechiclepool department
	Registered Vehicles	RTO Regional transport office
	Sub urban rail transport	N.A.
	Mono Rail Authority	N.A.
	Tramways	N.A.
	Marine Transport Authority	N.A.

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 71 number of documents.

Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	1
State Education Department	6
DISCOM/Electricity Department	4
Traffic and Police Department	3
Development Authority	5
Pollution Control Board	0
State Renewable Energy Department	0
Town and Country Planning	0
State Health Department	2
Transport Authority	3
Disaster Management	0
Urban Local Body	47
Total	71*

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

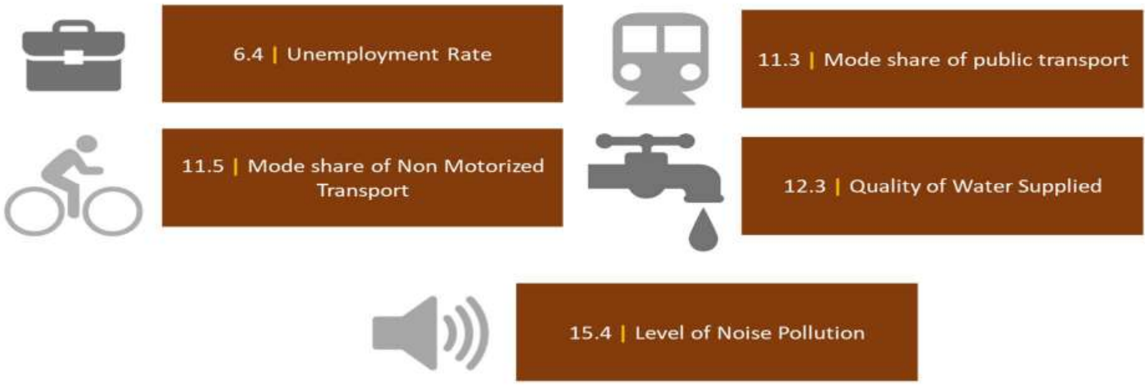
6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.



6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

7. LA - Street Vendors
8. LA - Universal Design Principles

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**59.12**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	0
	1.1b death certificate	0
	1.1c trade license	1
	1.1d solid waste management	0
	1.1e water supply	1
	1.1f sewerage/drainage	1
	1.1g fogging	0
	1.1h property tax	1
	1.1i professional tax	0.25
	1.1j information	0.769230769
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	0.666666667
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**57.14**
Description	Services integrated through an integrated or a singular operations command centre	12
Unit	Percentage	
Benchmark	100%	

Indicator No. 1.3	**Percentage of citizens using online services**	**0.27**
Description		
Sub Indicators	1.3a Building plan	NA
	1.3b Birth/Death Certificate	0.002300122
	1.3c water supply	1.00104E-05
	1.3d solid waste management	NA
	1.3e property tax	0.00577906
	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	0.007841796
	1.3h complaints/ grievance redressal	0.000388997
	1.3i information	NA
	1.3j electricity	1.5029E-06
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**0**
Description		
Sub Indicators	1.4a water supply	0
	1.4b solid waste	0
	1.4c street lights	0
	1.4d sewerage	0
	1.4e professional tax	0
	1.4f parks and recreational spaces	0
	1.4g building plan	0
Unit	Days	
Benchmark	0	

Indicator No: 1.5	**Tax collected as percentage of tax billed**	**114.31**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	20980.27
Denominator	Total demand raised for the year	18354.48
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**118.33**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	6611.12
Denominator	Total O&M cost for providing water supply services during the year	5587.15
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**9.67**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	29580.47
Denominator	Total expenditure (revenue and capital accounts) in the same year	305870.71
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	0
Denominator	Total number of wards	12
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**2.94**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	2
Denominator	Total number of historic buildings/sites identified	68
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	0
Denominator	Total number of ecologically important sites identified in the city	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**Non-Computable**
Description	Average Occupancy rate of Hotels	Data Unavailable
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0.21**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	339.9
Denominator	Total budget of the ULB (capital and revenue)	160493.35
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**2032**

Description	Number of cultural/sports events hosted by the city authority in the preceding year	2032
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**77.01**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	216536
Denominator	Total population in the age group of 6-14 years	281164
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**77.5**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	97977
Denominator	Total female population in the age group of 6-14 years	126420
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**37.75**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	134869
Denominator	Total number of teachers available for primary grades (public and private schools)	3573
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**73.55**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	456

Denominator	Total number of schools	620
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**80.43** 80.42610338
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**97.42** 745192100
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	**97.42**

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**72.57**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	12717
Denominator	Total population of the city	1752371
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**48.22**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	8450
Denominator	Total population of the city	1752371
Unit	Number per 10,000 population	

Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**11**
Description	Total response time for health-related distress calls received in the city	11
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.72**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	12693
Denominator	Total population of the city	1752371
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.11**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	1899
Denominator	Total population of the city	1752371
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**36.36**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	529
Denominator	Total length of road network in the city	1455
Unit	Percentage	
Benchmark	100%	

Indicator No: 5.2	**Number of recorded crimes per lakh population**	**1415.68**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	24808
Denominator	Total population of the city	1752371
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**11.56**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	2867
Denominator	Total crimes recorded in the same year	24808
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**53.7**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	941
Denominator	Total population of the city	1752371
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**11.31**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	26407.95
Denominator	Total VAT/GST collection during preceding year	2334.1512
Unit	Percentage	

Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**8.8**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	334.81
Denominator	Total Professional Tax collection during preceding year	3803.46
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**-2.53**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	-44
Denominator	Number of construction permits during preceding year	17.41
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	16801
Denominator	Total labour force in the city	281164
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**7.22**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	822
Denominator	Total number of vendors in the city	11379
Unit	Percentage	

Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**61.65**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	24707
Denominator	Total number of slum and EWS households in the city	400.75
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**0.02** 11026593625
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	
Unit	Percentage	
Benchmark	100%	**0.02**

Category 8: Public Open Spaces

Indicator No: 8.1	**Per capita availability of green spaces**	**15.18**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	26600000
Denominator	Total population of the city	1752371
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	**Per capita availability of public and recreational places**	**15.89**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	27846887

Denominator	Total population of the city	1752371
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**99.6**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	159310000
Denominator	Total area of the city (total area of all land uses)	159950000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**17329.62**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	1752371
Denominator	Area allocated for residential land use (in hectares)	101.12
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**104.41**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	562385
Denominator	Total number of households in the city	538620
Unit	Percentage	

Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	665380
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**1027**
Description	Total number of sustained electrical interruptions in a year	1027
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.81**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	24594
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	12338.44
Denominator	Total energy consumption from all sources	1883136259
Unit	Percentage	
Benchmark	10%	

Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.27**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	6652066.333
Denominator	Total quantum of water and waste water handled during the period	24330
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.33**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	23220907
Denominator	Total number of street light installations	82000
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	649330.41
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.52**
Formula:	*Numerator / Denominator*	

Numerator	Total energy consumption (for all uses) in the city	1883136259
Denominator	Total population of the city	1752371
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.64**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	274
Denominator	Total area of the city (sq.km)	159.95
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.05**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	80
Denominator	Total population of the city	1752371
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	4
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0.33**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	4.8
Denominator	Total length of road network in the city	1455
Unit	Percentage	

Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	NA
Denominator	Total number of major transport interchanges in the city	8
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	1
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**0.25**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	2
Denominator	Total number of major interchanges in the city	8
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**25**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	8
Denominator	Total number of signalised intersections in the city	32
Unit	Percentage	
Benchmark	>=75	

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Indicator No: 11.9	**Availability of paid parking spaces**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	5
Denominator	Total available on-street parking spaces in the city	5
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**5.14**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	149.55
Denominator	Total length of road network in the city	2910
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**38.46**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	35
Denominator	Total number of junctions/ intersections on major roads in the city	91
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**1.07**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	129
Denominator	Total number of public right-of-way areas in the city	12107
Unit	Percentage	

Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**97.96**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	527617
Denominator	Total number of households in the city	538620
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**268.21**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	470
Denominator	Total population of the city	1752371
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	1917
Denominator	Total number of samples tested for water quality	76874
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	Blank
Denominator	Quantum of water put into the distribution system (mld)	470
Unit	Percentage	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**1.82**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	12372
Denominator	Total number of water connections in the city	678363
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**4.47**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	97
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	2171
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**191.42**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	1242955
Denominator	Total number of properties in the city	649327
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**98.34**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	638539
Denominator	Total number of properties in the city	649327

Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**94.99**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	341
Denominator	Total waste water generated in the city per day	359
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	341
Denominator	Total waste water received at treatment plants per day	341
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**27.63**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	402
Denominator	Total length of road network in the city	1455
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**99.3**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	635415
Denominator	Total number of households and establishments in the city	639883
Unit	Percentage	
Benchmark	100% door to door collection	

Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	1200
Denominator	Total quantum of MSW generated in the city	1200
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**8.1**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	2917
Denominator	Average MSW generated in the city (tons per month)	36000
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**17**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	17
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**23.4**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	23.4
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**104.6**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	104.6
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean	

	concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	Data Unavailable
Denominator	Total number of noise samples	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	Data Unavailable
Denominator	Total number of samples tested	37
Unit	Percentage	
Benchmark	100%

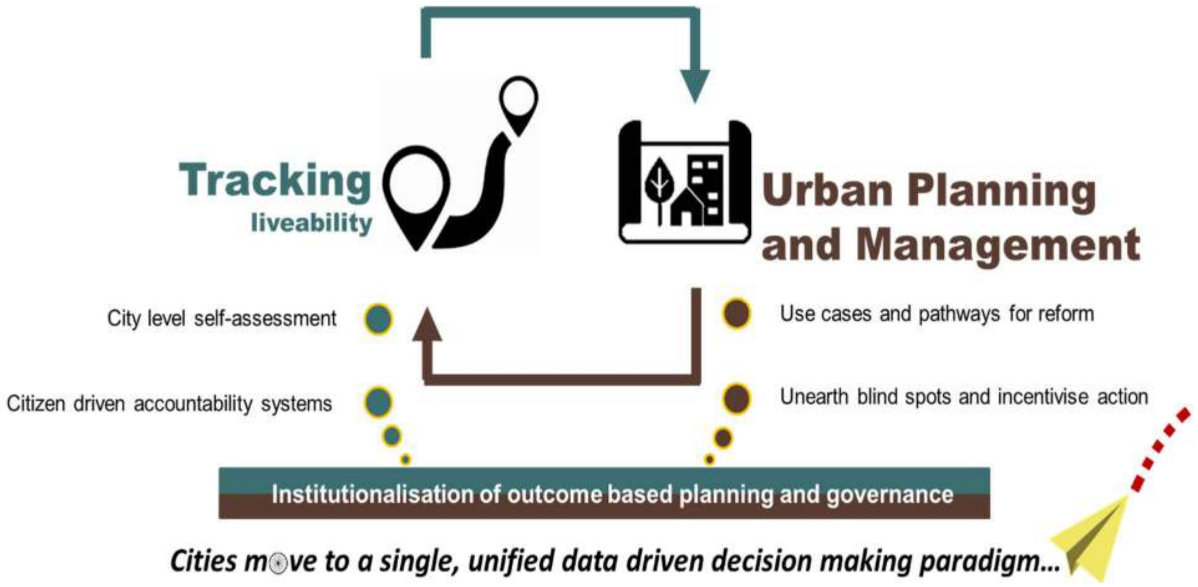
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

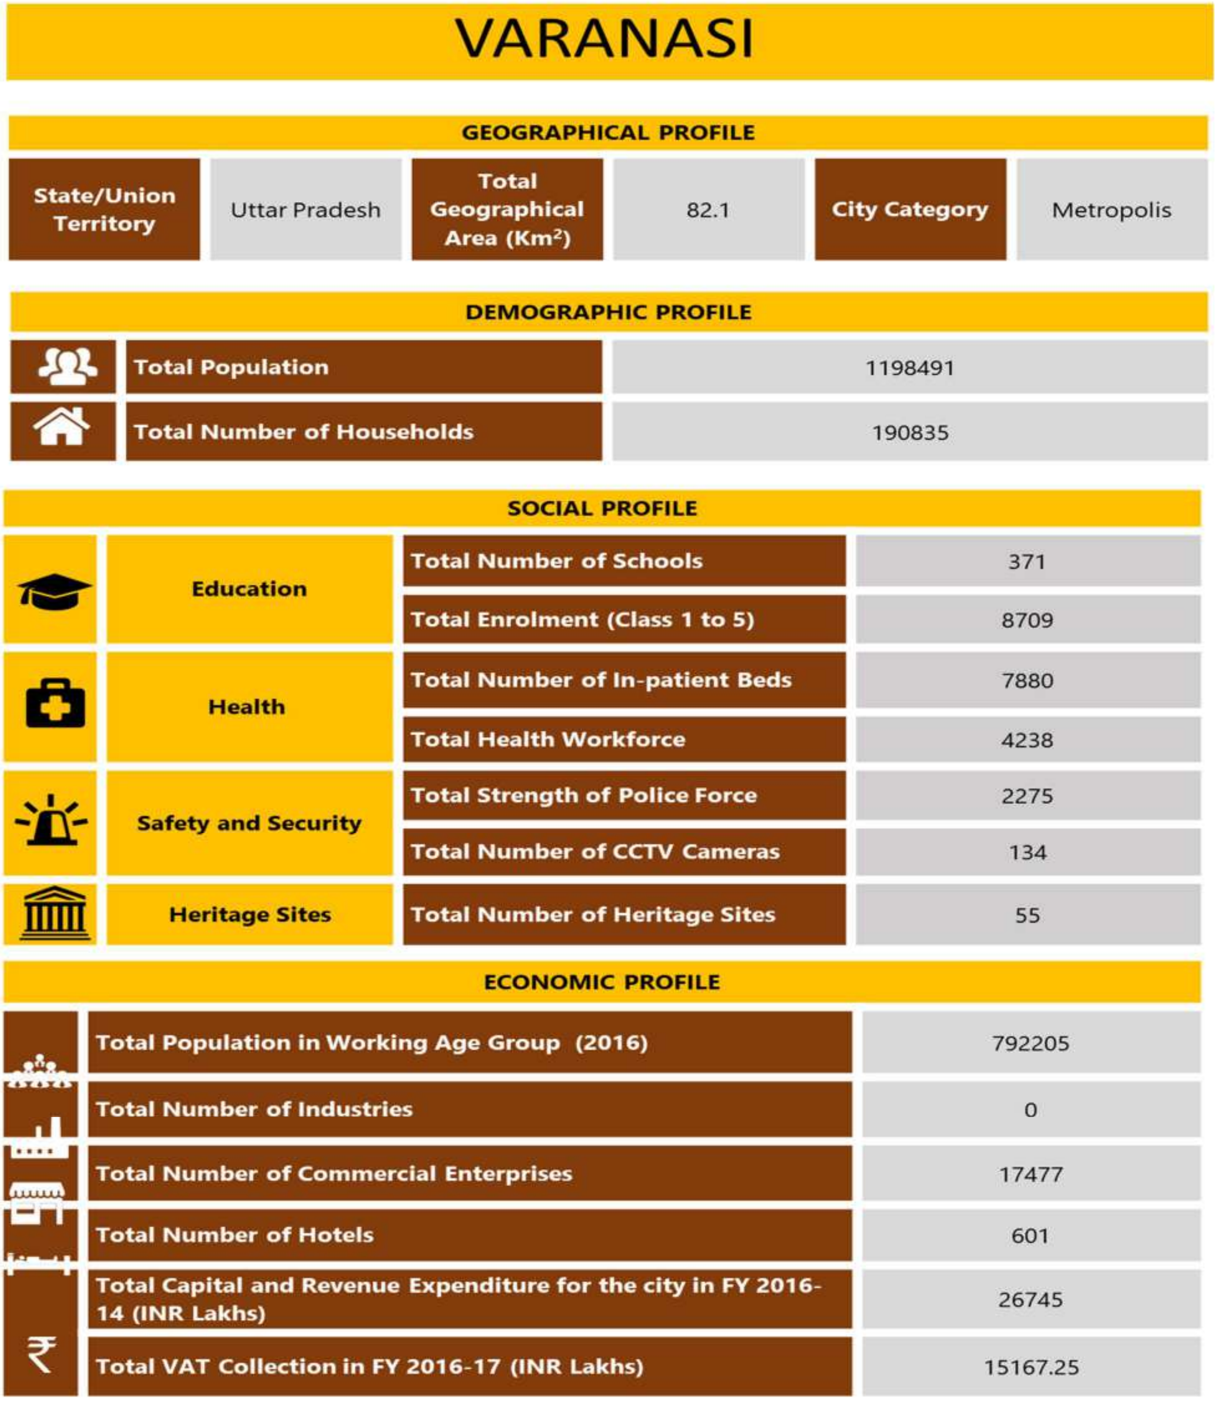


Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



VARANASI

GEOGRAPHICAL PROFILE

State/Union Territory	Uttar Pradesh	**Total Geographical Area (Km²)**	82.1	**City Category**	Metropolis

DEMOGRAPHIC PROFILE

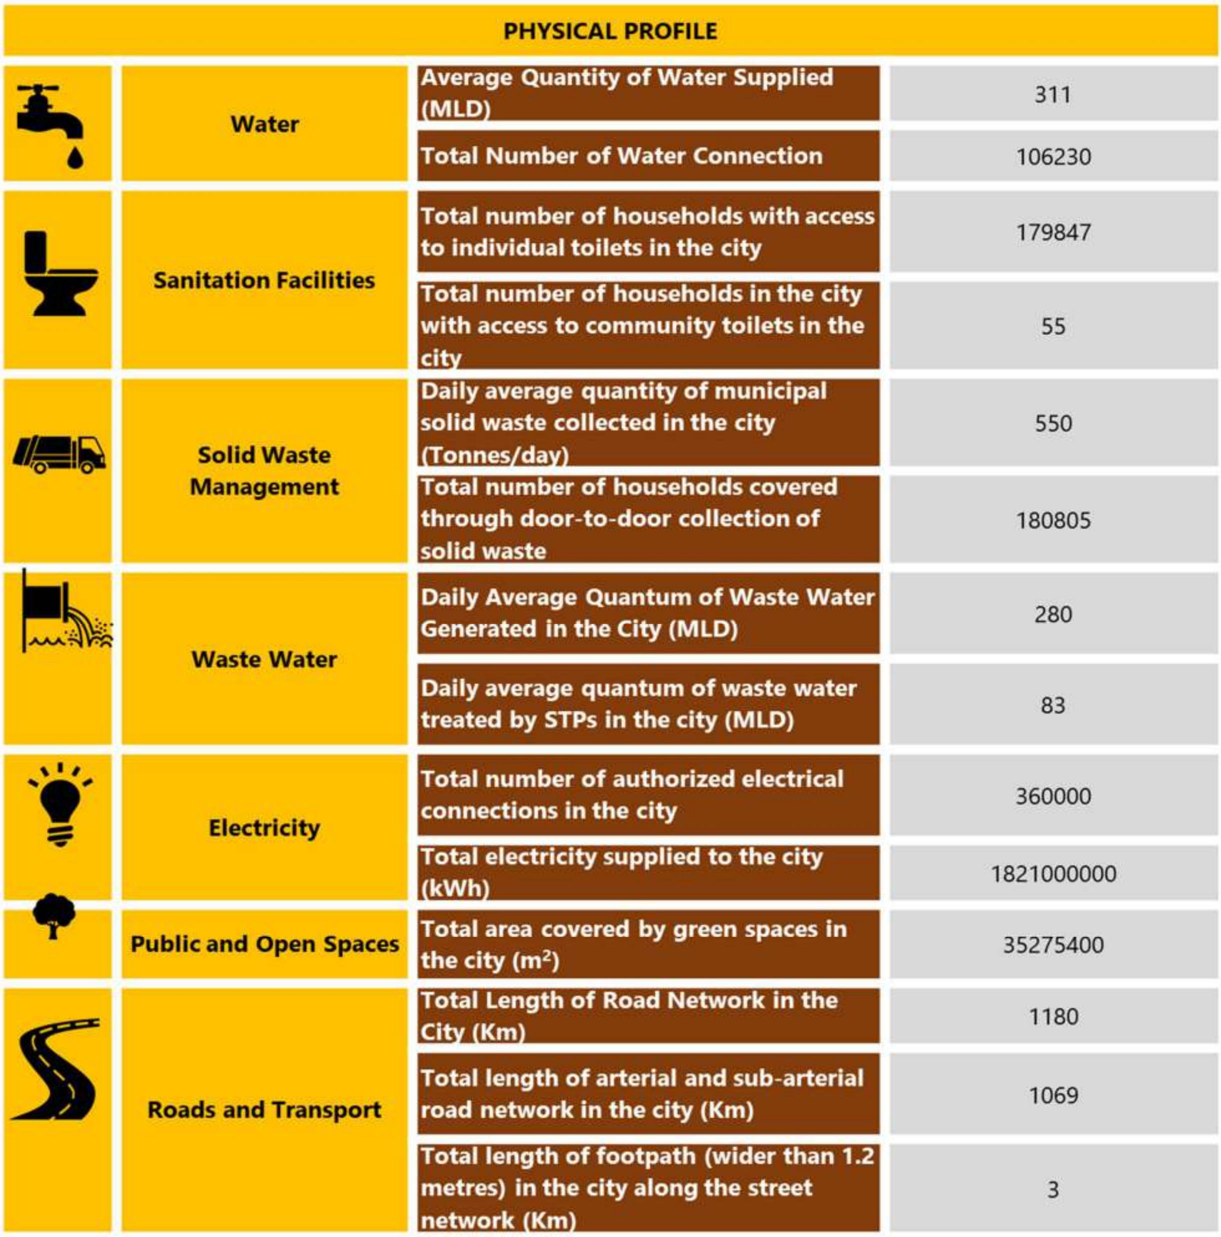
Total Population	1198491
Total Number of Households	190835

SOCIAL PROFILE

Education	**Total Number of Schools**	371
	Total Enrolment (Class 1 to 5)	8709
Health	**Total Number of In-patient Beds**	7880
	Total Health Workforce	4238
Safety and Security	**Total Strength of Police Force**	2275
	Total Number of CCTV Cameras	134
Heritage Sites	**Total Number of Heritage Sites**	55

ECONOMIC PROFILE

Total Population in Working Age Group (2016)	792205
Total Number of Industries	0
Total Number of Commercial Enterprises	17477
Total Number of Hotels	601
Total Capital and Revenue Expenditure for the city in FY 2016-14 (INR Lakhs)	26745
Total VAT Collection in FY 2016-17 (INR Lakhs)	15167.25



PHYSICAL PROFILE		
Water	Average Quantity of Water Supplied (MLD)	311
	Total Number of Water Connection	106230
Sanitation Facilities	Total number of households with access to individual toilets in the city	179847
	Total number of households in the city with access to community toilets in the city	55
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	550
	Total number of households covered through door-to-door collection of solid waste	180805
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	280
	Daily average quantum of waste water treated by STPs in the city (MLD)	83
Electricity	Total number of authorized electrical connections in the city	360000
	Total electricity supplied to the city (kWh)	1821000000
Public and Open Spaces	Total area covered by green spaces in the city (m^2)	35275400
Roads and Transport	Total Length of Road Network in the City (Km)	1180
	Total length of arterial and sub-arterial road network in the city (Km)	1069
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	3

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators,

various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000

Pillars of Comprehensive Development	Category	Indicators
		population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting

Pillars of Comprehensive Development	Category	Indicators
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste

Pillars of Comprehensive Development	Category	Indicators
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

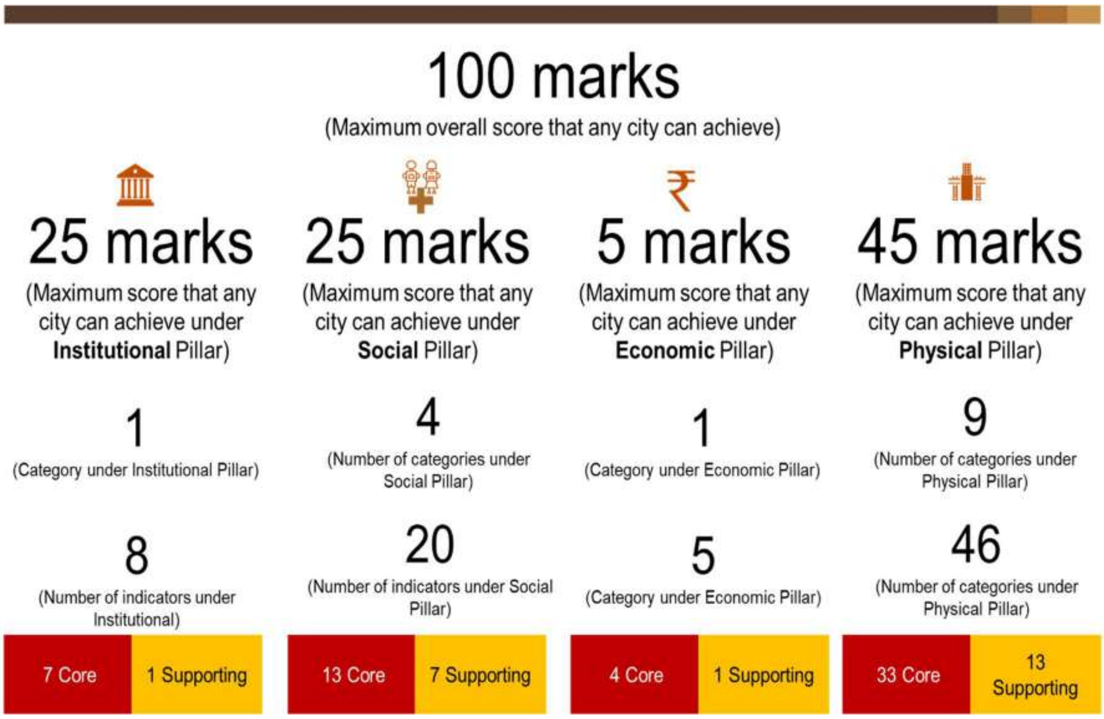
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks

(Maximum overall score that any city can achieve)

25 marks	25 marks	5 marks	45 marks
(Maximum score that any city can achieve under **Institutional** Pillar)	(Maximum score that any city can achieve under **Social** Pillar)	(Maximum score that any city can achieve under **Economic** Pillar)	(Maximum score that any city can achieve under **Physical** Pillar)
1	4	1	9
(Category under Institutional Pillar)	(Number of categories under Social Pillar)	(Category under Economic Pillar)	(Number of categories under Physical Pillar)
8	20	5	46
(Number of indicators under Institutional)	(Number of indicators under Social Pillar)	(Category under Economic Pillar)	(Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to "maximum within the comparison group" or "absolute benchmarks". For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and

development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Acount department Nagar Nigam
Urban Local Body	For Park and Recreation Related Questions	Udyan adhikshak Nagar nigam, AMRUT yojna
Urban Local Body	For Water Supply and Drainage related questions	Jalkal
Urban Local Body	For Heritage sites related data	Hriday yojna office Nagar nigam
Urban Local Body	For Ecological sites related data	NA
Urban Local Body	For Housing related data	DUDA/NRLM Nagar nigam
Urban Local Body	For Building plan related data	Computer cell Nagar nigam
Urban Local Body	For Roads related data	Chief engineer office Nagar nigam
Urban Local Body	For Solid waste management related data	Swaksha Bharat Mission office Nagar nigam
Urban Local Body	For IT services related data	Coordinator Computer cell
Urban Local Body	For Vendor committee related data	DUDA/NRLM office Nagar nigam
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	Tourism, Employment exchange, Town and country planning, Ward parishad.
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Pollution control board
Development Authority	Building Infrastructure	Varanasi development authority
	Construction planning	Varanasi development authority
	Green Building	Varanasi development authority
	Rain water harvesting	Varanasi development authority
	Universal Design Principle	Varanasi development authority

Designated data owners	Subcategories	Data owners at city level
DISCOM /Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Urban electricity distribution circle Bhelupur
State Disaster management authority		District disaster management authority
State Education Department		Basic Shiksha Adhikari office
State Health Department	Health care professionals	Chief Medical Officer office
	Citizen Services	Chief Medical Officer office
	Disease Prevalence	Chief Medical Officer office
	Health Infrastructure	Chief Medical Officer office
State Renewable Energy Development Agency	Renewable Energy	Project Officer NEDA
State Sales / Commercial Taxes Department		Commercial Tax Department
Town and Country Planning Department	Land Use	Town and Country planning Department Varanasi
Traffic and Police Department		Varishth Police adhikshak office
Transport Authorities	Buses	ARM city bus office
	Registered Vehicles	Sambhagiya parivahan adhikari office
	Sub urban rail transport	NA
	Mono Rail Authority	NA
	Tramways	N A
	Marine Transport Authority	N A

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 35 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	**1**
State Education Department	**1**
DISCOM/Electricity Department	**1**
Traffic and Police Department	**0**
Development Authority	**2**
Pollution Control Board	**3**
State Renewable Energy Department	**0**
Town and Country Planning	**1**
State Health Department	**0**
Transport Authority	**1**
Disaster Management	**0**
Urban Local Body	**25**
Total	**35***

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

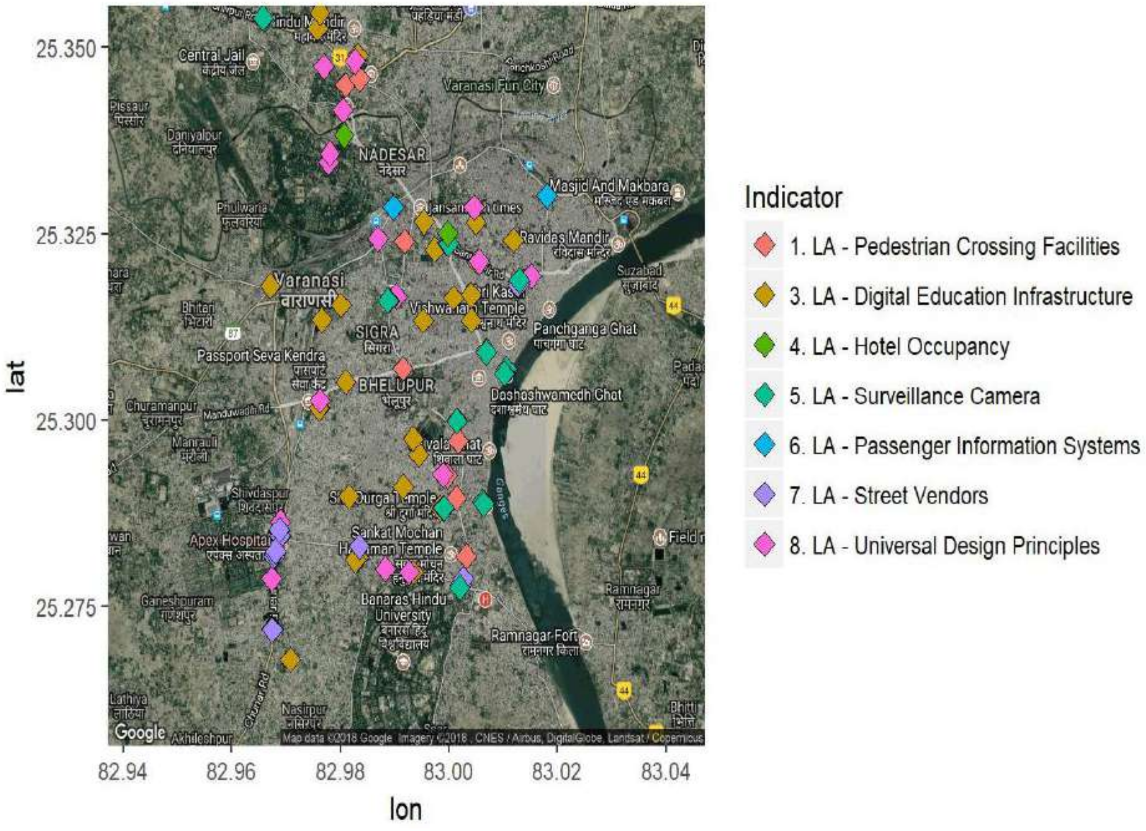
- 1.2 | Percentage of services integrated through Command Centre
- 2.3 | Hotel occupancy
- 3.4 | Percentage of schools with access to digital education
- 5.1| Number of streets, public places, junctions covered through surveillance systems
- 6.5 | Percentage of vendors registered and provided formal spaces
- 11.7 | Availability of Passenger Information System
- 11.11 | Percentage of traffic intersections with pedestrian crossing facilities
- 11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

- 6.4 | Unemployment Rate
- 11.3 | Mode share of public transport
- 11.5 | Mode share of Non Motorized Transport
- 12.3 | Quality of Water Supplied
- 15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.



Indicator
1. LA - Pedestrian Crossing Facilities
3. LA - Digital Education Infrastructure
4. LA - Hotel Occupancy
5. LA - Surveillance Camera
6. LA - Passenger Information Systems
7. LA - Street Vendors
8. LA - Universal Design Principles

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**37.9**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	0.75
	1.1b death certificate	0.75
	1.1c trade license	0
	1.1d solid waste management	0
	1.1e water supply	0
	1.1f sewerage/drainage	0
	1.1g fogging	0
	1.1h property tax	0.333333333
	1.1i professional tax	0
	1.1j information	0.538461538
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	0.555555556
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**0**
Description	Services integrated through an integrated or a singular operations command centre	0
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**0.13**
Description		

Sub Indicators	1.3a Building plan	NA
	1.3b Birth/Death Certificate	0.001342661
	1.3c water supply	NA
	1.3d solid waste management	NA
	1.3e property tax	0.000812222
	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	0.001668765
	1.3i information	NA
	1.3j electricity	NA
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**0.08**
Description		
Sub Indicators	1.4a water supply	0
	1.4b solid waste	0
	1.4c street lights	0
	1.4d sewerage	0
	1.4e professional tax	NA
	1.4f parks and recreational spaces	0.5
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**96.59**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	3263.91
Denominator	Total demand raised for the year	3379
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water**	**0**

	supply services	
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	0
Denominator	Total O&M cost for providing water supply services during the year	245.03
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**-450.25**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	-40946
Denominator	Total expenditure (revenue and capital accounts) in the same year	9094
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**60**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	54
Denominator	Total number of wards	90
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	81
Denominator	Total number of historic buildings/sites identified	81
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	0

Denominator	Total number of ecologically important sites identified in the city	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**26.36**
Description	Average Occupancy rate of Hotels	26.36285714
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	0
Denominator	Total budget of the ULB (capital and revenue)	26745
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**6**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	6
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**3.98**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	9724
Denominator	Total population in the age group of 6-14 years	244410
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**4.1**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	4717

Denominator	Total female population in the age group of 6-14 years	114953
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**24.88**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	8709
Denominator	Total number of teachers available for primary grades (public and private schools)	350
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	0
Denominator	Total number of schools	371
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**71.56**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	71.56447871
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**89.03**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	74124
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**65.75**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	7880
Denominator	Total population of the city	1198491
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**35.36**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	4238
Denominator	Total population of the city	1198491
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**21.49**
Description	Total response time for health-related distress calls received in the city	21.49
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.76**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	9066
Denominator	Total population of the city	1198491
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.04**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	525
Denominator	Total population of the city	1198491
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**11.36**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	134
Denominator	Total length of road network in the city	1180
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**2731.27**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	32734
Denominator	Total population of the city	1198491
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**3.18**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	1042
Denominator	Total crimes recorded in the same year	32734
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**7.59**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	91
Denominator	Total population of the city	1198491
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**22.71**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	2807.48
Denominator	Total VAT/GST collection during preceding year	123.5977
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	NA
Denominator	Total Professional Tax collection during preceding year	NA
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**0.84**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	2
Denominator	Number of construction permits during preceding year	2.39
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	13461
Denominator	Total labour force in the city	244410
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	

Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	0
Denominator	Total number of vendors in the city	24472
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**13.19**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	12489
Denominator	Total number of slum and EWS households in the city	946.58
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**Non-Compuatble**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	NA
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**29.43**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	35275400
Denominator	Total population of the city	1198491
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**8.73**
Formula:	*Numerator / Denominator*	

Numerator	Total area of public and recreational places (sq.m.)	10467055
Denominator	Total population of the city	1198491
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**17.34**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	14237600
Denominator	Total area of the city (total area of all land uses)	82100000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	1198491
Denominator	Area allocated for residential land use (in hectares)	118981100
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**188.64**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	360000
Denominator	Total number of households in the city	190835
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0.03**

Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	110
Denominator	Total number of electricity connections in the city	360000
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**1188**
Description	Total number of sustained electrical interruptions in a year	1188
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.81**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	2075
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	52000
Denominator	Total energy consumption from all sources	1821300000
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.33**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	724213.8333
Denominator	Total quantum of water and waste water handled during the period	11820
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	32490
Denominator	Total number of street light installations	36000
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	8000
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.4**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	1821300000
Denominator	Total population of the city	1198491
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.64**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	168
Denominator	Total area of the city (sq.km)	82.1
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.11**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	130
Denominator	Total population of the city	1198491
Unit	Number per 1000 persons	

Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	40
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	1180
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**50**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	1
Denominator	Total number of major transport interchanges in the city	2
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	1
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**0.5**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	1
Denominator	Total number of major interchanges in the city	2
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**100**
Formula:	*Numerator / Denominator*	

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Numerator	Total number of signalised intersections that are synchronised	7
Denominator	Total number of signalised intersections in the city	7
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	43
Denominator	Total available on-street parking spaces in the city	43
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**0.13**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	3
Denominator	Total length of road network in the city	2360
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**225**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	9
Denominator	Total number of junctions/ intersections on major roads in the city	4
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**7.77**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	32
Denominator	Total number of public right-of-way areas in the city	412
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**55.67**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	106230
Denominator	Total number of households in the city	190835
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**259.49**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	311
Denominator	Total population of the city	1198491
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	0
Denominator	Total number of samples tested for water quality	3000
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	Blank
Denominator	Quantum of water put into the distribution system (mld)	311
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	0
Denominator	Total number of water connections in the city	106230
Unit	Percentage	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**74.9**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	182
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	243
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**99.78**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	180074
Denominator	Total number of properties in the city	180472
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**1.35**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	2441
Denominator	Total number of properties in the city	180472
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**32.14**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	90
Denominator	Total waste water generated in the city per day	280
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**228.92**
Formula:	*Numerator / Denominator*	

Numerator	Quantum of waste water recycled or reused per day	190
Denominator	Total waste water received at treatment plants per day	83
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**6.44**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	76
Denominator	Total length of road network in the city	1180
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**87.17**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	181595
Denominator	Total number of households and establishments in the city	208312
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	550
Denominator	Total quantum of MSW generated in the city	550
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**84.55**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	13950
Denominator	Average MSW generated in the city (tons per month)	16500
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**8.8**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	8.8
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**46.1**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	46.1
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**228**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	228
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	11
Denominator	Total number of noise samples	192
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	0
Denominator	Total number of samples tested	24
Unit	Percentage	
Benchmark	100%

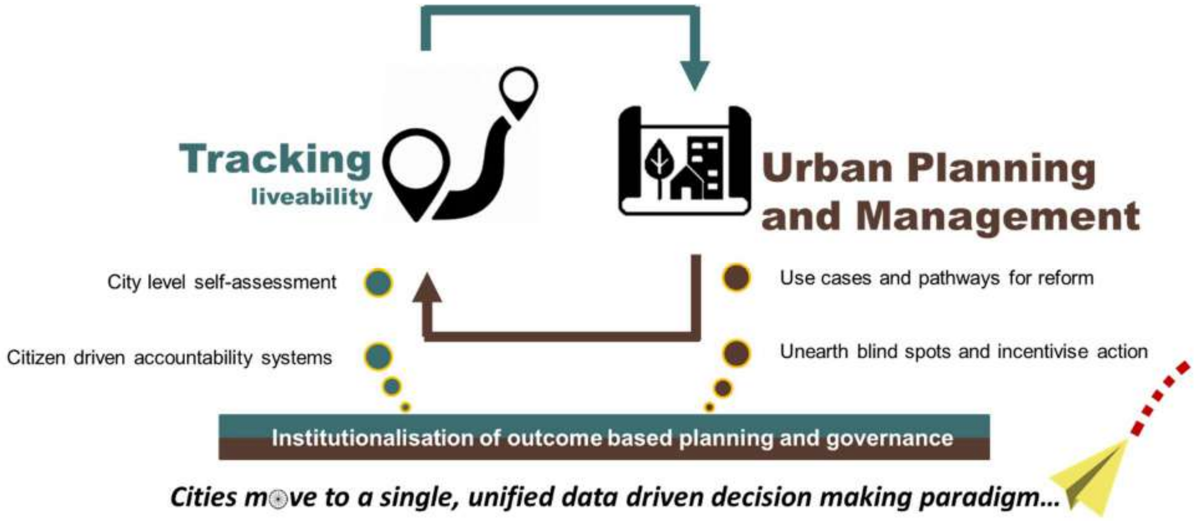
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance

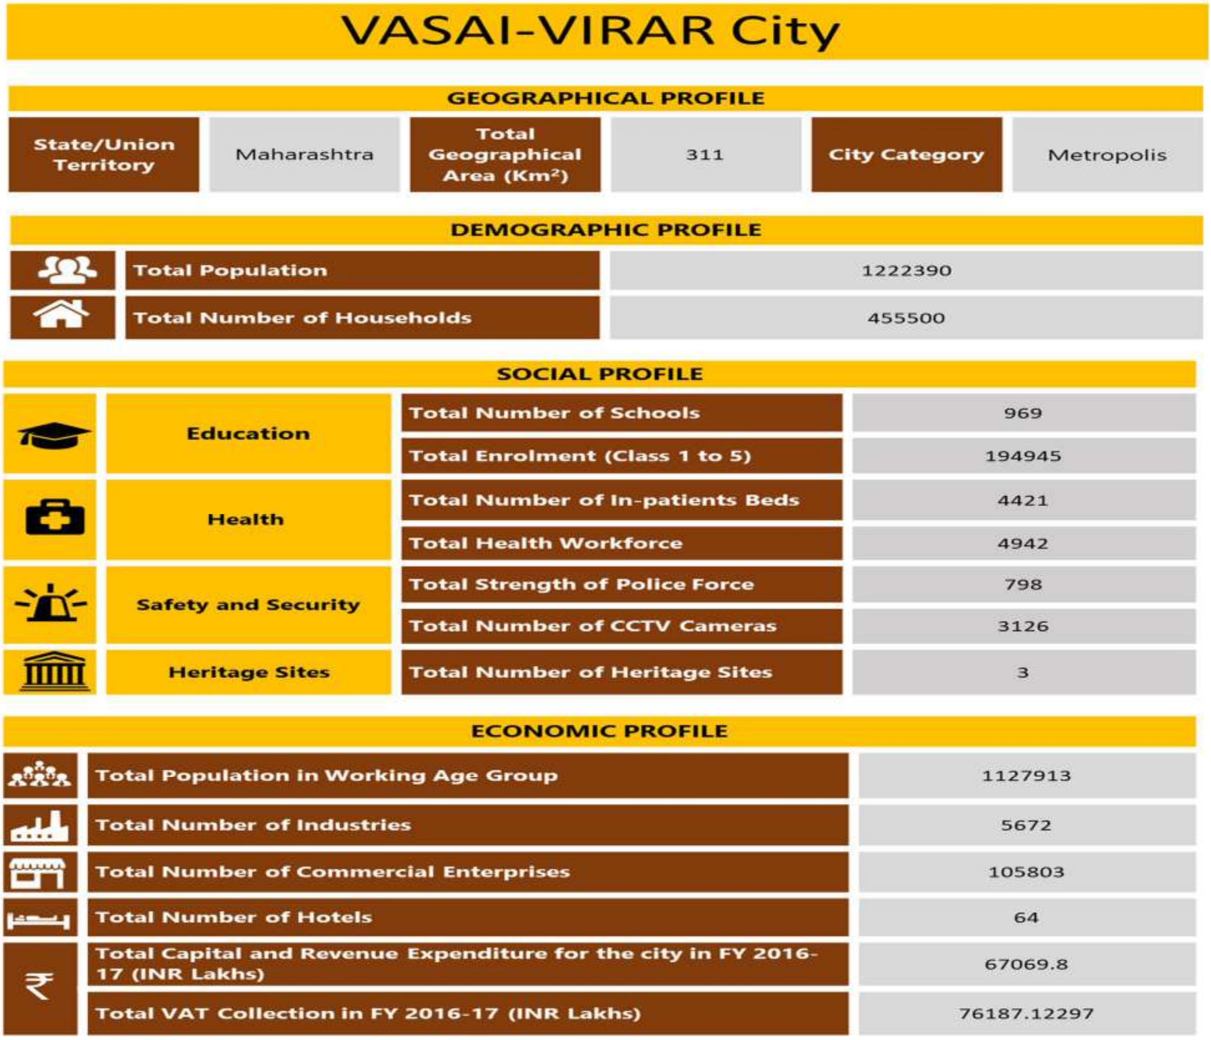
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart

cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



VASAI-VIRAR City

GEOGRAPHICAL PROFILE

State/Union Territory	Maharashtra	**Total Geographical Area (Km²)**	311	**City Category**	Metropolis

DEMOGRAPHIC PROFILE

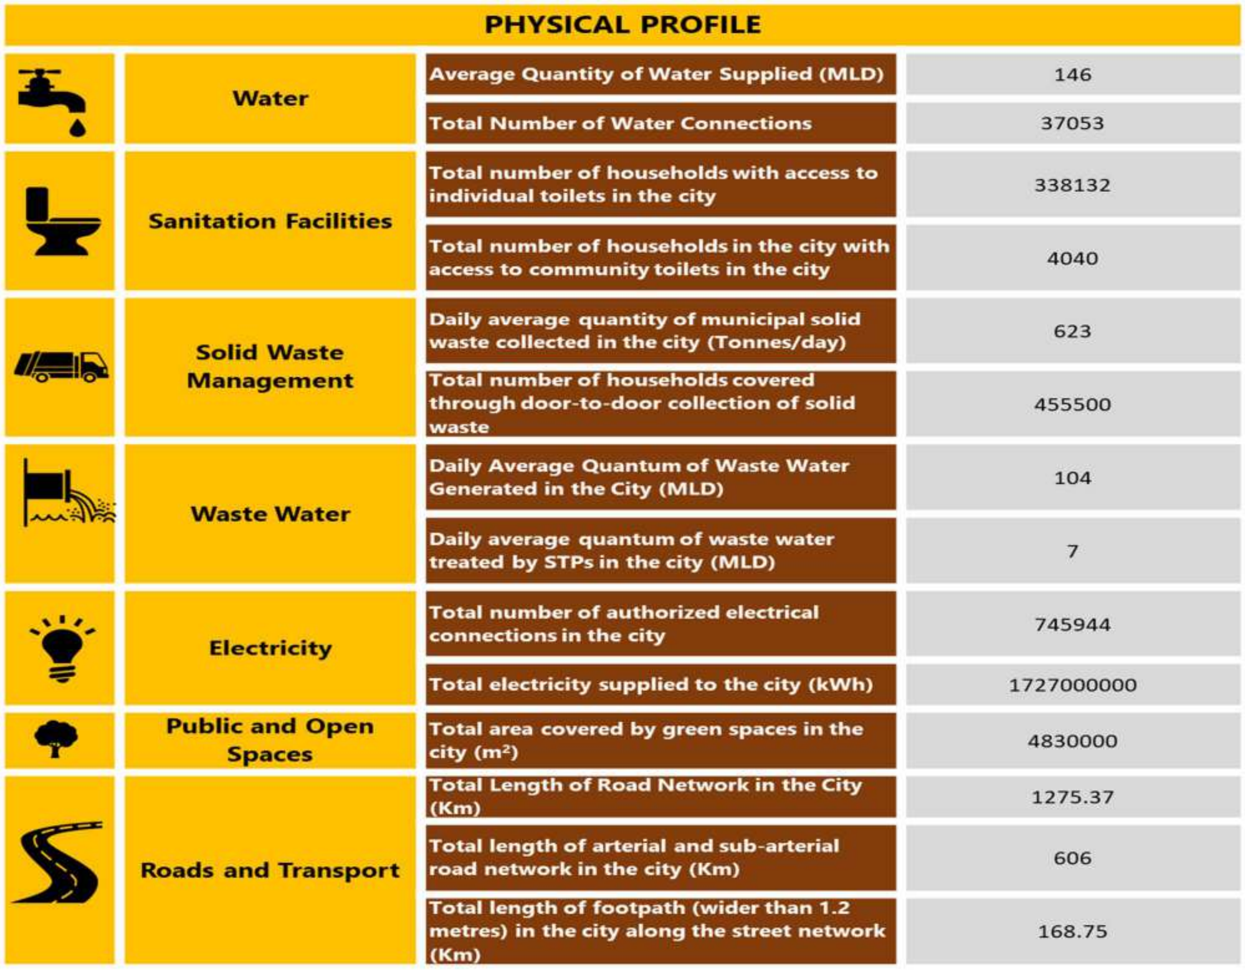
Total Population	1222390
Total Number of Households	455500

SOCIAL PROFILE

Education	**Total Number of Schools**	969
	Total Enrolment (Class 1 to 5)	194945
Health	**Total Number of In-patients Beds**	4421
	Total Health Workforce	4942
Safety and Security	**Total Strength of Police Force**	798
	Total Number of CCTV Cameras	3126
Heritage Sites	**Total Number of Heritage Sites**	3

ECONOMIC PROFILE

Total Population in Working Age Group	1127913
Total Number of Industries	5672
Total Number of Commercial Enterprises	105803
Total Number of Hotels	64
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	67069.8
Total VAT Collection in FY 2016-17 (INR Lakhs)	76187.12297



PHYSICAL PROFILE		
Water	Average Quantity of Water Supplied (MLD)	146
	Total Number of Water Connections	37053
Sanitation Facilities	Total number of households with access to individual toilets in the city	338132
	Total number of households in the city with access to community toilets in the city	4040
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	623
	Total number of households covered through door-to-door collection of solid waste	455500
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	104
	Daily average quantum of waste water treated by STPs in the city (MLD)	7
Electricity	Total number of authorized electrical connections in the city	745944
	Total electricity supplied to the city (kWh)	1727000000
Public and Open Spaces	Total area covered by green spaces in the city (m^2)	4830000
Roads and Transport	Total Length of Road Network in the City (Km)	1275.37
	Total length of arterial and sub-arterial road network in the city (Km)	606
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	168.75

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary

Pillars of Comprehensive Development	Category	Indicators
		education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density

Pillars of Comprehensive Development	Category	Indicators
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian

Pillars of Comprehensive Development	Category	Indicators
		crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

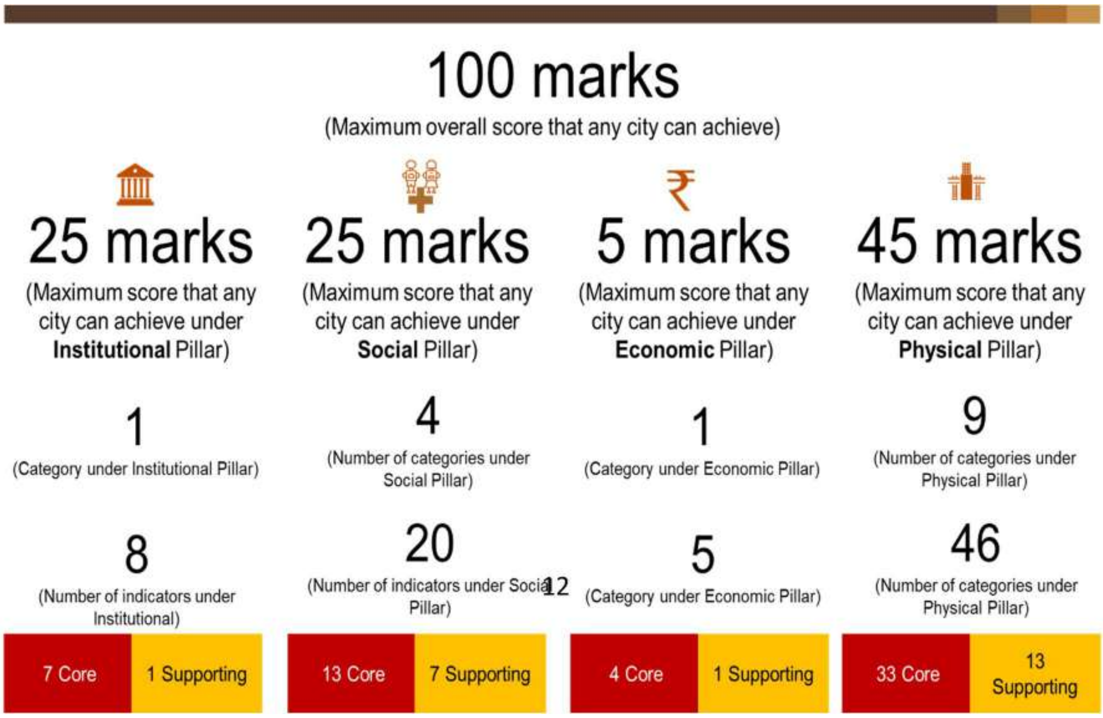
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks
(Maximum overall score that any city can achieve)
25 marks
(Maximum score that any city can achieve under Institutional Pillar)
25 marks
(Maximum score that any city can achieve under Social Pillar)
5 marks
(Maximum score that any city can achieve under Economic Pillar)
45 marks
(Maximum score that any city can achieve under Physical Pillar)
1
(Category under Institutional Pillar)
4
(Number of categories under Social Pillar)
1
(Category under Economic Pillar)
9
(Number of categories under Physical Pillar)
8
(Number of indicators under Institutional)
20
(Number of indicators under Social Pillar)
5
(Category under Economic Pillar)
46
(Number of categories under Physical Pillar)
7 Core
1 Supporting
13 Core
7 Supporting
4 Core
1 Supporting
33 Core
13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry.

The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Accounts department
Urban Local Body	For Park and Recreation Related Questions	Pwd department
Urban Local Body	For Water Supply and Drainage related questions	Water department
Urban Local Body	For Heritage sites related data	Town planning department
Urban Local Body	For Ecological sites related data	Forest department
Urban Local Body	For Housing related data	Housing department
Urban Local Body	For Building plan related data	City engineer and town planning department
Urban Local Body	For Roads related data	City engineer department/ pwd dept
Urban Local Body	For Solid waste management related data	Solid waste management department
Urban Local Body	For IT services related data	It department
Urban Local Body	For Vendor committee related data	Social welfare department
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	Employment exchange department

Designated data owners	Subcategories	Data owners at city level
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Water department and environment department, mpcb
Development Authority	Building Infrastructure	City engineer and town planning department
	Construction planning	Pwd department
	Green Building	Town planning department
	Rain water harvesting	Town planning department
	Universal Design Principle	City engineering department
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Electricity department
State Disaster management authority		Disaster management department
State Education Department		Education department
State Health Department	Health care professionals	Health department
	Citizen Services	Health department
	Disease Prevalence	Health department
	Health Infrastructure	Health department
State Renewable Energy Development Agency		Electricity department
State Sales / Commercial Taxes Department		Sales tax department
Town and Country Planning Department	Land Use	Town planning department
Traffic and Police Department		Disaster management department
Transport Authorities	Buses	Transport department
	Registered Vehicles	Transport department (rto)
	Sub urban rail transport	Transport department
	Mono Rail Authority	Transport department
	Tramways	Transport department
	Marine Transport Authority	Transport department

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 143 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register,

signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

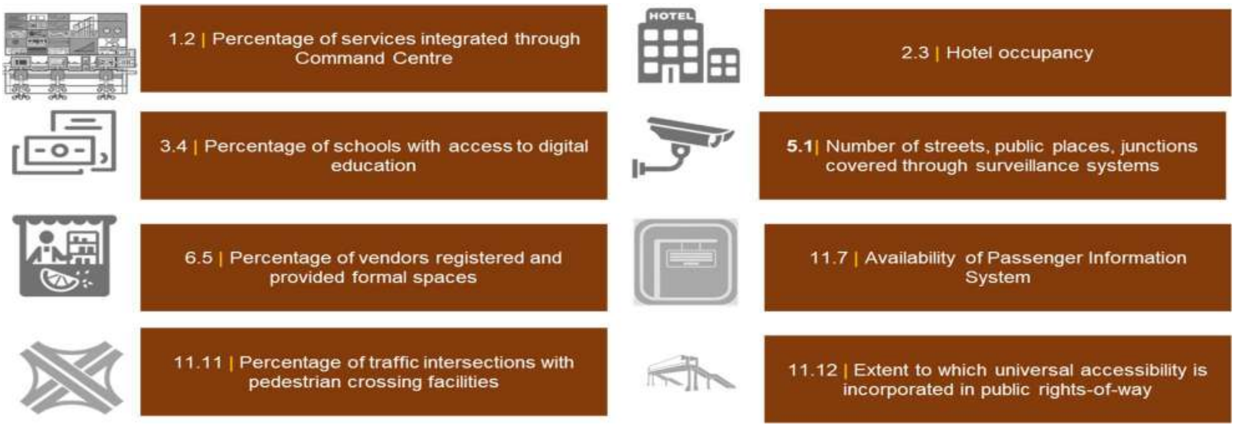
Data Owners	Number of Documents
Sales and Commercial Taxes	**0**
State Education Department	**1**
DISCOM/Electricity Department	**11**
Traffic and Police Department	**7**
Development Authority	**3**
Pollution Control Board	**3**
State Renewable Energy Department	**8**
Town and Country Planning	**1**
State Health Department	**8**
Transport Authority	**9**
Disaster Management	**3**
Urban Local Body	**89**
Total	**143***

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:



1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

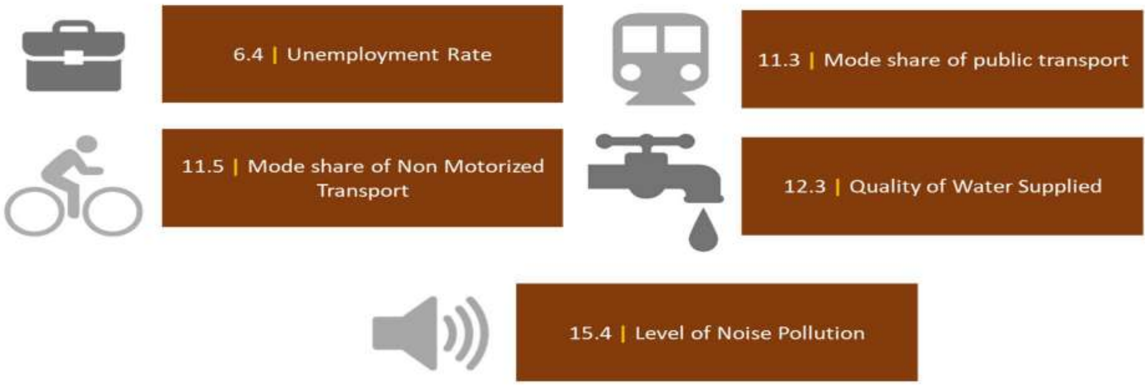
6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.



6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

5 Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**70.51**
Description	Average citizen services available online	

Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	1
	1.1c trade license	0
	1.1d solid waste management	1
	1.1e water supply	1
	1.1f sewerage/drainage	0
	1.1g fogging	0.5
	1.1h property tax	0.666666667
	1.1i professional tax	1
	1.1j information	1
	1.1k Grievance redressal	1
	1.1l electricity	1

Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**78.59**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	14882.28
Denominator	Total demand raised for the year	18936.85
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**84.32**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	2879.35532
Denominator	Total O&M cost for providing water supply services during the year	3414.83
Unit	Percentage	
Benchmark	100%	

Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**51.2**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	105085.46
Denominator	Total expenditure (revenue and capital accounts) in the same year	205250.09
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	115
Denominator	Total number of wards	115
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	55
Denominator	Total number of historic buildings/sites identified	55
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	1
Denominator	Total number of ecologically important sites identified in the city	1
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**16**
Description	Average Occupancy rate of Hotels	16

Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	543.25
Denominator	Total budget of the ULB (capital and revenue)	67069.8
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**306**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	306
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**139.29**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	296926
Denominator	Total population in the age group of 6-14 years	213173
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**138.13**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	138772
Denominator	Total female population in the age group of 6-14 years	100462
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**21.66**
Formula:	*Numerator / Denominator*	

Numerator	Total number of students in primary grades (public and private)	194945
Denominator	Total number of teachers available for primary grades (public and private schools)	9000
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**47.78**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	463
Denominator	Total number of schools	969
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**136.76**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	136.7586469
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**108.14**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	1104975228
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**36.17**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	4421
Denominator	Total population of the city	1222390
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	

Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**40.43**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	4942
Denominator	Total population of the city	1222390
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**15**
Description	Total response time for health-related distress calls received in the city	15
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.05**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	650
Denominator	Total population of the city	1222390
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.02**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	297
Denominator	Total population of the city	1222390
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**245.11**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	3126
Denominator	Total length of road network in the city	1275.37

Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**262.52**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	3209
Denominator	Total population of the city	1222390
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**51.95**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	1667
Denominator	Total crimes recorded in the same year	3209
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**22.25**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	272
Denominator	Total population of the city	1222390
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**13.33**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	8960.63503
Denominator	Total VAT/GST collection during preceding year	672.2648794
Unit	Percentage	

Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**-0.76**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	-16.73882
Denominator	Total Professional Tax collection during preceding year	2199.01882
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**141.46**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	58
Denominator	Number of construction permits during preceding year	0.41
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	9733
Denominator	Total labour force in the city	213173
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**99.95**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	15157
Denominator	Total number of vendors in the city	15165
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**0.19**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	401
Denominator	Total number of slum and EWS households in the city	2060.73
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**17.14**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	733936545575750
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**3.95**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	4830000
Denominator	Total population of the city	1222390
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**28**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	34232722.29
Denominator	Total population of the city	1222390
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	311000000
Denominator	Total area of the city (total area of all land uses)	311000000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.03**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	1222390
Denominator	Area allocated for residential land use (in hectares)	36425000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**142.44**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	648792
Denominator	Total number of households in the city	455500
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	745944

Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**731**
Description	Total number of sustained electrical interruptions in a year	731
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.81**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	731
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	553061
Denominator	Total energy consumption from all sources	1727003935
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.22**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	1986946.333
Denominator	Total quantum of water and waste water handled during the period	4590
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.32**

Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	16333044
Denominator	Total number of street light installations	34776
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	91292.655
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.43**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	1727003935
Denominator	Total population of the city	1222390
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.64**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	368.6
Denominator	Total area of the city (sq.km)	311
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**4.7**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	5743

Denominator	Total population of the city	1222390
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	67.1
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	1275.37
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**64.29**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	9
Denominator	Total number of major transport interchanges in the city	14
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	1.4
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**27.64**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	387
Denominator	Total number of major interchanges in the city	14
Unit	Percentage	

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	15
Denominator	Total number of signalised intersections in the city	15
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**91.67**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	11
Denominator	Total available on-street parking spaces in the city	12
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**6.62**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	168.75
Denominator	Total length of road network in the city	2550.74
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**62.5**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	25
Denominator	Total number of junctions/ intersections on major roads in the city	40
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**99.69**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	634
Denominator	Total number of public right-of-way areas in the city	636

Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**63.33**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	288488
Denominator	Total number of households in the city	455500
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**119.44**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	146
Denominator	Total population of the city	1222390
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	3954
Denominator	Total number of samples tested for water quality	4013
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**22.29**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	32.54
Denominator	Quantum of water put into the distribution system (mld)	146
Unit	Percentage	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	NA
Denominator	Total number of water connections in the city	37053
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**99.1**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	110
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	111
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**63.3**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	455500
Denominator	Total number of properties in the city	719634
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	719634
Denominator	Total number of properties in the city	719634
Unit	Percentage	

Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**6.73**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	7
Denominator	Total waste water generated in the city per day	104
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**171.43**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	12
Denominator	Total waste water received at treatment plants per day	7
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**43.91**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	560
Denominator	Total length of road network in the city	1275.37
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	561303
Denominator	Total number of households and establishments in the city	561303
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**99.2**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	623
Denominator	Total quantum of MSW generated in the city	628

Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**37.72**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	7050
Denominator	Average MSW generated in the city (tons per month)	18690
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**27.45**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	27.45
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**14**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	14
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**80**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	80
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	100
Denominator	Total number of noise samples	100
Unit	Percentage	
Benchmark		

Indicator No: 15.5	**Quality of water in public surface water bodies**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	12
Denominator	Total number of samples tested	12
Unit	Percentage	
Benchmark	100%

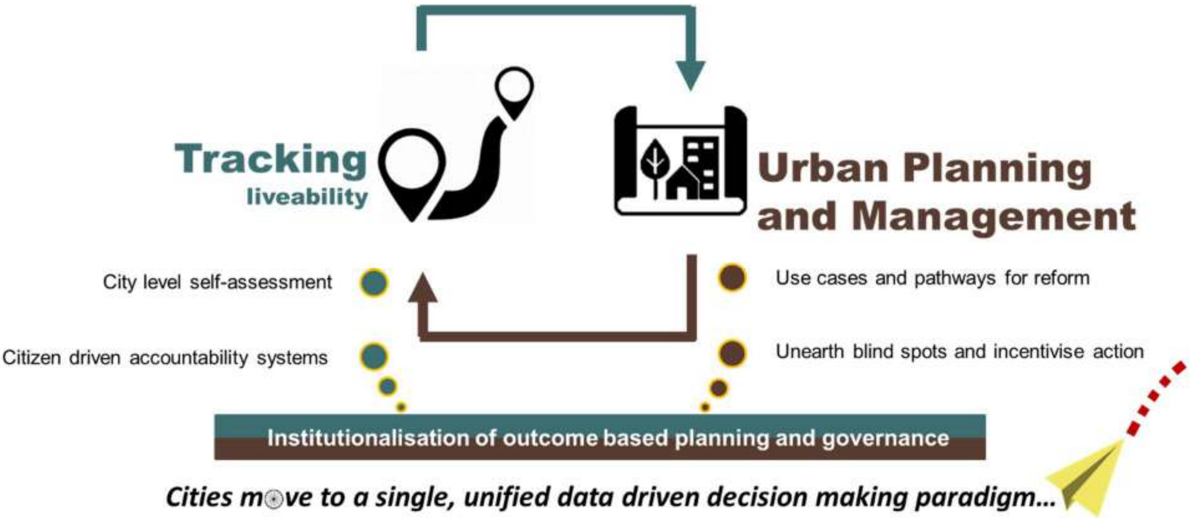
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



Tracking
liveability
Urban Planning and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart

cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).

GEOGRAPHICAL PROFILE

State/Union Territory	Tamil Nadu	Total Geographical Area (Km²)	87.2	City Category	Small City

DEMOGRAPHIC PROFILE

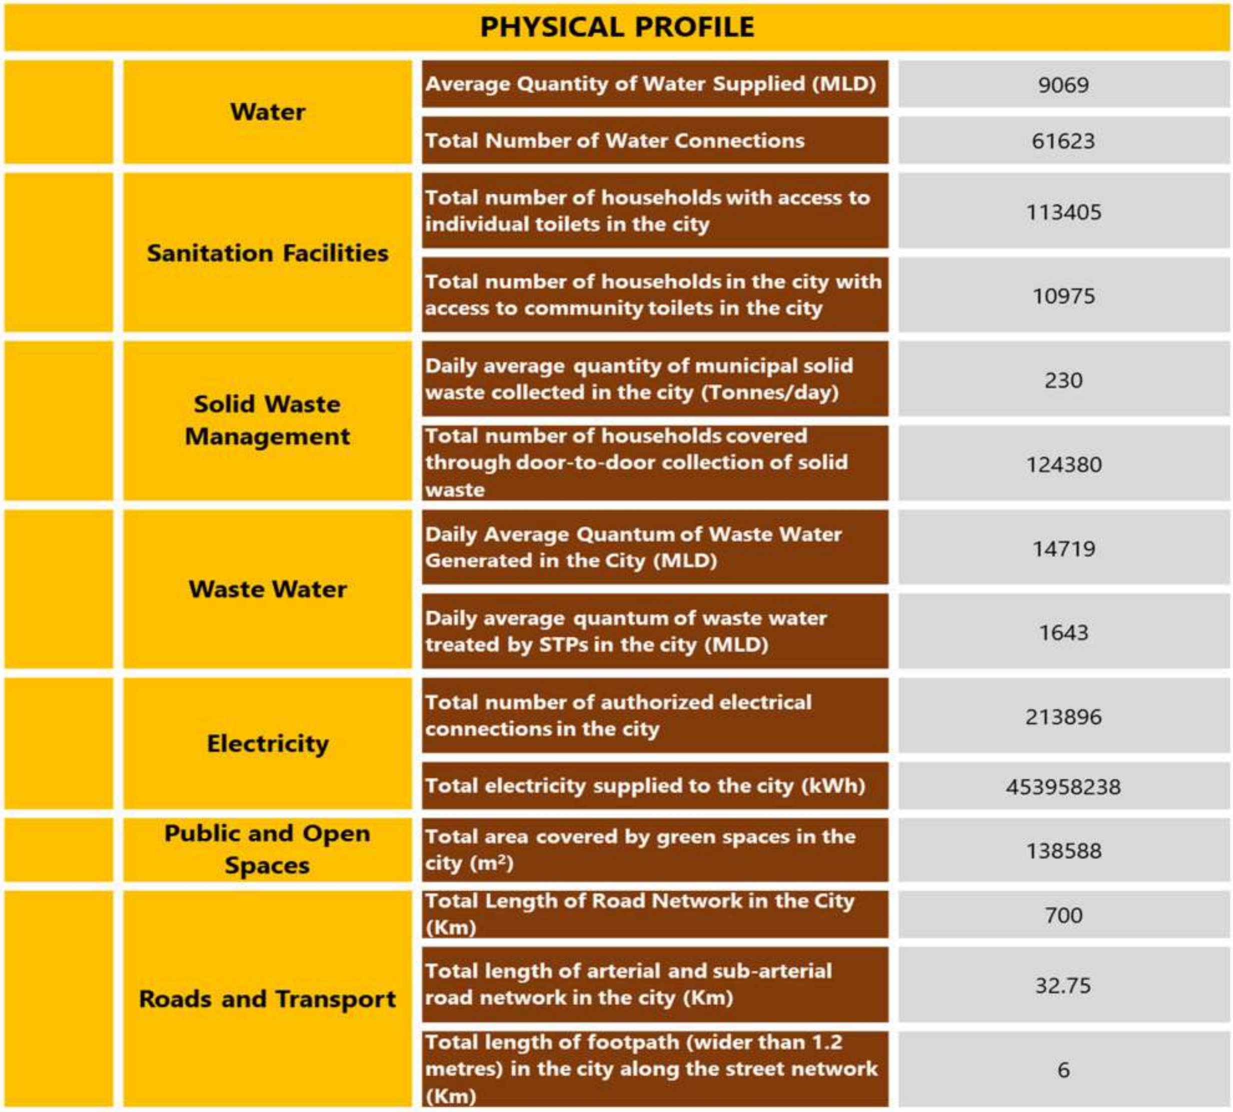
Total Population	185803
Total Number of Households	117077

SOCIAL PROFILE

Education	Total Number of Schools	78
	Total Enrolment (Class 1 to 5)	66585
Health	Total Number of In-patients Beds	3509
	Total Health Workforce	5503
Safety and Security	Total Strength of Police Force	2224
	Total Number of CCTV Cameras	45
Heritage Sites	Total Number of Heritage Sites	8

ECONOMIC PROFILE

Total Population in Working Age Group	23029
Total Number of Industries	38
Total Number of Commercial Enterprises	16361
Total Number of Hotels	30
₹ Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	22397
Total VAT Collection in FY 2016-17 (INR Lakhs)	7078



PHYSICAL PROFILE			
	Water	Average Quantity of Water Supplied (MLD)	9069
		Total Number of Water Connections	61623
	Sanitation Facilities	Total number of households with access to individual toilets in the city	113405
		Total number of households in the city with access to community toilets in the city	10975
	Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	230
		Total number of households covered through door-to-door collection of solid waste	124380
	Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	14719
		Daily average quantum of waste water treated by STPs in the city (MLD)	1643
	Electricity	Total number of authorized electrical connections in the city	213896
		Total electricity supplied to the city (kWh)	453958238
	Public and Open Spaces	Total area covered by green spaces in the city (m^2)	138588
	Roads and Transport	Total Length of Road Network in the City (Km)	700
		Total length of arterial and sub-arterial road network in the city (Km)	32.75
		Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	6

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education

Pillars of Comprehensive Development	Category	Indicators
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	6. Economy and Employment	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	7. Housing and Inclusiveness	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use	9.1 Share of mixed land use area in overall city land use

Pillars of Comprehensive Development	Category	Indicators
	and Compactness	9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m

Pillars of Comprehensive Development	Category	Indicators
		11.11 Percentage of traffic intersections with pedestrian crossing facilities 11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections 12.2 Per capita supply of water 12.3 Quality of water supplied 12.4 Level of non-revenue water – NRW 12.5 Percentage of water connections covered through meters 12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets 13.2 Coverage of sewerage network and/or septage 13.3 Collection efficiency of sewerage network 13.4 Extent of reuse and recycling of waste water 13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection 14.2 Efficiency of collection of municipal solid waste 14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution 15.2 Concentration of NO2- air pollution 15.3 Concentration of PM10 - air pollution 15.4 Level of noise pollution

Pillars of Comprehensive Development	Category	Indicators
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

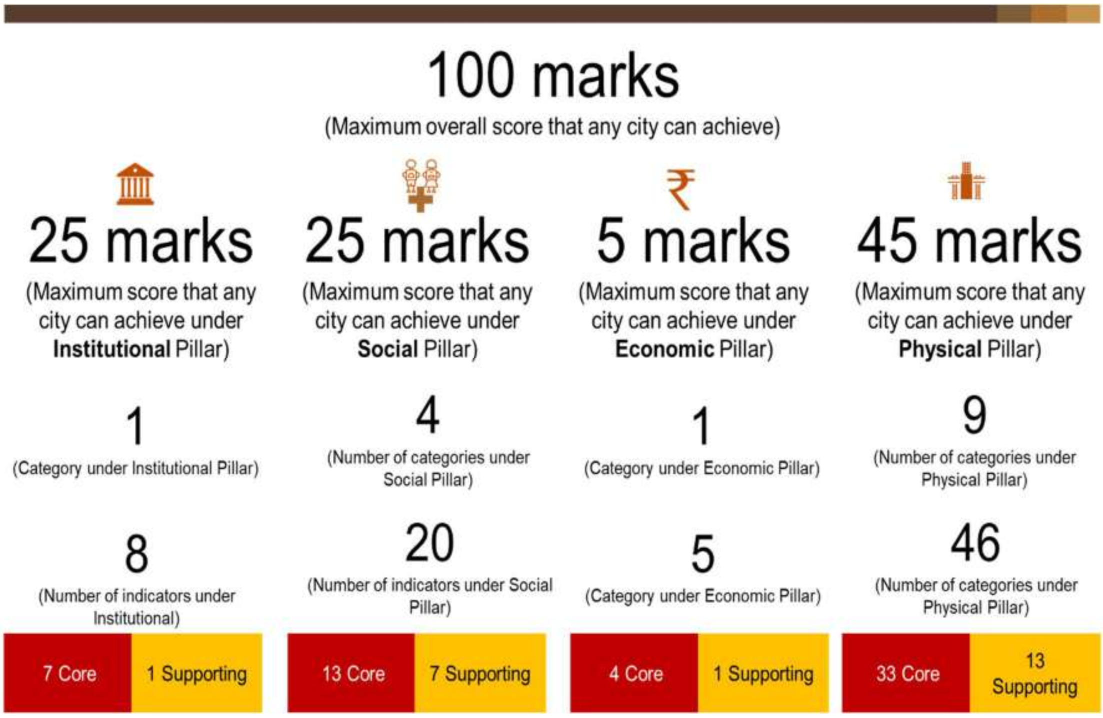
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks

(Maximum overall score that any city can achieve)

25 marks	25 marks	5 marks	45 marks
(Maximum score that any city can achieve under **Institutional** Pillar)	(Maximum score that any city can achieve under **Social** Pillar)	(Maximum score that any city can achieve under **Economic** Pillar)	(Maximum score that any city can achieve under **Physical** Pillar)
1	4	1	9
(Category under Institutional Pillar)	(Number of categories under Social Pillar)	(Category under Economic Pillar)	(Number of categories under Physical Pillar)
8	20	5	46
(Number of indicators under Institutional)	(Number of indicators under Social Pillar)	(Category under Economic Pillar)	(Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring. The list of benchmarks is presented in Annexure 1.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark -\ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Accounts
Urban Local Body	For Park and Recreation Related Questions	Engineering
Urban Local Body	For Water Supply and Drainage related questions	Engineering
Urban Local Body	For Heritage sites related data	Town Planning
Urban Local Body	For Ecological sites related data	Town Planning
Urban Local Body	For Housing related data	Town Planning
Urban Local Body	For Building plan related data	Town Planning
Urban Local Body	For Roads related data	Engineering

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Solid waste management related data	Health Dept. ULB
Urban Local Body	For IT services related data	IT Dept
Urban Local Body	For Vendor committee related data	Town Planning
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	Revenue
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	State Pollution Control Board
Development Authority	Building Infrastructure	Town Planning
	Construction planning	Town Planning
	Green Building	Town Planning
	Rain water harvesting	Town Planning
	Universal Design Principle	Town Planning
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	TamilNadu Generation and Distribution Corporation Limited
State Disaster management authority		District Disaster Management Unit
State Education Department		District Chief Educational Officer
State Health Department	Health care professionals	Deputy Director Health Services
	Citizen Services	Deputy Director Health Services
	Disease Prevalence	Deputy Director Health Services
	Health Infrastructure	Deputy Director Health Services
State Renewable Energy Development Agency		Tamil Nadu Energy Development Agency
State Sales / Commercial Taxes Department		Deputy Commissioner, Commercial Taxes
Town and Country Planning Department	Land Use	Town Planning
Traffic and Police Department		District Superintendent of Police
Transport Authorities	Buses	Regional Transport Office
	Registered Vehicles	Regional Transport Office
	Sub urban rail transport	Not Applicable

Designated data owners	Subcategories	Data owners at city level
	Mono Rail Authority	Not Applicable
	Tramways	Not Applicable
	Marine Transport Authority	Not Applicable

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 94 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	**1**
State Education Department	**2**
DISCOM/Electricity Department	**10**
Traffic and Police Department	**2**
Development Authority	**1**
Pollution Control Board	**1**
State Renewable Energy Department	**2**
Town and Country Planning	**3**
State Health Department	**1**
Transport Authority	**3**
Disaster Management	**1**
Urban Local Body	**67**
Total	**94***

* The count of documents is based on first round of submission.

Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

- 1.2 | Percentage of services integrated through Command Centre
- 2.3 | Hotel occupancy
- 3.4 | Percentage of schools with access to digital education
- 5.1 | Number of streets, public places, junctions covered through surveillance systems
- 6.5 | Percentage of vendors registered and provided formal spaces
- 11.7 | Availability of Passenger Information System
- 11.11 | Percentage of traffic intersections with pedestrian crossing facilities
- 11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

- 6.4 | Unemployment Rate
- 11.3 | Mode share of public transport
- 11.5 | Mode share of Non Motorized Transport
- 12.3 | Quality of Water Supplied
- 15.4 | Level of Noise Pollution

4.4 Physical Audit

The following map presents the indicators audited at city level.

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**79.16**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	1
	1.1c trade license	1
	1.1d solid waste management	0
	1.1e water supply	1
	1.1f sewerage/drainage	1
	1.1g fogging	0
	1.1h property tax	1
	1.1i professional tax	1
	1.1j information	0.846153846
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	0.444444444
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**2.38**
Description	Services integrated through an integrated or a singular operations command centre	0.5
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**0**
Description		
Sub Indicators	1.3a Building plan	0

	1.3b Birth/Death Certificate	1.30066E-05
	1.3c water supply	0
	1.3d solid waste management	0
	1.3e property tax	0
	1.3f professional tax (RC)	0
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	0
	1.3i information	0
	1.3j electricity	0
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**0.36**
Description		
Sub Indicators	1.4a water supply	0
	1.4b solid waste	0
	1.4c street lights	0
	1.4d sewerage	0
	1.4e professional tax	0
	1.4f parks and recreational spaces	2.5
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**68.79**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	3008.53
Denominator	Total demand raised for the year	4373.24
Unit	Percentage	
Benchmark	90%	

Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**46.15**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	150
Denominator	Total O&M cost for providing water supply services during the year	325
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**55.42**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	35648
Denominator	Total expenditure (revenue and capital accounts) in the same year	64327
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**6.67**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	4
Denominator	Total number of wards	60
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	0
Denominator	Total number of historic buildings/sites identified	3
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	0
Denominator	Total number of ecologically important sites identified in the city	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**31.43**
Description	Average Occupancy rate of Hotels	31.42857143
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	0
Denominator	Total budget of the ULB (capital and revenue)	22397
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**11**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	11
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**226.19**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	68252
Denominator	Total population in the age group of 6-14 years	30175
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**23.01**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	3392
Denominator	Total female population in the age group of 6-14 years	14741
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**19.18**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	66585
Denominator	Total number of teachers available for primary grades (public and private schools)	3472
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	0
Denominator	Total number of schools	78
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**802524.77**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	802524.7706
Numerator	Percentage	

Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**94.84**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	288444
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**188.86**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	3509
Denominator	Total population of the city	185803
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**296.17**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	5503
Denominator	Total population of the city	185803
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**20**
Description	Total response time for health-related distress calls received in the city	20
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.24**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	454
Denominator	Total population of the city	185803
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases	

	(amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.02**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	36
Denominator	Total population of the city	185803
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**6.43**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	45
Denominator	Total length of road network in the city	700
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**2689.95**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	4998
Denominator	Total population of the city	185803
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**0.84**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	42
Denominator	Total crimes recorded in the same year	4998
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size	

	classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**91.49**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	170
Denominator	Total population of the city	185803
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**21.03**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	1230
Denominator	Total VAT/GST collection during preceding year	58.48
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**39.07**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	418.59
Denominator	Total Professional Tax collection during preceding year	1071.5
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**-14.53**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	-112
Denominator	Number of construction permits during preceding year	7.71
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	369783
Denominator	Total labour force in the city	30175
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**37.01**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	1558
Denominator	Total number of vendors in the city	4210
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**144.84**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	18428
Denominator	Total number of slum and EWS households in the city	127.23
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**277494.43**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	171019472256
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**0.75**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	138588
Denominator	Total population of the city	185803
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**0.63**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	117199
Denominator	Total population of the city	185803
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**81.42**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	71000000
Denominator	Total area of the city (total area of all land uses)	87200000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	185803
Denominator	Area allocated for residential land use (in hectares)	53000000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a	

	benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**142.02**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	166274
Denominator	Total number of households in the city	117077
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	213896
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**1885**
Description	Total number of sustained electrical interruptions in a year	1885
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.81**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	1671
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	79
Denominator	Total energy consumption from all sources	453958238
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	1008156.083
Denominator	Total quantum of water and waste water handled during the period	321360
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.34**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	4139401
Denominator	Total number of street light installations	19710
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	1737
Unit	Percentage	

Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.73**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	453958238
Denominator	Total population of the city	185803
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.51**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	70
Denominator	Total area of the city (sq.km)	87.2
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.34**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	64
Denominator	Total population of the city	185803
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	36.1
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	700
Unit	Percentage	
Benchmark	>=50	

Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**200**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	4
Denominator	Total number of major transport interchanges in the city	2
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	5
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**2**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	4
Denominator	Total number of major interchanges in the city	2
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**217.65**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	37
Denominator	Total number of signalised intersections in the city	17
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**33.33**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	1
Denominator	Total available on-street parking spaces in the city	3
Unit		

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**0.43**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	6
Denominator	Total length of road network in the city	1400
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**173.33**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	26
Denominator	Total number of junctions/ intersections on major roads in the city	15
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**2.09**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	19
Denominator	Total number of public right-of-way areas in the city	909
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**51.85**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	60705
Denominator	Total number of households in the city	117077
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**48809.76**
Formula:	*Numerator / Denominator*	

Numerator	Total quantity of water supplied into the distribution system	9069
Denominator	Total population of the city	185803
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	365
Denominator	Total number of samples tested for water quality	365
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	Blank
Denominator	Quantum of water put into the distribution system (mld)	9069
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	0
Denominator	Total number of water connections in the city	61623
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**113.94**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	752
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	660

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**116.87**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	127400
Denominator	Total number of properties in the city	109012
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**208.78**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	227592
Denominator	Total number of properties in the city	109012
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**11.16**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	1643
Denominator	Total waste water generated in the city per day	14719
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	1563
Denominator	Total waste water received at treatment plants per day	0
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**6.93**
Formula:	*Numerator / Denominator*	

Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	48.5
Denominator	Total length of road network in the city	700
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**95.26**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	127110
Denominator	Total number of households and establishments in the city	133438
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	230
Denominator	Total quantum of MSW generated in the city	230
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**1.45**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	100
Denominator	Average MSW generated in the city (tons per month)	6900
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**Non=Computable**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	Data Unavailable
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean	

	concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**Non=Computable**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	Data Unavailable
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**Non=Computable**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	Data Unavailable
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	Data Unavailable
Denominator	Total number of noise samples	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	Data Unavailable
Denominator	Total number of samples tested	Data Unavailable
Unit	Percentage	
Benchmark	100%	

LIVEABILITY ASSESSMENT DRAFT REPORT

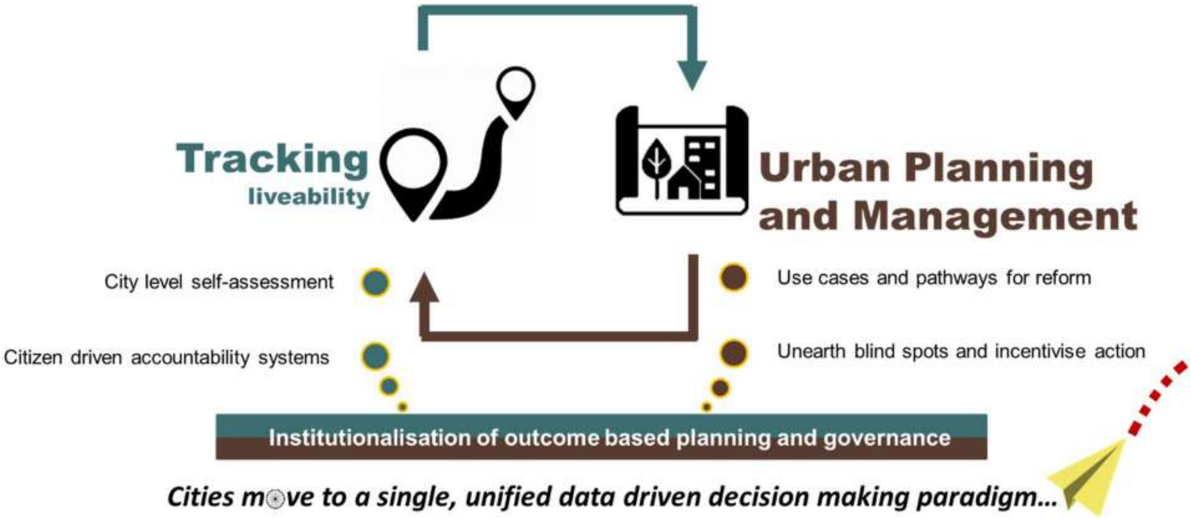
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



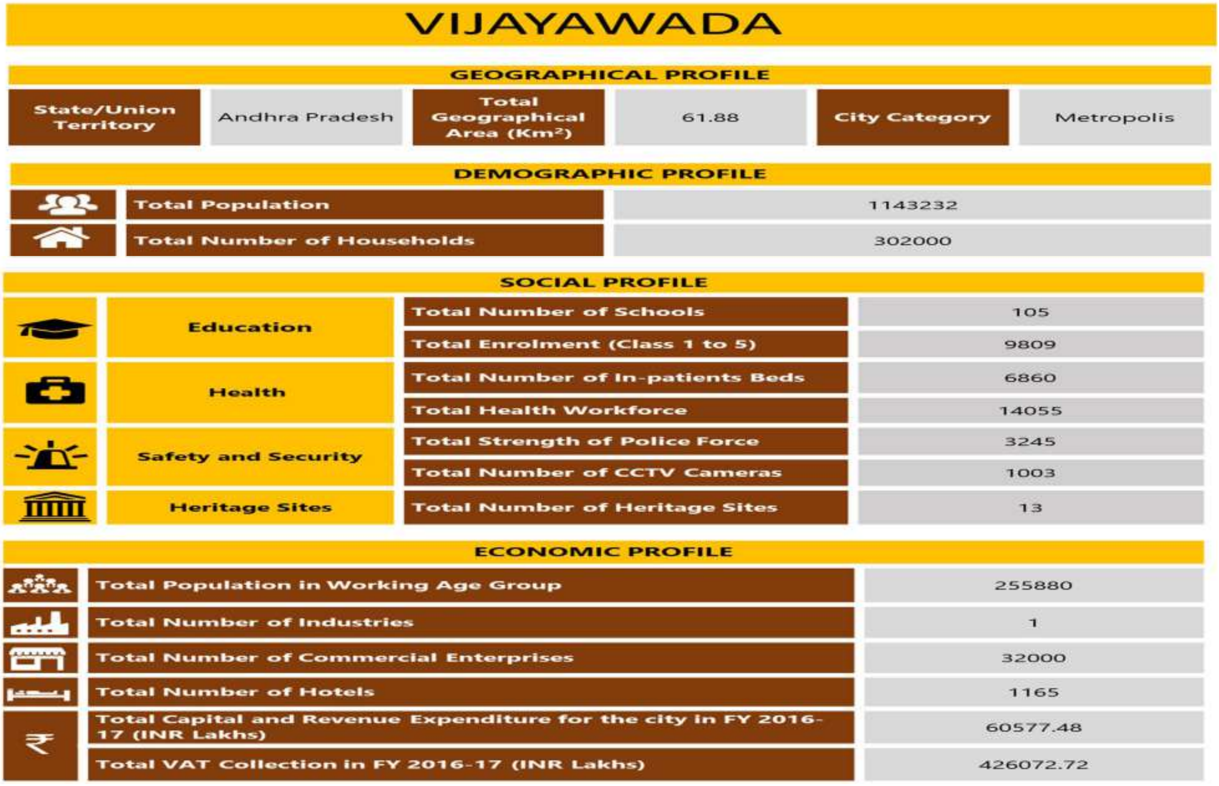
Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart

cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



VIJAYAWADA

GEOGRAPHICAL PROFILE

State/Union Territory	Andhra Pradesh	Total Geographical Area (Km²)	61.88	City Category	Metropolis

DEMOGRAPHIC PROFILE

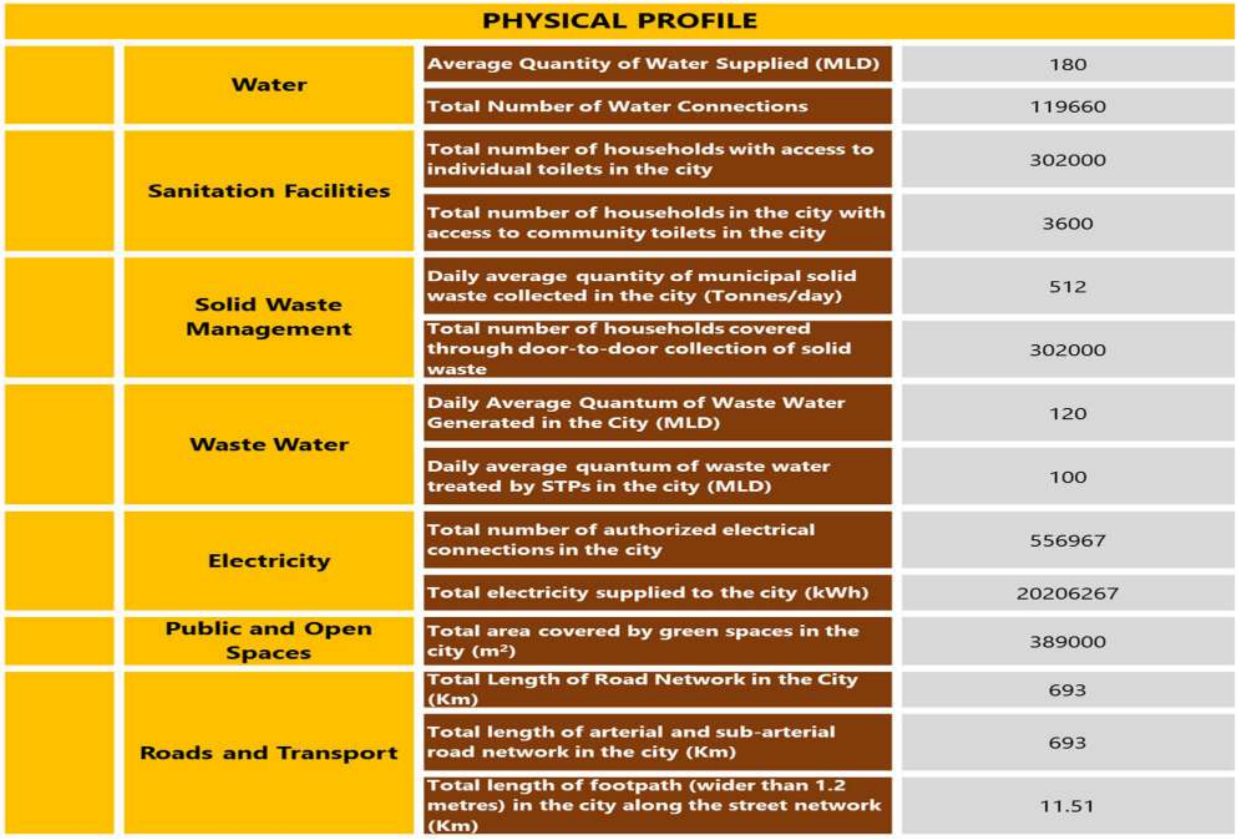
Total Population	1143232
Total Number of Households	302000

SOCIAL PROFILE

Education	Total Number of Schools	105
	Total Enrolment (Class 1 to 5)	9809
Health	Total Number of In-patients Beds	6860
	Total Health Workforce	14055
Safety and Security	Total Strength of Police Force	3245
	Total Number of CCTV Cameras	1003
Heritage Sites	Total Number of Heritage Sites	13

ECONOMIC PROFILE

Total Population in Working Age Group	255880
Total Number of Industries	1
Total Number of Commercial Enterprises	32000
Total Number of Hotels	1165
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	60577.48
Total VAT Collection in FY 2016-17 (INR Lakhs)	426072.72



PHYSICAL PROFILE			
	Water	Average Quantity of Water Supplied (MLD)	180
		Total Number of Water Connections	119660
	Sanitation Facilities	Total number of households with access to individual toilets in the city	302000
		Total number of households in the city with access to community toilets in the city	3600
	Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	512
		Total number of households covered through door-to-door collection of solid waste	302000
	Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	120
		Daily average quantum of waste water treated by STPs in the city (MLD)	100
	Electricity	Total number of authorized electrical connections in the city	556967
		Total electricity supplied to the city (kWh)	20206267
	Public and Open Spaces	Total area covered by green spaces in the city (m^2)	389000
	Roads and Transport	Total Length of Road Network in the City (Km)	693
		Total length of arterial and sub-arterial road network in the city (Km)	693
		Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	11.51

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various ‘Category Sub-Indexes’ and a composite ‘City Liveability Index’ will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population

Pillars of Comprehensive Development	Category	Indicators
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters

Pillars of Comprehensive Development	Category	Indicators
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water

Pillars of Comprehensive Development	Category	Indicators
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

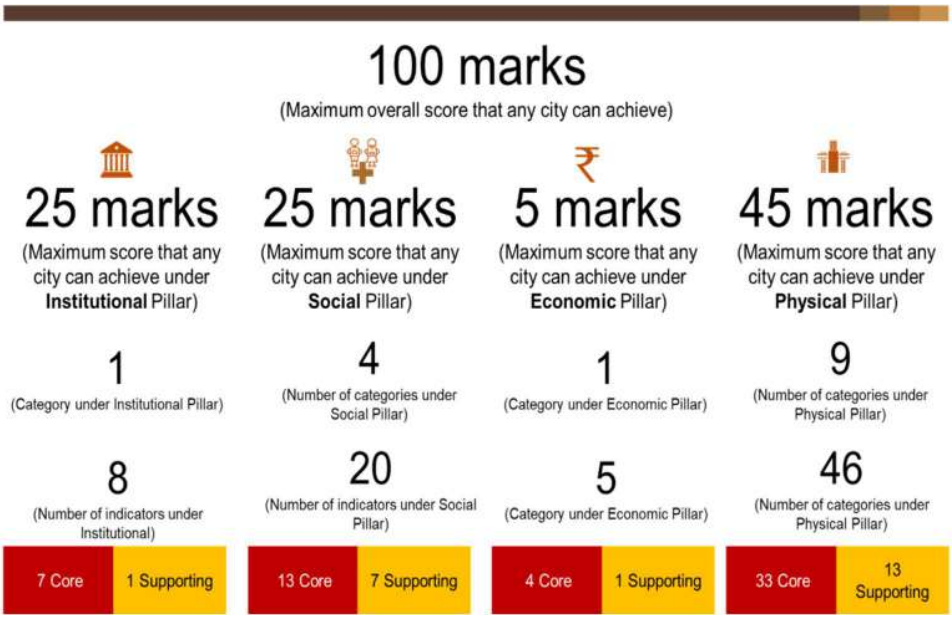
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks
(Maximum overall score that any city can achieve)

25 marks (Maximum score that any city can achieve under **Institutional** Pillar)	25 marks (Maximum score that any city can achieve under **Social** Pillar)	5 marks (Maximum score that any city can achieve under **Economic** Pillar)	45 marks (Maximum score that any city can achieve under **Physical** Pillar)
1 (Category under Institutional Pillar)	4 (Number of categories under Social Pillar)	1 (Category under Economic Pillar)	9 (Number of categories under Physical Pillar)
8 (Number of indicators under Institutional)	20 (Number of indicators under Social Pillar)	5 (Category under Economic Pillar)	46 (Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to "maximum within the comparison group" or "absolute benchmarks". For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring. The list of benchmarks is presented in Annexure 1.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State

Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Account Section
Urban Local Body	For Park and Recreation Related Questions	Horticulture Section
Urban Local Body	For Water Supply and Drainage related questions	Engineering section
Urban Local Body	For Heritage sites related data	Estate Section
Urban Local Body	For Ecological sites related data	Horticulture section
Urban Local Body	For Housing related data	Housing Section
Urban Local Body	For Building plan related data	Planning section
Urban Local Body	For Roads related data	Engineering section
Urban Local Body	For Solid waste management related data	Engineering section
Urban Local Body	For IT services related data	VOICE section
Urban Local Body	For Vendor committee related data	UCD Section
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Pollution Control Board
Development Authority	Building Infrastructure	Planning section
	Construction planning	Planning section
	Green Building	Planning section
	Rain water harvesting	Planning section
	Universal Design Principle	Planning section
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Southern power/DISCOM, Vijayawada
State Disaster management authority		District Disaster Management Authority AC[P]
State Education Department		Deputy Education Officer
State Health Department	Health care professionals	District Medical and Health Officer

Designated data owners	Subcategories	Data owners at city level
	Citizen Services	Do
	Disease Prevalence	Do
	Health Infrastructure	Do
State Renewable Energy Development Agency	Renewable Energy	NEDCAP
State Sales / Commercial Taxes Department		Commercial Tax
Town and Country Planning Department	Land Use	Planning section
Traffic and Police Department		Commissioner of Police
Transport Authorities	Buses	District Transport Dept
	Registered Vehicles	Do
	Sub urban rail transport	Do
	Mono Rail Authority	Do
	Tramways	Do
	Marine Transport Authority	Do

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 25 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	**5**
State Education Department	**4**
DISCOM/Electricity Department	**1**
Traffic and Police Department	**0**
Development Authority	**0**
Pollution Control Board	**1**
State Renewable Energy Department	**1**
Town and Country Planning	**0**
State Health Department	**0**
Transport Authority	**6**

Disaster Management	**0**
Urban Local Body	**7**
Total	**25***

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre
2.3 | Hotel occupancy
3.4 | Percentage of schools with access to digital education
5.1 | Number of streets, public places, junctions covered through surveillance systems
6.5 | Percentage of vendors registered and provided formal spaces
11.7 | Availability of Passenger Information System
11.11 | Percentage of traffic intersections with pedestrian crossing facilities
11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

8. LA - Universal Design Principles

5 Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**94.38**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	0.75
	1.1b death certificate	0.75
	1.1c trade license	1
	1.1d solid waste management	1
	1.1e water supply	1
	1.1f sewerage/drainage	1
	1.1g fogging	1
	1.1h property tax	1
	1.1i professional tax	1
	1.1j information	0.769230769
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	1
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**147.62**
Description	Services integrated through an integrated or a singular operations command centre	31
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**0.74**
Description		
Sub Indicators	1.3a Building plan	0.026328727
	1.3b Birth/Death Certificate	0.00131207
	1.3c water supply	0.001914817
	1.3d solid waste management	3.67379E-05
	1.3e property tax	0.016284566

	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	0.001612315
	1.3i information	0.004512645
	1.3j electricity	NA
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**1.21**
Description		
Sub Indicators	1.4a water supply	2.5
	1.4b solid waste	0
	1.4c street lights	3
	1.4d sewerage	1
	1.4e professional tax	0
	1.4f parks and recreational spaces	2
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**90.41**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	9503.84
Denominator	Total demand raised for the year	10511.46
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**63.07**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	2187.44
Denominator	Total O&M cost for providing water supply services during the year	3468.34
Unit	Percentage	
Benchmark	100%	

Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**22.11**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	24447.72
Denominator	Total expenditure (revenue and capital accounts) in the same year	110571.09
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	59
Denominator	Total number of wards	59
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	8
Denominator	Total number of historic buildings/sites identified	8
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	NA
Denominator	Total number of ecologically important sites identified in the city	NA
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**67.14**
Description	Average Occupancy rate of Hotels	67.14285714
Unit	Percentage	

Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0.04**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	26.1
Denominator	Total budget of the ULB (capital and revenue)	60577.48
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**54**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	54
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**9.77**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	17365
Denominator	Total population in the age group of 6-14 years	177653
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**10.29**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	8955
Denominator	Total female population in the age group of 6-14 years	87059
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**17.83**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	9809
Denominator	Total number of teachers available for primary grades (public and private schools)	550

Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**5.71**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	6
Denominator	Total number of schools	105
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**153.28**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	153.2784265
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**109.96**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	6749595
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**60.01**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	6860
Denominator	Total population of the city	1143232
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**122.94**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	14055
Denominator	Total population of the city	1143232
Unit	Number per 10,000 population	

Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**1**
Description	Total response time for health-related distress calls received in the city	1
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.06**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	712
Denominator	Total population of the city	1143232
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.03**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	390
Denominator	Total population of the city	1143232
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**144.73**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	1003
Denominator	Total length of road network in the city	693
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**826.78**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	9452
Denominator	Total population of the city	1143232
Unit	Crimes per lakh	

Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**15.38**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	1454
Denominator	Total crimes recorded in the same year	9452
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**33.59**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	384
Denominator	Total population of the city	1143232
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**-21.91**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	-119511.74
Denominator	Total VAT/GST collection during preceding year	5455.8446
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**8.28**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	88.44
Denominator	Total Professional Tax collection during preceding year	1068.37
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 6.3	**Increase in issuance of Construction Permits**	**59400**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	2376
Denominator	Number of construction permits during preceding year	0.04
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	73198
Denominator	Total labour force in the city	177653
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**48.09**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	2273
Denominator	Total number of vendors in the city	4727
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**15.23**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	20533
Denominator	Total number of slum and EWS households in the city	1348.24
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic**	**0.03**

	services	
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	80585383392
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**0.34**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	389000
Denominator	Total population of the city	1143232
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	396592
Denominator	Total population of the city	1143232
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	20
Denominator	Total area of the city (total area of all land uses)	61880000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**22864.64**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	1143232
Denominator	Area allocated for residential land use (in hectares)	50

Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**184.43**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	556967
Denominator	Total number of households in the city	302000
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	556967
Denominator	Total number of electricity connections in the city	556967
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**2**
Description	Total number of sustained electrical interruptions in a year	2
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.81**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	8
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0.04**

Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	184389
Denominator	Total energy consumption from all sources	41719238
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.29**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	1683850.583
Denominator	Total quantum of water and waste water handled during the period	8400
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.32**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	13721953
Denominator	Total number of street light installations	32226
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	NA
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	NA
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.8**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	41719238
Denominator	Total population of the city	1143232
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst	

	cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.67**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	76
Denominator	Total area of the city (sq.km)	61.88
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**2.19**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	2508
Denominator	Total population of the city	1143232
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	80
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	693
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	2
Denominator	Total number of major transport interchanges in the city	2
Unit	Percentage	
Benchmark	>=75	

Indicator No: 11.6	**Mode share of non-motorised transport[1]**	**To be computed**
Description	Mode share of non-motorised transport	2
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**170**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	340
Denominator	Total number of major interchanges in the city	2
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	NA
Denominator	Total number of signalised intersections in the city	36
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**35.56**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	16
Denominator	Total available on-street parking spaces in the city	45
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**0.83**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	11.51
Denominator	Total length of road network in the city	1386
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**250**
Formula:	*Numerator / Denominator*	

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Numerator	Total number of intersections with pedestrian crossing facilities on major roads	30
Denominator	Total number of junctions/ intersections on major roads in the city	12
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**20.2**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	20
Denominator	Total number of public right-of-way areas in the city	99
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**40.69**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	122890
Denominator	Total number of households in the city	302000
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**157.45**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	180
Denominator	Total population of the city	1143232
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	0
Denominator	Total number of samples tested for water quality	109500
Unit	Percentage	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**61.11**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	110
Denominator	Quantum of water put into the distribution system (mld)	180
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**7.61**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	9112
Denominator	Total number of water connections in the city	119660
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	NA
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	NA
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**1662.62**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	321269
Denominator	Total number of properties in the city	19323
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**781.45**

Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	151000
Denominator	Total number of properties in the city	19323
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	120
Denominator	Total waste water generated in the city per day	120
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**240**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	360
Denominator	Total waste water received at treatment plants per day	150
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**4.24**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	29.4
Denominator	Total length of road network in the city	693
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**100.15**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	334500
Denominator	Total number of households and establishments in the city	334000
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**100**
Formula:	*Numerator / Denominator*	

Numerator	Total quantum of MSW collected by the ULB or private operator	512
Denominator	Total quantum of MSW generated in the city	512
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**1.5**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	230
Denominator	Average MSW generated in the city (tons per month)	15360
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**6**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	6
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**6**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	6
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**5.5**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	5.5
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	0
Denominator	Total number of noise samples	365
Unit	Percentage	
Benchmark		

Indicator No: 15.5	**Quality of water in public surface water bodies**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	12
Denominator	Total number of samples tested	12
Unit	Percentage	
Benchmark	100%	

LIVEABILITY ASSESSMENT

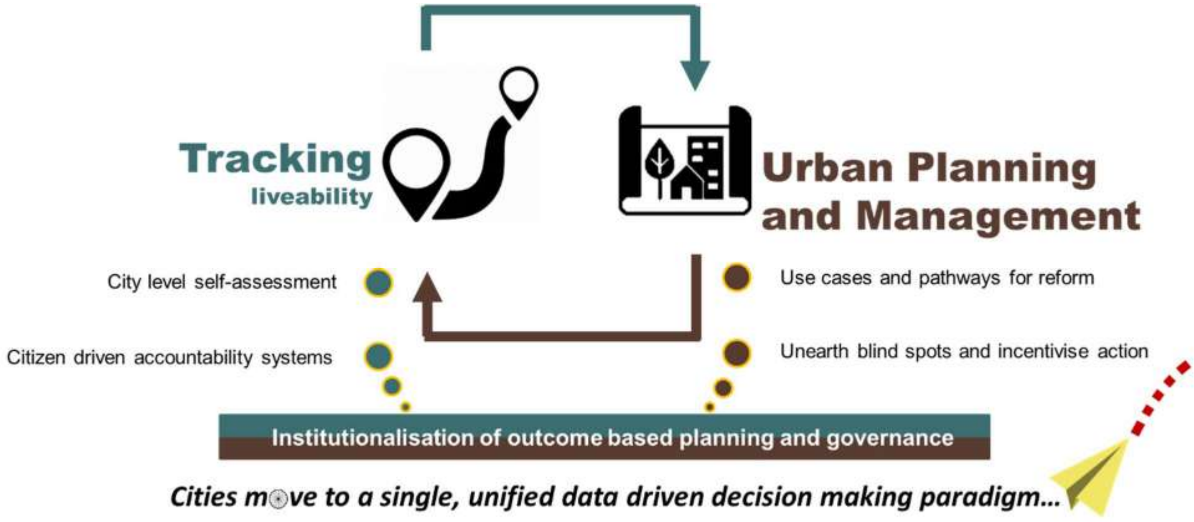
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

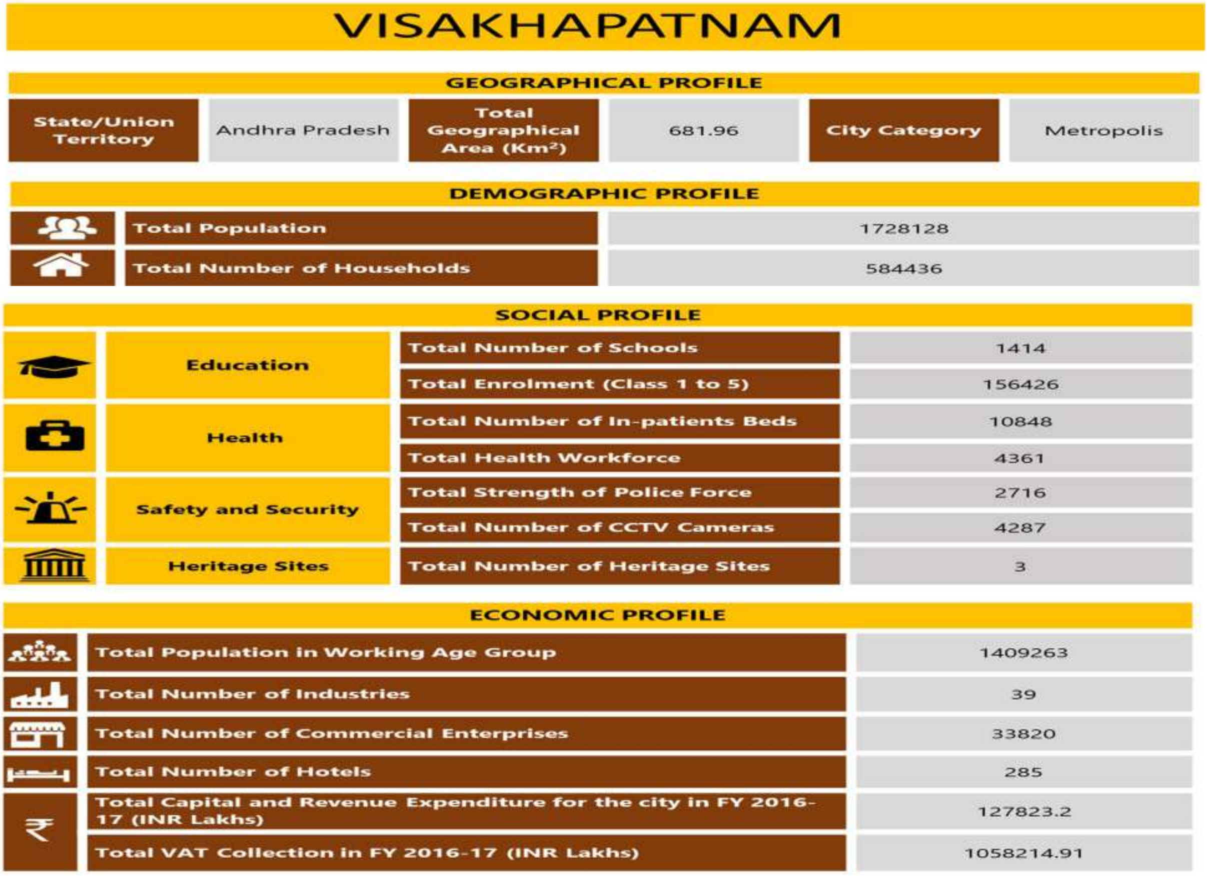


Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



VISAKHAPATNAM

GEOGRAPHICAL PROFILE

State/Union Territory	Andhra Pradesh	Total Geographical Area (Km²)	681.96	City Category	Metropolis

DEMOGRAPHIC PROFILE

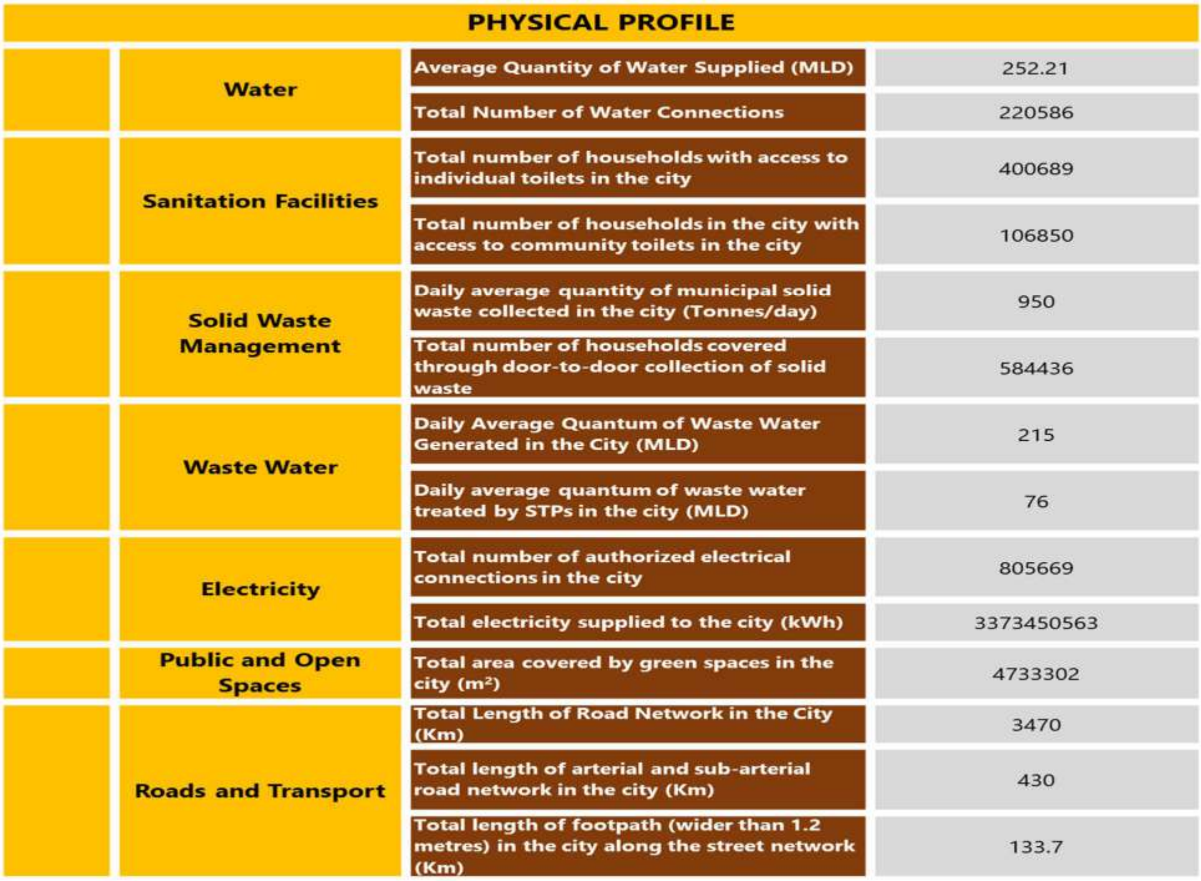
Total Population	1728128
Total Number of Households	584436

SOCIAL PROFILE

Education	Total Number of Schools	1414
	Total Enrolment (Class 1 to 5)	156426
Health	Total Number of In-patients Beds	10848
	Total Health Workforce	4361
Safety and Security	Total Strength of Police Force	2716
	Total Number of CCTV Cameras	4287
Heritage Sites	Total Number of Heritage Sites	3

ECONOMIC PROFILE

Total Population in Working Age Group	1409263
Total Number of Industries	39
Total Number of Commercial Enterprises	33820
Total Number of Hotels	285
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	127823.2
Total VAT Collection in FY 2016-17 (INR Lakhs)	1058214.91



PHYSICAL PROFILE			
	Water	Average Quantity of Water Supplied (MLD)	252.21
		Total Number of Water Connections	220586
	Sanitation Facilities	Total number of households with access to individual toilets in the city	400689
		Total number of households in the city with access to community toilets in the city	106850
	Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	950
		Total number of households covered through door-to-door collection of solid waste	584436
	Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	215
		Daily average quantum of waste water treated by STPs in the city (MLD)	76
	Electricity	Total number of authorized electrical connections in the city	805669
		Total electricity supplied to the city (kWh)	3373450563
	Public and Open Spaces	Total area covered by green spaces in the city (m^2)	4733302
	Roads and Transport	Total Length of Road Network in the City (Km)	3470
		Total length of arterial and sub-arterial road network in the city (Km)	430
		Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	133.7

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various ‘Category Sub-Indexes’ and a composite ‘City Liveability Index’ will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases

Pillars of Comprehensive Development	Category	Indicators
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport

Pillars of Comprehensive Development	Category	Indicators
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

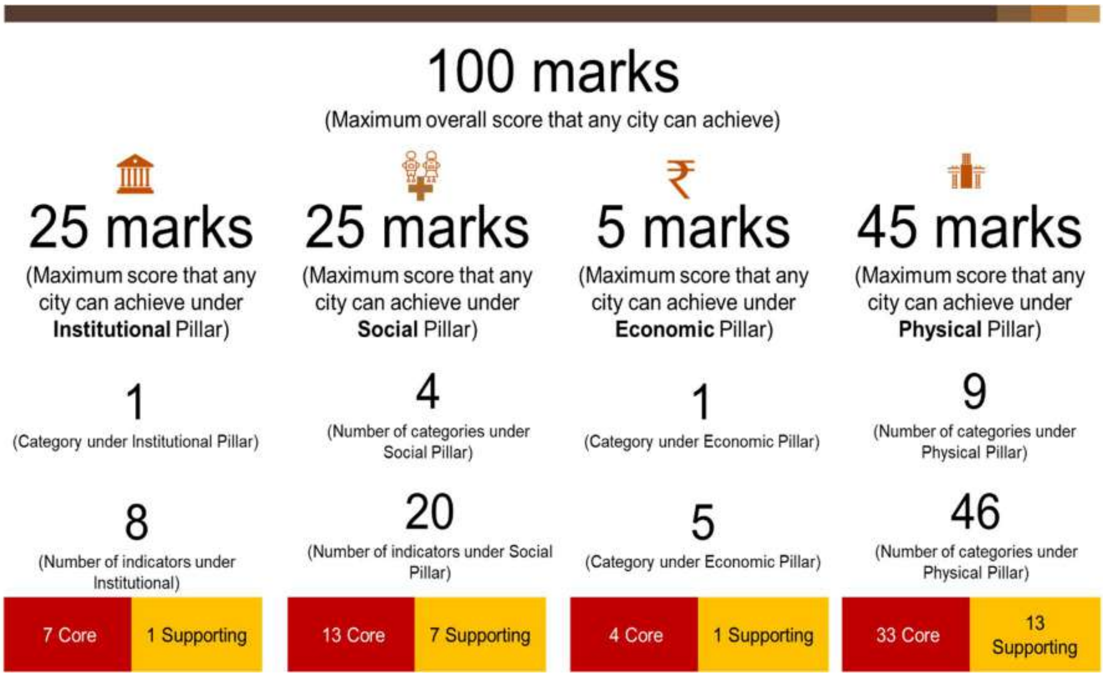
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks
(Maximum overall score that any city can achieve)
25 marks
(Maximum score that any city can achieve under Institutional Pillar)
25 marks
(Maximum score that any city can achieve under Social Pillar)
5 marks
(Maximum score that any city can achieve under Economic Pillar)
45 marks
(Maximum score that any city can achieve under Physical Pillar)
1
(Category under Institutional Pillar)
4
(Number of categories under Social Pillar)
1
(Category under Economic Pillar)
9
(Number of categories under Physical Pillar)
8
(Number of indicators under Institutional)
20
(Number of indicators under Social Pillar)
5
(Category under Economic Pillar)
46
(Number of categories under Physical Pillar)
7 Core
1 Supporting
13 Core
7 Supporting
4 Core
1 Supporting
33 Core
13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to "maximum within the comparison group" or "absolute benchmarks". For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring. The list of benchmarks is presented in Annexure 1.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled

in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Accounts , Revenue and Audit departments
Urban Local Body	For Park and Recreation Related Questions	Assistant Director, Horticulture, Director of Sports& Town Planning
Urban Local Body	For Water Supply and Drainage related questions	Engineering Department(Water supply & projects)
Urban Local Body	For Heritage sites related data	Archaeological Department, Town Planning & Visakhapatnam Urban Development Authority.
Urban Local Body	For Ecological sites related data	Archaeological Department, Town Planning & Visakhapatnam Urban Development Authority.
Urban Local Body	For Housing related data	Urban Community Development, Town Planning
Urban Local Body	For Building plan related data	Town Planning Department & Visakhapatnam urban Development Authority
Urban Local Body	For Roads related data	Engineering-Public Works, Andhra University GIS team & Low carbon Mobility Plan report.
Urban Local Body	For Solid waste management related data	Public Health Department
Urban Local Body	For IT services related data	Information Technology Department
Urban Local Body	For Vendor committee related data	Urban Community Development
Urban Local Body	Any other departments	IT Department and Administration

Designated data owners	Subcategories	Data owners at city level
	involved in providing data for questions mentioned under Urban Local Body	
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Pollution Control Board
Development Authority	Building Infrastructure	Town planning Department & Visakhapatnam Urban Development Authority (VUDA)
	Construction planning	Town planning Department & VUDA
	Green Building	Town planning Department & VUDA
	Rain water harvesting	Town planning Department & VUDA
	Universal Design Principle	Town planning Department & VUDA
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Andhra Pradesh Eastern Power Distribution Company Limited (APEPDCL)
State Disaster management authority		Addition Commissioner (Projects) District DM Authority,
State Education Department		District Educational Officer
State Health Department	Health care professionals	District Medical & Health Department
	Citizen Services	District Medical & Health Department
	Disease Prevalence	District Medical & Health Department
	Health Infrastructure	District Medical & Health Department
State Renewable Energy Development Agency	Renewable Energy	National Renewable Energy Corporation Limited
State Sales / Commercial Taxes Department		Deputy Commercial tax Department
Town and Country Planning Department	Land Use	Town Planning Department.
Traffic and Police Department		Office of Commissioner of Police.
Transport Authorities	Buses	Road Transport Authority
	Registered Vehicles	Road Transport Authority
	Sub urban rail transport	-
	Mono Rail Authority	-
	Tramways	-
	Marine Transport Authority	-

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 77 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	**1**
State Education Department	**2**
DISCOM/Electricity Department	**1**
Traffic and Police Department	**3**
Development Authority	**0**
Pollution Control Board	**6**
State Renewable Energy Department	**0**
Town and Country Planning	**0**
State Health Department	**1**
Transport Authority	**10**
Disaster Management	**0**
Urban Local Body	**53**
Total	**77***

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that

data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

- 1.2 | Percentage of services integrated through Command Centre
- 2.3 | Hotel occupancy
- 3.4 | Percentage of schools with access to digital education
- 5.1| Number of streets, public places, junctions covered through surveillance systems
- 6.5 | Percentage of vendors registered and provided formal spaces
- 11.7 | Availability of Passenger Information System
- 11.11 | Percentage of traffic intersections with pedestrian crossing facilities
- 11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

- 6.4 | Unemployment Rate
- 11.3 | Mode share of public transport
- 11.5 | Mode share of Non Motorized Transport
- 12.3 | Quality of Water Supplied
- 15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

8. LA - Universal Design Principles

5 Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**82.36**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	1
	1.1c trade license	1
	1.1d solid waste management	0.75
	1.1e water supply	0.333333333
	1.1f sewerage/drainage	0
	1.1g fogging	1
	1.1h property tax	1
	1.1i professional tax	1
	1.1j information	0.846153846
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	0.777777778
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**111.9**
Description	Services integrated through an integrated or a singular operations command centre	23.5
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**19.86**
Description		
Sub Indicators	1.3a Building plan	0.000762614
	1.3b Birth/Death Certificate	0.000615454
	1.3c water supply	0.012730584

	1.3d solid waste management	0.035904748
	1.3e property tax	0.007300866
	1.3f professional tax (RC)	0.371969697
	1.3g professional tax (EC)	0.017996892
	1.3h complaints/ grievance redressal	0.001337285
	1.3i information	0.031501717
	1.3j electricity	1.505700852
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**0.93**
Description		
Sub Indicators	1.4a water supply	1
	1.4b solid waste	0.5
	1.4c street lights	0.5
	1.4d sewerage	2
	1.4e professional tax	0
	1.4f parks and recreational spaces	0
	1.4g building plan	2.5
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**92.15**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	22437.21
Denominator	Total demand raised for the year	24348.7
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**175.25**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	22576.39

Denominator	Total O&M cost for providing water supply services during the year	12882.31
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**33.3**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	79379.88
Denominator	Total expenditure (revenue and capital accounts) in the same year	238355.68
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	NA
Denominator	Total number of wards	132
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**23.08**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	3
Denominator	Total number of historic buildings/sites identified	13
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	0
Denominator	Total number of ecologically important sites identified in the city	20
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**52.14**

Description	Average Occupancy rate of Hotels	52.14285714
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0.05**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	63.25
Denominator	Total budget of the ULB (capital and revenue)	127823.2
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**133**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	133
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**94.13**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	256293
Denominator	Total population in the age group of 6-14 years	272271
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**91.61**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	120423
Denominator	Total female population in the age group of 6-14 years	131457
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**143.25**
Formula:	*Numerator / Denominator*	

Numerator	Total number of students in primary grades (public and private)	156426
Denominator	Total number of teachers available for primary grades (public and private schools)	1092
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**2.19**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	31
Denominator	Total number of schools	1414
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**137.17**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	137.166431
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**108.88**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	1101007284
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**62.77**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	10848
Denominator	Total population of the city	1728128
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**25.24**
Formula:	*Numerator / Denominator*	

Numerator	Total number of qualified healthcare professionals	4361
Denominator	Total population of the city	1728128
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**10**
Description	Total response time for health-related distress calls received in the city	10
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.43**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	7484
Denominator	Total population of the city	1728128
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.11**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	1854
Denominator	Total population of the city	1728128
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**123.54**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	4287
Denominator	Total length of road network in the city	3470
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**539.95**
Formula:	Numerator / Denominator	

Numerator	Total number of crimes recorded in a year	9331
Denominator	Total population of the city	1728128
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**12.61**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	1177
Denominator	Total crimes recorded in the same year	9331
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**21.87**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	378
Denominator	Total population of the city	1728128
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**12.78**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	119879.71
Denominator	Total VAT/GST collection during preceding year	9383.352
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**10.62**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	192

Denominator	Total Professional Tax collection during preceding year	1808
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**242.12**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	3058
Denominator	Number of construction permits during preceding year	12.63
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	85450
Denominator	Total labour force in the city	272271
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**15.93**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	2000
Denominator	Total number of vendors in the city	12557
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	0

Denominator	Total number of slum and EWS households in the city	4430.11
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**1.36**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	121077122949864
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**2.74**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	4733302
Denominator	Total population of the city	1728128
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**96.7**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	167108230
Denominator	Total population of the city	1728128
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	0
Denominator	Total area of the city (total area of all land uses)	681960000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 9.2	**Net Density**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	1728128
Denominator	Area allocated for residential land use (in hectares)	133840000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**121.09**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	707672
Denominator	Total number of households in the city	584436
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0.19**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	1502
Denominator	Total number of electricity connections in the city	805669
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**23435**
Description	Total number of sustained electrical interruptions in a year	23435
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.73**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	431663
Unit	Hours	

Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	22200
Denominator	Total energy consumption from all sources	3373450563
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.23**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	3665385.083
Denominator	Total quantum of water and waste water handled during the period	9846.3
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.34**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	13000000
Denominator	Total number of street light installations	108251
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	1032490
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.28**
Formula:	*Numerator / Denominator*	

Numerator	Total energy consumption (for all uses) in the city	3373450563
Denominator	Total population of the city	1728128
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.38**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	410.8
Denominator	Total area of the city (sq.km)	681.96
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.47**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	809
Denominator	Total population of the city	1728128
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	27
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	3470
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**15.22**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with	7

	bicycle parking facility (within 250m radius)	
Denominator	Total number of major transport interchanges in the city	46
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport[1]**	**To be computed**
Description	Mode share of non-motorised transport	0.38
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**3.67**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	169
Denominator	Total number of major interchanges in the city	46
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	0
Denominator	Total number of signalised intersections in the city	50
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**0.91**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	1
Denominator	Total available on-street parking spaces in the city	110
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**1.93**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	133.7
Denominator	Total length of road network in the city	6940
Unit	Percentage	

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**34.14**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	141
Denominator	Total number of junctions/ intersections on major roads in the city	413
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**3.94**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	82
Denominator	Total number of public right-of-way areas in the city	2082
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**32.36**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	189147
Denominator	Total number of households in the city	584436
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**145.94**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	252.21
Denominator	Total population of the city	1728128
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Numerator	Number of samples meeting or exceeding specified potable water standards	993215
Denominator	Total number of samples tested for water quality	993215
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**4.18**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	10.537
Denominator	Quantum of water put into the distribution system (mld)	252.21
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**2.69**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	5924
Denominator	Total number of water connections in the city	220586
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**138.85**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	6037
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	4348
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**113.17**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	534353

Denominator	Total number of properties in the city	472170
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**190.68**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	900334
Denominator	Total number of properties in the city	472170
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**35.35**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	76
Denominator	Total waste water generated in the city per day	215
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	76
Denominator	Total waste water received at treatment plants per day	76
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**92.56**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	3212
Denominator	Total length of road network in the city	3470
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**94.83**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	586296
Denominator	Total number of households and establishments in the city	618256

Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	950
Denominator	Total quantum of MSW generated in the city	950
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	230
Denominator	Average MSW generated in the city (tons per month)	28500
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**8.6**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	8.6
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**17.6**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	17.6
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**72.9**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	72.9
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	140

Denominator	Total number of noise samples	140
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	0
Denominator	Total number of samples tested	0
Unit	Percentage	
Benchmark	100%

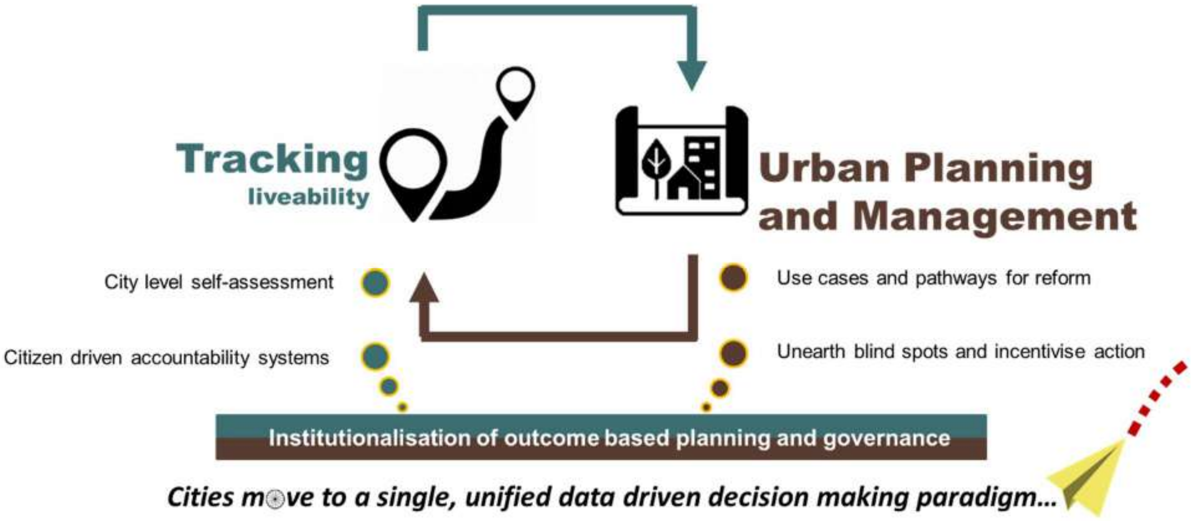
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



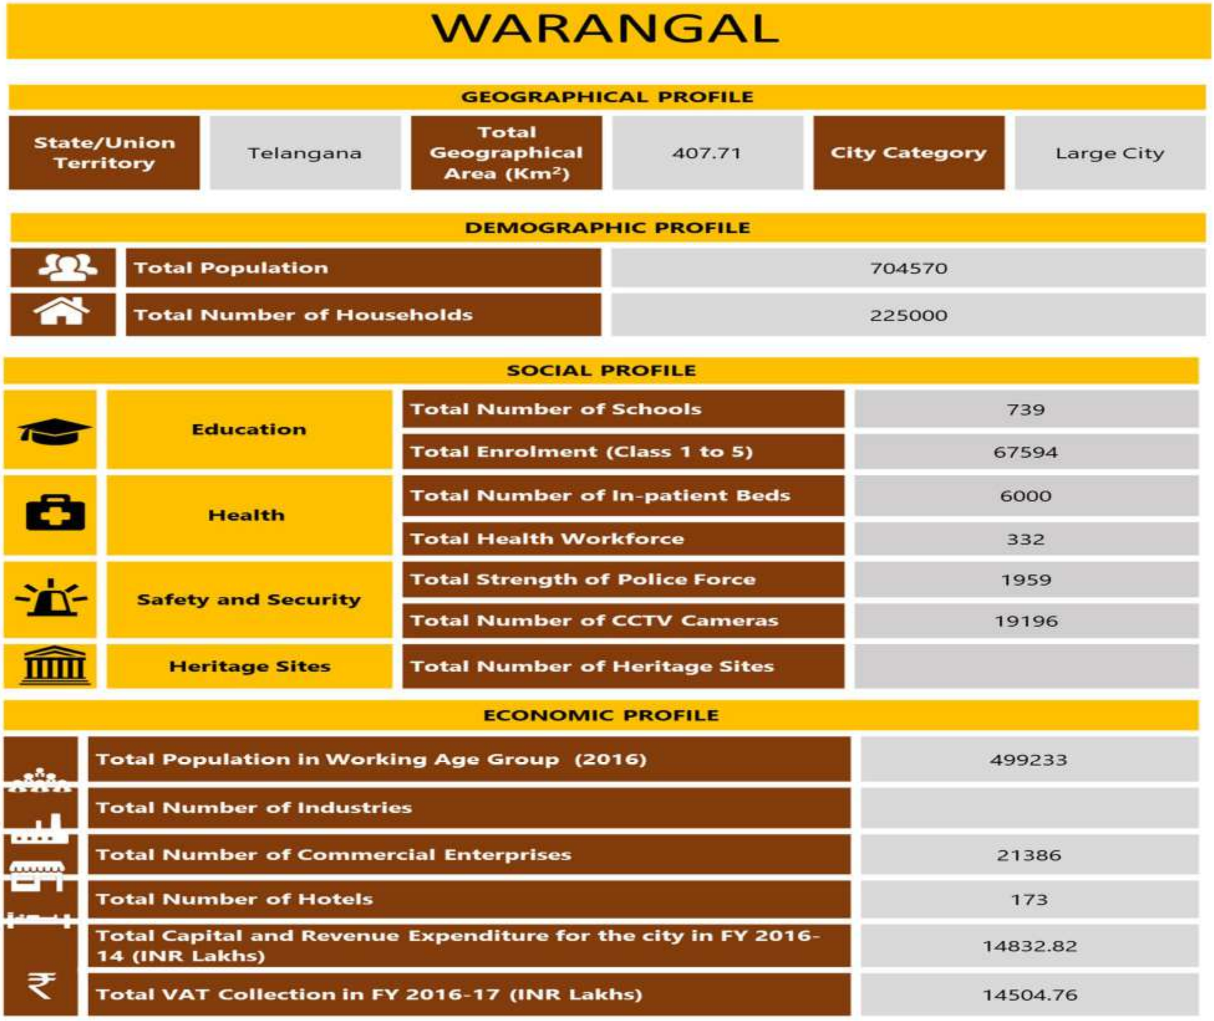
Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart

cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



WARANGAL

GEOGRAPHICAL PROFILE

State/Union Territory	Telangana	**Total Geographical Area (Km²)**	407.71	**City Category**	Large City

DEMOGRAPHIC PROFILE

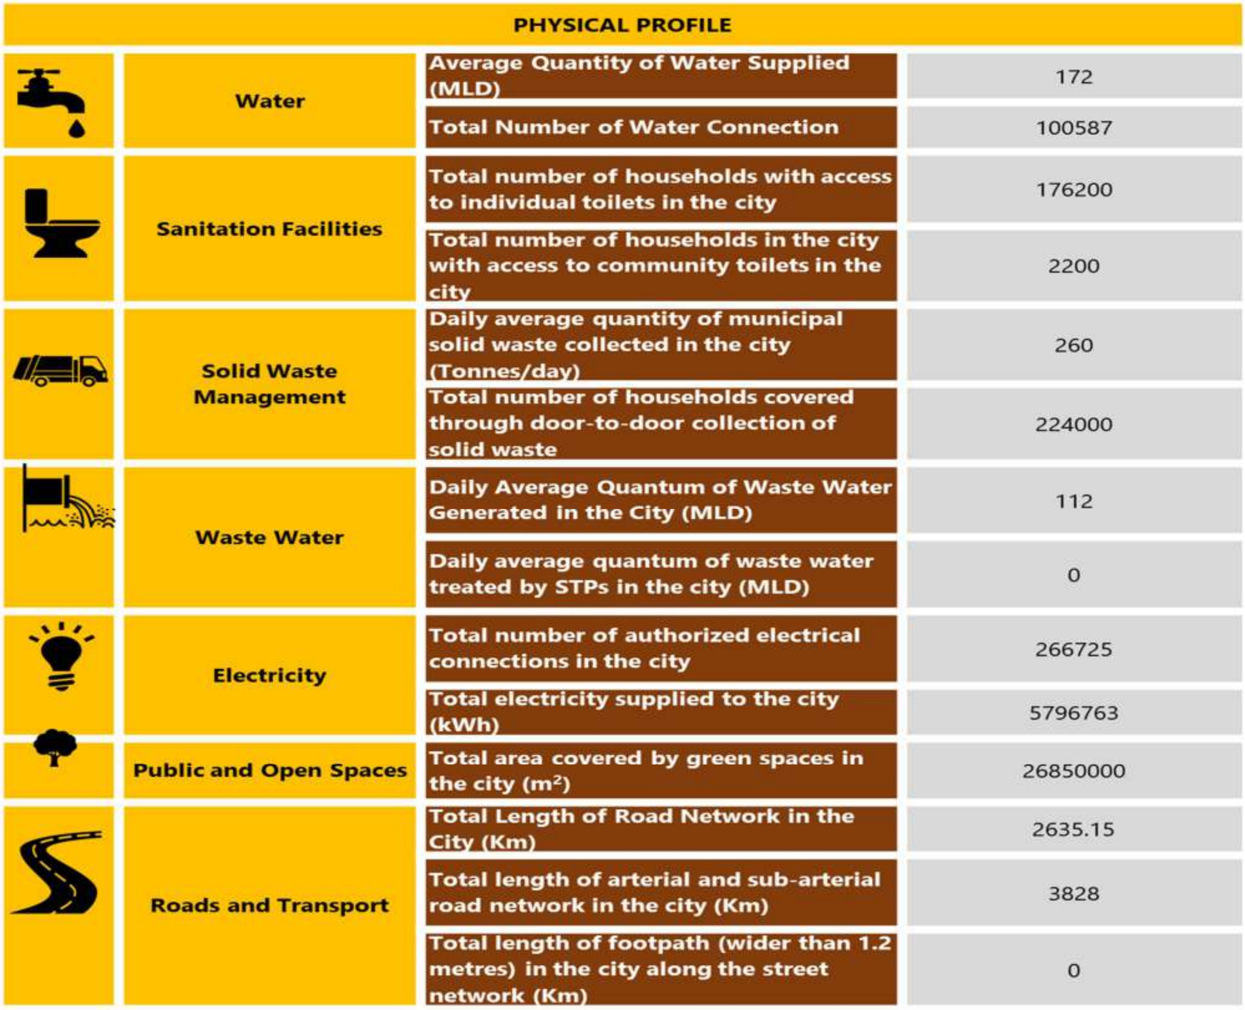
Total Population	704570
Total Number of Households	225000

SOCIAL PROFILE

Education	**Total Number of Schools**	739
	Total Enrolment (Class 1 to 5)	67594
Health	**Total Number of In-patient Beds**	6000
	Total Health Workforce	332
Safety and Security	**Total Strength of Police Force**	1959
	Total Number of CCTV Cameras	19196
Heritage Sites	**Total Number of Heritage Sites**	

ECONOMIC PROFILE

Total Population in Working Age Group (2016)	499233
Total Number of Industries	
Total Number of Commercial Enterprises	21386
Total Number of Hotels	173
Total Capital and Revenue Expenditure for the city in FY 2016-14 (INR Lakhs)	14832.82
Total VAT Collection in FY 2016-17 (INR Lakhs)	14504.76



PHYSICAL PROFILE		
Water	Average Quantity of Water Supplied (MLD)	172
	Total Number of Water Connection	100587
Sanitation Facilities	Total number of households with access to individual toilets in the city	176200
	Total number of households in the city with access to community toilets in the city	2200
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	260
	Total number of households covered through door-to-door collection of solid waste	224000
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	112
	Daily average quantum of waste water treated by STPs in the city (MLD)	0
Electricity	Total number of authorized electrical connections in the city	266725
	Total electricity supplied to the city (kWh)	5796763
Public and Open Spaces	Total area covered by green spaces in the city (m^2)	26850000
Roads and Transport	Total Length of Road Network in the City (Km)	2635.15
	Total length of arterial and sub-arterial road network in the city (Km)	3828
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	0

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary

Pillars of Comprehensive Development	Category	Indicators
		education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density

Pillars of Comprehensive Development	Category	Indicators
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian

Pillars of Comprehensive Development	Category	Indicators
		crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

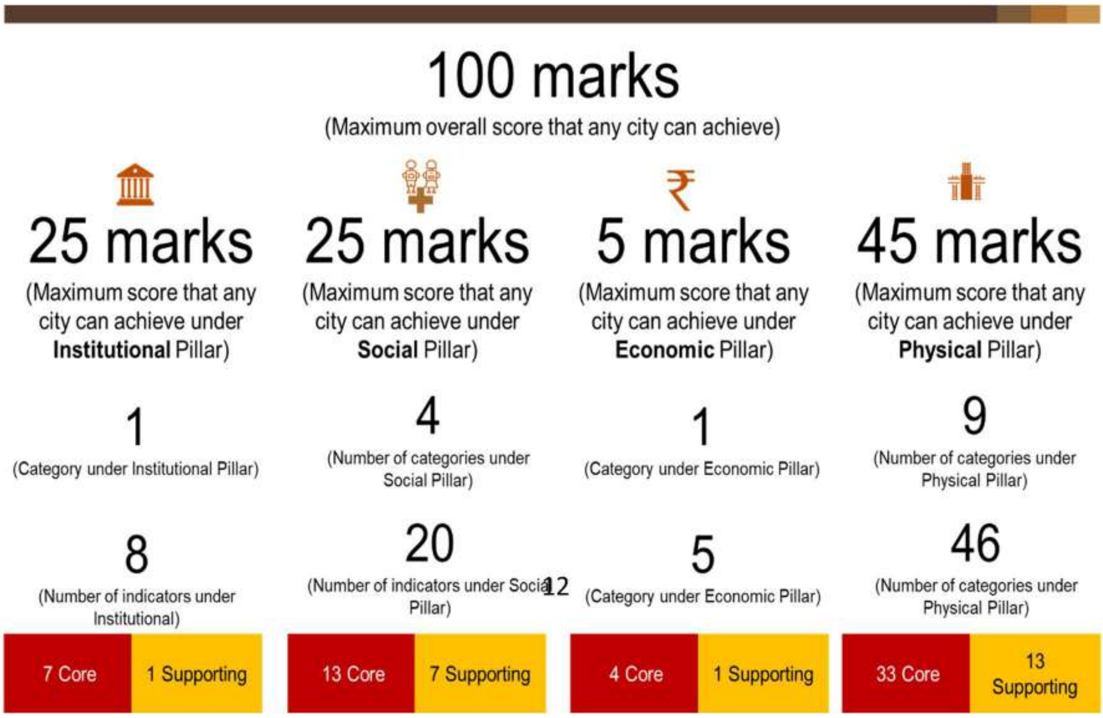
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks
(Maximum overall score that any city can achieve)
25 marks
(Maximum score that any city can achieve under **Institutional** Pillar)
25 marks
(Maximum score that any city can achieve under **Social** Pillar)
5 marks
(Maximum score that any city can achieve under **Economic** Pillar)
45 marks
(Maximum score that any city can achieve under **Physical** Pillar)
1
(Category under Institutional Pillar)
4
(Number of categories under Social Pillar)
1
(Category under Economic Pillar)
9
(Number of categories under Physical Pillar)
8
(Number of indicators under Institutional)
20
(Number of indicators under Social Pillar)
5
(Category under Economic Pillar)
46
(Number of categories under Physical Pillar)
7 Core
1 Supporting
13 Core
7 Supporting
4 Core
1 Supporting
33 Core
13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken

down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Administration wing c1 Greater Warangal municipal corporation
Urban Local Body	For Park and Recreation Related Questions	Town planning wing Greater Warangal municipal corporation
Urban Local Body	For Water Supply and Drainage related questions	Engineering section Greater Warangal municipal corporation
Urban Local Body	For Heritage sites related data	ENGINEERING
Urban Local Body	For Ecological sites related data	ENGINEERING
Urban Local Body	For Housing related data	
Urban Local Body	For Building plan related data	City planner
Urban Local Body	For Roads related data	engineering
Urban Local Body	For Solid waste management related data	Public health
Urban Local Body	For IT services related data	IT WING
Urban Local Body	For Vendor committee related data	MEPMA
Urban Local Body	Any other departments	ADMINISTRATION

Designated data owners	Subcategories	Data owners at city level
	involved in providing data for questions mentioned under Urban Local Body	
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	ENGINEERING AND
Development Authority	Building Infrastructure	TOWN PLANNING
	Construction planning	TOWN PLANNING
	Green Building	ENGINEERING
	Rain water harvesting	TOWN PLANNING
	Universal Design Principle	TOWN PLANNING
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	ELECTRICAL SUPERENTANDANT
State Disaster management authority		
State Education Department		
State Health Department	Health care professionals	DMHO
	Citizen Services	DMHO
	Disease Prevalence	DMHO
	Health Infrastructure	DMHO
State Renewable Energy Development Agency	Renewable Energy	
State Sales / Commercial Taxes Department		
Town and Country Planning Department	Land Use	TOWN PLANNING
Traffic and Police Department		
Transport Authorities	Buses	
	Registered Vehicles	Road transport authority
	Sub urban rail transport	Not applicable
	Mono Rail Authority	Not applicable
	Tramways	Not applicable
	Marine Transport Authority	Not applicable

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 27 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

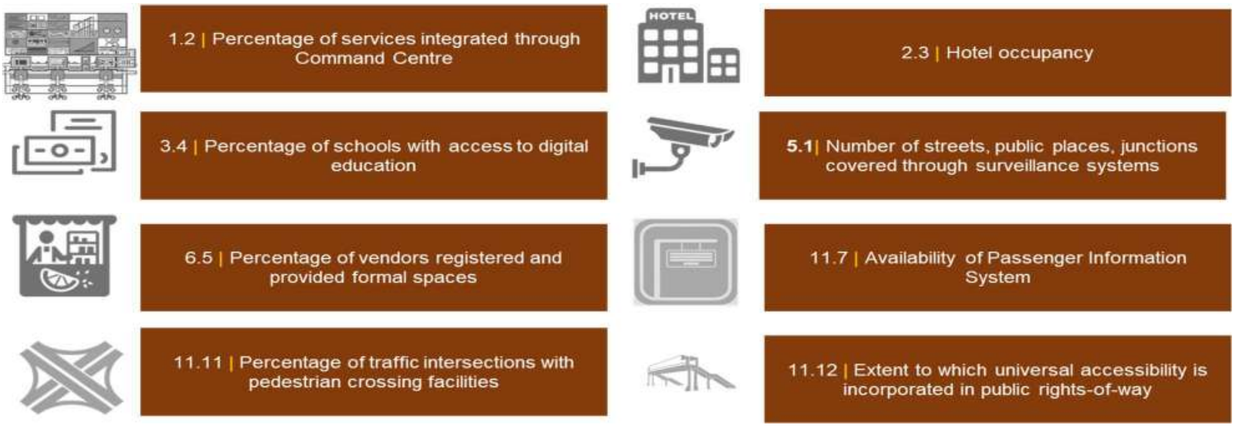
Data Owners	Number of Documents
Sales and Commercial Taxes	0
State Education Department	0
DISCOM/Electricity Department	0
Traffic and Police Department	0
Development Authority	0
Pollution Control Board	4
State Renewable Energy Department	4
Town and Country Planning	0
State Health Department	0
Transport Authority	0
Disaster Management	0
Urban Local Body	19
Total	27*

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:



1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

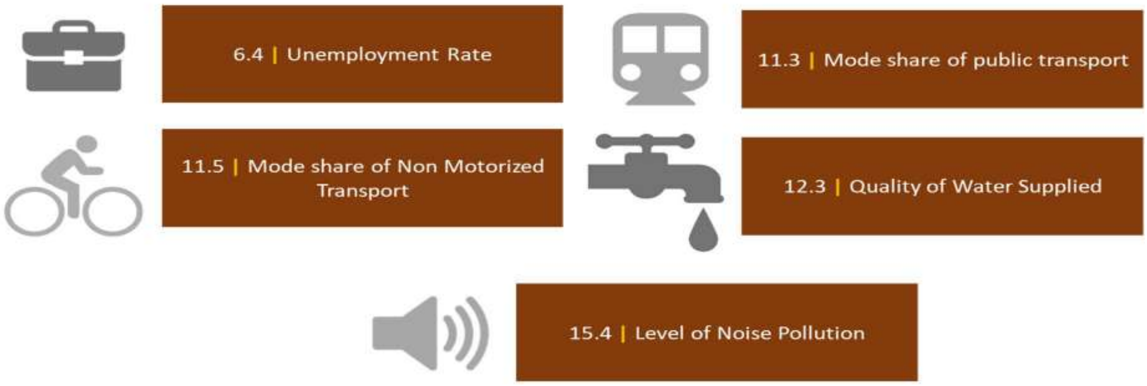
6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.



6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5 Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**91.72**
Description	Average citizen services available online	

Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	1
	1.1c trade license	1
	1.1d solid waste management	1
	1.1e water supply	1
	1.1f sewerage/drainage	0
	1.1g fogging	1
	1.1h property tax	1
	1.1i professional tax	1
	1.1j information	0.923076923
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	1
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**0**
Description	Services integrated through an integrated or a singular operations command centre	0
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**0.38**
Description		
Sub Indicators	1.3a Building plan	0.001055593
	1.3b Birth/Death Certificate	NA
	1.3c water supply	0.000610325
	1.3d solid waste management	NA
	1.3e property tax	0.014454431
	1.3f professional tax (RC)	NA

	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	0.000631591
	1.3i information	0.000618817
	1.3j electricity	0.005143875
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**0.57**
Description		
Sub Indicators	1.4a water supply	1
	1.4b solid waste	0
	1.4c street lights	1
	1.4d sewerage	0
	1.4e professional tax	0
	1.4f parks and recreational spaces	0
	1.4g building plan	2
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**101.6**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	5733.12
Denominator	Total demand raised for the year	5642.93
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**64.37**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	1416.14
Denominator	Total O&M cost for providing water supply services during the year	2200
Unit	Percentage	
Benchmark	100%	

Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**-18.32**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	-3721.15
Denominator	Total expenditure (revenue and capital accounts) in the same year	20312.9
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	0
Denominator	Total number of wards	58
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**33.33**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	1
Denominator	Total number of historic buildings/sites identified	3
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	0
Denominator	Total number of ecologically important sites identified in the city	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**14.29**
Description	Average Occupancy rate of Hotels	14.28571429

Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0.24**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	36.02
Denominator	Total budget of the ULB (capital and revenue)	14832.82
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**44**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	44
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**93.58**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	109963
Denominator	Total population in the age group of 6-14 years	117505
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**90.6**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	51411
Denominator	Total female population in the age group of 6-14 years	56745
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**28.42**

Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	67594
Denominator	Total number of teachers available for primary grades (public and private schools)	2378
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**19.08**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	141
Denominator	Total number of schools	739
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**89.24**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	89.23806835
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**103.41**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	202805240
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**85.16**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	6000
Denominator	Total population of the city	704570
Unit	Number per 10,000 population	

Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**4.71**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	332
Denominator	Total population of the city	704570
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**18**
Description	Total response time for health-related distress calls received in the city	18
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	105
Denominator	Total population of the city	704570
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.06**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	390
Denominator	Total population of the city	704570
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**728.46**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	19196

Denominator	Total length of road network in the city	2635.15
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**562.33**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	3962
Denominator	Total population of the city	704570
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**10.55**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	418
Denominator	Total crimes recorded in the same year	3962
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**19.59**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	138
Denominator	Total population of the city	704570
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**13.8**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	1758.84
Denominator	Total VAT/GST collection during preceding year	127.4592
Unit	Percentage	

Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**-3.22**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	-0.58
Denominator	Total Professional Tax collection during preceding year	17.99
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**92.11**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	35
Denominator	Number of construction permits during preceding year	0.38
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	Data Unavailable
Denominator	Total labour force in the city	117505
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**4.93**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	152
Denominator	Total number of vendors in the city	3085
Unit	Percentage	

Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	0
Denominator	Total number of slum and EWS households in the city	674.78
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**0**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	**0**
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**38.11**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	26850000
Denominator	Total population of the city	704570
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**3.59**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	2530909
Denominator	Total population of the city	704570
Unit	Square metres (sq.m.)	

Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	0
Denominator	Total area of the city (total area of all land uses)	407710000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.05**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	704570
Denominator	Area allocated for residential land use (in hectares)	13140000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**117.1**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	263471
Denominator	Total number of households in the city	225000
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0.1**
Formula:	*Numerator / Denominator*	

Numerator	Number of electrical connections (residential and commercial) with smart meters	266
Denominator	Total number of electricity connections in the city	266725
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**15958**
Description	Total number of sustained electrical interruptions in a year	15958
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.8**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	40000
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	914
Denominator	Total energy consumption from all sources	5796763
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	5919947
Denominator	Total quantum of water and waste water handled during the period	5160
Unit	kWh per million litres	

Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.34**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	10865621
Denominator	Total number of street light installations	66219
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**0.17**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	2000
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	5000
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	5796763
Denominator	Total population of the city	704570
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.02**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	10
Denominator	Total area of the city (sq.km)	407.71
Unit	Transport length (kms) per square km	

Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.1**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	69
Denominator	Total population of the city	704570
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	60
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	2635.15
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	NA
Denominator	Total number of major transport interchanges in the city	15
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	0
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**Non-**

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

		Computable
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	NA
Denominator	Total number of major interchanges in the city	15
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	0
Denominator	Total number of signalised intersections in the city	18
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	0
Denominator	Total available on-street parking spaces in the city	0
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	0
Denominator	Total length of road network in the city	5270.3
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**218.75**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	35

Denominator	Total number of junctions/ intersections on major roads in the city	16
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**1.21**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	20
Denominator	Total number of public right-of-way areas in the city	1652
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**34.3**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	77169
Denominator	Total number of households in the city	225000
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**244.12**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	172
Denominator	Total population of the city	704570
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified	72

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

	potable water standards	
Denominator	Total number of samples tested for water quality	72
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**35**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	60.2
Denominator	Quantum of water put into the distribution system (mld)	172
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**0.56**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	565
Denominator	Total number of water connections in the city	100587
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	Data Unavailable
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	Data Unavailable
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**102.72**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual	178410

	and/or community toilets	
Denominator	Total number of properties in the city	173678
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**88.27**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	153310
Denominator	Total number of properties in the city	173678
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	0
Denominator	Total waste water generated in the city per day	112
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	0
Denominator	Total waste water received at treatment plants per day	0
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**0.95**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	25
Denominator	Total length of road network in the city	2635.15
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**99.47**
Formula:	*Numerator / Denominator*	

Numerator	Total number of households and establishments covered through doorstep collection	245088
Denominator	Total number of households and establishments in the city	246386
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**92.86**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	260
Denominator	Total quantum of MSW generated in the city	280
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**1.54**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	120
Denominator	Average MSW generated in the city (tons per month)	7800
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**7.6**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	7.6
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**24.7**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	24.7
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**66.5**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	66.5

Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	0
Denominator	Total number of noise samples	36
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**47.92**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	23
Denominator	Total number of samples tested	48
Unit	Percentage	
Benchmark	100%	

Copies of the [illegible] reports were placed in the Project Monitoring Committee chaired by Secretary (HUA) held on 17.07.2018. The reports were approved by the committee / JS (AMRUT). (minutes of the meeting attached).
Submitted.

Re: **Contract Reference No: 1554254 –'Assessment of Liveability Indices for 116 cities'- Submission of Draft City Assessment Report**

Dear Sir,

We, hereby submit the Draft City Assessment Reports of 116 cities for 'Assessment of Liveability Indices for 116 cities' (Contract reference number 1554254). The reports are in line with the report structure approved by the Chairman of the Project Implementation Committee. Each city report contains the following:

1. Introduction, City Profile, Liveability Framework and Indicators
2. City Reconnaissance Meeting: Data Collection and Verification
3. Indicator Values

Thank you.

We remain,

Yours sincerely,

Recd on 5/6/2018

Minutes of the Meeting of the Monitoring Committee on "Ease of Living Index" held on 17th July, 2018 under the Chairmanship of Shri Durga Shanker Mishra, Secretary (HUA)

The meeting of the Monitoring Committee on "Ease of Living Index" was held on 17th July, 2018 under the Chairmanship of Shri Durga Shanker Mishra, Secretary (HUA) at 5:00 PM in Conference Hall (Room No. 123 C), Nirman Bhawan, New Delhi. The list of participants is at annexure-I.

Secretary (HUA) welcomed all the members and discussions were initiated to review the progress on ease of living assessment in 111 cities. On behalf of the consortia, Mr. Ankit Chatri Lead Consultant, Athena Infonomics and Ms. Tripti Sharma, Research Director, Ipsos Public Affairs presented progress on key deliverables. The consortia briefed on the following:

- Progress on ranking
- Presentation of the ranking dashboard
- Presentation of the video (Hindi)
- Presentation of draft National and City assessment reports

The following decisions were taken:

1. It was informed that the ranking has been finalised on the basis of 78 indicators instead of 79 indicators. The indicator on unemployment has been excluded due to lack of reliable data.

2. The monitoring committee reviewed the ranking dashboard and suggested a few modifications.

3. The committee suggested revision in the Hindi version of the video. It was advised to use bright, vibrant and more relevant illustrations/images.

4. The format for integrated national report was presented and following suggestions were made:

    a. Change the cover page illustration (cover should have city features and people)
    b. Use of ease of living related images in the body of the report

5. The city assessment report structure in the form of a sample report was presented and approved. The monitoring committee was informed that the draft city assessment reports have been submitted

The meeting concluded with a vote of thanks to the Chair.

Executive Summary

Assessment of liveability indices is an initiative by the Ministry of Housing and Urban Affairs to improve quality of life of citizens and achieve sustainable development goals by encouraging cities to adopt "outcome based" approach for urban planning. Assessment process aimed to provide opportunity to cities to review the development components holistically by involving 79 measurable indicators categorized under governance, health, education, safety, economy, power supply, transportation and mobility, identity, culture, housing, waste management and pollution.

This report highlights the assessment process, key milestones, and the final outcome of the data submitted. Implementation of liveability assessment commenced formally on 19th January 2018. A national level workshop was organized on 13th February 2018 to explain the importance and process of liveability assessment and get feedback on methodology from the city authorities.

This was followed by the next stage of Questionnaire development. The questionnaire was arranged under 12 categories representing 12 data owners namely urban local body, Central and state pollution control board, development authority, DISCOM/Electricity board, State disaster management authority, state education department, state health department, state renewable energy development agency, state sales and commercial taxes department, town and country planning department, traffic and police department and transport authorities.

An online data entry portal was developed to facilitate data submission by the cities. Each city had a unique log in to access the portal and submit the data. Both online and off-line options (download the questionnaire in an excel) to submit the data were available for cities. An email help desk was set up for the cities to raise any queries and seek clarification when responding to the questions.

A team for each state comprising of State Coordinator and City Coordinator (one per city) was deployed that facilitated the process and supported the cities. A total of 6 regional coordinators/ consultants, 29 State Coordinators, and 99 city coordinators were deployed across 116 cities. Training for state coordinators was held from 26th to 28th February 2018 at Chennai to make coordinators understand overall liveability assessment, indicators, data sources, protocols and roles and responsibilities.

City Reconnaissance Meetings were initiated by the state and city coordinators. The discussion began with discussions to finalize the state workshop schedule, mapping of data owners, and assist cities in data collection. The City Coordinators were based in the cities for over 6 weeks and during this time, they liase with ULB and other data owners to explain the liveability framework, online portal, and facilitate the online submission.

A total of 33 state workshops were conducted at the state level. The objective of the workshop was to orient the city stakeholders on liveability assessment, indicators, components of data collection, timelines, expectations of support and support extended by MoHUA. The state level workshops brought various city level departments on a single platform to understand and discuss the methodology and components of city liveability assessment.

Nodal agency at state level supported by the City and State Coordinator and city level (Municipality corporation/smart city limited) coordinated with city specific data owners/departments for data gathering, collation, and submission. Nodal persons in each department were appointed for timely data collection and submission. Of 116, 112 cities submitted data as per the timeline on 16th April 2018.

Post submission, the city and state coordinators supported by the central team followed up extensively with the cities to support secondary documents as evidence to substantiate their submissions. Secondary documents such as reports, official orders, copy of office register, signed copy of liveability assessment questionnaire furnished by cities against the submitted data. Documents are verified to map the documents for the reponses provided by city and to check the type data provided by city. The document check outcomes were shared with the cities as a part of data quality check.

For checking consistency of data, logical check of data, verifying data from other public sources were undertaken. Quality check was done to ensure data validity and provide opportunity to cities to review the data provided by them and correct in case of wrong data entry.

For 8 selected indicators namely, percentage of services integrated through command and control center, hotel occupancy rate, percentage of schools with access to digital education, number of CCTV cameras per unit road length, percentage of vendors registered and provided formal spaces, availability of passenger information system, percentage of traffic intersection with pedestrian crossing facility, and extent to which universal accessibility is incorporated in public rights of way. Physical audit was conducted in 110 cities by physical auditors appointed and trained by the consortium. In consultation with ULB nodal person, locations and indicators for physical audit was selected in each city. A mobile based application was developed to capture the physical audit related data.

Primary data collection was done for five indicators such as unemployment rates, mode share of public transport, mode share of non-motorized transport, quality of water supplied, and level of noise pollution. Protocols for water and noise test were prepared in consultation with experts. Water quality test involved physical, chemical and bacteriological test of water as per the CPCB norms. For testing quality of water at consumer end, the auditors worked closely with the ULB and Water department. Samples were collected from consumer end and submitted to the lab suggested by city. For noise pollution, in about 20 cities the state pollution board or city level environment department took the responsibility for providing noise pollution data as per the protocols. In rest of the cities, mobile based application was used to measure noise pollution.

During implementation, MoHUA facilitated the process by conducting video conferences with cities to address any queries, reiterate the importance, and ensure that cities adequately engages in the process and submit their responses in time and respond to requests for clarifications.

In addition to secondary data collection, physical audit and primary data collection, citizen survey was conducted to understand their perception and level of satisfaction on various services such as health, education, water supply, electricity, waste management etc. provided by urban local bodies. Over 60000 citizens participated in the survey across India.

The final scores and ranks have been generated based on the scoring methodology that has been discussed extensively and minor modifications made that are summarized as below:

#	Challenges	Proposed Solutions
1	Only 23 cities of 111 cities have City Mobility Plan (CMP) or any and hence able to provide data for Mode Share of Public Transport and Non-Motorised Transport. To address the data gap, as advised by the MoHUA, the consortia undertook a sample dipstick across all cities covering a sample of 150 Households. Understandably, the dipstick findings will not match the rigor of a CMP.	We recommend the following: 1) Cities which have provided CMP Data will be evaluated on 100% of the maximum score 2) For the cities where the dipstick data is used, the city receives a 50% discount on the overall score Alternatively, another approach is to assign 0 score to all 88 cities that don't have a CMP
2	Variance was observed on data reported by cities on road network and data presented in the smart city proposals during the verifications.	We recommend taking the data reported by the cities in the Smart City Proposals.
3	There is no secondary source/ organization that provides un-	The indicator on unemployment will

#	Challenges	Proposed Solutions
	employment data at city level. As a result, most cities do not have the data. Fully cognizance of the challenges of generating this data in a short span of time, it was agreed to collect this data through a dipstick survey on lines of NSSO questions. The data generated needs further scrutiny and triangulation with some inputs from experts. This may not be possible in the short window.	be excluded from scores. For final ranking, the cities will be scored on 78 indicators.
4	Many cities did not have data on noise pollution and it was decided that data will be collected using a mobile app for all the 111 cities. However, many cities have expressed reservations with the approach especially with respect to the reliability of using this data. Further, some cities have relied on the SPCB to collect the data as per the approach proposed by the consortia. Thus, noise pollution data is currently from two sources: 1. SPCB- 20 cities 2. Noise-based app- 91 cities	The data collected through the primary survey will be used for scoring the cities. Currently, there is no differential scoring for the data from the SPCB and the data collected through the mobile app. However, a certain higher weightage can be provided to those cities which used the state apparatus to collect noise pollution data.
5	For the indicator on quality of water supplied, the methodology document states that samples should be drawn both at the treatment plant outlet as well as the consumer end. However, the data provided by the cities were predominantly from the distribution point. Hence for consumer end results with MoHUA intervention, consortia coordinated with cities to collect the data at the consumer end. The cities facilitated the testing. The outcome of the process is as below: 1. Sample given- 102 cities 2. Report received- 86 cities 3. Report awaited- 16 cities 4. Tests not completed due to lack of cooperation and other reasons – 9	The maximum score for this indicator will be distributed equally (50%) for results based on samples from the treatment plant and consumer end. Cities that did not complete tests or provide the results will be given a score 0 for against consumer end tests.
6	City level population is not projected annually by most of the cities. So, estimates for 2017 population are not available with the cities.	As recommended by MoHUA, 2011 census population is being used for the ranking purpose.
7	The age category specific data for 9 cities is not available at a city level	The age category specific population data has been taken at a district level for these cities.
8	Indicators on non-motorised transports like- Dedicated bicycle tracks, bicycle parking facilities and mode share of non-motorised transport are not relevant for hilly terrains.	As discussed during the PMC meeting, these indicators have been treated as non-applicable for the hilly cities and the weights have been redistributed among other indicators within the same category.

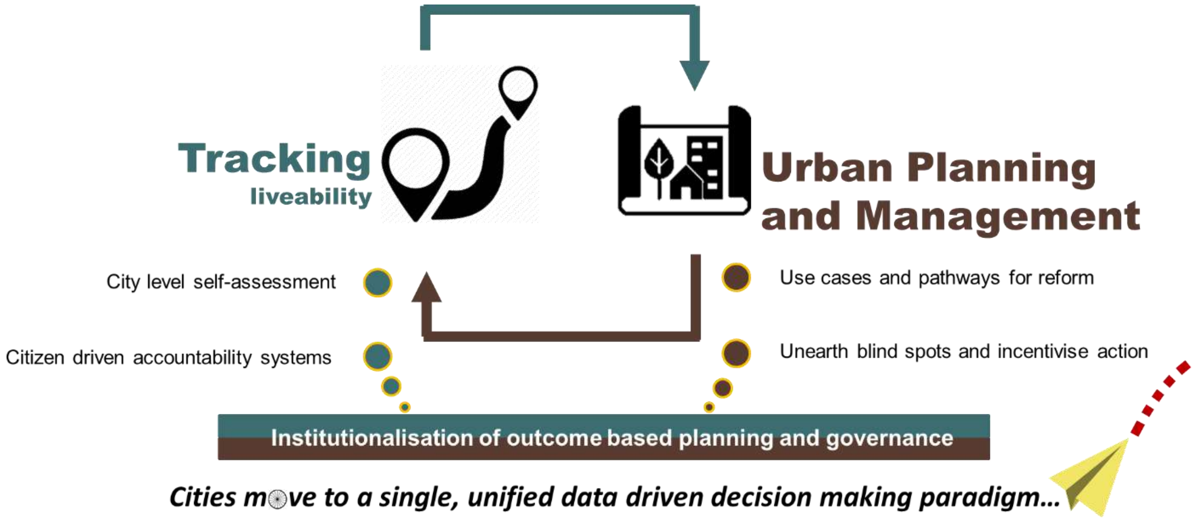
#	Challenges	Proposed Solutions
9	The indicator on increase in professional tax is not relevant to cities which do not levy the professional tax.	As discussed during the PMC meeting, this indicator has been non-applicable to the cities belonging to states where professional tax is not levied, and the weights have been redistributed among other indicators within the same category.
10	The indicator on increase in VAT collection is not applicable to Port Blair and Kavaratti, as there was no provision of VAT collection in these cities.	As discussed during the PMC meeting, these indicatosr has been treated as non-applicable for these two cities and the weights have been redistributed among other indicators within the same category.
11	Indicator on coverage of basic services to slum households does not concern cities with no slums (notified/ non-notified.	As discussed during the PMC meeting, this indicators has been treated as non-applicable for these cities and the weights have been redistributed among other indicators within the same category.

1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



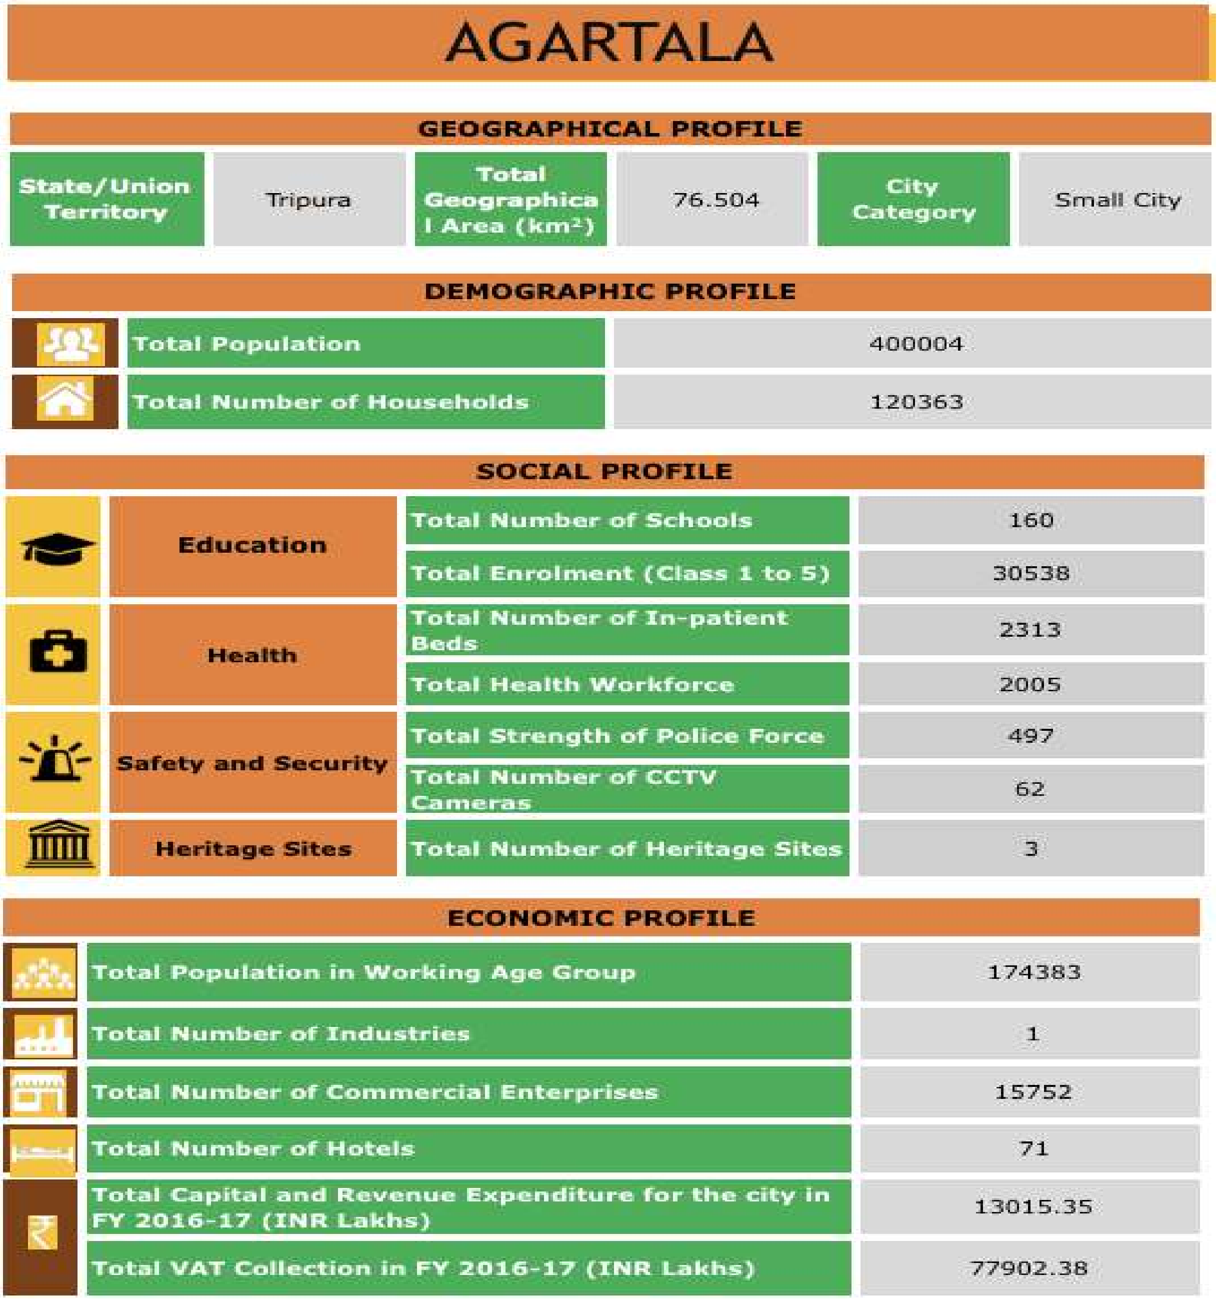
Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance

Cities move to a single, unified data driven decision making paradigm…

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



AGARTALA

GEOGRAPHICAL PROFILE

State/Union Territory	Tripura	Total Geographical Area (km²)	76.504	City Category	Small City

DEMOGRAPHIC PROFILE

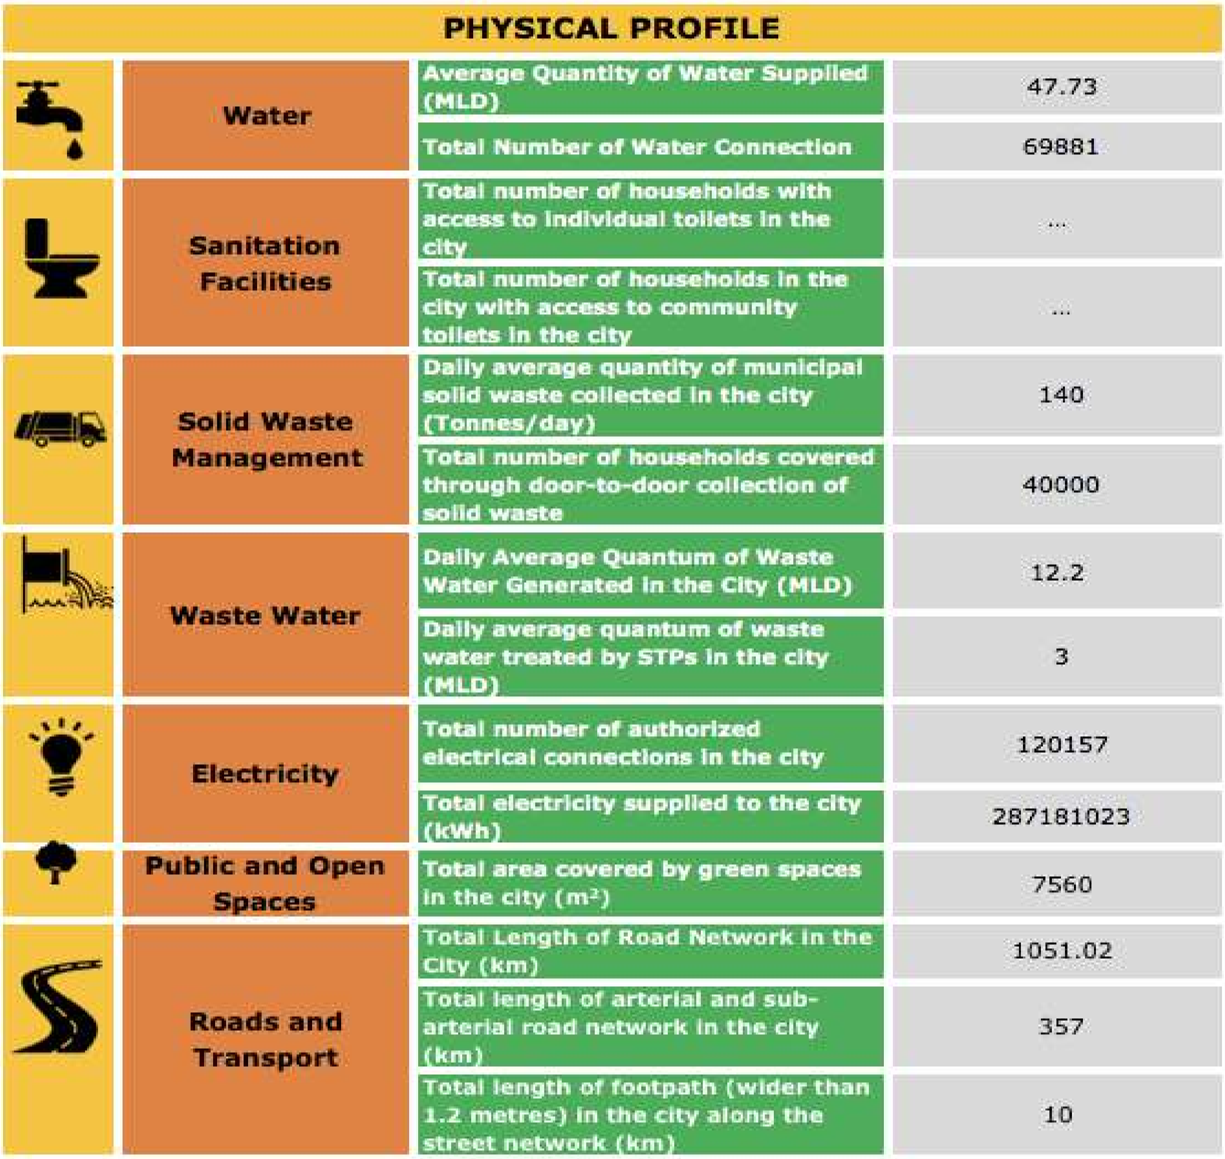
Total Population	400004
Total Number of Households	120363

SOCIAL PROFILE

Education	Total Number of Schools	160
	Total Enrolment (Class 1 to 5)	30538
Health	Total Number of In-patient Beds	2313
	Total Health Workforce	2005
Safety and Security	Total Strength of Police Force	497
	Total Number of CCTV Cameras	62
Heritage Sites	Total Number of Heritage Sites	3

ECONOMIC PROFILE

Total Population in Working Age Group	174383
Total Number of Industries	1
Total Number of Commercial Enterprises	15752
Total Number of Hotels	71
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	13015.35
Total VAT Collection in FY 2016-17 (INR Lakhs)	77902.38



PHYSICAL PROFILE

Water	Average Quantity of Water Supplied (MLD)	47.73
	Total Number of Water Connection	69881
Sanitation Facilities	Total number of households with access to individual toilets in the city	...
	Total number of households in the city with access to community toilets in the city	...
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	140
	Total number of households covered through door-to-door collection of solid waste	40000
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	12.2
	Daily average quantum of waste water treated by STPs in the city (MLD)	3
Electricity	Total number of authorized electrical connections in the city	120157
	Total electricity supplied to the city (kWh)	287181023
Public and Open Spaces	Total area covered by green spaces in the city (m^2)	7560
Roads and Transport	Total Length of Road Network in the City (km)	1051.02
	Total length of arterial and sub-arterial road network in the city (km)	357
	Total length of footpath (wider than 1.2 metres) in the city along the street network (km)	10

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1. Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy

Pillars of Comprehensive Development	Category	Indicators
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and**	6.1 Increase in VAT/GST collection

Pillars of Comprehensive Development	Category	Indicators
	Employment	6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms

Pillars of Comprehensive Development	Category	Indicators
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility

Pillars of Comprehensive Development	Category	Indicators
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2. Scoring and Computing Category Indices of Liveability

The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3. Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.

100 marks

(Maximum overall score that any city can achieve)

25 marks	25 marks	5 marks	45 marks
(Maximum score that any city can achieve under **Institutional** Pillar)	(Maximum score that any city can achieve under **Social** Pillar)	(Maximum score that any city can achieve under **Economic** Pillar)	(Maximum score that any city can achieve under **Physical** Pillar)
1 (Category under Institutional Pillar)	4 (Number of categories under Social Pillar)	1 (Category under Economic Pillar)	9 (Number of categories under Physical Pillar)
8 (Number of indicators under Institutional)	20 (Number of indicators under Social Pillar)	5 (Category under Economic Pillar)	46 (Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to "maximum within the comparison group" or "absolute benchmarks". For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4. Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicatorvalueforthecity - indicatorvaluefortheworstperformingcity}{benchmark - indicatorvaluefortheworstperformingcity}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1. Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2. Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and de-

velopment agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Agartala Municipal Corporation
Urban Local Body	For Park and Recreation Related Questions	Public Work Section, Agartala Municipal Corporation
Urban Local Body	For Water Supply and Drainage related questions	Public Work Section, Agartala Municipal Corporation
Urban Local Body	For Heritage sites related data	Agartala Municipal Corporation
Urban Local Body	For Ecological sites related data	Agartala Municipal Corporation
Urban Local Body	For Housing related data	Agartala Municipal Corporation
Urban Local Body	For Building plan related data	Building Plan Section, Agartala Municipal Corporation
Urban Local Body	For Roads related data	Public Work section, Agartala Municipal Corporation
Urban Local Body	For Solid waste management related data	Solid Waste Management Section, Agartala Municipal Corporation
Urban Local Body	For IT services related data	IT Section, Agartala Municipal Corporation
Urban Local Body	For Vendor committee related data	Agartala Municipal Corporation
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Tripura State Pollution Control Board

Designated data owners	Subcategories	Data owners at city level
Development Authority	Building Infrastructure	Building Plan Section, Agartala Municipal Corporation
	Construction planning	Building Plan Section, Agartala Municipal Corporation
	Green Building	Building Plan Section, Agartala Municipal Corporation
	Rain water harvesting	Building Plan Section, Agartala Municipal Corporation
	Universal Design Principle	Building Plan Section, Agartala Municipal Corporation
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Tripura State Electricity Corporation Limited
State Disaster management authority		District Disaster management Office
State Education Department		District Education Department
State Health Department	Health care professionals	Health Section, Agartala Municipal Corporation
	Citizen Services	Health and Family welfare department
	Disease Prevalence	Health and Family welfare department
	Health Infrastructure	Health and Family welfare department
State Renewable Energy Development Agency		Tripura Renewable Energy Development Agency
State Sales / Commercial Taxes Department		Sales and commercial Taxes department
Town and Country Planning Department	Land Use	Planning department, Tripura
Traffic and Police Department		State Police department
Transport Authorities	Buses	Tripura state road transport corporation
	Registered Vehicles	Tripura state road transport corporation
	Sub urban rail transport	NA

Designated data owners	Subcategories	Data owners at city level
	Mono Rail Authority	NA
	Tramways	NA
	Marine Transport Authority	NA

4.3. List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 3 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	0
State Education Department	0
DISCOM/Electricity Department	0
Traffic and Police Department	0
Development Authority	0
Pollution Control Board	3
State Renewable Energy Department	0
Town and Country Planning	0
State Health Department	0
Transport Authority	0
Disaster Management	0
Urban Local Body	0
Total	3

4.4. Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1| Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5. Physical Audit

The following map presents the indicators audited at city level.

5. City Score on 15 categories of Assessment

Liveability Assessment covered 15 categories and 78 indicators. The below table presents the scores for all 15 indicators namely governance, identity & culture, education, health, safety and security, economy & employment, housing & inclusiveness, public open spaces, mixed land use & compactness, power supply, transport & mobility, assured water supply, waste water management, solid waste management and reduced pollution.

Table 1: Category wise scores

Categories	Scores in Percentage
Governance	60.30%
Identity & Culture	35%
Education	89%
Health	97%
Safety & Security	67%
Economy & Employment	33%
Housing & Inclusiveness	50%
Public Open Spaces	1%
Mixed Land Use & Compactness	0%
Power Supply	53%
Transport & Mobility	41%
Assured Water Supply	44%
Waste Water Management	45%
Solid Waste Management	45%
Reduced Pollution	77%

The rank of the city is based on the performance and scores in each of the category. The final city rank is submitted separately.

Executive Summary

Assessment of liveability indices is an initiative by the Ministry of Housing and Urban Affairs to improve quality of life of citizens and achieve sustainable development goals by encouraging cities to adopt "outcome based" approach for urban planning. Assessment process aimed to provide opportunity to cities to review the development components holistically by involving 79 measurable indicators categorized under governance, health, education, safety, economy, power supply, transportation and mobility, identity, culture, housing, waste management and pollution.

This report highlights the assessment process, key milestones, and the final outcome of the data submitted. Implementation of liveability assessment commenced formally on 19th January 2018. A national level workshop was organized on 13th February 2018 to explain the importance and process of liveability assessment and get feedback on methodology from the city authorities.

This was followed by the next stage of Questionnaire development. The questionnaire was arranged under 12 categories representing 12 data owners namely urban local body, Central and state pollution control board, development authority, DISCOM/Electricity board, State disaster management authority, state education department, state health department, state renewable energy development agency, state sales and commercial taxes department, town and country planning department, traffic and police department and transport authorities.

An online data entry portal was developed to facilitate data submission by the cities. Each city had a unique log in to access the portal and submit the data. Both online and off-line options (download the questionnaire in an excel) to submit the data were available for cities. An email help desk was set up for the cities to raise any queries and seek clarification when responding to the questions.

A team for each state comprising of State Coordinator and City Coordinator (one per city) was deployed that facilitated the process and supported the cities. A total of 6 regional coordinators/ consultants, 29 State Coordinators, and 99 city coordinators were deployed across 116 cities. Training for state coordinators was held from 26th to 28th February 2018 at Chennai to make coordinators understand overall liveability assessment, indicators, data sources, protocols and roles and responsibilities.

City Reconnaissance Meetings were initiated by the state and city coordinators. The discussion began with discussions to finalize the state workshop schedule, mapping of data owners, and assist cities in data collection. The City Coordinators were based in the cities for over 6 weeks and during this time, they liase with ULB and other data owners to explain the liveability framework, online portal, and facilitate the online submission.
